

**Working Party on the
Accession of Cambodia**

**DRAFT REPORT OF THE WORKING PARTY
ON THE ACCESSION OF CAMBODIA**

Revision

Introduction

1. The Government of the Kingdom of Cambodia applied for accession to the World Trade Organization in December 1994. At its meeting on 21 December 1994, the Preparatory Committee for the WTO established a Working Party to examine the application of the Government of Cambodia to accede to the World Trade Organization under Article XII of the Marrakesh Agreement establishing the WTO. The terms of reference and the membership of the Working Party are reproduced in document WT/ACC/KHM/1/Rev.5.
2. The Working Party met on 22 May 2001; 14 February and 14 November 2002; and 16 April and [22 July] 2003 under the Chairmanship of Mr. A. Meloni (Italy).

Documentation provided

3. The Working Party had before it, to serve as a basis for its discussions, a Memorandum on the Foreign Trade Regime of Cambodia (document WT/ACC/KHM/2), the questions submitted by Members on the foreign trade regime of Cambodia, together with the replies thereto, and other information provided by the authorities of Cambodia (WT/ACC/KHM/3; WT/ACC/KHM/6; WT/ACC/KHM/7 and Revisions 1 and 2; WT/ACC/KHM/8; WT/ACC/KHM/9; WT/ACC/KHM/10 and Revisions 1 and 2; WT/ACC/KHM/12; WT/ACC/KHM/13 and Revision 1; WT/ACC/KHM/14 and Revision 1; WT/ACC/KHM/15 and Revision 1; WT/ACC/KHM/16 and Revision 1; WT/ACC/KHM/17 and Revision 1; WT/ACC/KHM/18; and WT/ACC/KHM/20), including the legislative texts and other documentation listed in Annex I.

Introductory statements

4. The representative of Cambodia said that Cambodia had embarked on a process of fundamental political and economic reforms since the adoption of a new Constitution in 1993, which had restored the constitutional monarchy in his country. However, Cambodia was still heavily marked by two decades of armed conflict, which had resulted in important losses of human resources, and political and economic instability. The lack of skilled manpower remained a major obstacle on Cambodia's way to economic development.

5. His Government had developed a "triangle strategy", aimed at restoring peace, ensuring sustainable development, and integrating Cambodia into the world community. Reforms had been implemented simultaneously in many areas, including administrative reform; legal and judicial reform of the financial, economic and trade regime; and military reform. Cambodia had joined the Association of South-East Asian Nations (ASEAN) in April 1999.

6. Accession to the WTO was one of the highest priorities of his Government. Closer integration into the world economy was seen as a powerful instrument to alleviate poverty and the main driving force for socio-economic development. In reforming its trade system, his Government had paid particular attention to aligning its policies and practices to WTO rules, especially the principles of MFN and national treatment. A tariff nomenclature based on the 1996 Harmonized System had been put in place, and numerous laws had been drafted and adopted to ensure compliance with WTO regulations.

7. Implementation of WTO requirements was, however, a lengthy and difficult process. In view of the difficulties his country was facing, and bearing in mind Cambodia's status as a least-developed economy, the representative of Cambodia called on members of the Working Party to be flexible in the negotiations to establish Cambodia's WTO commitments and to extend special and differential treatment as foreseen in the provisions of the WTO Agreements regarding LDCs.

8. Members of the WTO welcomed the application from Cambodia to join the Organisation. WTO membership was considered important for Cambodia's development and integration into the world trading system. Appreciating the efforts already undertaken by Cambodia to achieve compliance with WTO rules and principles, they noted that further work was needed in this regard. Members pledged to work constructively with Cambodia in accomplishing this task, and several Members would offer technical assistance to facilitate Cambodia's accession. Members looked forward to Cambodia's early accession on appropriate terms. Some Members referred to Cambodia's

status as a least-developed country, and would consider this a relevant factor in establishing Cambodia's terms of accession.

9. The Working Party reviewed the economic policies and foreign trade regime of Cambodia and the possible terms of a draft Protocol of Accession to the WTO. The views expressed by members of the Working Party on the various aspects of Cambodia's foreign trade regime, and on the terms and conditions of Cambodia's accession to the WTO are summarized below in paragraphs 10 to [223].

ECONOMIC POLICIES

Monetary and fiscal policy

10. The representative of Cambodia said that the cornerstone of Cambodia's monetary policy was low-inflationary economic growth. A restrained monetary policy had been maintained since 1993 to serve this end. As a result, annual inflation had fallen from three-digit levels in 1993 to single-digit figures at present.

11. The Cambodian banking system had undergone important changes since 1989, when the mono-type banking system had been replaced by a two-tier system comprising the central bank and commercial banks. The central bank – the National Bank of Cambodia (NBC) – was responsible for formulating and implementing Cambodia's monetary policy. The main instruments used to control liquidity were mandatory reserve requirements, and limits on bank financing of the budget. The introduction of treasury bills as a complementary policy instrument had also been considered, and two issues of treasury bills had taken place in 2003.

12. Fiscal policy had been at the core of Cambodia's reform strategy. Domestic financing of the budget had been eliminated since 1999, and focus had shifted towards broadening the tax base and improved tax collection. The tax system had been reformed in January 1997 with the adoption of the Law on Taxation. The Law had introduced a turnover tax on the first sale of imported products (previously exempt); extended excise duties to automobiles, international air travel, and international communication services; imposed taxes on interest income and dividends; strengthened the application of minimum tax levels; subjected profits on exploitation of oil and gas and natural resources to a tax of 30 per cent; introduced income tax for government employees, elected officials, and employees of NGOs; established a system of withholding tax; as well as replacing some turnover and consumption taxes by a value added tax. The ratio of tax revenue to GDP was still very low, and concentrated on few sources of revenue. In 2000, taxes had accounted for approximately 73

per cent of total government revenue, principally derived from customs duties (48 per cent), excises (12 per cent) and VAT (40 per cent).

13. Cambodia had established two taxation regimes, namely the "Real Regime" and the "Estimated Regime". The "Real Regime" affected large and medium sized taxpayers, i.e. legal entities and individual businesses with annual turnover exceeding 500 million Riels for goods (approximately US\$130,000) or 250 million Riels (US\$65,000) for services, or 125 million Riels (US\$32,000) in the case of government contracts. Large and medium sized taxpayers were subject to VAT, while other taxpayers were assessed a 2 per cent turnover tax under the "Estimated Regime". The representative of Cambodia added that a "Simplified Tax Regime", similar to the "Real Regime" but covering smaller taxpayers and based on self-assessment, might be introduced at a future date yet to be determined.

Foreign exchange and payments

14. The representative of Cambodia said that the objective of Cambodia's exchange rate policy was to maintain a market-based exchange rate. The value of the national currency - the Riel - had been freely determined by the market since 1993. The National Bank intervened occasionally in the currency market to bolster international reserves and to smooth excessive exchange rate fluctuations.

15. Cambodia's current foreign exchange system was based on the Law on Foreign Exchange of 1997. According to this Law, all foreign exchange transactions including purchases and sales of foreign currency, transfers, and all types of international settlements and capital flows were permitted without restriction provided these were effected through authorized intermediaries (which would include foreign bank branches). Foreign currency transactions equalling US\$10,000 or more were subject to a declaration. Cambodia did not require surrender of foreign exchange proceeds from imports or exports.

16. Cambodia had introduced current account convertibility of its currency as provided under Article VIII sections 2, 3 and 4 of the IMF Articles of Agreement, and had been granted membership under Article VIII on 1 January 2002.

Investment regime

17. The representative of Cambodia said that the Law on Investment of 4 August 1994, together with its Sub-Decrees of 29 December 1997 and 11 June 1999, regulated all investment, domestic or foreign, in Cambodia. The Law (Article 8) granted national treatment generally to foreign investors, except in the ownership of land. He added that Cambodia would normally not prohibit or restrict

foreign investment, except for reasons of national security and social safety, or when deemed necessary for economic reasons. Sectors subject to various forms of investment restrictions were listed in document WT/ACC/KHM/6, Annex 1. In some cases, such as investment in rice milling, foreign investment was subject to local equity participation, to be determined through negotiations between the investors. Foreign investment in livestock and forestry required a local partner. The criteria governing these restrictions were laid down in Sub-Decree No. 88 of 29 December 1997.

18. Cambodia's Constitution (Article 44) reserved the ownership of land for Cambodian citizens or legal persons with minimum 51 per cent Cambodian ownership. Foreign investors were allowed to lease or use land for up to 70 years in accordance with the 1994 Investment Law. A proposal to extend the time limit from 70 years to 99 years had been considered. The 2001 Land Law defined two types of land – concession land and leased land. Concession land could be leased for a period of maximum 99 years for agro-industrial projects. Leased land was defined as real estate, including buildings and land, available for short-term or long-term lease. The leasing period could either be indefinite, or of specified duration. Definite-period leases included short term leases with a renewal option, or long term leases for 15 years or longer.

19. Cambodia's legislation guaranteed compensation in case of expropriation. Article 44 of the Constitution stipulated that legal private property was protected by law, and the right to confiscate property could only be exercised in the public interest as provided for in the law and against fair and just advance compensation. Article 9 of the Law on Investment provided a general guarantee against nationalisation. To enhance investor confidence further, Cambodia had concluded bilateral investment treaties to provide legal protection to foreign and domestic investors. Cambodia had concluded bilateral investment guarantee agreements with 12 countries (China, Croatia, France, Germany, Indonesia, Malaysia, the Philippines, the Republic of Korea, Singapore, Switzerland, Thailand and Viet Nam), signed and ratified an agreement with the Overseas Private Investment Corporation (OPIC) of the United States, and ratified the Multilateral Investment Guarantee Agency (MIGA) of the World Bank.

20. Cambodia provided incentives to stimulate investment in accordance with Article 14 of the Law on Investment. These incentives were granted to Cambodian and foreign firms without discrimination upon application to the Council for the Development of Cambodia (CDC). The Council processed applications within 45 days. Incentives included (i) corporate tax at a rate of 9 per cent, except for exploitation of natural resources, timber, oil, mining, gold, and precious stones (30 per cent); (ii) tax holidays on corporate tax for up to eight years with five-year loss carry forward and exemption from all corporate tax for profits reinvested in Cambodia (the tax holidays were granted on

socio-economic and geographic criteria laid down in Annex III of Sub-Decree No. 88 of December 1997); (iii) no withholding tax on dividends; and (iv) unrestricted repatriation of profits. In addition, investment projects exporting 80 per cent or more of the production benefitted from full import duty exemption on construction materials, means of production, equipment, intermediate goods, raw materials and spare parts. The import duty exemption was also available for projects located in designated Special Promotion Zones (SPZ), the tourism industry, labour-intensive industries (e.g. garments, footwear and toys), agro-industry and food processing industries (i.e. canning), as well as physical infrastructure and energy generation (roads, bridges, airports, seaports, power generation, etc). Incentives could be revoked according to Article 7.2 of Sub-Decree No. 88, and his Government had been considering revising some of the incentives offered under the Law on Investment. Parliament had approved the "Law on the Amendment to the Law on Investment of the Kingdom of Cambodia" on 3 February 2003. The amended law revised some of the incentives, but also contained transitional provisions allowing the continuation of previously approved privileged profit tax rates for a further five years. The representative of Cambodia held the view that the prohibition on export subsidies defined in paragraph 1(a) of Article 3 of the Agreement on Subsidies and Countervailing Measures (ASCM) did not apply to Cambodia by virtue of Article 27.2 of the ASCM. For further discussion of this issue, see the section on "Export subsidies".

State ownership and privatization

21. The representative of Cambodia said that private initiative had been encouraged in agriculture since 1987, while nationalised industries had been granted progressive autonomy from the State planning system in subsequent years. Private ownership was now a constitutional right enshrined in the 1993 Constitution.

22. Privatization had been carried out during a first phase from 1991 to mid-1993, and a second phase starting in April 1995. During the first phase, priority had been given to attracting foreign investors and maintaining employment. Sectoral Ministries had been granted authority to sell and lease State-owned enterprises within their area of responsibility with no external approval needed.

23. The second phase of the privatization process had been launched with new regulations intended to tighten and centralise the control over privatization. Under the leadership of the Ministry of Economy and Finance, an inter-ministerial committee had been established to draw up an inventory of existing enterprises, formulate privatization strategies and monitor the privatisation process. The most important privatizations had taken place after 1995. He confirmed that foreign and domestic investors were treated equally in the privatization process, except with regard to the general restriction on foreign ownership of land.

24. As of April 2000, 177 enterprises had been privatized - mainly in manufacturing, agriculture and commerce – of which 152 had been leased to private investors, five were joint-ventures, and 20 had been sold off. Eleven enterprises had been transformed into public enterprises and 16 remained to be privatized. A detailed status report is provided in Table 1(a), and enterprises in State ownership as per March 2003 are enumerated in Table 1(b). He added that 13 enterprises, which performed key public services to the Cambodian economy would be retained as State-owned enterprises upon completion of the privatization programme. Seven rubber companies would remain in State ownership until 2006. A list of the companies to be retained, including railway, water, electricity, and public works and transport enterprises, as well as agricultural companies, is provided in Table 1(c).

25. The representative of Cambodia stated that his government would ensure the transparency of its ongoing privatization programme and would keep WTO Members informed of progress in the reform of its economic and trade regimes. He stated that his Government would provide periodic reports to WTO Members on developments in its programme of privatization as long as the privatization programme would be in existence, along the lines of that already provided to the Working Party. He also stated that his Government would provide periodic reports on other issues related to its economic reform as relevant to its obligations under the WTO. The Working Party took note of these commitments.

Pricing policies

26. The representative of Cambodia said that price controls had been lifted in 1989. Prices for goods and services were determined freely by the market, except for electricity and water. Electricity prices were regulated by the Ministry of Industry, Mines and Energy pursuant to Sub-Decree 35 of 26 April 1999, while the regulation of water user charges rested with municipal and provincial bodies. As for the future use of price controls, this was a matter still to be addressed by his Government.

27. The representative of Cambodia confirmed that, from the date of accession, in the application of price controls, Cambodia would apply such measures in a WTO-consistent fashion, and take account of the interests of exporting WTO Members as provided for in Article III.9 of the GATT 1994, and in Article VIII of the General Agreement on Trade in Services (GATS). He also confirmed that Cambodia published the list of goods and services subject to State control and any changes in its Official Gazette and would continue to do so after accession. The Working Party took note of these commitments.

Competition policy

28. The representative of Cambodia said that Cambodia did not have a competition law, but Cambodia was seeking assistance to draft legislation to ensure fair competition in various business activities. Asked to provide information on how Cambodia was addressing the provisions of Article VIII of the GATS concerning monopolies and exclusive service suppliers, he said that in general his Government was pursuing a policy of gradual liberalization of previously monopolized services to involve private participation, including foreign competition.

FRAMEWORK FOR MAKING AND ENFORCING POLICIES

29. The representative of Cambodia said that Cambodia was a constitutional monarchy. The Constitution had been promulgated in September 1993. The Monarch was Head of State and held his function for life. The Monarch appointed the Prime Minister and Council of Ministers, as well as the Commander-in-chief of the Royal Cambodian Armed Forces. He signed decrees on the appointment, transfer or dismissal of high civil or military officials and judges, declared war, and could proclaim a state of emergency. Moreover, he signed and thereby ratified international treaties and conventions approved by the National Assembly.

30. Legislative powers were exercised by the National Assembly, composed of 122 members elected for 5 years in direct and general elections, and the Senate, made up of 61 members. The National Assembly was the only organ empowered to adopt laws. Other functions of the Assembly included approval of the national budget, the Government's programmes and strategies, and proposals by the Government to introduce, reduce or annul taxes. Legislation usually originated in the relevant line ministries. Draft Legislation approved by the Council of Ministers was presented to the Assembly for review and enactment. The Senate reviewed the laws passed by the National Assembly and could make binding recommendations to the Assembly on the proposed legislation. Legislation was promulgated by signature of the Monarch and became effective in the capital ten days after signature and throughout the country within 20 days. Laws violating constitutional principles could be annulled by the Constitutional Council, composed of nine members designated for nine-year terms by the Monarch, the National Assembly and the Supreme Council of Magistracy. The President of the National Assembly was a member of the Council of the Throne, which decided on the succession of the throne. The President of the Senate acted as Head of State in the absence of the Monarch (or if unable to fulfill his functions).

31. Judicial power was exercised by independent courts, judging on the basis of the Constitution, existing laws and international agreements ratified by the Kingdom. Cambodia's judicial system

comprised lower courts, including provincial, municipal and military courts, an Appellate Court and a Supreme Court. However, the Supreme Court foreseen in the September 1993 Constitution had not been established so far. Pending its establishment, decisions of the Appellate Court could be appealed to the Supreme Court established by the former State of Cambodia. According to the 1993 Constitution, the Supreme Court would be responsible for judicial review of the law and appeals of decisions rendered by the Appellate Court.

32. Cambodia's present judicial system did not provide for specialised courts, such as administrative or commercial courts. At present, administrative decisions could be appealed to the higher authority in the Ministries concerned, i.e. to the Minister. These rulings could, in turn, be appealed either to the courts or to the Prime Minister. Cambodia recognized the need to establish an appeals process, both administratively and to an independent tribunal to meet the requirements of Article X of the GATT 1994 and other such provisions in WTO Agreements, e.g. customs valuation and other procedures, trade remedies, and import licensing and quotas. In this regard, Chapter III of the draft Law on Judicial Organization envisaged the right to appeal of administrative decisions before the Administrative Chamber of the Appellate Court. Decisions of the Administrative Chamber could then be appealed before the Supreme Court. As per June 2003, the draft Law on Judicial Organization was being examined by the Council of Ministers and would subsequently be submitted to Parliament.

33. As for commercial disputes, the Ministry of Justice together with the Ministry of Commerce were preparing a draft law establishing a Commercial Court. In the interim, commercial cases were brought before provincial and municipal courts. Voluntary settlement of commercial disputes came within the competence of the Chamber of Commerce, empowered to act as an arbiter under Article 9 of the 1995 Chamber of Commerce Law. Cambodia had ratified the New York Convention on the Enforcement of Foreign Arbitral Awards on 5 January 1960. The Ministry of Commerce was preparing a Law on Commercial Arbitration to implement the New York Convention.

34. A Member noted that commercial cases were being heard in common courts, pending the establishment of a Commercial Court system. The present system did not, in his view, offer businesses adequate legal protection. This Member considered the establishment of a Commercial Court system with trained judges and staff essential to create a climate of transparency and predictability, and the system or a functional equivalent should therefore be in place by the date of accession. This Member also noted that Cambodia had ratified the New York Convention on the Enforcement of Foreign Arbitral Judgments, and asked what legislative action the Ministry of Commerce was taking to implement the Convention.

35. The representative of Cambodia confirmed that the National Assembly and the Senate had adopted a law ratifying the New York Convention on the Enforcement of Foreign Arbitral Awards in 2002. He further confirmed that, as indicated in document WT/ACC/KHM/10/Rev.2, the Ministry of Commerce was developing a draft "Law Establishing the Commercial Court" to implement the Convention. The draft law had been approved by the Council of Ministers in March 2003 and was currently being considered by Parliament. He expected the process of adopting and promulgating the law to be completed by June 2004. He noted that Cambodia was receiving some technical assistance in this area, and that his country was seeking more extensive and predictable assistance. He further confirmed that a Commercial Court system with trained judges and staff essential to create a climate of transparency and predictability, or a functional equivalent, should therefore be in place by the end of 2004.

36. The representative of Cambodia confirmed that a system of appeal from administrative decisions to an independent tribunal, as provided for in Article X of the GATT and other WTO Agreements, was in the process of being established in the draft Law on Judicial Organization, and would be operational [in December 2004][prior to the date of Cambodia's accession to the WTO]. [In addition, the Commercial Court system, to be established by 1 January 2005, would receive appeals from administrative decisions in matters covered by WTO Agreements.] The Working Party took note of this commitment.

37. The representative of Cambodia said that the Council of Ministers, or Royal Government, was the executive branch of the Kingdom of Cambodia. The Council was accountable to the National Assembly and chaired by the Prime Minister. The Prime Minister was in charge of executing the decisions taken by the Council. He presented decrees to the Monarch for signature, and could issue sub-decrees on his own authority, upon approval of the Council of Ministers. Individual ministers issued ministerial decrees, decisions and circulars. Once signed, all regulatory acts were published in the Official Journal.

