### State Ownership and Privatization

The accomplishing of tasks in the sphere of privatization is based on the following principles:

- the principle of combination of long-term and short-term interests of the State during privatization;
- the principle of differentiated approach to privatization of enterprises depending on their liquidity;
- principle of expanding privatization instruments, principle of on-going monitoring and control.

### Legal framework

Basic legal documents according to which the privatization of state property in the Russian Federation is currently taking place are the following: the Federal Law On the Privatization of the State Property and on the Principles of Privatization of the Municipal Property in the Russian Federation №123-FZ of 21 July 1997 (as amended on 23 June 1999, 5 August 2000), the State Program of Privatization of State-Owned and Municipal Enterprises in the Russian Federation (approved by the Decree of the President of the Russian Federation №2284 of 24 December 1993) (as amended on 14 March 1996, 6 October 1997, 15 July 1998, 25 July, 1 August 2000), Basic Provisions of the State Program of Privatization of State-Owned and Municipal Enterprises in the Russian Federation after 1 July 1994 (approved by the Decree of the President of the Russian Federation №1535 of 22 July 1994) (as amended on 16 April 1998, 25 January 1999) and the Conception of Management of State Property and Privatization in the Russian Federation (approved by the Decision of the Government of the Russian Federation №1024 of 9 August 1999, as amended on 29 November 2000).

The Government of the Russian Federation annually, simultaneously with the draft federal law on the federal budget for the respective year, submits to the State Duma of the Federal Assembly of the Russian Federation the draft federal law on the introduction of amendments and addenda into the Privatization Program.

The Government of the Russian Federation annually, before April 1 of the current year, submits to the Federal Assembly of the Russian Federation a report on the implementation of the Privatization Program in the course of the past year. The Privatization Program contains:

- a forecast of the privatization of the state property in the respective sectors of the Russian Federation economy;
- a forecast of an increase in the internal and the external investments into the Russian Federation economy as a result of the privatization of the state property;
- demands, made on the privatization programmes of the subjects of the Russian Federation;
- the order of selecting methods for the privatization of the state property ;
- the procedure for estimating the cost of the privatized state property;

- the procedure and the normatives for the distribution of the monetary means, derived as a result of privatization of the federal property etc.

Moreover the facilities and enterprises that are federal, state-owned and municipal property are divided into the following groups as regards the possibility of their privatization in the Privatization Program:

- facilities and enterprises that are federal property, the privatization of which is prohibited;
- facilities and enterprises that are federal property, the privatization of which is subject to approval by the Government of the Russian Federation;
- facilities and enterprises that are federal property, the privatization of which is subject to approval by the federal executive power body, possessing the powers for performing the functions of the management and of the disposal of the state property in agreement with the federal executive power bodies, endowed with the powers for the coordination and the regulation of the activity in the respective sectors of the economy;
- state-owned (municipal) facilities and enterprises, the privatization of which under the Program is subject to approval by the government authorities and administration bodies of the subjects of the Russian Federation and under local privatization programs;
- federal, state-owned (municipal) facilities, and enterprises subject to compulsory privatization;
- facilities and enterprises which are privatized with the prohibition or restrictions of the participation in its privatization of foreign natural and legal persons.

Regulatory acts currently in force provide lists of properties prohibited for privatization, including facilities necessary to support national defenses, the functioning of air and water transport, realization of other strategic interests of the Russian Federation (the said State Program of Privatization of State-Owned and Municipal Enterprises in the Russian Federation, the Decision of the Government of the Russian Federation No. 1348 of 6 December 1999 "On Federal State Unitary Enterprises Based on the Right of Economic Jurisdiction", the Decision of the Government of the Russian Federation No. 784 of 17 July 1998, "On the List of Joint-Stock Companies Producing Products (Goods, Services) of Strategic Importance in Terms of National Security which cannot sell their Federally-Owned shares before Term" (as amended on 7 August, 14 August, 31 October, 14 November, 18 December 1998; 27 February, 30 August, 3 September, 9 September, 16 October, 31 December 1999; 16 March 2000), and others).

Moreover pursuant to the Federal Law No. 150-FZ of 27 December 2000 On the Federal Budget for 2001 (as amended on 24 March, 8 August 2001) prior to the entry into force of a federal law on the state program for privatization of state property in the Russian Federation, federally held stocks in jointstock companies, the book value of whose fixed assets, calculated on the basis of a consolidated balance sheet that includes the assets of subsidiaries and dependent companies, as of 1 January 2000 is greater than 50 million times the minimum wage established by the legislation of the Russian Federation, shall not be subject to privatization in 2001 (Article 100). As well as when preparing the draft of the said Program, the list of enterprises to be privatized shall not include government-held blocks of shares in enterprises created in accordance with international agreements and

intergovernmental accords, the privatization of which has not been agreed upon by the parties, including the Russian-Belarusian oil and gas company "Slavneft" (Article 101).

The above lists of properties not subject to privatization are passed by the Government annually and are available for information of interested parties, including foreign investors.

In the course of bringing into life the program decisions the federal laws and the other legal normative acts of the Russian Federation, the laws and the other legal normative acts of the subjects of the Russian Federation, as well as the decisions of the local self-government bodies are being passed, which shall not contradict the main Federal Law on privatization and the Privatization Program.

