The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

Bentazone: Sum of bentazone, its salts and 6-hydroxy bentazone (free and conjugated) and 8-hydroxy bentazone (free and conjugated), expressed as bentazone (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Bentazone - codes 1000000 to 1700000, except 1040000: Sum of bentazone, its salts and 6-hydroxy bentazone (free and conjugated), expressed as bentazone

- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the
 Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the

 Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the
 Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the
 Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
- The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0631000 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0631010 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0631020 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0631030 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0631040 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0631050 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0631990 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0632000 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0632010 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0632020 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0632030 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0632990 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0633000 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0633010 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0633020 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When 0633990 re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods and GAP parameters as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office 0639000 of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account 0840040 changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of 1011010 Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1011020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1011030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1011040 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1011050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1012010 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1012020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1012030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1012040 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1012050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1013010 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1013020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1013030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies. When re-viewing the MRL, 1013040 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1013050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1014010 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of

Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1014020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1014030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1014040 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1014050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies. When re-viewing the MRL, 1015010 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1015020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1015030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1015040 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1015050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1017010 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability, feeding studies and analytical methods for fat as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it 1017020 is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1017030 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1017040 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1017050 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1020000 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When re-1020010 viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability and feeding studies as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

Bromoxynil: Bromoxynil phenol and its salts, expressed as bromoxynil phenol (F)

(F) = Fat soluble

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

Chlorothalonil (R)

(R) = The residue definition differs for the following combinations pesticide-code number: Chlorothalonil - codes 1000000 to 1070000, except 1040000: 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701)

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0130010

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on storage stability as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0154040

The European Food Safety Authority identified some information on storage stability as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0163020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0163040

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213040

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213060

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213070

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0213110

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0220000

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0220010

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0220020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0220040

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0220990

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0231000

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0231010

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0231030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0231040

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0231990

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0232000

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0232020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0232030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0232990

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0233000

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0233020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0233030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0233990

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0241020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0242020

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0256030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0256040

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0260010

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0260030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0260040

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. 0300020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0300030

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0300990

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0401020

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0500010

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0500050

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0500090

The European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0700000

The European Food Safety Authority identified some information on anlytical methods and residue trials as unavailable. When reviewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0840040

The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

1011000

The European Food Safety Authority identified some information on pigs metabolism and in TRR in poultry commodities as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

- The European Food Safety Authority identified some information on pigs metabolism and in TRR in poultry commodities as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on plant metabolism with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0300030

The European Food Safety Authority identified some information on plant metabolism with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0400000

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0401000

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0401050

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0401060

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

0401070

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods and plant metabolism studies with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

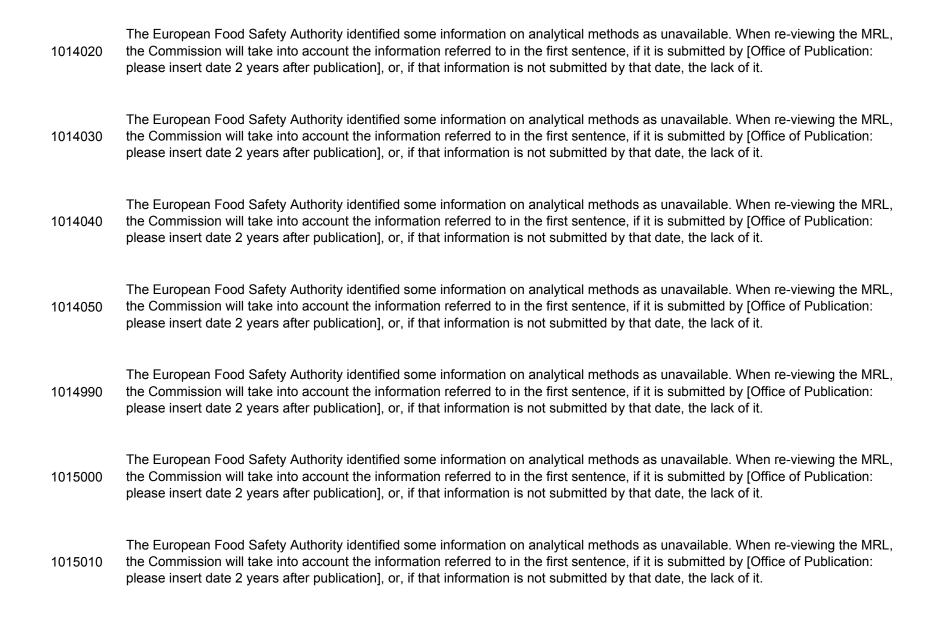

The European Food Safety Authority identified some information on plant metabolism with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first 0500030 sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on residue trials and plant metabolism with imazamox labelled at the imidazolinone ring as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to 0500060 in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for 0840040 horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1000000 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1010000 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1011000 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1011010 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication:

please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: 1011020 please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1011030 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1011040 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: 1011050 please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1011990 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1012000 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1012010 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: 1012020 please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1012030 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1012040 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: 1012050 please insert date 2 years after publication, or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1012990 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it. The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, 1013000 the Commission will take into account the information referred to in the first sentence, if it is submitted by [Office of Publication: please insert date 2 years after publication], or, if that information is not submitted by that date, the lack of it.