38. Policies related to foreign trade were formulated and implemented by the Ministry of Economy and Finance, in close co-operation with the Ministry of Commerce, the Council for the Development of Cambodia, the National Bank of Cambodia, the Ministry of Planning, and the Ministry of Industry, Mines and Energy. Border control of international trade fell under the competence of the Customs Department, which was in charge of tax collection and the preparation of tariff schedules. The Ministry of Commerce registered foreign business activities. The Ministry of Commerce also participated in border control, fraud repression, in the formulation and implementation of technical standards, and in the development of policies concerning intellectual

property rights. The Council for the Development of Cambodia implemented investment regulations, while issues related to industrial and technological development, exploitation of natural resources and the production and supply of electricity and potable water fell under the competency of the Ministry of Industry, Mines and Energy. He confirmed that provincial and municipal authorities had no jurisdiction over policies affecting foreign trade, such as in the areas of subsidies, investment, application of taxes, charges on imports not applied to domestic goods, or quantitative restrictions on imports or exports. Cambodia confirmed that local authorities will have no such authority in export processing zones within their jurisdiction.

39. The Ministry of Commerce acted as the focal point for activities related to WTO accession. The WTO Office of the Ministry had 10 professional staff. In addition, an Inter-Ministerial Coordinating Committee on WTO Accession, chaired by the Minister of Commerce, had been established in September 1997. The role of this Committee, which counted 15 members at the policy level and three officials from each of the 23 ministries and agencies involved in WTO activities at the working level, was to (i) coordinate policy issues related to WTO accession; (ii) elaborate guidelines to implement WTO Agreements; (iii) prepare the necessary documentation; (iv) define the Government's priorities related to foreign trade policies; (v) ensure coordination among Ministries; and (vi) report to the Prime Minister on issues related to WTO accession. In August 2001, his Government had appointed a working group comprising more than 110 senior government officials to assist in matters related to Cambodia's accession to the WTO.

40. International treaties, conventions and intergovernmental agreements concerning economic, technical, cultural and defense co-operation were negotiated by the Prime Minister and, after approval by the National Assembly, ratified and promulgated by the Monarch. Specifically concerning the ratification process of Cambodia's Protocol of Accession, a package including the Protocol and all WTO Agreements and legal documents would be submitted by the Royal Government to the National Assembly and the Senate for adoption. The package would then be presented to the Monarch for promulgation, after which it would be published in the Official Journal. He confirmed that WTO provisions would prevail over national legislation, with the exception of Cambodia's Constitution, in case of conflict between domestic legislation and the WTO Agreements.

41. He added that compliance with WTO Agreements required the preparation of many important pieces of legislation in Cambodia. He provided an Agenda for Enacting Laws for WTO Conformity in document WT/ACC/KHM/10, which was subsequently revised and up-dated on a regular basis (see Revision 1 of 31 July 2002, Revision 2 of 3 March 2003, and Revision 3 of 17 June 2003). In this respect, a Member was concerned about the long period foreseen for the adoption of the Civil

Procedure Code, which underpinned the effective enforcement of other laws. The representative of Cambodia replied that the draft Civil Procedure Code would be submitted to the Council of Ministers in the near future. The most recent version of Cambodia's Agenda for Enacting Laws for WTO Conformity and Adopting Regulations/Instructions is reproduced in the Attachment to Annex I.

POLICIES AFFECTING TRADE IN GOODS

Trading rights (the right to import and export)

42. The representative of Cambodia said that the Law on Commercial Regulations and the Commercial Register of 3 May 1995, as amended on 18 November 1999, required all commercial enterprises operating in Cambodia to register with the Ministry of Commerce. Copies of the "Instruction Circular on Commercial Registration at the Ministry of Commerce" and the "Announcement on Commercial Registration", both dated 3 December 1997, were reproduced in document WT/ACC/KHM/2, Annex 7B.

43. Commercial enterprises could register in the form of sole proprietorships, general partnership, limited partnership, private limited company, single member private limited company, public limited company, public institution, State enterprise, or joint venture. Natural persons per se could not engage in import activities as the Law on Commercial Regulations and the Commercial Register allowed registration of legal entities only. However, an individual could register, for example, as a single shareholder limited liability company.

44. A prohibition on companies with less than 51 per cent Cambodian ownership to engage in import/export activities for the sole purpose of re-selling goods without transformation had been abolished pursuant to a Declaration of the Ministry of Commerce of 25 January 2000. He confirmed that all firms, foreign and domestic, properly registered with the Ministry of Commerce, could engage in import and export activities of all types of goods except military equipment and narcotic drugs. Trade in forestry products could only be conducted by licensed concessionaires (domestic or foreign) according to Article 4, Chapter 2 of Sub-Decree No. 05 of 7 February 2000. A firm could amend its registration to include import and export activities by filing an application to amend its Memorandum and Articles of Association to the Ministry of Commerce. The amended registration would be deposited at the Office of Commercial Registry at the Ministry.

45. Registration required a company official to appear in person and deposit the required documentation - including a completed Registration Application Form, the Memorandum and Articles of Association, a Statement of Conformity, a certificate of the estate title or lease agreement, and

copies of the identification papers as well as photographs the company directors and shareholders - with the Ministry of Commerce. Applications which were not supported by the required documentation would be rejected. The procedure to enrol in the Commercial Register took about two weeks. The registration fee amounted to 260,000 Riels (approximately US\$70) for national and foreign companies. In addition, companies investing in Cambodia and applying for project approval for purposes of securing investment incentives were required to pay registration fees to the Council for the Development of Cambodia (CDC) in accordance with the Law on Investment of 4 August 1994. These fees amounted to US\$600 for investment projects up to US\$1 million and US\$1,200 for investment projects above US\$1 million.

46. Some members were concerned that the requirement to provide photographs of the directors and shareholders of a limited liability company would be unnecessarily burdensome for large companies with many stockholders, e.g. foreign firms wishing to establish operations in Cambodia. In reply, the representative of Cambodia said that the same requirements applied to domestic and foreign firms engaged in trade. According to Cambodian legislation, a private limited company could not have more than 30 individual shareholders. A public limited company needed only to submit photographs of the members of its board of directors. The photo requirement was applied for security reasons, principally to avoid fraud. He did not believe the requirement created obstacles for companies registering in Cambodia.

47. Noting that importation of pharmaceuticals was limited to pharmacists and the importation of agricultural inputs to agricultural technicians (see the section "Quantitative import restrictions, including prohibitions, quotas and licensing systems" below), a Member asked whether Cambodia distinguished between the right of importation and the right to distribute such products domestically. This Member sought recognition of the right to import, i.e. to be the importer of record, as a separate status from that of distribution, and would therefore welcome steps by Cambodia to simplify requirements to import, on the understanding that stricter requirements might be maintained for distributors within Cambodia's market.

48. The representative of Cambodia clarified that among the imported agricultural inputs only veterinary medicine was reserved for agricultural technicians. He added that, in practice, importers of agricultural inputs and pharmaceuticals also distributed the goods within Cambodia, and it would be difficult to separate the importation and distribution functions in a country such as Cambodia.

49. Based on this information, a Member concluded that Cambodia had placed restrictions on imported pharmaceuticals and veterinary medicines which would not apply to domestic production of similar products. Cambodia was therefore requested to amend its laws to distinguish explicitly

between the right to be the importer of record, and the right to distribute. The registration and technical requirements currently placed on importers should be transferred to distributors, and Cambodia should ensure that these requirements would be applied in a manner that would result in treatment no less favourable to imports than to similar domestic products.

50. The representative of Cambodia confirmed that it was not the intent of his Government that the current requirements for importation of pharmaceuticals or of veterinary medicines should discriminate against imports. In this regard, he further confirmed that no later than 1 June 2005, Cambodia would amend its legislation, e.g., the Law on Drug Management and Prakas No. 82 of 31 March 1999 on "Procedures for Exports and Imports of Pharmaceuticals", so as not to abridge the right to import and to export, and that any registered entity could be the importer or exporter of record. He confirmed that from that date, Cambodia would ensure that its laws and regulations relating to the right to trade in goods and all fees, charges or taxes levied on such rights would be in full conformity with its WTO obligations, including Articles VIII:I(a), XI:I and III:2 and 4 of the GATT 1994 and that it would also implement such laws and regulations in full conformity with these obligations. He confirmed in particular that this was recognized as without prejudice to requirements that might be placed on distributors of domestic and imported products to preserve plant, animal or human health, life, or safety. The Working Party took note of these commitments.

1. Import Regulation

Customs tariff

51. The representative of Cambodia said that the Customs and Excise Department had embarked on a Customs Reform and Modernization Programme aimed at creating a modern customs administration combining efficient revenue collection and protection at the border with the needs of the private sector for fast, straightforward and reliable customs services. Major elements of the reform programme included strengthening of the legal framework, restructuring of the customs tariff, modernization and streamlining of customs procedures, expansion of international relations, effective enforcement, automated systems and procedures, measures to strengthen the Customs and Excise Department, better service to the public and trade facilitation. A summary of the reform strategy was provided in document WT/ACC/KHM/6, Annex IV.

52. The Law on Import and Export Duties of 15 September 1989, as subsequently modified by decisions of the Ministry of Economy and Finance, constituted the legal basis for the imposition of tariffs. Cambodia's customs tariff was specified at 8 digits. The tariff nomenclature comprising 6,823 tariff lines in 2001 conformed to the 1996 version of the Harmonized System (HS) at the six-digit

level. All rates were *ad valorem*. At present, only MFN rates of duty existed, except for CEPT products originating within ASEAN. As member of ASEAN, Cambodia was committed to extend tariff preferences as stipulated in the ASEAN Agreement on a reciprocal basis.

53. In reforming its tariff structure, Cambodia had reduced the number of tariff bands from 12 to 4 at present (0, 7, 15, and 35 per cent). The highest tariff rates of 40, 50, 90 and 120 per cent had been abolished. Items subject to the maximum applied rate of 35 per cent were listed in document WT/ACC/KHM/6, Annex III. The simple average applied rate of duty had amounted to 16.4 per cent in 2001, and the objective was to achieve an average tariff level below 15 per cent by 2003/04. While Cambodia was reducing its import duties, excise taxes were being increased to ensure that the tax reform would be revenue neutral.

Other duties and charges

54. The representative of Cambodia confirmed that other than ordinary customs duties, Cambodia imposed no duties or charges of any kind within the meaning of Article II:1(b) of the GATT 1994 on or in connection with importation, except for petrol and diesel. On these two items, his Government was imposing a charge of US\$0.02 and US\$0.04 per litre, respectively. He confirmed that [these other duties and charges were being transformed and incorporated into a compound tariff rate.][the charges of US\$0.02 on petrol and US\$0.04 on diesel will be incorporated within the bound tariff from the date of accession.] The representative of Cambodia further confirmed that Cambodia would bind these charges and all other charges within the meaning of Article II:1(b) of the GATT 1994 at zero, in its Schedule of Concessions and Commitments on Goods.

55. The representative of Cambodia stated that the application of "other duties and charges" other than the normal customs duties and fees and charges for services rendered would be in accordance with WTO provisions from the date of accession. He further confirmed that Cambodia has bound "other duties and charges" as defined in Article II:1(b) of the GATT 1994 at zero in its Goods Schedule. The Working Party took note of this commitment.

Tariff rate quotas, tariff exemptions

56. The representative of Cambodia said that the Law on Import and Export Duties of 1989, Article 9.1, allowed importation free of customs duty for (i) temporary imports for re-export; (ii) goods in transit; (iii) personal items of Cambodians having resided abroad; (iv) imports by diplomatic missions, for humanitarian or religious purposes, etc.; and (v) border trade within limits determined by the Ministry of Finance. Although the draft Law on Customs did not define or make

reference to the concept of border trade, he confirmed that Cambodia's practice was within the meaning of Article XXIV:3(a) of the GATT 1994. Tariff exemptions were also accorded on goods imported in connection with investment projects approved by the Council for the Development of Cambodia in accordance with the 1994 Law on Investment. In addition, the Prime Minister had the authority to order ad hoc exemptions for compelling reasons of national interest, primarily emergency situations (Article 5 of the draft Law on Customs). Thus, 120 cars had been imported free of duty for the members of the National Assembly in 1994, but no such exemptions were currently in force. All tariff exemptions were applied on an MFN basis.

57. Noting a statement by the representative of Cambodia that Cambodia did not apply tariff quotas at present, but might consider the introduction of tariff rate quotas on certain agricultural imports in the future, some Members emphasized that such measures would complicate Cambodia's market access negotiations, and would involve complex procedures in establishing proper access conditions, as well as non-discriminatory and transparent allocation and administration of the tariff quota system.

58. The representative of Cambodia took note of these comments. Although Cambodia had not resorted to tariff rate quotas so far, Cambodia would reserve its right to implement such quotas depending on the outcome of the accession negotiations. Cambodia confirmed that it would respect WTO disciplines on tariff rate quotas.

59. The representative of Cambodia stated that upon accession to the WTO, any tariff exemptions would only be implemented in conformity with the relevant WTO provisions including Article I of the GATT 1994 and the TRIMs Agreement. The Working Party took note of this commitment.

Fees and charges for services rendered

60. The representative of Cambodia said that Cambodia applied a fee of 15,000 Riels (nearly US\$4) per import/export declaration. The fee was levied on imports from all sources, including Cambodia's preferential trading partners. The charge corresponded to the cost of printing the customs declaration form and the time spent by customs officers in processing the declaration. Some 100 customs officials processed approximately 6,000 customs declarations every month.

61. Some Members requested that Cambodia review the fee for the provision and processing of import/export declarations, referring to the public service nature of this function. In reply, the representative of Cambodia considered Cambodia's user or processing fees commensurate to the costs of the services rendered, and thus not in conflict with WTO provisions.

62. The representative of Cambodia stated that all fees and charges for services related to imports and exports would be operated in conformity with the provisions of the WTO Agreement, in particular Articles VIII and X of the GATT 1994. The representative of Cambodia also stated that, from the date of accession, Cambodia would not apply, introduce or reintroduce any fees and charges for services rendered that were applied to imports on an ad valorem basis. Information regarding the application and level of such fees and charges, revenues collected and their use, would be provided to WTO Members on request. The Working Party took note of these commitments.

Application of internal taxes

63. The representative of Cambodia said that Cambodia levied excise taxes in accordance with the Law on Taxation of 1997. Tax rates, which were identical for imported and domestically produced goods, were applied on the ex-factory price for domestic goods and the tariff inclusive CIF value of imports. The excise tax amounted to 10 per cent for soft drinks, beer, wine and spirits, cigarettes and other tobacco products, and petrol and lubricating oil. For automobiles, buses, trucks, motorcycles and spare parts the tax ranged from 5 to 110 per cent, as indicated in Table 2. He added that Cambodia did not have a domestic automobile manufacturing industry at present.

64. Some Members noted that Cambodia had introduced a tax of 3 per cent, applied solely to imported alcohol and tobacco products, in late 1998. Cambodia was requested to bring this tax into conformity with Article III of the GATT 1994. The representative of Cambodia replied that the 3 per cent tax in effect on imported alcohol and tobacco products since September 1999 had been extended to domestically-produced items on 1 January 2002.

65. The representative of Cambodia said that value added tax had replaced the former turnover and consumption taxes on 1 January 1999 in accordance with the Law on Taxation of 8 January 1997. VAT was levied at a single rate of 10 per cent on goods and services. Exports, including international transportation of passengers and goods, were zero rated. On imported goods, VAT was applied uniformly on imports from all sources on the CIF value including customs duties and excise taxes (if applicable).

66. Some Members noted that the value added tax system was being introduced gradually in Cambodia, and asked what steps Cambodia was taking to bring the system into conformity with the national treatment provisions of the WTO. Cambodia was urged to eliminate any discrimination in the application of the value added tax to domestically-produced and imported products.

67. In reply, the representative of Cambodia provided a descriptive note on the operation of VAT in document WT/ACC/KHM/18. At first, the VAT system had been applied only to 1,000 large and medium taxpayers – based on annual turnover - in the capital Phnom Penh. The system had subsequently been extended to additional entities in Phnom Penh as well as taxpayers in five other provinces. A further five provinces had been added in 2002, and the number of taxpayers was increasing rapidly, currently comprising some 2,900 entities. The Ministry of Economy and Finance had conducted a survey of taxpayers in all provinces in 2000 and 2001, and the most recent expansion in coverage included all provinces with taxpayers meeting the VAT threshold (see paragraph 13 for information on the thresholds).

68. Small taxpayers were not required to pay VAT. Instead, they were assessed a tax of 2 per cent on their annual turnover. The rationale for this dual system was that the administration and compliance costs of a full-fledged VAT regime would outweigh the expected revenue to be collected from small taxpayers. Entities not required to pay VAT could register voluntarily if they considered it to be in their interest to do so.

69. Certain goods and services were exempt from VAT, notably public postal services; hospital, clinic, medical, and dental services, and the sale of medical and dental goods; transportation of passengers by wholly State-owned public transport entities; insurance and primary financial services; public-interest non-profit activities; imported articles for personal use exempt from customs duties; goods imported by foreign diplomatic and consular missions, international organizations and technical cooperation agencies of other governments, for official use; and 10 categories of agricultural inputs and/or "raw agricultural products" such as fertilizer, plant seeds, veterinary medicines, animal feeds, breeding stock, small tractors and spare parts, and miscellaneous agricultural machinery (Prakas No. 303 MEF/TD of 23 May 2001). Imported agricultural inputs exempted from VAT are listed in Table 3. The Council of Ministers had reaffirmed that VAT on imported and domestically-produced agricultural products should be identical at a full Cabinet meeting on 20 December 2002. Since July 2001, the estimated revenue foregone due to the VAT exemptions had amounted to 2 billion Riels in the second half of 2001 and 1.5 billion Riels in the first five months of 2002.

70. A Member noted that Cambodia's present VAT system appeared to provide a de facto exemption for certain domestic goods, especially agricultural goods, and thus in practice would seem to be at odds with the December 2002 Council of Ministers Decision on the equivalence of domestic and imported goods for the purposes of VAT.

71. The representative of Cambodia confirmed that from 1 January 2003, his Government had applied the VAT on imported and domestically produced agricultural products equally and in

conformity with Article III of the GATT 1994 and that the exemption provided to certain farmers from the application of the VAT to their output was due to the fact that they did not meet the minimum income threshold for mandatory application of the VAT, and had the option of the turnover tax on total sales. The representative of Cambodia further confirmed that, from the date of accession, Cambodia would apply its domestic taxes, including those on products listed in Tables 2 and 3 and paragraphs 63 to 70 in strict compliance with Article III of the GATT 1994 and in a non-discriminatory manner to imports regardless of country of origin. The Working Party took note of this commitment.

Quantitative import restrictions, including prohibitions, quotas and licensing systems

72. The representative of Cambodia said that importation of narcotic drugs and poisons, including many pesticides, was prohibited. A list of products banned from importation into Cambodia is reproduced in Table 4.

73. Initial information on import licensing procedures was provided in document WT/ACC/KHM/2, Annexes 3 and 8, and revised information in documents WT/ACC/KHM/17, WT/ACC/KHM/17/Rev.1 and WT/ACC/KHM/17/Rev.2. He noted that Cambodia applied no quantitative restrictions on imports. However, a limited licensing system had been established for the protection of human health, consumer interests, national security, and to protect the environment. Products subject to import licensing are enumerated in Table 5. He stressed that the system was not designed to restrict the quantity or value of imports, except for pesticides. He confirmed that products not identified in document WT/ACC/KHM/17 and its Revision 1 were free from licensing requirements.

74. Non-automatic licences were applied to imports of aircraft and parts, ships and boats for military purposes. The Government was the only legal importer of arms, military equipment and related goods in Cambodia. Upon approval by the Government, the Ministry of Defence and the Ministry of Interior would be authorized to import such products. The Ministry of Defence administered imports of explosives, ammunition, military hardware, and other related products for military purposes in accordance with Governmental Sub-Decree No. 38 of 30 April 1999 on Management and Control of the Imports, Production, Distribution and Sale of all kind of Explosives and Ammunition. Importation of the same products for security purposes was administered by the Ministry of Interior. These were the only two Ministries authorized to import military equipment and related goods. In practice, the Ministries would not handle all logistical aspects of the procurement, but would subcontract a firm or manufacturer to assist in the purchase and shipment of the goods.

75. The Ministry of Agriculture, Forestry and Fisheries (MAFF) issued licences (authorization letters) for importation of agricultural inputs, principally pesticides and fertilizer, in accordance with the Sub-Decree on Standards for and Management of Agricultural Materials of 28 October 1998. Firms wishing to import should be registered with the Ministry of Commerce and the products should be registered and authorized by the Ministry of Agriculture, Forestry and Fisheries (MAFF). At present, 15 companies were authorized to import agricultural inputs. Registration was also required for the products to be imported. The quantity of pesticides imported by individual companies could be restricted due to safety requirements, including appropriate storage facilities, as well as domestic demand. The Department of Agronomy and Agricultural Land Improvement at the MAFF would estimate the need for pesticides on an annual basis, taking into account factors such as the size of the cultivated areas, type of crop planted, and seasonal infection ratios. In the future, Cambodia was considering either to allow registered goods into warehouses and release for sale or use after inspection, or to allow for accreditation of pesticides through bilateral agreements with the countries of origin. Cambodia was not in a position to undertake risk assessment at present, and would welcome assistance in developing such capacity. Fertilizer imports were licenced to minimize the environmental impact of soil degradation, acidity or salinity.