### **Monitoring of the privatization process**

For the purpose of maintaining a uniform state policy, the Russian Federation regions and local authorities annually submit progress reports on privatization of state and municipal properties to the Russian Federation Government and the Federal Assembly of the Russian Federation.

Monitoring of the privatization process in the Russian Federation is aimed at ensuring transparency of all developments and enabling state control and effective decision-making as regards state property.

According to the Federal Law On the Privatization of the State Property and on the Principles of Privatization of the Municipal Property in the Russian Federation №123-FZ of 21 July 1997 information on the privatization of the state and of the municipal property is published by the property sellers in the official information news letters and in the other mass media, not later than 45 days prior to the date, fixed for the sale of the said property. In the privatization of the municipal property, the local self-government bodies may also fix a shorter term for the publication of such information, but it shall not be less than one month. The list of the data, subject to an obligatory publication in the form of an information statement on the sale of the privatization objects, shall be laid down by the Government of the Russian Federation. Information on the results of the privatization deals in the state or in the municipal property is subject to publication within one month from the date of performing the said deals.

Pursuant to the Decision of the Government of the Russian Federation No. 696 of 3 July 1998 "On Organization of Accounting of Federal Property and Maintenance of a Registry of Federal Property", a registry of state property was set up and provides the efficiencies of systematized data regarding all elements of state property. Mass media are employed, for instance, the Russian Federal Property Fund publishes a special official informative and analytical bulletin entitled "Reform", information releases are posted on the Internet.

### **The terms of participation of foreign legal and physical bodies in the process of privatization**

Terms of participation of foreign legal and physical bodies in privatization process and investment activities are regulated by Federal Law On the privatization of the State property and on the Principles of Privatization of the Municipal Property in the Russian Federation №123-FZ of 21 July 1997, by Federal Law On Foreign Investment in the Russian Federation №160-FZ of 9 July 1999 and by the State Program of Privatization of State-Owned and Municipal Enterprises in the Russian Federation 1994 (approved by the Decree of the President of the Russian Federation №2284 of 24 December 1993).

Concerning foreign participation in privatization acts the principle of national treatment. Foreign investors can take part in an auction, tender and commercial tender with the investment and (or) the social terms.

Foreign investors' participation in the privatization of facilities and enterprises engaged in trade, public catering and consumer services, as well as of small enterprises in industry, construction, and automobile transportation are in all cases subject to approval by local government authorities. Authorizations are given by agencies in charge of management of municipal property of the Russian regions or of local authorities. The criteria governing decisions of such agencies regarding whether or not to authorize participation of foreign investors in the privatization of such facilities and enterprises, are non-discriminatory. Participation of foreign investors in privatization of properties with local authority holdings is subject to security considerations (proximity of the privatized property to a military facility, good name and diligence of the foreign investor, good standing), and requires a business plan and registrations as provided by the Russian legal framework.

Decisions on the possibility of foreign investors' taking part in the privatization of facilities and enterprises of the defense industry (if the defense order accounts for more than 30 per cent of their gross output), the oil and gas industry, the mining and processing of strategic material ores, precious and semi-precious stones, precious metals, radioactive and rare-earth minerals, transport and communications are made by the Government of the Russian Federation or authorities of subjects of the Russian Federation as applicable (depending on the kind of state property involved) simultaneously with a decision on privatization of such facilities and enterprises. More particularly, pursuant to the Federal Law of the Russian Federation No. 74-FZ of 7 May 1998, "On Distribution Constraints in Respect of the Shares of the Russian Joint-Stock Company for Power Engineering and Supply "Unified Energy Systems of Russia", and the Shares of other Federally-Owned Joint-Stock Companies in Power Engineering", foreign states, international organizations, foreign legal entities and their Russian affiliates, and foreign natural persons may own up to 25% of all types of shares in RAO UES. Pursuant to the Decree of the President of the Russian Federation of 28 May 1997 "On the Procedure for Turnover of Shares in Russian Joint-Stock Company (RAO) Gasprom", throughout the continuance of federal ownership of RAO Gasprom the aggregate foreign participation in its charter capital is restricted to 9%. Pursuant to the Federal Law of the Russian Federation No. 69-FZ of 31 March 1999 "On Gas Supply in the Russian Federation", in any sale and purchase of shares of owners of regional systems, or other transactions and operations associated with transfer of title to such shares, the participation of foreign citizens or foreign organizations must not exceed 20% of the total number of common shareholders of the said systems.

Foreign investments cannot be used for privatization of state-owned and municipal enterprises located within closed territorial entities, if not otherwise provided for by decrees of the Government of the Russian Federation.

### **Results of privatization**

As a result of restructuring of property relations in the Russian Federation by means of privatization the number of privatized enterprises as of 1 January 2001 (from 1992) comprised 130,180.

The table below shows data on number of privatized State-Owned and Municipal Enterprises:

**Table 1. Progress in Privatization of State Enterprises within 1993-2000**

Year	1993	1994	1995	1996	1997	1998	1999	2000
Number of privatized state-owned and municipal enterprises	42,924	21,905	10,152	4,997	3,353	2,694	677	301
Including those by the form of property								
Municipal	...	11,108	6,960	3,354	1,462	1,251	453	200
Subjects of the Russian Federation	...	5,112	1,317	715	340	503	44	74
Federal	...	5,685	1,875	928	1,651	940	180	27

In 2000 much fewer enterprises were privatized compared to 1999. The similar trend was observed in 1999 compared to 1998. The steady decrease in the number of privatized enterprises is explained by the fact that privatization of the major number of the enterprises, including enterprises in oil industry, metallurgy, sea and river transport, which are the most attractive for investors has been already completed.

At the same time there is a tendency of increasing the total volume of financial assets obtained by means of privatization. In 2000 revenues from the sale of shares packages of joint-stock companies and state property comprised 31,367.6 mln. rubles.

The increase in revenues by means of privatization is explained to a great extent by the usage of a new conception of state property management (approved by the Decision of the Government of the Russian Federation №1024 of 9 September 1999). The Conception determines new policy, which includes the individual approach to the choice of objects of privatization, presale evaluation of property, control of the effectiveness of management of state property.

The sector structure of privatization is shown in the table 2 below:

**Table 2. Progress in Privatization of State-Owned and Municipal Enterprises concerning specific areas of activity for a period of time up to the first half of 2000**

At present there are 22135 state-run unitary enterprises in the Russian Federation, including 11,128 Federal state-run unitary enterprises. The number of commercial companies with the participation share of federal state property comprises 3524, in that number according to the share of federal property in their authorized capital:

- 100% of authorized capital - 61 joint-stock company;
- more than 50 % of authorized capital - 506;
- from 25 % to 50 % of authorized capital – 1,211;
- less than 25 % - 1,746.

### **Methods of privatization**

The following privatization methods, specified by the Federal Law On the privatization of the State property and on the Principles of Privatization of the Municipal Property in the Russian Federation №123-FZ of 21 July 1997, are used in the privatization of the state and of the municipal property:

- the sale of the state or of the municipal property at an auction, including the sale of the shares of open joint-stock companies, created in the course of privatization, at a specialized auction;
- the sale of the state or of the municipal property at a commercial tender with the investment and (or) the social terms;
- the sale of the shares of open joint-stock companies, set up in the course of privatization, to their own workers;
- the redemption of the rented state or municipal property; the transformation of the state and the municipal enterprises into the open joint-stock companies, 100 per cent of whose shares are in the state or in the municipal ownership;
- putting the state or the municipal property by way of contribution into the authorized capitals of economic companies;
- the alienation of the shares of open joint-stock companies, set up in the course of privatization, which are in the state or in the municipal ownership, in favour of the owners of the state or of the municipal securities, certifying the right to acquire such shares.

A specific method of privatization of an enterprise is determined by a working privatization commission. When selecting methods of privatization of enterprises a differentiated approach is used depending on their liquidity and specifics.

Auction and commercial tender with the investment and (or) the social terms are the main methods of selling state property in the course of privatization. For instance, in 2000 56% of state property of Russian Federation subjects were sold through auctions.

Number of shares packages of Federal property enterprises sold	320
On auction	248
On particularized auction	13
On tender	32
In other ways	27

### **Goals in the sphere of privatization**

The potential "portfolio" of the shares packages, planned for sale, includes shares of the number of oil and coal companies, transport and communication enterprises, and engineering industry. It is planned to perform restructuring and privatization of about 3.5 thousand Federal state unitary enterprises in 2001; it is planned to sell shares of over 500 joint-stock companies in 2001.

Additional information about the objects, which privatization is possible in 2001-2003 is available in the Internet at the official site of Russia's Ministry of State Property ([www.mgi.ru](http://www.mgi.ru)), as well as at the homepage of the All-Russia Bank).

### **Production of Goods and Services by State-Owned Enterprises**

In accordance with the Decision of the Government of the Russian Federation No.1 of 4 January 1999, the state owned enterprises are state organizations, institutions, unitary enterprises, as well as companies and enterprises which either fully belong to the state or where the state owns controlling (over 50 percent) interests (shares).

At present enterprises with state property share in Russia are responsible for 14% of the total production of goods and services. The minimum share of state participation is in retail trade (Table 4). Full State monopoly remains in the sector of railroad transport. In the sphere of scientific research and development the share of public sector enterprises comprises 63.3%

The number of staff of public sector enterprises in 2000 was 11,373.6 thousand people, or 22.6% of the employed population.

In 2000 foreign investments to the public sector enterprises constituted over 16 mln. dollars, while general volume of foreign investments into Russian economy constituted 11 billion dollars.

**Comprehensive List of Tariff exemptions (based on the Law “On Customs Tariff”)**

**Article 34.** Tariff Preferences

Tariff benefits (preferences) for goods shall be established hereunder and may not be individual in nature other than in such cases as are described by Articles 35, 36 and 37 of this Law. Tariff preferences shall be granted exclusively by decision of the Russian Government.

A tariff benefit (preference) shall be understood to mean a benefit granted on the basis of reciprocity or unilaterally in implementing Russia's commercial policies on goods moved across the Russian customs border in the form of a refund of earlier paid duties, exemption from duties, reduced duties or tariff quotas on preferential imports (exports) of goods.