76. Asked to provide further detail on the import regime applicable to pesticides, in particular regarding restrictions based on domestic demand, the representative of Cambodia added that local conditions often led to rapid degradation of pesticide products, and thus expensive and potentially environmental harmful disposal of such products. Data on areas under cultivation and pest infestation levels allowed his authorities to estimate the needs for pesticides in any given crop year. Import licences were granted on a first come, first served basis up to the estimated requirements. The authorities could decide to authorize additional imports, and all registered importers would be informed of such decisions. Fully-stocked individual importers could be denied licences as a temporary measure until they would have the necessary capacity to store additional products. Cambodia had no plans to allow petitions for import tolerances, but as a Member of ASEAN Cambodia would adhere to the maximum residue limits of ASEAN as well as to FAO standards. The current import measures were applied due to Cambodia's limited capacity for safe handling and storage of pesticides, and could therefore, in his opinion, be justified under Article XX(b) of the GATT 1994.

77. The representative of Cambodia confirmed that, no later than 1 June 2005, Cambodia would eliminate quantitative restrictions on the importation of fertilizers, pesticides and other agricultural inputs as described in paragraphs [75 and 76 and Table 4] and establish a WTO-consistent method of registration and review of imported agricultural chemicals. Requirements related to the safe storage

and domestic distribution of these products would apply only to domestic distributors or to importers using bonded storage prior to domestic distribution. He further confirmed that, in the context of Cambodia's implementation of the WTO Agreement on Technical Barriers to Trade, that from 1 January 2007 Cambodia would rely on the provisions of that Agreement to regulate domestic and international trade in these items, and that the commitment contained in paragraph [50] would also apply to requirements for registration and licensing fees for importers of agricultural inputs from 1 June 2005. The Working Party took note of these commitments.

78. Cambodia had experienced problems with counterfeit pharmaceuticals and drug trafficking, and permission was accordingly needed for the importation of pharmaceutical products and materials, vitamins and hormones in accordance with the Law on Drug Management and Prakas No. 82 of 31 March 1999 on "Procedures for Exports and Imports of Pharmaceuticals". The importer should be a pharmaceutical company registered at the Ministry of Commerce and authorized by the Ministry of Health. At present, 90 companies were registered as authorized importers at the Department of Drugs and Food. Registration was also required for the products to be imported. The licensing procedure for first consignments of pharmaceuticals and vitamins would normally take three weeks due to laboratory analyses. Licences for subsequent consignments could be issued within one week as further laboratory analysis would not be necessary. Information on the procedure to be followed was published in the Official Journal of the Ministry of Health.

79. A Member stated that Cambodia's regulations could potentially violate the principle of national treatment and restrict trading rights. While this Member recognized the need to apply technical regulations or standards for agricultural inputs and pharmaceuticals, current practices in Cambodia seemed based on the assumption that there was no domestic production. This assumption was not valid for pharmaceuticals, and might not remain so for fertilizers and pesticides. Cambodia was requested to clarify that there would be no requirement for an importer of record to establish a commercial presence in Cambodia, or to negotiate the right to import.

80. Responding to concerns that the registration regime for importers of agricultural inputs and pharmaceutical products and materials might restrict imports indirectly or constitute a non-tariff measure, the representative of Cambodia underlined that Cambodia's legislation allowed any physical or juridical person to seek registration, and registration would be granted subject to the fulfilment of objective criteria related to safety, availability of necessary facilities or staff qualifications. The relatively low number of registered importers of agricultural inputs and pharmaceutical products and materials reflected the limited size of the domestic market. He noted, for example, that among the 90 firms authorized to import pharmaceutical products, only 30 of them had actually engaged in import

trade in 2002. As noted in document WT/ACC/KHM/17/Rev.1, Cambodia required a Certificate of Good Manufacturing Practice (GMP), issued in accordance with guidelines established by the WHO. Each country could issue its own certificate to local manufacturers, but the evaluation criteria should follow the WHO Standard Guidelines for GMP. In urgent cases, import licences could be granted within three days.

81. Import licences issued by the Ministry of Health were valid for six months and could be extended upon request. Licences for agricultural inputs were valid for one year and were also extendable. These import licences were issued free of charge, but each pharmaceutical product registered with the Ministry of Health was subject to a one-time fee of US\$200 (Prakas of the Ministry of Health No. 254 of 13 June 1996), and each agricultural input registered at the MAFF was subject to a registration fee of US\$30. Other import licences were issued against a fee of 15,000 Riels and were valid for three months. The validity of these licences could, upon request, be extended for an additional two months. A complete licence application would normally be processed within seven days. Licensing decisions could be appealed through the judicial and administrative procedures established in Cambodia.

82. The representative of Cambodia confirmed that from the date of accession, his government would not introduce, re-introduce or apply other non-tariff measures such as licensing, quotas, prohibitions, bans and other restrictions having equivalent effect that could not be justified under the provisions of the WTO Agreements. If balance-of-payment measures were necessary, Cambodia would impose them in a manner consistent with the relevant WTO provisions, including Article XVIII of the GATT and the Understanding on Balance-of-Payments Provisions of the GATT 1994. He further confirmed that any discretionary authority permitting the Government of Cambodia to suspend imports or licensing requirements that could suspend, ban, or otherwise restrict the quantity of trade would be applied from the date of accession in conformity with the requirements of the WTO. The Working Party took note of these commitments.

Customs valuation

83. Some Members noted that Cambodia's present customs valuation regime, based on the Law on Customs Duty and Tax on Imports and Exports of Goods of 1989, was not in compliance with the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 (Customs Valuation Agreement) and that Cambodia intended to address the deficiencies in a new Law on Customs and its implementing regulations. In this connection, these Members reminded Cambodia about the provisions of the Agreement regarding valuation hierarchy, prohibited methods of appraisal, confidentiality, right of appeal, transparency, sureties for the release of merchandise,

and the adoption of the Interpretative Notes. Among the problems mentioned by Members were duplication of work by customs agencies, customs red tape, delays in the processing of documents, and over-valuations or inconsistent valuations. Some Members agreed that certain aspects of the Agreement could be implemented over time, but hoped that the length and breadth of any transitional arrangements would be limited. In their view, critical provisions central to the issue of market access and the maintenance of a stable, predictable trade regime should be in place at the time of Cambodia's accession to the WTO. Cambodia should not expand the use of minimum prices beyond the products currently listed in its legislation, and the prohibited methods of valuation should not otherwise be used.

84. In reply, the representative of Cambodia said that the new draft Law on Customs had been approved by the Council of Ministers and was planned for adoption by the National Assembly by July 2004. Regulations would be developed upon completion of the drafting of the new Law, including regulations to implement Articles 17-24 of the Agreement, as well as the Interpretative Notes in Annex I of the Agreement and would be made available to WTO Members for review. He emphasized that Cambodia would seek a transition period. An Action Plan for the implementation of the customs valuation agreement was provided in document WT/ACC/KHM/13, and a revised action plan in document WT/ACC/KHM/13/Rev.1.

85. Implementation of the hierarchy of valuation techniques implied that Cambodia's present use of minimum values would need to be phased out and replaced by the transaction value provisions of the Agreement. Items currently subject to minimum customs values are listed in Table 6. His Government considered that a move to transaction value at the time of Cambodia's accession to the WTO would pose major risks to government revenue. He therefore proposed that minimum customs values be phased out gradually over a period of five years, with full compliance with the Customs Valuation Agreement to be achieved by the end of 2008. The challenges facing the customs administration at present included a low rate of voluntary compliance by importers, lack of sound accounting systems and record keeping, and the limited capacity of the Customs and Excise Department to administer transaction valuation provisions. Time would be needed to educate importers in the new valuation provisions, proper customs record keeping and accounting systems, as well as for Customs to develop its internal administrative procedures, such as post clearance audit, and to educate staff. The Customs and Excise Department would seek technical assistance in preparing and implementing the transition plan.

86. Some Members noted that Cambodia appeared also to be using data on reference prices provided by a Preshipment Inspection (PSI) firm. The Customs Valuation Agreement strictly prohibited such practice, and Cambodia should eliminate it prior to the date of accession.

87. The representative of Cambodia confirmed that Cambodia was using a reference database, but only as a guide for appraising valuation declarations. The database would not be used to establish actual transaction values, but only as a reference for establishing the reasonableness of values and for risk assessment purposes, in compliance with the Agreement. The representative of Cambodia confirmed, that aside from the products listed in Table 6 for which Cambodia used minimum values, Cambodia would not make use of reference prices to establish actual transaction values.

88. Concerning the transparency of legislation, the representative of Cambodia noted that Article 93 of Cambodia's Constitution required laws to be published in the Official Gazette and brought to the knowledge and attention of the population before entering into force. Legal texts related to customs matters were published in the Official Gazette for the general public on a non-discriminatory and transparent basis. In addition, the Customs and Excise Department frequently provided legislation and regulations to the 30-50 largest importers to up-date them on legal developments. He expected the new Law on Customs would receive extensive publicity through seminars, publications, and other information sources such as the departmental web-page.

89. The representative of Cambodia thanked members of the Working Party for their offers of technical assistance in this area, and for their recognition that more would be required. Cambodia was requesting a transitional period to complete the phasing-out of minimum customs value and administrative values listed in Table 6, and use of the valuation hierarchy stipulated in Article 21 of the draft Law on Customs. Provisions in the Customs Valuation Agreement relating to transparency, confidentiality, right of appeal, sureties for the release of merchandise, and the interpretative notes relevant to these issues would be implemented by the time of Cambodia's accession to the WTO.

90. The Government of Cambodia requested that the Working Party grant a transitional period from the date of its accession of approximately five years, until 1 January 2009, for certain provisions of the WTO Agreement on Customs Valuation, to allow Cambodia to obtain and utilize technical assistance to assist in the full implementation of the obligations of the Agreement. During the transition, for the imported goods listed in Table 7, Cambodia will not be required to observe the provisions of Article 7:2(f), allowing for the application of minimum customs values to these imports. If such a transitional period were granted, Cambodia's deviations from the provisions of the Agreement would be strictly limited to these measures, and that all other provisions of the Agreement would be fully implemented for all imports, including those covered by the transition.

91. During this period, Cambodia would ensure that its regulations under current legislation in place and additional legislation implemented during the transition concerning customs valuation would be applied on a non-discriminatory basis to all imports. In particular, the practice of varying the method of valuation for imports of automobiles based on national origin would be eliminated from the date of accession, and Cambodia would only apply customs duties on imported goods on a non-discriminatory basis [from all WTO Member countries]. Any changes made in its laws, regulations and practice during the transition period would not result in a lesser degree of consistency with the provisions of the Agreement on Customs Valuation than existed on the date of accession. Cambodia would participate in the work of the Committee on Customs Valuation. He added that Cambodia would seek out all available technical assistance to ensure that its capacity to fully implement the Agreement upon expiration of the transition period is assured.

92. In response to requests from delegations for more specificity, the representative of Cambodia presented an Action Plan setting out details of the steps that still remained to be taken in order to achieve this objective and a timetable for each step (Table 7).

Table 7: Action plan for implementation of the Agreement on Customs Valuation

Action	Deadline
WP review of Draft Law on Customs	Prior to accession
Creation of a WTO VA implementation project team and preparation of a departmental plan to implement the VA transition plan.	No later than December 2003
- If decision to retain PSI mechanism, new contract will be in compliance with WTO Valuation Agreement rules.	No later than 1 January 2004
Parliamentary consideration and enactment of legislation for WTO-consistent valuation rules.	No later than 1 July 2004
Transaction valuation to apply to: 1. imports by large multinational and Cambodian companies having a well established compliance record with the Customs and Excise Department and being considered low risk importers. 2. imports by firms other than large, multinational and Cambodian companies which import goods that are identical or similar to goods imported by these large firms, based on their compliance records. 3. imports by investment companies and other importers entitled to exemption (NGOs, foreign missions, etc).	No later than 1 January 2005
Technical training and preparation of departmental valuation technical manuals Launching of Post Clearance Audit program Launching of automated customs processing system project.	No later than 1 January 2006
Transaction valuation to apply to: 4. imports, by selected low risk importers and sectors, of low value goods subject to relatively low rates of duty and representing limited revenue risk. 5. imports of identical or similar goods by other importers	No later than 1 January 2007
Transaction valuation to apply to: 6. remaining imports of low value goods subject to relatively low rates of duty.	No later than 1 January 2008

Action	Deadline
Transaction valuation to apply to:	No later than 1 January 2009
7. all imports, including highly taxed and sensitive goods	
Full implementation of the Agreement on the Implementation of Article VII of the GATT 1994	No later than 1 January 2009

93. The representative of Cambodia stated that legislation on the valuation of imports for customs and taxation purposes conforming to the requirements of the Agreement on Customs Valuation would be enacted by 1 July 2004. Cambodia would progressively implement the Agreement on Customs Valuation in accordance with the action plan in Table 7, and with the understanding that during this period the scope of implementation of other aspects of the Agreement, as described in paragraphs 89, 90 and 91 would be applied by Cambodia. Full implementation will start from 1 January 2009. The Working Party took note of this commitment.

Rules of origin

94. Noting initial statements by the representative of Cambodia that Cambodia had not yet established regulations on rules of origin, but intended to introduce preferential rules of origin as required by its membership in ASEAN, a Member sought a commitment that upon accession Cambodia would apply its laws and regulations on rules of origin in conformity with the provisions of the WTO Agreement on Rules of Origin. This Member also sought confirmation that Cambodia's laws would incorporate the requirements of Article 2(h) and Annex II, paragraph 3(d), i.e., that for non-preferential and preferential rules of origin, respectively, the customs authority would provide upon the request of an exporter, importer or any person with a justifiable cause an assessment of the origin of the import and outline the terms under which it would be provided, and that any request for such an assessment would be accepted even before trade in the goods concerned began.

95. The representative of Cambodia said that, for non-preferential trade, importers were required to indicate a product's origin in the import declaration. The requirement was applied for statistical purposes only. He added that Cambodia would take into account the provisions of the WTO Agreement on Rules of Origin when developing the legislation in this area. Provisions for the administration of rules of origin would be included in the new Law on Customs, which he expected Cambodia to implement during 2004. The Ministry of Commerce was responsible for issuing certificates of origin.

96. The representative of Cambodia confirmed that his Government intended to comply fully with the provisions of the WTO Agreement on Rules of Origin in the application of preferential and

non-preferential rules of origin and would be able to do so after enactment of the new Customs Law and its implementing regulations, no later than 1 January 2005. In particular, the requirements of Article 2(h) and Annex II para. 3(d) of the Agreement, which require provision, upon request, of an assessment of the origin of the import and outline the terms under which it will be provided, would be established in Cambodia's Law on Customs from the date of its promulgation, or if necessary, by government decree, no later than 1 January 2004. The Working Party took note of this commitment.

Other customs formalities

97. The representative of Cambodia confirmed that Cambodia did not require authentication of import documentation by consular officials or other institutions in the country of export. He added that the Customs and Excise Department was reviewing all customs clearance procedures and processes with a view to simplification and modernization, and the application of risk management techniques. Sub-Decree No. 64, issued in mid-2001, contained measures to rationalise the presence of government agencies at border checkpoints. The Customs and Excise Department and CAMCONTROL (Ministry of Commerce) were lead agencies in the clearance process, while other governmental agencies participated in joint committees with clear mandates and responsibilities at all border checkpoints. He expected automation of the customs clearance process to result in further efficiency gains, and the new Law on Customs would provide the legislative basis for this initiative.

98. Concerning efforts to combat smuggling – an issue raised by several Members as competition from smuggled goods was impeding regular market access – the representative of Cambodia said that Government Order No. 02 issued by the Council of Ministers on 19 December 2001 had launched a major anti-smuggling initiative. The Government Order directed the military, the police and local authorities to co-operate with and assist the Customs and Excise Department in anti-smuggling operations. An Inter-Ministerial Commission had been set up under the direction of the Minister of Economy and Finance to plan, co-ordinate, and to monitor this initiative. At the same time, steps had been taken to strengthen the Customs and Excise Department and to improve its level of integrity. The anti-smuggling initiative provided generous financial rewards to customs officials participating in successful anti-smuggling operations. Cambodia was also seeking technical assistance to equip enforcement teams with appropriate tools and facilities.

99. The representative of Cambodia confirmed that in order to address concerns about smuggling and other customs administration issues brought to its attention, his Government was in the process of establishing a dispute settlement mechanism within the Cambodian Customs Service to accept and act upon complaints about customs practices from traders and governments. This mechanism was

authorized in the new Customs Law and would be established prior to 1 January 2005. The Working Party took note of this commitment.

Preshipment inspection

100. The representative of Cambodia said that his Government had signed a contract with a preshipment inspection firm in 1995. A new contract had entered into force in October 2000. The contract, valid for two years plus a one-year extension, would be in effect until October 2003. The regime was regulated in accordance with Prakas No. 599 SHV.PRK of 31 August 2000 on "the Implementation of Pre-shipment Inspection Services". The current contract emphasized the provision of training and technical assistance to the Customs and Excise Department to build expertise, technical skills and know-how and thereby allowing preshipment inspection to be phased out during a period of maximum three years.

101. The present preshipment inspection contract applied to consignments valued at US\$4,000 or more (FOB). Goods worth less than US\$4,000 were valued by the Cambodian Customs and Excise Department (some remote customs check points were authorized to make valuation decisions for imports up to US\$1,200). Exempt from preshipment inspection were precious stones and precious metals; objects of art; explosives and pyrotechnic products; ammunition, weapons and implements of war; live animals; current newspapers and periodicals; household and personal effects; parcel post or commercial samples; gifts from foreign governments or international organizations to foundations, charities and recognized humanitarian organizations; gifts and supplies to diplomatic and consular missions and to agencies related to the United Nations Organization imported for their own needs; grants in kind; goods imported for government use under government order; scrap metals; cigarettes; and temporarily admitted goods (inward processing for export).

102. The preshipment inspection firm verified the information to be used by Customs such as quantity, quality, value, tariff classification and duties and taxes payable. Valuations would be based on the principle of Fair Market Price until the entry into force of the new Law on Customs. From then on, the preshipment inspection firm would provide valuation opinions based upon procedures consistent with WTO requirements. The fee for preshipment inspection amounted to 0.80 per cent of the FOB value of the inspected goods, except for bulk petroleum products (US\$0.30 per metric ton). Importers failing to secure preshipment inspection, and thus necessitating goods to be inspected by customs officials at the border checking point, incurred a penalty equal to 7 per cent of the CIF value of the imported goods. A Dispute Settlement Working Group had been established to resolve promptly claims or disputes arising from the implementation of preshipment inspection. He noted that while the Dispute Settlement Working Group had been in operation since early 2001, importers

had yet to bring formal cases to it for resolution. Importers tended to raise their concerns with either the Customs and Excise Department or the preshipment inspection company who would then bring the matter to the Group. Steps would be taken to encourage importers to make formal representations to the Working Group. He added that Article 24 of the draft Law on Customs provided for appeals against customs decisions, first to the Customs and Excise Department, next to a Customs Tariff Committee, and finally to the court. The Committee, which had been established specifically to resolve cases where importers were not in agreement with the findings of the preshipment inspection firm regarding the tariff classification of goods or valuations, was fully operational. Under the new Law on Customs, the Customs Tariff Committee would have a mandate to hear appeals against any decision by Customs.

103. Some Members considered the 0.8 per cent *ad valorem* charge for preshipment inspection a violation of Article VIII of the GATT as the fee was not related to the approximate cost of the services rendered. The representative of Cambodia replied that upon expiration of the present contract, a new or modified contract on preshipment inspection would stipulate compliance with GATT Article VIII by requiring the preshipment inspection fee to be commensurate with the service rendered and not the value of the goods inspected. A full Ministerial Cabinet meeting had reconfirmed a decision to this effect on 20 December 2002.

104. In addition, a Member pointed out that the 7 per cent penalty imposed on non-inspected goods would be in contravention of GATT Article VIII paragraph 3. The representative of Cambodia held the view that Article VIII of the GATT 1994 dealt only with "penalties for minor breaches of customs regulations or procedural requirements", while failure to comply with mandatory preshipment inspection would constitute a substantial breach of the legal requirement laid down in the Prakas of the Ministry of Economy and Finance on preshipment inspection of imported products. He stressed that penalties discouraged duty evasion, and were necessary to protect government revenue and the competitive position of compliant importers. Notwithstanding this explanation, one Member maintained that such a penalty was disproportionate, constituted a non-tariff barrier to importation, and should be amended to be made less onerous and to meet the requirements of GATT Articles VIII and XI.

105. The representative of Cambodia confirmed that from the date of accession his Government would take full responsibility to ensure that the operations of the preshipment inspection companies, if retained by Cambodia meet the requirements of the WTO Agreements, including the establishment of charges and fees consistent with Article VIII of the GATT 1994, due process and transparency requirements of the WTO Agreements, in particular Article X of the GATT 1994, and the provisions

of the Agreement on the Implementation of Article VII of the GATT 1994 and the Agreement on Preshipment Inspection. He further confirmed that Cambodia's pre-shipment inspection regime would be temporary and would only operate until such time as the Customs and Excise Department was able to carry out the functions presently performed by pre-shipment inspection service providers. The Working Party took note of these commitments.

Anti-dumping, countervailing duties, safeguard regimes

106. The representative of Cambodia said that Cambodia had not yet developed any trade remedy legislation. According to Cambodia's legislation agenda, the law on anti-dumping and countervailing measures and the law on safeguard measures were not expected to be approved until the second half of 2004. He added that Cambodia would apply safeguard, antidumping or countervailing measures consistent with the WTO Agreements, including their procedural aspects, as a member of the WTO.

107. Appreciating these assurances, some Members requested that Cambodia would make a commitment not to apply antidumping, countervailing or safeguard measures without first implementing appropriate laws and notifying to the WTO legislation covering such measures consistent with WTO Agreements on the Implementation of Article VI of the General Agreement on Tariffs and Trade 1994, on Subsidies and Countervailing Measures, and on Safeguards. These Members invited Cambodia to submit draft legislation, if available, to the Working Party for review.

108. The representative of Cambodia confirmed that Cambodia would not apply any anti-dumping, countervailing or safeguard measure until it had notified and implemented appropriate laws and regulations in conformity with the provisions of the WTO Agreements on the Implementation of Article VI, on Subsidies and Countervailing Measures, and on Safeguards. In the elaboration of any legislation concerning such anti-dumping, countervailing and safeguard measures Cambodia would ensure their full conformity with the relevant WTO provisions, including Articles VI and XIX of the GATT 1994 and the Agreements on the Implementation of Article VI, the Agreement on Subsidies and Countervailing Measures and the Agreement on Safeguards. After such legislation was implemented, Cambodia would also only apply any anti-dumping duties, countervailing duties and safeguard measures in full conformity with the relevant WTO provisions. The Working Party took note of these commitments.

2. Export regulation

Customs tariffs, fees and charges for services rendered, application of internal taxes to exports

109. The representative of Cambodia said that Cambodia levied export taxes on certain unprocessed raw materials and products to encourage local processing, encourage exports of finished products and to protect human health. The products subject to export taxes are enumerated in Table 8. Responding to requests from some Members that Cambodia abolish all export duties upon accession, the representative of Cambodia said that export duties were - to his knowledge - permitted under WTO rules, subject to the disciplines of Article I of the GATT. Cambodia's export duties were applied on an MFN basis and hence its ASEAN partners were not exempt from these taxes. Export taxes had accounted for approximately 2 per cent of the customs revenue collected by the Customs and Excise Department in 2000.

110. A Member noted that Article XXIV of the GATT 1994 stipulated that duties between FTA partners should be eliminated for both imports and exports. Under these circumstances, Cambodia should indicate the reason for the exemption and how Cambodia intended to bring this measure into conformity with this WTO provision. The representative of Cambodia noted that the ASEAN Free Trade Area (AFTA) had been notified to the WTO under the Enabling Clause.

111. The representative of Cambodia confirmed that the registration requirements for exports were the same as for imports, and that the 15,000 Riels fee applied to each import/export declaration covered the cost of printing of the customs declaration form and the time spent by customs officers in processing the declaration. Preshipment inspection of exported products was effected by CAMCONTROL, a body under the Ministry of Commerce. CAMCONTROL inspected all exports without exception.

Export restrictions

112. Some Members noted that Cambodia maintained export restrictions on several products. Cambodia was reminded that a WTO Member could only apply export restrictions under tightly defined conditions, and it was not evident that Cambodia's restrictions met these requirements. Specifically, the export licensing restrictions on rice and logs would appear to violate Article XI of the GATT 1994, as these seemed to be applied for economic rather than conservation reasons. Cambodia was asked to explain the parallel restrictions applied to domestic production, and outline how it intended to replace the current measures with WTO-consistent instruments.

113. The representative of Cambodia replied that Cambodia generally did not restrict exports, except for rice; round logs, unprocessed timber and forestry products; antiques more than 100 years old; narcotic drugs and poisons; weapons, explosives and ammunition; and vehicles and machinery for military purposes (see Table 9). He added that the restrictions on rice exports had been lifted on 26 July 2001 pursuant to Prakas-Announcement No. 2290 MoC/M2001 of the Ministry of Commerce. However, his Government would maintain the right to reintroduce restrictive measures in the future if necessary to prevent or relieve critical shortages of foodstuffs, as provided for in Article XI:2(a) of the GATT 1994.

114. As for the export restrictions on forestry products, his Government had issued a Governmental Prakas on Management Measures to Eliminate the Forestry Anarchy No. 01 PROK on 25 January 1999 and a Sub-Decree on Forestry Concession Management No. 05 on 7 February 2000. Using the authority provided by the Sub-Decree on Forestry Concession Management, his Government had suspended all cutting of logs by forestry concession companies. The Government would not authorize the resumption of cutting until these companies had submitted Sustainable Forestry Management Plans (SFMP) and Environmental and Social Impact Assessments (ESIA). These plans and assessments would be evaluated by the Department of Forestry and Wildlife of the Ministry of Agriculture, by the public - in particular the local communities affected by forest management - and international experts. The evaluation of the SFDPs and the ESIA was presently underway. His Government had granted no authorization for forestry exploitation since 1 January 2002. Exportation of round and sawn logs was prohibited, and Government Decision No. 17 of 29 April 1997 had established a list of wood products authorized for exportation and detailed requirements, including an obligation for the exporter to obtain a special concession to exploit forest resources from the Ministry of Agriculture, access to the export quota established by the Government, as well as a non-automatic export licence issued by the Ministry of Commerce. The Decision also identified specific border crossing points through which wood products could be legally exported. In his view, the export licensing of wood products was applied in conjunction with parallel restrictions on domestic production, aimed at preserving exhaustible natural resources as foreseen under Article XX(g) of the GATT 1994.

115. The representative of Cambodia stated that, from the date of accession, Cambodia would ensure that it applied its laws and regulations governing export measures and would act in conformity with the relevant provisions of the WTO, including Articles I and XI of the GATT 1994 and the Agreement on Subsidies and Countervailing Measures. The Working Party took note of this commitment.

Export subsidies

116. The representative of Cambodia said that Cambodia had not yet identified policies or measures relating to export financing or export support. On 28 November 1997, the Ministry of Commerce had issued Declaration No. 343 on the organization and functioning of its Export Promotion Division, pursuant to Government sub-decree No. 54 on the Organization and Functioning of the Ministry of Commerce of 22 September 1997. The Division was expected to engage in general promotion activities such as assisting the private sector in collecting information on markets overseas, identify potential export opportunities, and participate in organizing trade fairs. As for export incentives, he noted that Article 14 of the Law on Investment of 4 August 1994 stipulated 100 per cent import duty exemption on construction materials, means of production, equipment, intermediate goods, raw materials and spare parts used by an "export-oriented project with a minimum of 80 per cent of the production set apart for exports". As a basic principle, all approved projects were eligible for these duty exemptions.

117. Several Members noted that incentives accorded under the Law on Investment were contingent upon export performance. Article 3 of the WTO Agreement on Subsidies and Countervailing Measures prohibited the use of such subsidies, and these Members accordingly asked Cambodia to indicate how it intended to eliminate prohibited export subsidies from its trade regime. In their view, any request for a transition for Cambodia should involve a detailed commitment to eliminate WTO-inconsistent practices. Cambodia was reminded that, although LDCs might be entitled to retain such subsidies, the measures could still be actionable under the Agreement on Subsidies and Countervailing Measures, which would be a detriment to the predictability and transparency sought by investors and buyers.

118. The representative of Cambodia considered the import duty exemption for export-oriented projects analogous to the exemption referred to in Article 1 (note 1) and paragraph (h) of Annex I of the Agreement on Subsidies and Countervailing Measures. He acknowledged that a duty drawback scheme would be a better way to address this issue, but Cambodia lacked the administrative resources to implement such a scheme properly at present. In any case, he considered least-developed countries exempt from the provisions of Article 3.1(a) by virtue of Article 27.2 of the Agreement on Subsidies and Countervailing Measures.

119. Some Members considered the existing system of remission of import fees and waiver of duty for certain goods used by certain investors to be highly complex, lacking in transparency and prone to abuse, and therefore encouraged Cambodia to implement a duty drawback scheme consistent with the Agreement on Subsidies and Countervailing Measures. Pending the implementation of a functioning

duty drawback programme limiting rebates to the amount of tariff and tax incorporated in the exported product, the current programmes would need to be notified as subsidies as they did not appear to qualify as valid duty drawback schemes.

120. The representative of Cambodia confirmed that any subsidy programmes provided by his Government after accession would be administered in conformity with the Agreement on Subsidies and Countervailing Measures, including Article 27, and that all necessary information on Cambodia's export subsidies and other notifiable programmes would be notified to the Committee on Subsidies and Countervailing Measures according to Article 25 of the Agreement upon entry into force of Cambodia's Protocol of Accession. He also confirmed that Cambodia would either eliminate the existing system of remission of import fees and waiver of duty for certain goods used by certain investors or establish a functioning duty drawback system consistent with WTO provisions, through amendment of the Law on Investment, as necessary, by the end of 2013. The Working Party took note of these commitments.

3. Internal policies affecting foreign trade in goods

Industrial policy, including subsidies

121. The representative of Cambodia said that the main objective of Cambodia's industrial policy was to stimulate economic development by enhancing access to international markets and strengthening the industrial base. Efforts focused on building up light industries and developing agro-manufacturing and food processing enterprises to sustain the agricultural sector. Measures had been taken to improve infrastructure for transportation and communication, encourage private and foreign direct investment through the adoption of an appropriate legal framework and the privatization of State-owned enterprises, and to promote the development of industrial zones. Particular attention was also given to the training of industry workers. The establishment of a Petroleum Training Institute and of a Training Institute for Mines and Geology was under consideration. The Ministry responsible for the development and implementation of Cambodia's industrial policy was the Ministry of Industry, Mines and Energy. He confirmed that Cambodia did not grant any subsidies within the framework of its industrial policy.

122. The representative of Cambodia stated that any subsidy programmes would be administered in line with the Agreement on Subsidies and Countervailing Measures and that any such programmes would be notified to the Committee on Subsidies and Countervailing Measures upon Cambodia's accession to the WTO. The Working Party took note of this commitment.

Technical barriers to trade, sanitary and phytosanitary measures

(a) Standards and certification

123. The representative of Cambodia said that Cambodia's standardization system was at an early stage of development. He informed the Working Party that Cambodia was seeking technical assistance to develop its system. A completed checklist of TBT Requirements and Implementation by the Kingdom of Cambodia was provided in document WT/ACC/KHM/8. The current system was largely voluntary, but mandatory standards were applied to some products when deemed necessary to protect national security, prevent deceptive practices or to preserve human, animal, and plant life or health.

124. Some Members reminded Cambodia that the Agreement on Technical Barriers to Trade (TBT Agreement) did not oblige Cambodia to establish standards, technical regulations or conformity assessment procedures. However, the provisions of the Agreement applied when such measures were being developed and applied (enforced). The Agreement established fundamental rules and procedures regarding the development, adoption, and application of voluntary standards, technical regulations, and the procedures used to determine whether a particular product met such standards (conformity assessment). Accordingly, it was imperative for governments to establish a coordinated approach to the development, adoption and application of standards, technical regulations and conformity assessment procedures to ensure that all ministries, agencies, and private bodies involved in these activities be aware of the obligations and abide by them on an ongoing basis. Issues of particular interest to Members included the use of international standards, recommendations or guides in the elaboration of standards, technical regulations or certification in Cambodia; work to harmonize national standards with international standards; mechanisms for publication and dissemination of draft legislation and standards for public comment prior to their entry into force; the establishment of a TBT Inquiry Point; the inspection process for imported versus domestically-produced goods; recognition of equivalence of technical regulations and conformity assessment procedures of other countries, and recognition of conformity assessment procedures carried out by appropriately accredited testing laboratories in the country of manufacture; and Cambodia's participation in multilateral or bilateral standards-related agreements or mutual recognition agreements or arrangements.

125. The representative of Cambodia replied that the Standards Office in the Technical Department of the Ministry of Industry, Mines and Energy was responsible for current work related to standardization and certification. Sub-Decree on Industrial Standards No. 42/ANK/BK of 15 May 2001 provided the basic rules and procedures for adopting new standards, technical

regulations and conformity assessment procedures. He expected a Sub-Decree on Metrology to be adopted during 2003. A Law on Industrial Standards of Cambodia was in preparation and slated for promulgation in the first half of 2004. The new Law would be complemented by a Sub-Decree and implementing regulations. This legislation had been provided to the Working Party for review.

126. The new Law foresaw the creation of a Department of Industrial Standards of Cambodia (ISC) within the Ministry of Industry, Mines and Energy. He confirmed that the ISC had been established in 2002 through sub-Decree XII of the Council of Ministers. The ISC would serve as Cambodia's TBT Inquiry Point, responsible for identifying and providing notifications to the WTO Secretariat under the TBT Agreement. The ISC would publish a regular Bulletin or Gazette which would carry notices of proposed technical regulations and conformity assessment procedures. The period for public comment on draft standards would be extended to 60 days, against the 30 days (amended standards) and 45 days (new standards) specified in existing legislation. A draft Law to this effect was in preparation.

127. Cambodia had been a member of the International Organization for Standardization (ISO) since 1 January 1995 and had ratified the ASEAN Framework Agreement on Mutual Recognition Arrangements. Imported goods were subject to the same inspection process as domestically-produced goods, and Cambodia would extend any Conformity Assessment Agreements, in particular those foreseen under the ASEAN, to all Members of the WTO. Cambodia recognized certificates from third countries' certification bodies provided that these bodies had received formal accreditation from international or regional accreditation bodies, or were signatories to a mutual recognition arrangement. In the case of pharmaceutical products, laboratory testing in Cambodia was required prior to registration to check the conformity of the samples.

128. Completed tasks, planned activities and related assistance needed during the period 1999-2006 was detailed in Cambodia's Action Plan for the Implementation of the TBT Agreement, circulated in document WT/ACC/KHM/14, and subsequently revised in document WT/ACC/KHM/14/Rev.1. The Action Plan is summarized in Table 10. Having reviewed Cambodia's action plan, some Members questioned Cambodia's need for a two-year period to readjust technical regulations, standards, etc. as good regulatory practice, outlined in Article 2.3 of the Agreement on Technical Barriers to Trade, required the appropriateness and effectiveness of particular standards and technical regulations to be reviewed on an ongoing basis. Cambodia should take immediate steps to fulfil the transparency requirements of the Agreement. Cambodia was encouraged to notify WTO Members of proposed regulations prior to adoption, and carefully consider Members' technical comments on proposed regulations before finalizing them. Noting Cambodia's

requests for technical assistance, some Members stressed that Cambodia should not make implementation of the TBT Agreement contingent on the provision of future technical assistance.

129. The Government of Cambodia requested that the Working Party grant a transitional period from the date of its accession until 1 January 2007 for implementation of the WTO Agreement on Technical Barriers to Trade, to allow Cambodia to obtain and utilize technical assistance to fully implement the obligations of the Agreement. During this period, existing measures would be applied on a non-discriminatory basis, i.e. providing for national treatment and MFN treatment to all imports. Measures in place already consistent with the provisions of the Agreement on Technical Barriers to Trade would not be subject to transitions, and Cambodia would ensure that any changes made in its laws, regulations and practice during the transition period would not result in a lesser degree of consistency with the provisions of the Agreement than existed on the date of accession. Standards, technical regulations, and conformity assessment procedures adopted during this period would be developed in conformity with the provisions of the Agreement. Cambodia would fully participate in the work of the Committee on Technical Barriers to Trade. He added that Cambodia would seek out all available technical assistance to ensure that its capacity to fully implement the Agreement upon expiration of the transition period is assured.

130. In response to requests from delegations for more specificity, the representative of Cambodia presented an Action Plan setting out details of the steps that still remained to be taken in order to achieve this objective and a timetable for each step (Table 10).

Full implementation of the WTO Agreement on Technical Barriers to Trade	No later than 1 January 2007

131. The representative of Cambodia stated that Cambodia would progressively implement the Agreement on Technical Barriers to Trade in accordance with the action plan in Table 10 and with the understanding that during this period the scope of implementation of other aspects of the Agreement, as described in paragraph [129] would be applied by Cambodia. Full implementation will start from

1 January 2007 without recourse to any further transitional period. The Working Party took note of this commitment.

(b) Sanitary and phytosanitary measures

132. At the outset, the representative of Cambodia said that Cambodia's sanitary and phytosanitary measures were applied and regulated on the basis of the Law on the Management of Quality and Safety of Products and Services of 21 June 2000, the Sub-Decree on Sanitary Inspection of Animal and Animal Products of 29 July 1988, the Sub-Decree on Plant Quarantine of 8 October 1983, and the Sub-Decree on Standards and Management of Agricultural Materials of 28 October 1998. Further work to ensure compliance with the Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement) involved revision of the 1983 and 1988 Sub-Decrees as well as the preparation of new sub-decrees and regulations related *inter alia* to food hygiene, labelling and safety requirements, detailed in the completed SPS Checklist circulated in document WT/ACC/KHM/9 and the Action Plan for the Implementation of the SPS Agreement, circulated in document WT/ACC/KHM/15, and subsequently revised in document WT/ACC/KHM/15/Rev.1.

133. Among the actions taken during 2001 and 2002, he noted that Cambodia had established a National Codex Committee and technical working groups, which were meeting on a regular basis, and Codex Units had been set up in each Ministry concerned to provide effective inputs and proactive participation in Codex work; the chemical and microbiological food analysis laboratory at CAMCONTROL had been strengthened; a Plant and Animal Quarantine Station had been established and programmes had been designed in the areas of plant pest and animal disease surveillance and control and pest and disease control; officials had received training in risk analysis; and Cambodia had implemented specific training programmes in the areas of plant quarantine, animal quarantine, laboratory diagnostic and product testing, and plant and animal quarantine. A first draft of a Sub-Decree on Food Hygiene, including storage requirements and microbiological requirements had also been completed.

134. He added that the National Codex Committee at the Ministry of Commerce would serve as Cambodia's SPS Enquiry Point. Assuming that technical assistance would be provided, he expected the enquiry point to become operational in 2003. The basic transparency provisions of the SPS Agreement had been incorporated in a Sub-Decree on Plant Quarantine and Animal Quarantine, stipulating publication of proposed measures at an early stage and a procedure to provide information to WTO Members, thus allowing a reasonable period of time for comment by WTO Members and the public, and a process for taking account of the comments received without discrimination. The Sub-Decree on Plant Quarantine, and the Sub-Decree on Sanitary Inspections of Animal and Animal

Products had been adopted by the Council of Ministers on 14 February 2003. The framework for adopting the standards, guidelines and recommendations developed by the relevant international organizations (the Codex Alimentarius Commission, the International Office of Epizootics and international or regional organizations operating within the framework of the International Plant Protection Convention) would be incorporated in the Law on Industrial Standards of Cambodia, planned for promulgation in the first half of 2003. Other legislation in preparation during 2003 included draft sub-Decrees on Food Safety Standards on Additives (sweeteners, colours, flavours, preservatives and antioxidants); Food Inspection Administration; Food Safety Standards on Environmental Contaminants; Food Safety Standards on Agricultural Chemicals (pesticide residues); draft regulations on safety requirements for fresh fruit and processed fruit; draft regulations on safety requirements for cereals pulses and legumes; draft guidelines on assurance of seafood quality; and draft registration procedures and implementation of registration for cosmetic products.

135. Noting a temporary ban on the importation of meat, meat products and associated dairy products from certain EU countries, a Member was concerned that customs officials in Cambodia appeared to interpret the ban to include other countries, and asked how Cambodia intended to ensure non-discriminatory application of its SPS regime.