**Article 35.** Exemption from Duties

The following shall be exempt from duties:

- a) transport vehicles engaged in the international transportation of freight, luggage and passengers, as well as materials, equipment, rigging, fuel, food and other effects required for their normal operation en route or during stopovers, or acquired abroad in connection with a breakdown of (damage to) such vehicles;
- b) material, equipment, rigging, fuel, food and other effects exported outside the Russian customs territory to support the operations of Russian ships engaged in sea fisheries or sea fishery ships leased (chartered) by Russian persons, as well as the products of such operations imported into the Russian customs territory;
- c) goods imported to the Russian customs territory or exported there from for official or personal uses by representatives of foreign States or individuals entitled to import such goods duty-free pursuant to Russia's international agreements or Russian legislation;
- d) Russian and foreign currency other than that used for numismatic purposes, as well as securities pursuant to Russian legislative acts;
- e) goods subject to nationalization by the State in cases envisaged by Russian legislation;

Decision of the Government of the Russian Federation No. 816 of 18 July 1996 established that concessions on payment of tax duties as regards goods imported to the customs territory of the Russian Federation as humanitarian aid shall not cover excisable goods, as well as goods imported under foreign trade agreements (contracts) the latter providing that Russian persons are to pay for these goods

- f) goods imported to the Russian customs territory and exported there from as humanitarian aid; or in order to deal with the effect of accidents, disasters and natural calamities; study aides for free educational, pre-school and medical treatment institutions;
- g) goods imported to the customs territory of the Russian Federation as gratuitous aid (assistance) as well as imported to the territory and/or exported from the territory for charitable purposes along the lines of states, international organizations, governments including among other things for the purposes of providing technical aid (assistance);

- h) goods moved under customs control in transit across the Russian customs territory and meant for third countries;
- i) goods moved across the Russian customs border by natural persons for personal use pursuant to the Customs Code of the Russian Federation;
- j) equipment, instruments and materials imported on the customs territory of the Russian Federation for implementation of the purpose oriented social and economic programs (projects) of the housing construction for servicemen, foundation, construction and maintenance of the centers for vocational retraining of the servicemen, ex-servicemen and their family members carried out for the expense of loans, credits and gratuitous financial aid being provided by the international agencies and governments of foreign states, foreign legal entities and natural persons in accordance with Inter-Governmental and Inter-State Agreements, as well as Agreements signed on behalf of the Government of the Russian Federation by the state executive bodies authorized by it;
- k) periodical printed publications and book products connected with education, science and culture, imported by the editorial offices of the mass media and the publishing houses into the customs territory of the Russian Federation and exported therefrom;
  - paper, polygraphic materials and polygraphic carriers, carriers of audio and video information, technological and engineering equipment imported into the customs territory of the Russian Federation by the editorial offices of the mass media, publishing houses, information agencies, tele- and radio broadcasting companies, polygraphic enterprises and organizations and used by them for the output of the products of the mass media and the book products connected with education, science and culture.

The privileges stipulated by the present item shall not apply to the books and periodical printed publications of advertising and erotic character and the mass media of advertising and erotic character;

- l) the fire-technical products, imported into the customs territory of the Russian Federation to ensure the operation of the administrative bodies and units of the State Fire-fighting Service of the Ministry of Internal Affairs of the Russian Federation in the process of performance of their functions, established by the legislation of the Russian Federation;
- m) equipment, including machinery, mechanisms and materials being part of the set of delivery of respective equipment as well as components (excluding the ones subject to excise taxation) imported to the customs territory of the Russian Federation to offset the loans provided by foreign states and international financial organizations under the international treaties of the Russian Federation;
- n) goods imported to the customs territory of the Russian Federation, including those imported on leasing in order to perform works under a production sharing agreement in accordance with a program of such works and with the investor's budget approved in the manner set out in the agreement or those exported from the territory in question in keeping with the terms of such agreement. In such case import and export customs duties shall be replaced with the division of the products pursuant to terms of a production sharing agreement concluded in accordance with the Federal Law on Production Sharing Agreements.

Exemption from the customs duty shall be granted only in the cases as provided in the international treaties of the Russian Federation;

- o) baby food manufacturing equipment (components and spare parts for it) acquired at the expense of earmarked federal budget funds, the equipment being of the kind not manufactured in the Russian Federation, as per the list endorsed by the Government of the Russian Federation as well as baby food manufacturing equipment (components and spare parts for it) acquired at the expense of stringed foreign credits extended to the Russian Federation by foreign states of foreign governments. The said privilege covers the baby food manufacturing equipment (components and spare parts for it) that has been imported (being imported) to the customs territory of the Russian Federation for the purpose of implementing the federal target program "Developing Baby Food Industry" of the presidential program "The Children of Russia".

**Article 36.** Granting of Customs Preferences

In Russia's trade and political relations with foreign countries Russian Customs Tariff preferences may be granted in the form of exemption from duties, reduced duties or tariff quotas on preferential imports (exports) with respect to the following goods:

- goods originating from countries, which form a free trade zone or a customs union with Russia or which have signed agreements aiming to create such zone or union; and
- goods originating from developing countries and using Russia's national system of preferences, which shall be periodically, but at least once in five years, reviewed by the Russian Government.