136. The representative of Cambodia replied that a temporary ban had been introduced to prevent the spread of diseases potentially harmful to human and animal health. The ban had been introduced in the light of information received from the Codex Alimentarius on the potential risk of BSE in meat, meat products and dairy products originating in certain EU countries. The ban had been initiated in March 2001 under Government Prakas No. 089. The ban had subsequently been terminated in September 2001.

137. The representative of Cambodia said that achieving full compliance with the requirements of the SPS Agreement was a complex process, and Cambodia was accordingly seeking a transition period during which the requirements would be implemented gradually in accordance with the Action Plan summarized in Table 11. He stressed that Cambodia's pace in implementing the SPS Agreement would depend on the assistance made available by WTO Members and relevant international organizations for Cambodia to develop new regulations in conformity with WTO provisions and ensure their effective implementation, in particular through training.

138. Some Members stated that they considered implementation of the SPS Agreement a key element of Cambodia's accession. Having reviewed Cambodia's Action Plan, these Members were reluctant to grant a five-year transition period without specific guidelines on implementation or sufficient detail to justify these transitional arrangements. It was noted that Cambodia should give

priority to the establishment of an enquiry point, any SPS measures taken by Cambodia should be notified to the WTO, and Cambodia should be prepared to consult with WTO Members upon request if measures taken would affect their exports negatively. The need for a two-year period for "readjusting technical regulations, standards, etc." was questioned. Cambodia was encouraged to consider adoption of international standards where such standards would meet Cambodia's needs and, where international standards would not be deemed appropriate, Cambodia should consider drawing upon WTO consistent standard setting work of other governments.

139. In reply, the representative of Cambodia referred to the revised Action Plan for the Implementation of the SPS Agreement, found in document WT/ACC/KHM/15/Rev.1, which in his view contained very specific guidelines and details regarding implementation. In his view, full implementation of the SPS Agreement could be achieved by 2007/2008. Cambodia would draw upon international standards and the work of other governments as appropriate. In this connection, he noted that the National Assembly and Senate had ratified Protocol 8 on Sanitary and Phytosanitary measures of the ASEAN Framework Agreement on the facilitation of goods in transit.

140. Members suggested that, based on the information provided on Cambodia's progress to date and plans for further progress found in document WT/ACC/KHM/15/Rev.1, Cambodia should be able to complete formal implementation of legal authority, procedures, and the basic infrastructure for applying SPS measures to imports in a WTO-consistent fashion prior to 1 January 2004 and be prepared to apply fully the provisions of the Agreement by 1 January 2006, and sought Cambodia's commitment to a timetable of implementation on that basis.

141. The representative of Cambodia requested that the Working Party grant a transitional period from the date of its accession until 1 January 2008 for implementation of the WTO Agreement on Sanitary and Phytosanitary Measures, to allow Cambodia to obtain and utilize technical assistance to fully implement the obligations of the Agreement. During this period, existing measures would be applied on a non-discriminatory basis, i.e., providing for national treatment and MFN treatment to all imports. Measures in place already consistent with the provisions of the Agreement on Sanitary and Phytosanitary Measures would not be subject to transitions, and Cambodia would ensure that any changes made in its laws, regulations and practice during the transition period would not result in a lesser degree of consistency with the provisions of the Agreement than existed on the date of accession. Technical regulations and other measures adopted during this period would be developed in conformity with the provisions of the Agreement. Priority would be given to the establishment of a functioning enquiry point and the notification of all of Cambodia's SPS measures to the Committee. He added that Cambodia would seek out all available technical assistance to ensure that its capacity to

fully implement the SPS Agreement upon expiration of the transition period is assured. Cambodia would fully participate in the work of the Committee on Sanitary and Phytosanitary Measures. In response to requests from delegations for more specificity, the representative of Cambodia presented an Action Plan setting out details of the steps that still remained to be taken in order to achieve this objective and a timetable for each step (Table 11).

Action	Deadline
toward MRA'S in the region. Capacity building for key Camcontrol, MAFF and MoH personnel on the implementation of the above regulations.	
WP review of legislation	Prior to accession
Drafting additional regulations on food safety and guidelines for food products certification (for exports), per WT/ACC/SPEC/KHM/15/Rev.1. Capacity building for key Camcontrol, NCC, and TWGs personnel on the implementation of the above regulations.	2004-2005
Updating the Codex Library. Readjustment of technical regulations, standards and procedures in accordance with new scientific discoveries and approaches. Working toward accreditation of inspection bodies and testing laboratories. Capacity building for key Camcontrol, NCC, and TWGs personnel on the implementation of the above regulations.	2006-2007
Updating the Codex Library. Full implementation of the WTO Agreement on Sanitary and Phytosanitary Measures	Not later than 1 January 2008

142. The representative of Cambodia confirmed that Cambodia would implement progressively the provisions of the WTO Agreement on Sanitary and Phytosanitary Measures within the timetable provided for in the Action Plan for Implementation in Table 11, and would ensure full implementation of the Agreement no later than 1 January 2008, [as stated in the Action Plan] [and with the understanding that during this period the scope of implementation of other aspects of the Agreement, as described in paragraph [141] would be applied by Cambodia.] He further confirmed that Cambodia should consult with WTO Members upon request if they deemed that any measures applied during the transition period affected their trade negatively. The Working Party took note of these commitments.

Trade-Related Investment Measures (TRIMs)

143. The representative of Cambodia said that Chapter V of the Law on Investment of 4 August 1994 and Chapter 7 of Government Sub-Decree No. 88 ANKR.BK on the Implementation of the Law on Investment of 29 December 1997 contained certain trade-related provisions, including [incentives for export-oriented investments that include the exemption, in whole or in part, of duties and taxes; corporate profit tax exemptions and preferences, depending on the characteristics of the project and its priority status with the Government of Cambodia; and tax exemption on dividend or profit distribution whether transferred abroad or distributed in Cambodia (Articles 12, 13, and 14:1-3 of the Law on Investment). Such investments could also be exempted from the export tax and enjoy

special rules for entry of foreign nationals. In particular, Article 14:4(a) and (b) exempted] 100 per cent of import duties on construction materials, means of production equipment, intermediate goods, raw materials and spare parts used in export-oriented investment projects with a minimum of 80 per cent of the production exported, or located in a designated Special Promotion Zone (SPZ) listed in a development priority list issued by the Council for the Development of Cambodia. Article 14:4(c), (d), and (e) provided that such incentives could be authorized for investments involving the tourism industry, labour-intensive industry, transformation industry, agro-industry or physical infrastructure and energy industry for the construction period of enterprises, factories, building and the first year of operation of business production. These measures were, in his view, incentives consistent with the Agreement on Trade-Related Investment Measures, and would be maintained as long as they were permitted by WTO provisions and Cambodia's protocol of accession and would meet Cambodia's development needs. However, the newly amended Law on Investment, in its Article 14 concerning incentives, does not make any reference to the "minimum 80 per cent of the production for export". Moreover, the implementing sub-Decree which will be drafted will be made to ensure full compliance with the WTO provisions on TRIMs.

144. While being sympathetic to Cambodia's need to attract investment, a Member noted that the Agreement on Trade-Related Investment Measures clearly prohibited the use of such measures. This Member sought full notification of such measures by Cambodia as provided for in the Agreement, including a list of the special project zones subject to TRIMs, and a commitment to eliminate these measures no later than 2010.

145. The representative of Cambodia said that Cambodia would not maintain any measures inconsistent with the TRIMs Agreement [after 2010][and would apply the TRIMs Agreement from the date of accession without recourse to any transitional period]. The Working Party took note of this commitment.

State trading entities

146. The representative of Cambodia said that eleven State-owned companies engaged in importation and exportation of products such as rice, rubber, fertilizer, fishery products, pharmaceutical products and agricultural equipment. The enterprises operated in full accordance with commercial considerations and private business practices, and no special privileges were granted to them. He was thus of the view that none of Cambodia's State-owned enterprises came within the scope of Article XVII of the GATT 1994, the Understanding on the Interpretation of Article XVII of the General Agreement on Tariffs and Trade 1994, or the informal illustrative list of State-trading enterprises contained in document G/STR/4.

147. Asked to provide more precise information about the trade activities of these enterprises and their relations with the Government, the representative of Cambodia said that the Green Trade Company (GTC), established by sub-Decree No. 72 of 23 November 1998, managed Cambodia's national reserve of rice through purchases and sales made at market prices. Although the Green Trade Company was free to trade in foodstuff and other commodities of its own choice, in practice the GTC has so far only engaged in the rice trade. Other than the initial capitalization of 30 billion Riels, subscribed by the Government of Cambodia in 1998, the GTC had received no funding or financial contributions from public funds. Each year the GTC remitted 1 per cent of its total turnover or 20 per cent of its gross profits, whichever was higher, to the Government as return on the equity. The company's needs for operational liquidity or working capital would be financed by the regular banking system at market rates. If requested, and subject to approval by the Minister of Economy and Finance, his Government could issue guarantees for such loans. The GTC was subject to technical supervision by the Ministry of Commerce, and financial supervision by the Ministry of Economy and Finance. Prior to 26 July 2001, when export licences for rice had been lifted, the Green Trade Company had upon request provided market information and advice to the Ministry of Commerce for the issuance of export licences. Since then, the Green Trade Company had had no further role to play in Cambodia's rice exports as the company engaged solely in distribution and domestic trade in rice.

148. Established through Anukret No. 12 of 18 February 1999, the Agricultural Inputs Company was managed by a board of five directors from the Ministry of Agriculture, Forestry, and Fisheries, Ministry of Economy and Finance, and Ministry of Commerce. The company engaged in importation, purchase and sale of agricultural products (fertilizer, pesticides, seeds and agricultural equipment), warehousing and managing the distribution of donated fertilizers and agricultural inputs, administered statistical data, and participated in training programmes and research. He stressed that the Agricultural Inputs Company operated on a strictly commercial basis, in competition with the private sector. Imports of agricultural inputs by the Agricultural Inputs Company had been effected through private enterprises. In 2002, the company had called for bids from private-sector importers to supply 15,000 tonnes of fertilizer for delivery in 2003, but no purchases had been made. He added that his Government intended to establish a committee that would draft a plan for full divestment of State ownership in the Agricultural Inputs Company by 2006 (Circular by the Council of Ministers No. 2018 of 26 December 2002).

149. Concerning State ownership in the rubber sector, the representative of Cambodia said that seven rubber plantations (Chup, Krek, Memot, Snoul, Chamcar Andoung, Boeng Ket and Peam Chaing) were being transformed into public enterprises under the Ministry of Agriculture, Forestry and Fisheries pursuant to the Law on Public Enterprises through Sub-decrees approved on

15 March 1999. Although the estates remained State-owned, the Sub-decrees conferred full autonomy to the Boards of Directors of the estates (which delegated the conduct of day-to-day operations to a Director General), financial transactions and management issues, and the enterprises received no privileges from the Government. An audit exercise was currently being conducted for each estate to determine whether it should be closed, sold to the private sector, or turned into a joint-venture with majority private ownership. His Government intended to complete the wind-up of State-ownership in the estates by 2006 (Circular by the Council of Ministers No. 2018 of 26 December 2002). Enterprises in State ownership as per March 2003 are listed in Table 1(b).

150. The representative of Cambodia confirmed that, if Cambodia were to authorize the operation of any state trading enterprises, it would ensure that all relevant laws and regulations were in conformity with the requirements of Article XVII of the GATT 1994, the Understanding on Interpretation of Article XVII of the GATT 1994, and Article VIII of the GATS, including those provisions requiring the application of "commercial considerations" in the sale and purchase of state traded commodities and notification requirements. He further confirmed that the operations of the enterprises to be retained as State-owned, including the Green Trade Company, were consistent with the provisions of GATT Article XVII, and that no new privileges in terms of Article XVII would be granted to these or other entities. Cambodia would apply its laws and regulations governing the trading activities of state-owned enterprises in full conformity with the provisions of the WTO Agreement. The Working Party took note of these commitments.

Free zones, special economic areas

151. The representative of Cambodia said that there were currently no free zones in Cambodia. His Government had been considering the establishment of industrial zones, including export processing zones. Government Sub-Decree No. 73 of 5 October 1995 and Sub-Decree No. 2 of 5 January 1996 foresaw the creation of an industrial zone in Stung Hav-Sihanouk Ville, but the project remained to be implemented. Poipet, Koh Kong, Pailin (on the border with Thailand) and some other areas along the border with Viet Nam had been evaluated as potential sites for further export processing zones. As a result of this evaluation, a decision to establish an industrial zone in Koh Kong had been issued by Governmental sub-Decree No. 10 of 5 February 2002. A draft Law on Industrial Zones had been approved by the Council of Ministers in March 2003 and was currently under consideration by Parliament. Pending the passage of this law, other zones could possibly be established by sub-Decree. He confirmed that the draft Law contained no export performance measures or local content requirements.

152. The representative of Cambodia said that the free zones or special economic areas, including special promotion zones established in accordance with the Law on Investment, which it established would be fully subject to the coverage of WTO Agreements and its commitments in its Protocol of Accession to the WTO Agreement and that Cambodia would ensure enforcement of its WTO obligations in those zones or areas. In addition, in accordance with the (draft) Law on Industrial Zones, [from the date of accession][no later than 1 January 2004] goods produced in any such zones or areas under tax and tariff provisions that exempt imports and imported inputs from tariffs and certain taxes would be subject to normal customs formalities when entering the rest of Cambodia, including the application of tariffs and taxes. The Working Party took note of these commitments.

Government procurement

153. The representative of Cambodia said that a new public procurement system had been in operation since 30 July 1995 (Sub-Decree No. 60). Procurement was carried out through either (i) international competitive bidding (ICB); (ii) domestic competitive bidding (DCB); (iii) international shopping (IS); (iv) domestic canvassing (DC); or (v) direct purchase or direct contracting (Dcon). ICB and DCB contracts were advertised publicly and open to all interested bidders. The DCB procedure was applied to projects below 200 million Riels for civil work and 100 million Riels for goods. The procedure used for procurement above these thresholds was the ICB, whose regulations complied with international standards. The last three methods did not require open public competition, but participation of foreign bidders was not prohibited.

154. The lowest-priced bid was generally chosen under the ICB and DCB procedures, but other factors such as the completeness of the bid, delivery periods, conformity with technical specifications, the bidder's experience and financial standing, and required supporting documents might also be considered. International shopping (IS) involved obtaining a minimum of three quotations from at least two different countries. He added that practices could deviate from established procurement procedures, and domestic preference could be granted in cases of emergency purchases, proprietary procurement, small-value items, and acquisition of military equipment and supplies.

155. Some Members noted that Cambodia's procurement policies were relatively open and that Cambodia would benefit from membership in the Agreement on Government Procurement. A Member invited Cambodia to ensure transparency in its Government procurement practices and policies and to consider the work being done in the WTO Working Group on transparency in government procurement.

156. The representative of Cambodia replied that Cambodia did not intend to join the plurilateral Agreement on Government Procurement for the time being. He nevertheless took note of Members' comments.

Trade in Civil Aircraft

157. The representative of Cambodia said that the current rate of duty on civil aircraft and aircraft parts ranged from zero to 15 per cent. Cambodia did not accord tariff exemptions on equipment, parts or technical supplies required for airports in connection with air services.

Transit

158. The representative of Cambodia said that Cambodia had no specific regulation related to trade in transit. Cambodia had signed bilateral agreements on transit trade with the Socialist Republic of Viet Nam on 3 April 1994 and with Lao PDR on 12 May 1994. According to the agreement with Viet Nam, the parties allowed the transit of goods across each other's territory, except for prohibited imports and exports such as narcotics, toxic chemicals, radioactive items, pornographic and other materials contrary to public morals, as well as rare, wild and precious animals and plants.

159. The representative of Cambodia confirmed that his Government would apply any laws, regulations and practices governing transit operations and would act in full conformity with the provisions of the WTO Agreement, in particular Article V of the GATT 1994. The Working Party took note of this commitment.

Agricultural policies

(a) Imports – description of the types of border protection maintained

160. The representative of Cambodia said that Cambodia imposed no licensing requirements nor quantitative restrictions or prohibitions on imported agricultural products. The trade-weighted average tariff on agricultural products was approximately 17 per cent. Sanitary and phytosanitary certificates were required for the importation of agricultural products.

(b) Exports

161. The representative of Cambodia said that Cambodia did not impose prohibitions or restrictions on exported agricultural products, except for narcotic drugs. A 10 per cent tax was levied on exports of pure bred cattle and swine, as noted in Table 8. Export restrictions on rice had been lifted in July 2001, but Cambodia would reserve its right to restrict exports of rice temporarily to

prevent or relieve critical shortages of foodstuffs as foreseen under Article XI:2(a) of the GATT 1994. He confirmed that Cambodia operated no export credit, export credit guarantee or insurance programmes for agricultural products.

(c) Internal policies – i.e. description of, and the budgetary expenditure and any revenue foregone involved in each of the domestic support measures in place

162. The representative of Cambodia said that the majority of Cambodia's population lived in rural areas and their livelihood depended on agriculture, particularly the cultivation of rice. Government policies aimed at improving food output and food security. The Ministry of Agriculture managed a Rice Seed Bank, which provided rice seed to farmers affected by natural disasters. Local offices of the Ministry of Water Resources and Meteorology also distributed diesel fuel free of charge to be used by farmers in the operation of irrigation water pumps in emergency drought situations.

163. He provided information on domestic support and export subsidies in agriculture for the period 1998-2000 in document WT/ACC/SPEC/KHM/3 of 11 December 2001 and its Revision 1 of 29 July 2002 and Addendum 1 to that document (background note). In addition to "green box measures", which included the programmes mentioned above as well as farmers' exemptions from agricultural land tax and income tax (classified as decoupled income support), the representative of Cambodia noted in Supporting Table DS:9 that VAT exemptions on agricultural inputs were generally available to farmers, although estimates of the revenue foregone by the Government were not available due to lack of statistical data. Farmers' exemption from land and income taxes, and turnover tax or VAT on own produce at the first point of sale, was an important element of Cambodia's strategy towards poverty alleviation and rural development. Plantation-type agricultural entities were subjected to VAT.

164. Responding to a specific question on Cambodia's Rice Reserve Policy, the representative of Cambodia added that the objective of the Rice Reserve was to provide emergency food aid to victims of natural disasters. During 1998-2000, 1 billion Riels of government funds had been earmarked each year for purchases from the Rice Reserve, and the allocation had increased to 1.64 billion Riels in 2001 and 3,28 billion Riels in 2002. Purchases to the Rice reserve (and sales) were effected by the Green Trade Company and had the effect of moderating movements in the domestic price of rice. When emergencies triggered the release of rice reserves, the National Committee for Disaster Management (NCDM) would purchase the rice from the Green Trade Company at cost plus a small mark-up. The NCDM in turn provided the rice to victims of natural disasters free of charge.

165. The representative of Cambodia agreed that, upon Cambodia's accession, his country would bind its agricultural export subsidies at zero in its Schedule of Concessions and Commitments on Goods, and not maintain or apply any export subsidies for agricultural products. The Working Party took note of these commitments.

Textiles Regime

166. The representative of Cambodia said that textiles and clothing were not subject to any special regime in his country. Although import duties on such products were relatively high in Cambodia – on average 34 per cent for garments and 14 per cent on yarn and fabrics – most Cambodian garments manufacturers were registered investment firms producing for export, and thus exempt from paying duty on imported raw materials and intermediate goods. Cambodia had concluded an Agreement Relating to Trade in Cotton, Wool, Man-made Fibre, Non-Cotton Vegetable Fibre and Silk Blend Textile, and Textile Products with the United States. The representative of Cambodia confirmed that Cambodia would extend the same preferential tariff rates accorded to U.S.-origin textile and apparel products under the Agreement to all WTO Members on an MFN basis upon accession. Under the terms of the bilateral agreement, the United States had placed quantitative restrictions on 13 categories of apparel from Cambodia. Exports of certain textile products to Canada were also restrained under a bilateral agreement. An EU-Cambodia textile agreement allowed quota-free access to the EU market, but set up double-checking (surveillance) on nine categories as well as administrative cooperation, with the view to verify and ascertain Cambodian origin of the goods.

167. The representative of Cambodia confirmed that the quantitative restrictions on imports maintained by WTO Members on textiles and clothing products originating in Cambodia that were in force on the date prior to the date of accession of Cambodia to the WTO should be notified to the Textiles Monitoring Body (TMB) by the Members maintaining such restrictions and would be applied for the purposes of Article 2 of the Agreement on Textiles and Clothing. Thus, for the purposes of Cambodia's accession to the WTO, the phrase "in force on the day before the entry into force of the WTO Agreement" contained in Article 2.1 of the Agreement on Textiles and Clothing shall be deemed to refer to the day prior to the date of accession of Cambodia to the WTO. To these base levels the increase in growth rates provided for in Article 2.13 and 2.14 of the Agreement on Textiles and Clothing shall be applied, as appropriate, in the Agreement on Textiles and Clothing from the date of Cambodia's accession, such base levels and growth rates coming to an end upon the termination of the Agreement on Textiles and Clothing. The Working Party took note of these commitments.

Trade-Related Intellectual Property Rights (TRIPS)

1. General

(a) Industrial property protection

168. The representative of Cambodia said that his Government considered the protection of intellectual property rights essential for the fostering of economic development, to stimulate foreign investment and the transfer of technology, and to facilitate Cambodia's integration into the world economy. At the outset Cambodia's protection of intellectual property rights had been based on Articles 47 and 48 of the Provisions Relating to the Judiciary and Criminal Law and Procedure Applicable in Cambodia During the Transitional Period, issued on 10 September 1992, and Declaration No. 368 of the Ministry of Commerce on Procedures of the Intellectual Property Department of 15 December 1997.

169. He added that his Government had been drafting new legislation with the help of foreign experts and WIPO to bring Cambodia's legislation into line with the TRIPS Agreement, including a Law on Marks, Trade Name, and Acts of Unfair Competition, promulgated on 7 February 2002; a Law on Patents, Utility Models and Industrial Designs promulgated on 22 January 2003; and a Law on Copyright and Related Rights promulgated on 5 March 2003. Further laws on Geographical Indications, Layout Design of Integrated Circuits, Protection of Undisclosed Information and Trade Secret, and Plant Variety Protection were in preparation and expected to be promulgated in 2004. Cambodia was also working on a new Civil Code, scheduled for adoption in 2004, which would backstop the protection of intellectual property. He confirmed that the new Civil Code would not duplicate provisions of specific intellectual property laws.

170. The representative of Cambodia provided detailed information on the implementation of the TRIPS Agreement in document WT/ACC/KHM/7 and its Revisions 1 and 2. He also submitted an Action Plan in document WT/ACC/KHM/16, and a revised Action Plan in document WT/ACC/KHM/16/Rev.1, and described the efforts of his Government to secure technical assistance in connection with the Action Plan.

(b) Responsible agencies for policy formulation and implementation

171. The representative of Cambodia said that the Department of Intellectual Property of the Ministry of Commerce was responsible for the formulation and implementation of policy regarding marks, trade name, and acts of unfair competition. The Ministry of Industry, Mines, and Energy was in charge of patents, utility models and industrial designs, the Ministry of Culture and Fine Arts of

copyrights and related rights, and the Ministry of Information recognized the collective management organizations of broadcasting rights.

172. Asked whether Cambodia intended to rationalize its administrative arrangements by establishing a single agency in charge of the administration of rights subject to grant and registration such as patents, trademarks and industrial designs, the representative of Cambodia replied that Cambodia had established a Committee to Govern the Three Areas of Intellectual Property Rights (i.e. trademarks, patents and copyright). The Minister of Commerce chaired the Committee, which had a mandate to coordinate the technical and administrative procedures of the various agencies with IPR responsibilities. The Committee also coordinated technical assistance in these area. He saw this Committee as a possible first step in the direction of establishing a single agency in charge of administration of rights subject to grant and registration.

(c) Participation in international intellectual property agreements

173. The representative of Cambodia said that Cambodia had been a member of the World Intellectual Property Organisation (WIPO) since 1995 and the Paris Convention for the Protection of Industrial Property Rights since 1998. Cambodia planned to adhere to the WIPO Copyright Treaty (WCT) and the WIPO Performances and Phonograms Treaty (WPPT) in 2005, and to join the Berne Convention after adoption of the Law on Copyright and Related Rights, and the Patent Cooperation Treaty upon enactment of the Law on Patents, Utility Models and Industrial Designs. His Government was also considering membership in the International Convention for the Protection of New Varieties of Plants, and a new law was being drafted to this end with the assistance of UPOV. Ratification of the Geneva Phonogram Convention and the Brussels Satellite Convention would also depend upon the enactment of the Law on Copyright and Related Rights and other relevant legislation currently in preparation.

174. Cambodia had been participating in the ASEAN Framework Agreement on Intellectual Property Cooperation since 30 April 1999. Cambodia had also concluded bilateral agreements on intellectual property protection and cooperation with the United States and the Kingdom of Thailand.

(d) Application of national and MFN treatment to foreign nationals

175. The representative of Cambodia said that national and MFN treatment was granted to all foreign nationals under existing intellectual property legislation, and all draft legislation continued to integrate the same principles.

(e) Fees and taxes

176. The representative of Cambodia said that trademarks processing fees amounted to US\$50 per certificate for registration, US\$50 per class for publication, and US\$5 per class for services. These fees were subject to revision by the Ministry of Commerce, having consulted with the Ministry of Economy and Finance (though a joint Prakas of the Ministry of Commerce and the Ministry of Economy and Finance). Fees concerning patents and copyright remained to be determined.

2. Substantive standards of protection, including procedures for the acquisition and maintenance of intellectual property rights

(a) Copyright protection

177. The representative of Cambodia said that a new Law on Copyright and Related Rights had been adopted by the Council of Ministers in March 2002, and ratified by the National Assembly and the Senate on 21 January 2003. The Law on Copyright and Related Rights had been promulgated on 5 March 2003. In the interim, copyright protection had been regulated by Article 48 of the 10 September 1992 Provisions Relating to the Judiciary and Criminal Law and Procedures Applicable in Cambodia During the Transitional Period.

178. The Law provided copyright protection for literary works; artistic and scientific documents; official legislative, judicial and administrative texts; spoken works (conferences, speeches, sermons, etc.); dramatic and dramatic-musical works; choreographic works and pantomimes; musical compositions with or without words; audiovisual works with or without sound and photographs extracted from these works; drawing, painting, architectural, sculptural, engraving and lithography works; graphic and typographic works; photographic works and works produced with techniques similar to photography; work of applied arts; illustrations, cards, plans, sketches and plastic works pertaining to geography, topography, architecture and sciences; computer programmes; and derived works, such as translation, adaptation, transformation of one or several pre-existing works.

179. Protection was provided for the lifetime of the author and 50 years after his/her death. The rights subsisted for 50 years, starting on 1 January of the calendar year following the date of fixation, first disclosure of the performance, or first broadcast. As to pre-existing works that had not yet fallen into the public domain, the spirit of the Law on Copyright and Related Rights complied throughout with Articles 1 through 21 of the Bern Convention, including Article 18. Chapter 5 (Articles 30 and 31) and Chapter 6 (Article 67) of the Law on Marks, Trade Names and Acts of Unfair Competition also covered the protected duration and adherence to international treaties. In response to a specific

question, the representative of Cambodia added that the Law included enforcement provisions providing for destruction of infringing goods (Articles 58-66).

180. He also added that the Law on Copyright and Related Rights provided for the protection of compilations of data (Articles 7 and 21), computer programs as literary works, rental rights for computer programmes, and the exclusive rights of a broadcaster to authorize rebroadcasts by wireless means (Articles 47 and 48).

(b) Trademarks, including service marks

181. The representative of Cambodia said that the new Law on Marks, Trade Name and Acts of Unfair Competition had been promulgated on 7 February 2002. A sub-Decree and Implementing Regulations to the Trademarks Law was expected to be adopted during 2003. Under the Law, applications for registration of a mark were to be submitted to the Intellectual Property Division at the Ministry of Commerce. Actual use of a mark was not a condition for filing an application. Priority was given to the person who first validly filed the mark or claimed the earliest priority to the mark. Priority rights to a mark already filed in another member of the Paris Convention or the WTO could be conferred, on the basis of the first filing date, to the same applicant or his successor, provided that the filing in the Kingdom of Cambodia was made within 6 months following the first filing. A trademark was protected for 10 years and could be renewed indefinitely for successive periods of ten years. Failure to use a registered mark for more than 5 years without valid reasons could lead to nullification of the protection. Trademark rights could be transferred or licenced and the right holder had the exclusive right to request the competent authority to handle infringement cases. The use of a trademark by a licence holder (but not the mere licensing of the right) was considered as an act of use.

182. Protection could be granted to a mark without distinctive characteristics, provided that such mark had been widely used and enjoyed a good reputation in Cambodia. He confirmed that well-known marks were protected in accordance with Article 6bis of the Paris Convention and Article 16 of the TRIPS Agreement under Article 4(e)(f) and Article 14(f) of the Law on Marks, Trade Name and Acts of Unfair Competition. Cambodia had already conducted several enforcement operations with respect to well-known marks, and he confirmed Cambodia's commitment to adhere to, and effectively enforce, Cambodia's international obligations and its intellectual property laws with respect to well-known marks in a fair and transparent manner in the future. The Law also included provisions concerning unfair competition, including indications or allegations likely to mislead the public. No specific law on unfair competition was envisaged for the time being.

(c) Geographical indications, including appellations of origin

183. The representative of Cambodia said that Cambodia did not protect geographical indications at present. He expected a new law covering this subject, including additional protection for geographical indications for wines and spirits, to be promulgated in 2004.

(d) Industrial designs

184. The representative of Cambodia said that industrial designs were protected according to the Law on Patents, Utility Models and Industrial Designs, promulgated on 22 January 2003. Only new industrial designs, i.e. designs not disclosed to the public through publication or use prior to the priority date, could be registered under the new Law. Protection did not extend to parts of a design dictated essentially by technical considerations. Industrial designs contrary to public order or morality could not be registered. Applications for registration were to be submitted to the Ministry of Industry, Mines, and Energy, and the priority date was the date of filing or first claim. Applications had to be published to afford an opportunity to oppose the registration. Protection was provided for 5 years and could be renewed twice. Industrial designs could be transferred or licenced. The owner had the exclusive right to request the competent authority to take action against infringements and could claim compensation.

185. A Member invited Cambodia to specify how Cambodia's legislation complied with the provisions of Article 26.1 of the TRIPS Agreement concerning the right of an industrial design holder to prevent the importation of articles bearing or embodying a protected design. The representative of Cambodia replied that Cambodia's legislation guaranteed the right for the holder to prohibit third persons from "exploiting" a registered industrial design, i.e. by making, selling, or importing articles incorporating the industrial design (section 42.1 of the draft Law).

(e) Patents

186. The representative of Cambodia said that the Law on Patents, Utility Models and Industrial Designs had been promulgated on 22 January 2003. Drafting of implementing regulations under this Law would commence in the first quarter of 2003. The Law afforded patent protection to inventions which involved an inventive step and were industrially applicable. Patents could not be issued for discoveries, scientific theories and mathematical methods; schemes, rules and methods for doing business, performing intellectual activities, or playing games, and computer programs; diagnostic, therapeutic and surgical methods for the treatment of human beings and animals; inventions contrary to public order or morality; and biological methods for breeding plants and animals, other than

microbiological methods, as well as products derived from these methods. In response to a specific question concerning the exclusions, he added that the algorithms used in computer programmes, not the programmes *per se*, were ineligible for patent protection, and that "schemes or methods for doing business" were only ineligible for patent protection to the extent that they were lacking industrial application. These distinctions would be clarified in the implementing regulations to the Law.

187. Applications for registration were submitted to the Ministry of Industry, Mines, and Energy, and priority was given to the person having first filed an application or claimed priority to the patent. Patent applications were subject to mandatory examination as to form and substance. Patents were granted upon expiration of an 18 month period starting on the priority date and protection was provided for 20 years from the filing date. The patent holder had the exclusive right to transfer or licence a patent and to request third persons to stop infringement, and could claim compensation. Provisions on compulsory licensing, contained in Articles 47-62 of the Law on Patent, Utility Models and Industrial Designs, could be applied following three years of non-use of a patent, or if a patented product had not been offered for sale in sufficient quantity to supply the Cambodian market without valid reason, but only for use predominantly for the supply of the domestic market.

188. Specifically concerning action against counterfeit pharmaceuticals, he noted that right holders could use provisions in the Law on the Management of Pharmaceutical Products to protect their lawful rights. Aware of the distinction between counterfeit and generic products, he noted that in the case of importation of counterfeit medicines, right holders could seek protection of their rights under the Trademark Law and/or the provisions of the Law on the Management of Pharmaceutical Products. Article 12 of the latter provided for criminal penalties - fines of Riels 20 million to 50 million, and prison terms ranging from 5 to 10 years - for knowingly producing, importing, exporting, distributing or selling unregistered narcotic drugs or pharmaceuticals that were counterfeit, of sub-standard quality or expired, and thus having an adverse effect on human health.

(f) Plant variety protection

189. The representative of Cambodia said that plant varieties had been excluded from the Law on Patent, Utility Models and Industrial Designs. Thus, Cambodia did not provide plant variety protection at present, but a draft Law on Plant Variety Protection was in preparation with the assistance of UPOV. Promulgation of the Law was at present foreseen in 2005.

(g) Layout designs of integrated circuits

190. A Member noted that Cambodia's patent utility law did not appear to contain any provisions for the protection of layout-designs as required by Article 35 of the TRIPS Agreement, and sought confirmation that these provisions were or would be provided for in a separate law.

191. The representative of Cambodia said that the subject-matter would be protected through a new Law on Layout Designs of Integrated Circuits. Cambodia was presently seeking technical assistance on this topic.

(h) Requirements on undisclosed information, including trade secrets and test data

192. The representative of Cambodia said that Article 128 of the Law on Patent, Utility Models and Industrial Designs provided protection for undisclosed data. In addition, Cambodia would prepare and adopt a separate Law on the Protection of Undisclosed Information and Trade Secrets. The Law was planned for adoption by the National Assembly in 2004 and promulgation in 2005.

3. Measures to control abuse of intellectual property rights

193. The representative of Cambodia said that current measures to control abuse of intellectual property rights were based on the Provisions Relating to the Judiciary and Criminal Law and Procedure Applicable in Cambodia During the Transitional Period of 10 September 1992, and Declaration No. 368 of 15 December 1997 concerning measures to control abuse of intellectual property rights in Cambodia. In addition, new laws such as the Law on Marks, Trade Name and Acts of Unfair Competition, the Law on Copyright and Related Rights and the Law on Patents, Utility Models and Industrial Designs contained provisions concerning the non-performance of obligations, such as failure to pay maintenance fees, or failure to use registered trademarks or patents for the period determined by the law, which could result in nullification of the protection or the granting of a licence to a third person or administrative body with a view to supplying the domestic market.

4. Enforcement

(a) General obligations

194. The representative of Cambodia said that Cambodia's draft laws on intellectual property would comply fully with the provisions of Article 41 of the TRIPS Agreement concerning the availability of enforcement procedures under domestic legislation, the existence of fair and equitable

procedures, and the opportunity for parties to proceedings to obtain the review of final administrative decisions and initial judicial decisions by a judicial authority.

(b) Civil judicial procedures and remedies

195. The representative of Cambodia said that provisions on civil judicial procedures and remedies had been included in the draft Civil Code, Civil Procedure Code and specific intellectual property laws currently in preparation. Implementing regulations for these laws and codes were under consideration. The Civil Procedure Code would include procedures concerning civil judgement, execution and provisional measures, and intellectual property legislation would cover provisions for remedies and provisional measures. Enforcement authorities would comprise Courts, Customs, as well as CAMCONTROL, an organisation under the authority of the Ministry of Commerce, and the Economic Police, both in charge of fraud repression and inspections of exported and imported goods. Under the new regulations, courts - including municipal and provincial courts - would have the authority to handle cases of abuse of intellectual property rights, disputes over royalties and remuneration, violation of authors and application rights, and disputes related to the transfer and licensing of rights. The injured party could seek court injunctions to stop infringement and claim compensation for damages. The amount of damages would be calculated on a case-by-case basis. Addressing a query by a Member regarding the factors used by the Courts to determine the damages in the absence of specific legislation on this issue, the representative of Cambodia said that the calculation was based on the value of the benefits lost because of the infringement and on the duration of the infringement act. He added that this matter was currently being discussed among judges and relevant authorities, although the elaboration of guidelines in assessing damages and imposing remedial measures was currently not being considered. The Civil Code and the Civil Procedure Code would provide the legal authority, though no detailed provisions, for the award of damages and other remedial measures. He nevertheless believed that Cambodia's current IPR legislation and its future laws were, and would remain, in full compliance with the requirements of Article 48 of the TRIPS Agreement with respect to the indemnification of the defendant.

196. Courts had the authority to order that documents be produced (Article 152 of the draft Civil Procedure Code), and failure to do so would lead the Court to consider the other party's allegations to be true (Article 153), and to impose a fine on the impeding party (Article 154). Confidential information was protected under Article 42 of the Trademarks Law and Article 128 of the draft Patents Law. A general provision referring to specific legislation was included in Article 115.1 of the draft Civil Procedure Code.

197. A Member voiced concern about Cambodia's efforts to ensure compliance with Article 48 of the TRIPS Agreement regarding the indemnification of the defendant, including appropriate attorney's fees. In response to a specific concern, the representative of Cambodia said that draft legislation had not provided judicial and administrative officials the authority to order infringers to provide right holders with information on third parties involved in the production and distribution of infringing goods, as mentioned in Article 47 of the TRIPS Agreement, but investigative judges (including Customs and other competent authorities) could request infringers to submit such information to the Court in the case of criminal procedures, and the issue was addressed in Article 42 (second paragraph) of the Law on Marks, Trade Name and Acts of Unfair Competition. He confirmed that decisions on the merits in Court proceedings were provided in writing and made available to the public through publication in newspapers, and added that his Government was also considering the publication of Court decisions in the Official Gazette of the Ministry of Commerce.

(c) Provisional measures

198. The representative of Cambodia said that courts and authorities responsible for administrative enforcement of intellectual property legislation had the authority to order prompt and effective provisional measures based on *prima facie* evidence to prevent an infringement and preserve relevant evidence. Pursuant to Article 30a of the Law on Marks, Trade Name and Unfair Competition, there was *prima facie* evidence when there were reasonable grounds to believe that an infringement was taking place. Applicable provisional measures included detention of material evidence and facilities, search for concealed materials and facilities, order to stop an infringement, confiscation of the infringing goods, and temporary seizure of the goods with a view to ensuring proper compensation.

(d) Administrative procedures and remedies

199. The representative of Cambodia said that under the new regulations the authorities competent to apply administrative measures and remedies were the Market Control sections of the Ministry of Commerce, Ministry of Industry, Mines, and Energy, and Ministry of Culture and Fine Arts; Customs offices; and the Economic Police. Administrative measures and remedies included warning, monetary fines up to 25 million Riels (about US\$6,000), seizure of material evidence and facilities, destruction of infringing goods, and compensation for damages. Pursuant to the Law on Marks, Trade Name and Acts of Unfair Competition and the draft Law on Copyrights and Related Rights, competent authorities had the power to issue injunctions to order a party to stop an infringement and to suspend clearance of goods, as stipulated in Article 44.1 of the TRIPS Agreement, but did not have the authority to order infringers to provide right holders with information on third parties involved in the production and distribution of infringing goods. They could however acquire such information

themselves. The Law on Marks, Trade Name and Acts of Unfair Competition (Article 46) and the Law on Copyright and Related Rights (Article 59) prohibited the re-exportation of counterfeit or pirated goods and conferred customs and other competent authorities the power to destroy infringing goods upon a court decision. Infringing goods could not be destroyed without a court order.

(e) Special border measures

200. The representative of Cambodia said that the draft Law on Customs did not include provisions on border measures as required by Article 51-60 of the TRIPS Agreement. The necessary border measures had been incorporated in the Law on Marks, Trade Names and Acts of Unfair Competition (Articles 35-47). In addition, the Law on Copyrights and Related Rights (Article 63) included, by reference, all border measures included in the Law on Marks, Trade Names and Acts of Unfair Competition. He saw no need to consolidate these measures in the new Law on Customs, as the draft Law (Article 8) explicitly required the customs authorities to execute all laws of Cambodia, and this provision would be underpinned by a sub-Decree to be prepared by the Department of Customs and Excises, in collaboration with the Ministries responsible for the protection of intellectual property.

201. Cambodia's legislation provided for seizure, forfeiture and destruction of infringing goods, evidences, copies and equipment used in the creation of infringing goods, and prohibited the re-exportation of counterfeit trademark goods or use of different customs procedures. Under the new regulations, customs authorities were allowed to inform right holders about the possible importation or exportation of infringing goods. The right holder could apply to the customs authorities to suspend clearance of the suspected goods. The application should include a detailed description of the goods. The customs authorities were obliged to inform the right holder of the measures taken, and should cancel the measures if no proceedings had been initiated within 10 days. The right holder was liable for any damages resulting from an unsubstantiated application. In case of *prima facie* evidence, customs authorities could suspend clearance of suspected goods on their own initiative, and should immediately inform the right holder of the place and date of suspension.