**Article 37.** Granting of Tariff Benefits

In Russia's commercial policies followed in its customs territory tariff benefits may be granted in the form of a refund of earlier-paid duties, cut-rate duties, or in exceptional cases, exemption from duties with respect to the following goods:

- goods imported to the Russian territory and/or exported therefrom temporarily under customs control under the appropriate customs arrangements established by the Customs Code of the Russian Federation;
- goods exported as part of complete deliveries for the construction of investment cooperation projects abroad pursuant to intergovernmental agreements, to which Russia is a party;
- goods exported from the Russian customs territory as part of suppliers to meet federal state needs, as determined pursuant to Russian legislative acts.

Goods imported to the Russian customs territory as a contribution to the statutory funds of enterprises with foreign investment and of foreign companies, as well as individual kinds of goods of their own production imported by such enterprises and companies in cases envisaged by agreements on division of output, concluded by the Russian Government or a state agency authorized thereby in accordance with Russian law, or during the period of recouping foreign investments in accordance with such procedure as is established by the Supreme Soviet of the Russian Federation.

**Port Fees used in Commercial Seaports of the Russian Federation**  
**Group Classification of Vessels**

Group of vessels	Vessels and floating facilities
A	Foreign-going cargo vessels and facilities, including non-self propelled ones.
B	Coastal-traffic cargo vessels and facilities, including non-self propelled ones.
C	Foreign-going inter-port ferries. Foreign-going passenger ships.
D	Coastal-traffic inter-port ferries. Coastal-traffic passenger ships. Ice breakers not operated day-to-day or rented by port sea administration (or seaport administration).
E	Lighters on board the lighter-aboard ship; warships; hospital ships; sports vessels; private yachts; technical vessels used for deepening works in ports; vessels of local port fleet, shipyards or ASPTR/LRN; ice breakers operated day-to-day by port sea administration (or seaport administration) and not rented by them.
F	Transit vessels; vessels touching at a port forcedly, for damage repairs, quarantine needs or custom house and frontier formalities, as well as the vessels undergoing performance trial.
G	Service vessels; research ships; surveying vessels.
H	Fishing and other vessels of a fish industry department.

The tariff was set for Russian coastal-traffic vessels, Russian foreign-going vessels and foreign vessels.

For the Russian foreign-going vessels and foreign vessels the rates of dues are set in US dollars. The Russian vessels shall make payments in rubles at the exchange rate of the Central Bank of Russia as of the day of the vessel's departure.

The currency used for settling the charges collected from vessels of CIS countries shall be regulated by interstate agreements.

Tariff surcharges and relieves shall be applied to basic rate. If several relieves are applicable to a vessel, the greatest of these relieves shall be applied.

School, field-study and training ships shall be exempted from all types of charges. During charges collecting, vessel nationality and granted status shall be determined by the flag the vessel is flying, irrespective of the entity, which owns or uses it (see Article 5 of Open Sea Convention dated 29.04.58).

A voyage of a Russian ship shall be considered as foreign-going, if the vessel arrives to a Russian port after load handling in a foreign port or gets under way to a foreign port for load handling.

For voyages not covered by this definition, charges shall be collected in accordance with coastal traffic tariff. The charges shall be collected for the voyage, which is ended with vessel arrival to the port.

For vessels arriving to the port in ballast, charges shall be collected for the voyage, which is the aim of this arrival. For vessels sailing from the port in ballast, charges shall be collected for the voyage, which is ended with vessel arrival to the port.

Conventional capacity of a vessel, in cubic meters, shall be determined as a product of three values specified in vessel documents: maximum length of the vessel, maximum width of the vessel and maximum height of the board of the vessel.

For vessels transporting cargo on the upper deck or having no less than two decks, the board height used in calculations shall be no less than a half of maximum width of the vessel.

Conventional capacity of barge-towboat trains, caravans or other floating facilities composed of individual elements used for calculating all types of charges, except for ecological dues, shall be determined as a sum of capacities of individual elements.

Charges from lighter-aboard ships carrying out handling operations with lighters in the outer and inner harbour shall be collected in accordance with capacity of lighters handed over by a lighter-aboard ship on entering the port and received by it on sailing out of the port.

For calculating all types of charges, conventional capacity of Ro-Ro, Lo-Ro, Ro-Flow and OBO vessels, as well as container carriers, shall be multiplied by a factor of 0.7. For calculating all types of charges, capacity of double-bottomed or double-boarded tankers, as well as tankers with isolating ballast tanks, shall be multiplied by a factor of 0.85.

Type and specialization of a vessel shall be determined based on vessel documents.

Charges shall be paid by a vessel prior to sailing from port.

REFERENCE PAPER 9

**Table 1: List of Goods Subject to Hygienic Assessment**

The Ministry of Health of the Russian Federation issued Order No. 217 dated July 20, 1998 “On Hygienic Assessment of the Manufacture, Delivery and Distribution of Products and Commodities”.

This Order establishes *inter alia*:

- Regulations on Hygienic Assessment of Products, Commodities as well as Manufactures;
- List of Socially Significant and Potentially Hazardous Products and Commodities Subject to Hygienic Assessment by the Department of State Sanitary and Epidemiological Supervision of the Ministry of Health of the Russian Federation;
- List of Types of Products and Commodities Subject to Hygienic Assessment.

The Department of State Sanitary and Epidemiological Supervision of the Ministry of Health of the Russian Federation (Gossanepidnadzor) conducts hygienic assessment (issues hygienic approvals) of any socially significant, potentially hazardous types of products and commodities in accordance with the following List.

**Table 2: List of Socially Significant and Potentially Hazardous Products and Commodities Subject to Hygienic Assessment by the Department of State Sanitary and Epidemiological Supervision of the Ministry of Health of the Russian Federation**

1. Foodstuffs
  - 1.1 specialized baby food products, including components for their production;
  - 1.2 food additives (buffers, preservatives, stabilizers, leavening agents);
  - 1.3 food products and alimentary feedstock made from new (unconventional) raw materials and produced using new processes;
  - 1.4 products intended for therapeutic or preventive nutrition.
2. Products for children:
  - 2.1 materials used in the manufacture of products for new-borns and babies under one year old;
  - 2.2 perfumes and cosmetics for children;
  - 2.3 teaching aids, textbooks, didactic materials.
3. Dyes, finishing, felt-proofing and water-repelling materials, softeners.
4. Products for home-use:
  - 4.1 reagents for potable water treatment;
  - 4.2 household devices intended for after-treatment of potable water;
  - 4.3 perfumes, cosmetics and mouth care agents containing biologically active components, essential oils, fragrance compounds, preservatives, pigments, sunscreen and fluorine-containing compounds, home-use skin protection substances; new and unconventional raw materials usable in perfumes, cosmetics and mouth care agents.
5. Products intended for industrial use:
  - 5.1 personal protective agents, including ointments, pastes and creams usable in industry;
  - 5.2 equipment and apparatus for collective protection, materials for the manufacture of ventilation systems; and
  - 5.3 waste-incinerating furnaces and units.

6. Medical equipment, tools and hygienic agents:
  - 6.1 physiotherapeutic, diagnostic and medical treatment equipment.
7. Products containing sources of ionizing radiation, including generating one, which are intended for full-scale production or new technology use. Industrial waste containing natural or artificial radio-nuclides which are used as building materials, fertilizers or otherwise.
8. Antenna feeder systems of radio transmitting stations, radar stations (including ones for space tracking), outdoor switch-gears for high and ultrahigh voltage substations, satellite telecommunications systems.

Other hygienic approvals are issued by the Department of State Sanitary and Epidemiological Supervision of the Ministry of Health of the Russian Federation (Gossanepidnadzor), centers of state sanitary and epidemiological supervision in the subjects of the Russian Federation, regional centers of state sanitary and epidemiological supervision in transport, the Federal Center for State Sanitary and Epidemiological Supervision at the Ministry of Health of the Russian Federation or centers of state sanitary and epidemiological supervision of the Federal Agency for Medical, Biological and Extreme Problems under the Ministry of Health of the Russian Federation, authorizing manufacture, delivery and distribution of products and commodities in accordance with the Regulations on Hygienic Assessment of Products, Commodities as well as Manufactures and the following List of Products and Commodities Subject to Hygienic Assessment.

**Table 3: List of Types of Products and Commodities Subject to Hygienic Assessment**

1. Alimentary raw materials, foodstuffs, food additives, biologically active additives, preservatives; materials and their derivatives contacting foodstuffs.
2. Products for children: games and toys, clothes (including bed-linen), footwear, teaching aids, stationery, furniture, baby carriages, knapsacks, artificial polymer and synthetic materials used in the manufacturing of products for children.
3. Materials, equipment and substances used in commercial and potable water supply practices.
4. Perfumes, cosmetics, mouth care agents.
5. Chemical and petrochemical products for industrial use, household chemicals.
6. Polymer and synthetic materials intended for use in construction, transport and manufacture of furniture and other home-use articles; chemical threads and fibres, textile, sewed and knitted materials containing chemical fibres and textile auxiliary materials; artificial and synthetic leather and textile materials for footwear.
7. Products of mechanical engineering and instrument-making of industrial, medicinal and home use designation.
8. Printed products.
9. Products derived from natural raw materials treated (painting, impregnation, ionizing radiation etc.) in the course of production.
10. Materials for products in contact with human skin.

11. Products and articles constituting a source of ionizing radiation, including generating radiation, as well as products and commodities containing radioactive substances.
12. Building stock and materials in which the content of radioactive substances is restricted by hygienic standards, including industrial waste intended for recycling and use in business, as well as metal scrap.
13. Mobile vehicles and products of transport designation.

HS codes are not indicated as groupings of goods established by the Order do not correspond to the HS.

The Ministry of Health of the Russian Federation plans to group the goods listed in the Order as per the Russian HS during 2001.

An extract from the Price List for Services and Goods provided by the Center for Standardization and Certification of the Ministry of Health of Russia approved by the director of the Center is adduced in the Table below. Prices are the same for domestic and imported products and for services provided to domestic and foreign traders.

Any laboratory research, instrument testing and measurements, expert investigations incidental to hygienic assessment of products and goods are performed by central laboratories on contract basis. The Chief State Sanitary Physician of the Russian Federation approves the list of central laboratories. The price list for works so provided is approved by the chief officials of such centers based on the volume of such works, postal, telephone and other costs.