(f) Criminal procedures

202. The representative of Cambodia said that infringement of intellectual property was liable to criminal prosecution pursuant to the Law on Marks, Trade Names and Acts of Unfair Competition (Articles 63 through 68), the Law on Patent, Utility Models and Industrial Designs (Articles 132 and 133), and the Law on Copyright and Related Rights (Articles 64 and 65). Criminal infringement cases were punishable with fines of up to 25 million Riels (about US\$6,000) and/or prison sentences

ranging from 1 to 60 months. The maximum penalties were doubled for second offences committed within 5 years from the date of the first conviction. Implementing regulations to the laws would specify the circumstances under which these criminal penalties would be imposed. In case of sale, distribution and importation of counterfeit pharmaceuticals, provisions in the Law on the Management of Pharmaceuticals could also be applied to impose criminal penalties and protect the rights of the right-holders.

203. The representative of Cambodia confirmed that implementation of the TRIPS Agreement by Cambodia would proceed in accordance with the revised Action Plan circulated in document WT/ACC/KHM/16/Rev.1, and summarized in Table 12. Urged by a Member to accelerate work on the of the new Civil Procedure Code, which underpinned the enforcement of other laws, the representative of Cambodia said that the draft Civil Procedure Code had been completed and would be submitted to the Council of Ministers in the near future.

204. Having reviewed Cambodia's Action Plan for compliance with the requirements of the TRIPS Agreement, a Member sought a realistic plan laying out the measures that Cambodia would take over time to bring its regime into compliance with specific provisions of the TRIPS Agreement as soon as possible. The plan would constitute an understanding between Cambodia and the Working Party on how Cambodia would use the transition period, and form a blueprint for the technical assistance making compliance possible within the timeframe contemplated. Cambodia should also provide specific assurances on its application of measures covered by the TRIPS Agreement during any transition period approved by the Working Party. TRIPS-consistent measures already in place should not be subject to transitions, and Articles 3, 4 and 5 of the TRIPS Agreement, providing for *inter alia* national treatment and MFN treatment, should apply from the date of accession. Moreover, Cambodia should not allow production of goods or works inconsistent with the substantive provisions of the TRIPS Agreement during the transition period.

205. The representative of Cambodia thanked the Working Party members for their support and for their pledges of technical assistance. For the reasons given above, the Government of Cambodia requested that the Working Party grant a transitional period to 1 January 2007 to obtain technical assistance and equip the administration to implement fully the obligations of the TRIPS Agreement. The representative of Cambodia confirmed that should a transition be granted for the implementation of the WTO Agreement on TRIPS, his government was prepared to undertake the following commitments. During the transition periods in the Action Plan for full implementation of the TRIPS Agreement, Cambodia will fully apply Articles 3, 4 and 5 of the Agreement that provide for, *inter alia*, national treatment and MFN treatment under current legislation in place. Cambodia will also

ensure that any change made in its laws, regulations and practice during this period will not result in a lesser degree of consistency with the provisions of the TRIPS Agreement that existed on the date of accession. In addition, Cambodia will not grant patents, trademarks, or copyrights, or marketing approvals for pharmaceuticals or agricultural chemicals inconsistent with the provisions of the TRIPS Agreement.

206. The representative of Cambodia further confirmed that, should a transition be granted, his government would ensure that existing rates of infringement would not significantly increase and that any infringement of intellectual property rights would be addressed immediately in cooperation with the assistance from affected right holders. He further confirmed that during the transition period, that Cambodia would protect against unfair commercial use of undisclosed test or other data submitted in support of applications for marketing approval of pharmaceutical or of agricultural chemical products which utilize new chemical entities, by providing that no person other than the person who submitted such data may, without the permission of the latter person, rely on such data in support of an application for product approval for a period of at least five years from the date on which Cambodia granted marketing approval to the person that produced the data. Prior to the issuance of marketing approval of any pharmaceutical and agricultural chemical products, the relevant Ministries in Cambodia will determine the existence of a patent covering a product for which an application for marketing approval had been filed by a party other than the patentee, and will not approve such application for marketing approval until the date of the expiration of such patent. He added that Cambodia would seek out all available technical assistance to ensure that its capacity to fully enforce its TRIPS-consistent legal regime upon expiration of the transition periods is assured and that Cambodia would make available all legislation in draft and promulgated form to WTO Members so that advice on TRIPS-consistency can be obtained. In response to requests from delegations for more specificity, the representative of Cambodia presented an Action Plan setting out details of the steps that still remained to be taken in order to achieve this objective and a timetable for each step (Table 12).

207. The representative of Cambodia confirmed that Cambodia would apply the Agreement on Trade-Related Intellectual Property Rights no later than 1 January 2007 according to the action plan in Table 12 with the understanding that during this period protection for intellectual property rights listed in paragraphs [205 and 206] would be applied in Cambodia. The Working Party took note of this commitment.

Policies affecting trade in services

208. The representative of Cambodia said that the services industry, which was dominated by private sector, had accounted for approximately 40 per cent of Cambodia's GDP in 1999, having grown about 6 per cent per year between 1995 and 1999. The legal framework was still under development, and a number of services sectors remained to be regulated. Information based on the services sectoral classification list was provided in document WT/ACC/KHM/2, Annex 7A.

209. He added that Cambodia's legislation generally complied with the principles and provisions of the General Agreement on Trade in Services (GATS). Foreign ownership of newspapers was limited

to 20 per cent of the total number of newspapers in the Cambodian language. Companies owned by foreigners could not own land. The number of foreign nationals to be employed in a particular establishment or services sector was limited to 10 per cent of the workforce and only available to residents of Cambodia. The Ministry of Labour could authorize a higher percentage of foreign employment where specific skills were not available in the domestic market. Pursuant to the Cambodian Law on Bar adopted on 15 June 1995, foreign lawyers could not represent clients, conduct activities to attract clients, or publish commercial advertisements. They were, however, permitted to work in commercial association with Cambodian lawyers. [The commercial association requirement does not apply when legal services are provided in the areas of foreign and international law.]

210. In 1989, Cambodia had replaced a mono-type banking system by a two-tier system comprising the central bank and commercial banks. Foreign banks had been authorised in Cambodia since 1991. The Law on Banking and Financial Institutions, promulgated in 1999, governed all financial operations, except insurance. As of 31 December 2002, the banking sector in Cambodia included 13 commercial banks, one of which was a State-owned bank, 9 privately-owned banks, and 3 foreign-owned banks (two of which were subsidiaries). The banking sector also comprised four specialized banking institutions, which could only engage in lending activities aimed at providing rural credit and support to small and medium sized enterprises. The Rural Development Bank, which distributed funds received from donors, was one of these institutions. In addition, a large number of micro-finance institutions (around 90) were also operating in Cambodia. These institutions were non-governmental organizations engaging in humanitarian activities and focusing on poverty reduction in line with the policy introduced by his Government in 2000. The micro-finance institutions provided some credit and promoted savings, especially among their members. He stressed that commercial banking was the main banking activity in Cambodia. The other institutions were marginal, and existed due to the unwillingness of commercial banks to provide such specialized services in Cambodia. The Law on Banking and Financial Institutions and subsequent regulations guaranteed foreign banks rights and obligations equal to local banks and there was no restriction regarding foreign ownership of banks. A list of laws and regulations concerning the banking sector was provided in document WT/ACC/KHM/2, Annex 2, section 5.

211. The insurance sector had been regulated by the Law on the Establishment of Insurance Industry of 8 February 1992, the Sub-Decree on the Creation of the State-Owned Insurance Company of 20 September 1990, the Sub-Decree on the Control of Insurance Activity of 9 June 1992, and the Notice of the Government of 22 September 1992. A new Insurance Law had been promulgated in 2000, and an Insurance sub-Decree to implement the Insurance Law had been adopted in 2001. The Law and the sub-Decree established the general framework for the setting-up of insurance companies,

including minimum capital requirements and solvency margins. Several private companies, including foreign insurance companies, competed in the non-life insurance market. The market also included CAMINCO, a State-owned insurance company operating on an equal commercial basis and in competition with the other insurance companies. All licensed insurance companies could provide all types of insurance products, including reinsurance. However, according to the Insurance Sub-Decree, all insurance companies were required to re-insure 20 percent of their total risks in Cambodia. In addition, all insurance contracts with a total sum insured of US\$500,000 or less had to be reinsured locally with any of the insurance companies operating in Cambodia. Insurance companies were free to choose where and with which company to reinsure all other risks.

212. Government monopolies existed in the supply of postal services for transported mail weighing less than 500 grams, advertising (to expire in 2003), railway transport, electricity distribution, and water supply. Preferential credits were being provided to Electricité du Cambodge and to water supply services. Exclusive suppliers were present in the wholesale distribution sector. The representative of Cambodia said that Cambodia's authorities was acting in accordance with Article VIII of the GATS to ensure that monopolies and exclusive service suppliers would not abuse their monopoly position outside the scope of their monopoly rights.

213. In the telecommunication sector, the Ministry of Posts and Telecommunications of the Kingdom of Cambodia (MPTC) was responsible for operating telecommunication services and facilities, and issuing licences. During 1990s, the market had been opened progressively to foreign investors in the form of joint ventures delivering international telecommunications and Internet, radio, and mobile cellular services. According to a new law in preparation, Cambodia envisaged to establish an independent regulatory body providing for more transparency in the delivery of licences. The new law was expected to be ready for submission to the Council of Ministers by 2004. Additional time would be needed for its adoption and implementation.

214. Concerning the establishment of enquiry points foreseen in Article III:4 of the GATS, the representative of Cambodia said that information on trade in services was available from the ASEAN and International Organizations Department at the Ministry of Commerce.

Transparency

Publication of information on trade

215. Concerning the transparency requirements prescribed in Article X of the GATT, Article III of the GATS and other WTO Agreements, the representative of Cambodia said that Article 93 of

Cambodia's Constitution required laws to be published in the Official Journal and brought to the knowledge and attention of the population before entering into force. According to Article 93 of the Constitution, all laws and other regulations were published in the Official Journal, in the Khmer language, and entered into force 10 days after their publication in Phnom Penh and 20 days in the rest of the country. Implementing decisions of the Ministries were also published, and Cambodia would ensure that all regulations would be included per GATT Article X:1. The date of entry into force was stipulated in each law. As to the establishment of enquiry points stipulated in Article III of the General Agreement on Trade in Services, he confirmed that Cambodia had set up operational enquiry points in conformity with the requirements of the WTO Agreements on GATS, TBT and SPS.

216. A Member stated the Official Journal was only available by subscription, and many private sector entities seemed unaware of its existence. Although all laws appeared to be published in the Journal, some new regulations had been omitted. This Member suggested that Cambodia might consider posting its Official Journal on the internet to improve access to new laws and regulations, and would welcome other practical steps taken by Cambodia to ensure proper publication of new regulations in the Official Journal. This Member also asked to what extent Article 93 of the Constitution or other laws or regulations required the publication prior to enactment or implementation of regulations, judicial decisions and administrative rulings of general application to be published similarly "in such a manner as to enable governments and traders to become acquainted with them" as required by Article X of the GATT, and what steps Cambodia had taken to implement the transparency measures required by specific WTO Agreements.

217. In response, the representative of Cambodia confirmed that from the date of accession all laws, regulations, decrees, judicial decisions and administrative rulings of general application related to trade would be published in a manner that fulfils WTO requirements. As such, no law or regulation related to international trade would become effective prior to such publication in the Official Journal. He further stated that all laws which were amended to comply with the WTO Agreements contained provisions which require such publication. Decrees, sub-Decrees and Prakas affecting international trade would be published in the Official Journal. Cambodia's Constitution and the laws currently in place or listed in the Attachment as slated for near-term enactment would implement fully Article X of the GATT 1994 and the other transparency requirements in WTO Agreements requiring notification and publication. He further confirmed that by 1 January 2004, Cambodia would establish or designate a [single] official journal or website, published or updated on a regular basis and readily available to WTO Members, individuals and enterprises, dedicated to the publication of all regulations and other [normative acts or] measures pertaining to or affecting trade in goods, services, and TRIPS prior to enactment, and that Cambodia would provide a reasonable period, i.e. no less than 30 days,

for comment to the appropriate authorities before such measures are [implemented][adopted], except for those regulations and other measures involving national emergency or security, or for which the publication would impede law enforcement. [The publication of such regulations and other measures would include the effective date of these measures and, where appropriate or possible, list the products and services affected by the particular measure, identified by appropriate tariff line and classification.] The Working Party took note of these commitments.

Notifications

218. The representative of Cambodia said that at the latest twelve months after the entry into force of the Protocol of Accession, Cambodia would submit all initial notifications required by any Agreement constituting part of the WTO Agreement. Any regulations subsequently enacted by Cambodia which gave effect to the laws enacted to implement any Agreement constituting part of the WTO Agreement would also conform to the requirements of that Agreement.

Trade agreements

219. The representative of Cambodia said that the signing of the Paris Peace Agreement in 1991 and the 1993 elections had allowed Cambodia to rejoin the international community and participate in multilateral and regional institutions. Thus, Cambodia was now a member of institutions such as the International Bank for Reconstruction and Development; the International Monetary Fund; the Asian Development Bank; the International Development Association; the Multilateral Insurance Guarantee Agency; the United Nations Development Programme; the United Nation Conference on Trade and Development; the Food and Agriculture Organization; the International Fund for Agricultural Development; the International Civil Aviation Organization; the World Intellectual Property Organization; the International Standards Organization; the World Health Organization; the International Maritime Organization; the International Telecommunications Union; the United Nations Educational, Scientific and Cultural Organization; the World Tourism Organization; the Economic and Social Commission for Asia and the Pacific; and the Paris Convention for the Protection of Industrial Property Rights.

220. Since 1993, Cambodia had concluded 24 agreements and memoranda of understanding relating to economic cooperation, foreign trade, promotion and protection of investment and intellectual property rights protection with 13 countries, including China, Indonesia, Malaysia, the Lao PDR, Viet Nam, Thailand, the Russian Federation, the United States, the Philippines and the European Union. The bilateral trade agreements did not include preferential arrangements, but contained provisions granting MFN treatment on a general or specific basis (details are provided in

document WT/ACC/KHM/2, pages 91-93). In addition, Cambodia had concluded a Memorandum of Mutual Cooperation on Intellectual Property with Thailand; an Investment Incentives Agreement with the United States; an Agreement on Cultural and Scientific Cooperation with the Russian Federation; an Agreement on Economic, Scientific and Technical Cooperation with Malaysia; as well as transit agreements with Lao PDR and Viet Nam.

221. Cambodia had joined the Association of South-East Asian Nations on 30 April 1999, which implied automatic accession to the ASEAN Free Trade Area (AFTA). Together with the other members of ASEAN, Cambodia had accepted the Agreement on the Common Effective Preferential Tariff Scheme for the ASEAN Free Trade Area (CEPT), whereby the tariffs applicable to ASEAN products would be reduced to 0-5 per cent over a ten year period starting on 1 January 2000. Cambodia's Inclusion List (IL), Temporary Exclusion List (TEL), Sensitive List (SL) and General Exception List (GEL) had been endorsed by the 13th AFTA Council and the 31st ASEAN Economic Ministers Meeting in October 1999. At the third ASEAN Informal Summit in November 1999, Cambodia had agreed to eliminate tariffs on essentially all ASEAN products by 2015. In addition to tariffs, the ASEAN framework also covered areas such as customs, industrial cooperation, intellectual property cooperation, services, economic cooperation, promotion and protection of investment, energy cooperation, facilitation of goods in transit, mutual recognition, etc.

222. The representative of Cambodia confirmed that the ASEAN Free Trade Area was the only free trade area to which Cambodia was a member, and that Cambodia did not grant trade preferences to any trading partner outside the ASEAN framework. Asked to provide the texts the FTAs, the representative of Cambodia said that the Agreements related to AFTA would be submitted to the Working Party if members were unfamiliar with them. Statistical data on Cambodia's preferential trade was not yet available.

223. The representative of Cambodia confirmed that Cambodia would observe all WTO provisions, including those of Article XXIV of the GATT 1994 and Article V of the GATS in the trade agreements [to which it belongs], and would ensure that the provisions of these WTO Agreements for notification, consultation and other requirements concerning free trade areas and customs unions of which Cambodia was a member were met from the date of accession. He confirmed that Cambodia would, within 12 months after accession, submit notifications and copies of the Free Trade Area and Customs Union Agreements to which it belongs to the Committee on Trade in Goods for transmittal to the Committee on Regional Trade Agreements (CRTAs) for review. The Working Party took note of this commitment.

Conclusions

224. The Working Party took note of the explanations and statements of Cambodia concerning its foreign trade regime, as reflected in this Report. The Working Party took note of the commitments given by Cambodia in relation to certain specific matters which are reproduced in paragraphs [25, 27, 36, 50, 55, 59, 62, 71, 77, 82, 93, 96, 99, 105, 108, 115, 120, 122, 131, 142, 145, 150, 152, 159, 165, 167, 207, 217 and 223] of this Report. The Working Party took note that these commitments had been incorporated in paragraph 2 of the Protocol of Accession of Cambodia to the WTO.

225. Having carried out the examination of the foreign trade regime of Cambodia and in the light of the explanations, commitments and concessions made by the representative of Cambodia, the Working Party reached the conclusion that Cambodia be invited to accede to the Marrakesh Agreement Establishing the WTO under the provisions of Article XII. For this purpose, the Working Party has prepared the draft Decision and Protocol of Accession reproduced in the Appendix to this Report, and takes note of Cambodia's Schedule of Concessions and Commitments on Goods (document WT/ACC/KHM/.../Add.1) and its Schedule of Specific Commitments on Services (document WT/ACC/KHM/.../Add.2) that are annexed to the draft Protocol. It is proposed that these texts be adopted by the General Council when it adopts the Report. When the Decision is adopted, the Protocol of Accession would be open for acceptance by Cambodia which would become a Member thirty days after it accepts the said Protocol. The Working Party agreed, therefore, that it had completed its work concerning the negotiations for the accession of Cambodia to the Marrakesh Agreement Establishing the WTO.