**Table 4: Extract from the Price List for Services and Goods of the Center for Standardization and Certification of the Ministry of Health of the Russian Federation approved by Order No. 1 of the Director of the Center for Standardization and Certification of the Ministry of Health of Russia of 9 January 2001**

<b>Group 13</b>	<b>Lac; Gums, Resins, and Other Vegetable Saps and Extracts</b>
From 1301	Lac; natural gum, resins, gum-resins and balsams.
<b>Group 14</b>	<b>Vegetable Plaiting Materials; Vegetable Products Not Elsewhere Specified or Included</b>
1401	Vegetable materials of the kind used primarily for plaiting (e.g. bamboos, rattans, reeds, riches, osier, raffia, cleaned, bleached or dyed cereal straw, and lime bark).
1402	Vegetable materials of the kind used primarily as stuffing or as padding (e.g. kapok, vegetable hair, and eel-grass), whether or not put up as a layer with or without supporting material.
1403	Vegetable materials of the kind used primarily in brooms or in brushes (e.g. broomcorn,

Code	Name of Heading
	piassava, couch- grass, and istle), whether or not in hanks or bundles: 1404 10 000 -raw vegetable materials of the kind used primarily in dyeing or tanning.
1404 20 000	Cotton linters.
<b>Group 17</b>	<b>Sugar and Sugar Confectionery</b>
1701 11	Cane sugar.
1701 12	Beet sugar.
<b>Group 18</b>	<b>Cocoa and Cocoa Preparations</b>
1801 00 000	Cocoa beans, whole or broken, raw or roasted.
1802 00 000	Cocoa shells, husks, skins, and other cocoa waste.
<b>Group 19</b>	<b>Preparations or Cereals, Flour, Starch, or Milk; Pastrycooks' Products</b>
1903 00 000	Tapioca.
<b>Group 23</b>	<b>Residues and Waste From Food Industries; Prepared Animal Fodder</b>
2302	Bran, sharps, and other residues, whether or not in the form of pellets, derived from the sifting, milling, or other working of cereals or of leguminous plants.
2303	Residues of starch manufacture and similar residues, beet-pulp, bagasse, and other waste of sugar manufacture, brewing or distilling dregs and waste, whether or not in the form of pellets.
2304 00 000	Oil-cake and other solid residues, whether or not ground or in the form of pellets, resulting from the extraction of soys-bean oil.
2305 00 000	Oil-cake and other solid residues, whether or not ground or in the form of pellets, resulting from the extraction of ground-nut oil.
2306	Oil-cake and other solid residues, whether or not ground of in the form of pellets, resulting from the extraction of vegetable fats or oils, other than those of Headings <u>2304</u> or <u>2305</u> .
2308	Vegetable materials and vegetable waste, vegetable residues and by-products, whether or not in the form of pellets, of the kind used in animal feeding, not elsewhere specified or included.
<b>Group 24</b>	<b>Tobacco and Manufactured Tobacco Substitutes</b>
2401	Unmanufactured tobacco; tobacco refuse.
<b>Group 27</b>	<b>Mineral Fuels, Mineral Oils, and Products of Their Distillation; Bituminous Substances; Mineral Waxes</b>
2703 00 000	Peat (including peat litter), whether or not agglomerated.
<b>Group 30</b>	<b>Pharmaceutical Products</b>
3002 90 500	Cultures of micro-organisms.
<b>Group 31</b>	<b>Fertilizers</b>
3101 00 000	Animal or vegetable fertilizers, whether or not mixed together or chemically treated; fertilizers produced by mixing or chemical treatment of animal or vegetable products.
<b>Group 41</b>	<b>Raw Hides and Skins (Other Than Furskins) and Leather</b>
4101-4103	Raw hides and skins of bovine or equine animals, raw skins of sheep or lambs or other raw hides and skins, other than those excluded by <u>Note 1b</u> or <u>1c</u> to this Chapter: fresh or salted, dried, limed, pickled, or otherwise preserved, but not tanned, parchment-dressed, or further prepared), whether or not dehaired or split.
<b>Group 44</b>	<b>Wood and Articles of Wood; Wood Charcoal</b>
From 4401	Fuel wood, in logs, in billets, in twigs, in faggots, or in similar forms; wood in chips, or particles; sawdust and wood waste and scrap.
4403	Wood in the rough, whether or not stripped of bark or sapwood, or roughly squared.
4404	Hoopwood; split poles; piles, pickets, and stakes, of wood, pointed but not sawn lengthwise; wooden sticks, roughly trimmed but not turned, bent, or otherwise worked, suitable for making walking-sticks, umbrellas, tool handles, or the like; chipwood and the like.
4406 10 000	Railway or tramway sleepers (cross-ties), of wood: not impregnated.
4407	Wood, sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded, or finger-jointed, with thickness exceeding 6 mm.
4408	Veneer sheets and sheets for plywood (whether or not spliced) and other wood sawn