ANNEX I

Laws, Regulations and Other Information Provided to the Working Party by Cambodia

1. Financial Blueprint of the Royal Government of Cambodia (2001-2010);

	87141110	- - For cycle of subheading Nos 87111000, 87112010 and 87119010	5
	8714.11.20	--- For cycles of subheadings Nos. 8711.20.20, 8711.30.00, 8711.40.00, 8711.50.00, 8711.90.20	15
	87141910	- - For cycles of subheadings Nos 87111000,87112010 and 87119010	5
	8714.19.20	--- For cycles of subheadings Nos. 8711.20.20, 8711.30.00, 8711.40.00, 8711.50.00, 8711.90.20	15

Table 3: Imported products exempt from VAT in Cambodia

HS classification	Product description
0101.11.00; 0102.10.00; 0103.10.00; 0104.10.10; 0104.20.10; 0105.11.10; 0105.12.10; 0105.19.10; 0105.19.30; 0105.92.10; 0105.93.10; 0106.00.10; 0511.10.00; 0701.10.00	Animal species
1005.10.00; 1006.11.00; 1008.30.00; 12.04; 12.05; 12.06; 1207.20.00; 1207.30.00; 1207.40.00; 1207.50.00; 1207.60.00; 1207.91.00; 12.09; 50.01	Seeds
23.08; 23.09 except 2309.10.10 and 2309.10.90	Animal feedstuff and supplementary feed

Table 4: Products Banned from Importation into Cambodia

A. List of pesticides banned from use in the Kingdom of Cambodia				
No.	HS Code	Common Name		Use
1.		1,2-dibromo-3-chloropropane	[DBCP]	NEM
2.		2,4,5 T		HEB
3.		aldicarb(e)		INS-S
4.		aldrin(e)	[HHDN, for pure material]	BODUP
5.	28048000	arsenic compound		RDT
6.		BHC/ HCH	[666,hexachlor(an)]	INS
7.	28371900	calcium cyanide		FM
8.	29021900	camphechlor	[Polychlorcamphene,toxaphene]	BODUP
9.		captafol	[difolatan]	FN
10.		chlor(o)dimeform(e)	[Chlorphenamidine]	BODUP
11.		chlordane		INS
12.		chlorfenvinphos	[CVP]	INS
13.		chlormephos		INS
14.		chlorphenamidine		BODUP
15.		chlorthiophos		BODUP
16.		coumaphos		AC,MT
17.		crimidine		RDT
18.		cyanthoate		INS
19.		cycloheximide		FN
20.		cyhexatin	[tricyclohexyltin hydroxide]	AC
21.	29036200	DDT	[zeidane, dicophane]	INS
22.		demephion-O and S		INS
23.		demephion-S	[merkaptofos teolery]	BODUP
24.		demeton-O and-S		INS
25.		demeton-S		BODUP
26.		dieldrin(e)	[HEOD]	INS
27.		dimefox		INS
28.		dinoseb(e)	[DNBP]	HEB
29.		disulfoton	[ethylthiodemeton, M-74]	INS
30.	29209000	endosulfan		INS
31.		endrin(e)	[nendrin]	BODUP
32.		EPN		INS
33.		ESP	[oxydeprofos]	BODUP
34.		ethoprop	[ethoprophos]	INS-S
35.		ethylthiometon		
36.		fenamiphos (phe-)		
37.		fenophosphon		
38.		fensulfothion		
39.		fluoroacetamide		
40.		fonofos		
41.		fosthietan		
42.		heptachlor(e)		
43.		isodrin	[isomer of aldrine]	
44.		leptophos	[MBCP]	
45.		MBCP Herbicide		
46.		mephosf(ph)olan		
47.	37079000	mercuric compound		
48.	29201000	methyl parathion	[metafos]	
49.		monocrotophos		

A. List of pesticides banned from use in the Kingdom of Cambodia			
No.	HS Code	Common Name	Use
50.		paraquat	
51.		parathion	[thiofos]
52.		parathion-ethyl	
53.		phenamiphos	
54.	29310090	phenylmercury acetate	
55.		phorate	[timet]
56.		phos(ph)folan	
57.	29241000	phosphamidon	
58.		prothoate	
59.		red squill	[scilliroside]
60.		schradan(e)	
61.	28261100	sodium fluoroacetate	
62.		sulfotep(p)	
63.		TEPP	[ethyl pyrophosphate]
64.		terbufos	
65.		terpene polychlorinates	[polychloroterpenes]
66.		thionazin(e)	
67.		trichloronat(e)	

Legend:

AC :	Acaricide	Ia.:	Extremely hazardous (<20mgkg)	GF:	Gaseous or volatile fumigants not classified under the WHO recommended classification of pesticides by hazard
AP:	Aphicide	Ib.:	Highly hazardous(20-200mgkg)	LV:	Larvicide
BTS:	Bacteriostat (soil)	II.:	Moderately hazardous(200-2000mgkg)	-S:	Apply to soil: not use with HEB or PGR
BODUP:	Active Ingredient believed to be obsolete or discontinued for use as pesticide	III.:	Slightly hazardous(>2000mgkg)	GF:	Gaseous or volatile fumigants not classified under the WHO recommended classification of pesticides by hazard; [...]-others equivalent common names.
DFL:	Defoliant	IGR:	Insect Growth Regulator		
FN:	Fungicide, other than for seed treatment	ML:	Molluscicide		
FM:	Fumigant	MT:	Miticide		
FST:	Fungicide for Seed Treatment	NEM:	Nematicide		
HEB:	Herbicide	O:	Pesticide unlikely to present acute hazard in normal use		
INS:	Insecticide	PGR:	Plant Growth Regulator		
		RDT:	Rodenticide		

B. List of Narcotics, Psychotropic Substances and Their Precursors Banned from Import into Cambodia		
No.	HS –Code	Description
1.	1211.90.10	- - Of a kind used in pharmacy
2.	1211.90.20	- - Cannabis
3.	1211.90.30	- - Coca
4.	1301.90.30	- - Cannabis resin
5.	1302.11.00	- - Opium.
6.	1302.19.10	- - - Extracts and dyes of cannabis
7.	1302.39.10	- - - Modified
8.	2921.11.00	- - Methylamine, di- or trimethylamine and their salts
9.	2921.12.00	- - Diethylamine and its salts
10.	2921.19.00	- - Other
11.	2921.21.00	- - Ethylenediamine and its salts
12.	2921.22.00	- - Hexamethylenediamine and its salts
13.	2921.29.00	- - Other
14.	2921.30.00	- Cyclanic, cyclenic or cycloterpenic mono- or polyamines, and their derivatives; salts thereof
15.	2921.41.00	- - Aniline and its salts
16.	2921.42.00	- - Aniline derivatives and their salts
17.	2921.43.00	- -Toluidines and their derivatives; salts thereof
18.	2921.44.00	- - Diphenylamine and its derivatives; salts thereof
19.		(beta-naphthylamine) and their derivatives; salts thereof
20.	2921.49.00	- - Other
21.	2921.51.00	- - o-, m-, p-Phenylenediamine, diaminotoluenes, and their derivatives salts thereof
22.	2921.59.00	- - Other
23.	2922.11.00	- - Monoethanolamine and its salts
24.	2922.12.00	- - Diethanolamine and its salts
25.	2922.13.00	- -Triethanolamine and its salts
26.	2922.19.00	- - Other
27.	2922.21.00	- - Aminohydroxynaphthalene sulphonic acids and their salts
28.	2922.22.00	- - Anisidines, dianisidines, phenetidines, and their salts
29.	2922.29.00	- - Other
30.	2922.30.00	- Amino-aldehydes, amino-ketones and amino-quinones , other than those containing more than one kind of oxygen function; salts thereof - Amino-acids and their esters, other than those containing more than one kind of oxygen function; salts thereof :
31.	2922.41.00	- - Lysine and its esters; salts thereof
32.	2922.42.10	- - - Glutamic acid
33.	2922.42.20	- - - Monosodium glutamate
34.	2922.42.90	- - - Other
35.	2922.43.00	- - Anthranilic acid and its salts
36.	2922.49.00	- - Other
37.	2922.50.00	- Amino-alcohol-phenols, amino-acid-phenols and other amino-compounds with oxygen function
38.	2924.10.00	- Acyclic amides (including acyclic carbamates) and their derivatives; salts thereof

B. List of Narcotics, Psychotropic Substances and Their Precursors Banned from Import into Cambodia		
No.	HS -Code	Description
39.	2924.21.10	- - - Parsethoxyphenyl urea (dulcin)
40.	2924.21.90	- - - Other
41.	2924.22.00	- - 2-Acetamidobenzoic acid
42.	2924.29.00	- - Other
43.	2925.11.00	- - Saccharin and its salts
44.	2925.19.10	- - - Glutethimides
45.	2925.19.90	- - - Other
46.	2925.20.10	- - Metformin, phenformin and cemetidines; its salts and derivatives
47.	2925.20.20	- - Ethylene imine, propylene imine
48.	2925.20.90	- - Other
49.	2926.10.00	- Acrylonitrile
50.	2926.20.00	- 1- Cyanoguanidine (dicyandiamide)
51.	2926.90.00	- Other
52.	2927.00.00	Diazo-, azo- or azoxy-compounds.
53.	2932.11.00	- -Tetrahydrofuran
54.	2932.12.00	- - 2-Furaldehyde (furfuraldehyde)
55.	2932.13.00	- - Furfuryl alcohol and tetrahydrofurfuryl alcohol
56.	2932.19.00	- - Other
57.	2932.21.00	- - Coumarin, methylcoumarins and ethylcoumarins
58.	2932.29.00	- - Other lactones
59.	2932.91.00	- - Isosafrols
60.	2932.92.00	- - 1-(1,3-Benzodioxol-5-yl)propan-2-one
61.	2932.93.00	- - Piperonal
62.	2932.94.00	- - Safrole
63.	2932.99.00	- - Other
64.	2933.11.00	- - Phenazone (antipyrin) and its derivatives
65.	2933.19.00	- - Other
66.	2933.21.00	- - Hydantoin,and its derivatives
67.	2933.29.00	- - Other
68.	2933.31.00	- - Pyridine and its salts
69.	2933.32.00	- - Piperidine and its salts
70.	2933.39.10	- - - Chlorpheniramine and isoniazid
71.	2933.39.90	- - - Other
72.	2933.40.00	- Compounds containing a quinoline or isoquinoline ring - system (whether or not hydrogenated), not further fused
73.	2933.51.00	- - Malonylurea (barbituric acid) and its derivatives; salts thereof
74.	2933.59.00	- - Other
75.	2933.61.00	- - Melamine
76.	2933.69.00	- - Other
77.	2933.71.00	- - 6-Hexanelactam (epsilon-caprolactam)
78.	2933.79.00	- - Other lactams
79.	2933.90.10	- - Mebendazole and Parbendazole
80.	2933.90.90	- - Other
81.	2934.10.00	- Compounds containing an unfused thiazole ring (whether or not hydrogenated) in the structure

B. List of Narcotics, Psychotropic Substances and Their Precursors Banned from Import into Cambodia		
No.	HS –Code	Description
82.	2934.20.00	- Compounds containing a benzothiazole ring-system (whether or not hydrogenated), not further fused
83.	2934.30.00	- Compounds containing a phenothiazine ring-system (whether or not hydrogenated), not further fused
84.	2934.90.00	- Other
85.	2939.10.00	- Alkaloids of opium and their derivatives; salts thereof
86.	2939.21.00	- - Quinine and its salts
87.	2939.29.00	- - Other
88.	2939.30.00	- Caffeine and its salts
89.	2939.41.00	- - Ephedrines and its salts
90.	2939.42.00	- - Pseudophedrine (INN) and its salts
91.	2939.49.00	- - Other
92.	2939.50.00	- Theophylline and aminophylline(theophylline - ethylenediamine) and their derivatives; salts thereof
93.	2939.61.00	- - Ergometrine (INN) and its salts
94.	2939.62.00	- - Ergotamine (INN) and its salts
95.	2939.63.00	- - Lysergic acid and its salts
96.	2939.69.00	- - Other
97.	2939 70.10	- - Nicotine sulphate
98.	2939 70.90	- - Other
99.	2939.90.00	- Other

C- Right Hand Drive Vehicles

Table 5: Goods subject to import licensing

HS Codes	Description	Government Body in charge of import licensing
300110, 300120, 300190, 300210, 300210, 300230, 300290, 300310, 300320, 300330, 300340, 300390, 300410, 300420, 300430, 300440, 300450, 300490, 300510, 300590, 300610, 300620, 300630, 300640, 300650, 300660	Pharmaceuticals and medical material	Ministry of Health, Department of Drugs and Food
310100, 310210, 310220, 310230, 310240, 310240, 310250, 310260, 310270, 310280, 310290, 310310, 310320, 310390, 310410, 310420, 310430, 310490, 310510, 310520, 310530, 310540, 310550, 310560, 310590, 380810, 380820, 380830, 380840, 380890	Agricultural inputs	Ministry of Agriculture, Forestry and Fishery (MAFF), Department of Agricultural Legislation
36; 93	Weapons, explosives and ammunition	Ministry of National Defense
71.06; 71.08; 71.18	Gold, silver, precious stones and articles thereof	National Bank of Cambodia
88; 89	Vehicles, aircraft and parts, ships and boats, and other machinery for military purposes	Ministry of National Defense

Table 6: Imports subject to minimum customs value

	HS Code	Product Description
1	1511.90.00	Cooking Oil
2	0713.	Green bean
3	2401.20.90	Leaf tobacco strips
4	2401.30.00	C-Tobacco slice
5	2403.10.90	Cut tobacco
6	2710.00.21 to 2710.00.27	Gasoline (E.A)
7	2710.00.31	Gasoline (JET A1)
8	2710.00.41	Aviation turbine fuel having of flashpoint of 23oC or over
9	2710.00.42	Lamps kerosen
10	2710.00.71 to 2710.00.73	Gas Oils
11	2710.00.79	Other of gas oils
12	2710.00.83	Lubriating oil
13	2711.11.00	Natural Gas
14	2806.10.00	Hydrochloric acid
15	2807.10.00	Sulfuric acid
16	2922.42.20	Monosodium Glutamate
17	4802.52.00	Paper in roll (50 GSM to 70 GSM)
18	4802.53.00	Paper in roll (more than 150 GSM)
19	6309.00.00	Used Clothes
20	6908.90.20	Tile (for China origine only)
21	7208.10.00 to 7208.90.00	Flat-rolled product of iron or non-alloy steel
22	7209.15.00 to 7209.90.00	Flat-rolled product of iron or non-alloy steel
23	7211.13.00 to 7211.90.90	Flat-rolled product of iron or non-alloy steel
24	7213.10.10 to 7213.99.30	Bars and rods, hot -rolled in irregularly wound coils, of iron or non-ally steel
25	7214.10.10 to 7214.99.30	Other bars and rods of iron or non-ally steel
26	7215.10.10 to 7215.90.20	Other bars and rods of iron or non-ally steel
27	7216.10.10 to 7216.99.20	Angles, sharpes and sections of iron or non-alloy steel
28	7303.00.10 to 7303.00.90	Tubes, pipes and hollow profiles, of cast iron
29	7304.10.00 to 7404.90.00	Tubes, pipes and hollow profiles, seamless, of iron or steel
30	7305.11.00 to 7305.90.00	Other tubes and pipes
31	7306.10.00 to 7306.90.90	Other tubes, pipes and hollow profiles, of iron or steel
32	8407.31.90	Used motorcycle engine
33	8415.10.10	Used air conditionner
34	8418.10.10	Used refrigerator
35	8450.11.00	Used washing machine
36	8473.30.90	Computer casing with power supply
37	8501.61.00 to 8501.64.00	Generator
38	8502.11.00 to 8502.20.20	Generator
39	8518.29.00	Used speaker
40	8518.50.00	Used amplifier
41	8520.33.00	Used radio cassette
42	8521.10.00	Used VTR, VCR, VCP,
43	8523.29.00	Cement
44	8528.12.00	Used CTV
45	8702.10.10 to 8702.90.00	Motor vehicles for the transport of ten or more persons
46	8703.10.10 to 8703.10.20	Motor cars
47	8703.21.20 to 8703.21.30	Motor cars
48	8703.22.20 to 8703.22.30	Motor cars
49	8703.23.21 to 8703.23.32	Motor cars
50	8703.24.21 to 8703.24.32	Motor cars
51	8703.31.21 to 8703.31.32	Motor cars

	HS Code	Product Description
52	8703.32.21 to 8703.32.32	Motor cars
53	8703.33.21 to 8703.90.12	Motor cars
54	8704.10.00 to 8704.90.00	Motor vehicles for the transport of goods
55	8708.29.13	Used door for motor vehicles origine from Japan, EU and the Norht American
56	8708.29.92	Used dashboard for motor vehicles origine from Japan, EU and the Norht American
57	8708.29.93	Used bumper for motor vehicles origine from Japan, EU and the Norht American
58	8711.10.00	Used motorcycles
59	8711.20.10 to 8711.30.00	Used motorcycles
60	8711.90.10 to 8711.90.20	Used motorcycles
61	8712.00.00	Used Bicycles
62	8714.19.10 to 8714.19.20	Used parts and accessories of motorcycles (Saddle)
63	8714.19.10	Used parts and accessories of motorcycles
64	9401.20.00	Used seats for motor vehicles origine from Japan, EU and the North American
64	9503.90.90	Used Toys

HS code based on Customs Tariff of Cambodia 2001

Table 8: Items subject to export taxes

HS Heading	Description of Goods	Export Tariff (% <i>ad valorem</i>)
01.02 01.03	Pure bred breeding bovine animals and swine	10
03.01, 03.02 03.03, 03.04 03.05	Live fish, prepared fish and fish products	10
03.06 03.07	Live crustaceans and molluscs and products thereof	10
12.11,13.01 13.02	Cannabis, Cannabis resin, extracts and dyes, coca, opium*	50
29.05.50	Halogenated, sulphonated, nitrated or nitrated derivatives of a cyclic alcohol*	50
29.26	Nitrile-function compounds*	50
40.01 40.04	Natural rubber in primary forms or in plates, sheets or strips and rubber waste	10
44.02, 44.03 44.04, 44.05 44.06, 44.07	Unprocessed and semi-processed wood; wood charcoal	10
44.08.10.00 44.09	Sawn and shaped wood. Veneer sheets and sheets for plywood; strips for flooring	5

* Categories included for the sake of formal completeness. The products in these groups require a licence in order to be exported. The Royal Government has in fact never issued any such licenses.

Table 9: Export restrictions maintained by Cambodia

HS Code	Product description	Measure	Responsible agency	GATT/WTO justification

[DRAFT DECISION

ACCESSION OF THE KINGDOM OF CAMBODIA

Decision of [...]

The [General Council] [Ministerial Conference],

Having regard to paragraph 2 of Article XII and paragraph 1 of Article IX of the Marrakesh Agreement Establishing the World Trade Organization (the "WTO Agreement"), and the Decision-Making Procedures under Articles IX and XII of the WTO Agreement agreed by the General Council (WT/L/93),

[*Conducting* the functions of the Ministerial Conference in the interval between meetings pursuant to paragraph 2 of Article IV of the WTO Agreement,]

Taking note of the application of the Kingdom of Cambodia for accession to WTO Agreement dated 19 October 1994,

Noting the results of the negotiations directed toward the establishment of the terms of accession of the Kingdom of Cambodia to the WTO Agreement and having prepared a Protocol on the Accession of the Kingdom of Cambodia,

Decides as follows:

1. The Kingdom of Cambodia may accede to the WTO Agreement on the terms and conditions set out in the Protocol annexed to this Decision.

DRAFT PROTOCOL
ON THE ACCESSION OF THE KINGDOM OF CAMBODIA

Preamble

The World Trade Organization (hereinafter referred to as the "WTO"), pursuant to the approval of the General Council of the WTO accorded under Article XII of the Marrakesh Agreement Establishing the World Trade Organization (hereinafter referred to as the "WTO Agreement"), and the Kingdom of Cambodia,

Taking note of the Report of the Working Party on the Accession of the Kingdom of Cambodia to the WTO Agreement reproduced in document WT/ACC/KHM/[...], dated [...] (hereinafter referred to as the "Working Party Report"),

Having regard to the results of the negotiations on the accession of the Kingdom of Cambodia to the WTO Agreement,

Agree as follows:

PART I - GENERAL

1. Upon entry into force of this Protocol pursuant to paragraph 8, the Kingdom of Cambodia accedes to the WTO Agreement pursuant to Article XII of that Agreement and thereby becomes a Member of the WTO.
2. The WTO Agreement to which the Kingdom of Cambodia accedes shall be the WTO Agreement, including the Explanatory Notes to that Agreement, as rectified, amended or otherwise modified by such legal instruments as may have entered into force before the date of entry into force of this Protocol. This Protocol, which shall include the commitments referred to in paragraph [224] of the Working Party Report, shall be an integral part of the WTO Agreement.
3. Except as otherwise provided for in paragraph [224] of the Working Party Report, those obligations in the Multilateral Trade Agreements annexed to the WTO Agreement that are to be implemented over a period of time starting with the entry into force of that Agreement shall be implemented by the Kingdom of Cambodia as if it had accepted that Agreement on the date of its entry into force.
4. The Kingdom of Cambodia may maintain a measure inconsistent with paragraph 1 of Article II of the GATS provided that such a measure was recorded in the list of Article II Exemptions annexed to this Protocol and meets the conditions of the Annex to the GATS on Article II Exemptions.

PART II - SCHEDULES

5. The Schedules reproduced in Annex I to this Protocol shall become the Schedule of Concessions and Commitments annexed to the General Agreement on Tariffs and Trade 1994 (hereinafter referred to as the "GATT 1994") and the Schedule of Specific Commitments annexed to the General Agreement on Trade in Services (hereinafter referred to as "GATS") relating to the Kingdom of Cambodia. The staging of the concessions and commitments listed in the Schedules shall be implemented as specified in the relevant parts of the respective Schedules.
6. For the purpose of the reference in paragraph 6(a) of Article II of the GATT 1994 to the date of that Agreement, the applicable date in respect of the Schedules of Concessions and Commitments annexed to this Protocol shall be the date of entry into force of this Protocol.

PART III - FINAL PROVISIONS

7. This Protocol shall be open for acceptance, by signature or otherwise, by the Kingdom of Cambodia until [...].

8. This Protocol shall enter into force on the thirtieth day following the day upon which it shall have been accepted by the Kingdom of Cambodia.

9. This Protocol shall be deposited with the Director-General of the WTO. The Director-General of the WTO shall promptly furnish a certified copy of this Protocol and a notification of acceptance by the Kingdom of Cambodia thereto pursuant to paragraph 9 to each Member of the WTO and to the Kingdom of Cambodia.

This Protocol shall be registered in accordance with the provisions of Article 102 of the Charter of the United Nations.

Done at [place] this [date of month in full] day of [month and year in full] in a single copy in the English, French and Spanish languages, each text being authentic, except that a Schedule annexed hereto may specify that it is authentic in only one of these languages.