Code	Name of Heading
	lengthwise, sliced or peeled, whether or not planed, sanded, or finger-jointed, with thickness not more than 6 mm.
4409	Wood (including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rebated, chamfered, V-jointed, beaded, moulded, rounded or the like) along any of its edges or faces, whether or not planed, sanded, or finger-jointed.
4415	Packing cases, boxes, crates, drums, and similar packings, of wood; cable-drums of wood; pallets, box pallets, and other load boards, of wood; pallet collars of wood.
4416 00	Casks, barrels, vats, tubs, and other cooper's products and parts thereof, of wood, including staves.
4418	Builders' joinery and carpentry, of wood, including cellular wood panels, assembled parquet panels, shingles and shakes.
<b>Group 45</b>	<b>Cork and Articles of Cork</b>
4501	Natural cork, raw or simply prepared; waste cork; crushed, granulated or ground cork.
<b>Group 46</b>	<b>Manufactures of Straw, of Esparto, or of Other Plaiting Materials; Basketware and Wickerwork</b>
From 4601	Plaits and similar products of plaiting materials.
From 4602	
<b>Group 47</b>	<b>Pulp of Wood or of Other Fibrous Cellulosic Material; Recovered (Waste And Scarp) Paper or Paperboard</b>
4701 00 900	Mechanical wood pulp: thermo-mechanical wood pulp, other.
<b>Group 48</b>	<b>Paper and Paperboard; Articles of Paper Pulp, of Paper, or of Paperboard</b>
4808 10 000	Corrugated paper and paperboard, whether or not perforated.
4819 10 000	Cartons, boxes, and cases, of corrugated paper or paperboard.
<b>Group 50</b>	<b>Silk</b>
5001 00 000	Silk-worm cocoons suitable for reeling.
5003	Silk waste (including cocoons unsuitable for reeling, yarn waste and garnetted stock).
<b>Group 51</b>	<b>Wool, Fine or Coarse Animal Hair; Horsehair Yarn and Woven Fabric</b>
5101 – 5102	Wool, fine or coarse animal hair not carded or combed.
5103	Waste of wool or of fine or coarse animal hair, including yarn waste, but excluding garnetted stock.
<b>Group 52</b>	<b>Cotton</b>
5201 00	Cotton, not carded or combed.
5202	Cotton waste (including yarn waste and garnetted stock):
5203 00 000	Cotton, carded or combed
<b>Group 53</b>	<b>Other Vegetable Textile Fibres; Paper Yarn and Woven Fabrics or Paper Yarn</b>
5301	Flax, raw or processed, but not spun; flax tow and waste (including yarn waste and garnetted stock).
5302	True hemp ( <i>Cannabis sativa</i> L.), raw or processed, but not spun; tow and waste of true hemp (including yarn waste and garnetted stock).
5303	Jute and other textile bast fibres (excluding flax, true hemp, and ramie), raw or processed, but not spun; tow and waste of these fibres (including yarn waste and garnetted stock).
5304	Sisal and other textile fibres of <i>Agave</i> genus, raw or processed, but not spun; tow and waste of these fibres (including yarn waste and garnetted stock).
5305	Coconut, abaca ( <i>Manila hemp</i> or <i>Musa textilis</i> Nee), ramie and other vegetable textile fibres, not elsewhere specified or included, raw or processed, but not spun; tow, noils, and waste of these fibres (including yarn waste and garnetted stock): of coconut (coir).
<b>Group 96</b>	<b>Miscellaneous Manufactured Articles</b>
9603 10 000	Brooms and brushes, consisting of twigs or other vegetable materials bound together, with or without handles-tooth brushes, shaving brushes, hair brushes, nail brushes, eyelash brushes, and other toilet brushes for use on the person, including such brushes making part of appliances.
<b>Group 97</b>	<b>Works of Art, Collectors' Pieces, and Antiques</b>

### **Activities Subject to Licensing**

The list of activities subject to licensing, aims and basic principals of licensing, and licensing procedure requirements are strictly determined by the Federal Law № 158-FZ of 25 September 1998 On Licensing of Certain Types of Activities<sup>2</sup> (as amended on 26 November 1998, 22 December 1999, 12 May, 29 December 2000).

Licensing of certain types of activity is aimed at ensuring a single state policy in the regulation and protection of the consumers' rights and legal interests, morale and health, the ensuring of the security of the state.

Complete list of activities subject to licensing is stated in the Federal Law № 158-FZ of 25 September 1998 On Licensing of Certain Types of Activities (Table 1).

For obtaining a license an applicant shall submit to the relevant licensing body the following documents:

1. An application for the issuance of a license with the indication of:
  - the name and the legal-organizational form of the juridical person, its location, the name of the bank and the number of the settlement account in the bank for a juridical person;
  - the full name, the data of the identity paper of the citizen - for an individual businessman;
  - the name of activity which the juridical person or the individual businessman intend to carry out, and the period of time during which the indicated activity will be carried out.
2. Copies of the constituent documents and a copy of the certificate on the state registration of the licensee as a juridical person (with the presentation of the originals in the case that the copies have not been notarized) - for juridical persons.
3. A copy of the certificate on the state registration of the citizen as an individual businessman (with the presentation of the original in the case that the copy has not been notarized) - for individual businessmen.
4. A reference on the registration of the licensee with the tax body.
5. A document confirming the payment by the applicant for the license of the fee for the consideration by the licensing body of the application of the applicant for the license.

<sup>2</sup> The types of activity which have not been included in the Federal Law № 158-FZ may be subject to licensing in accordance with other federal laws which entered into force before the entry into force of this Federal Law. The particularities of licensing of types of activity requiring licensing according to other federal laws are indicated in the Table 2.

### **Fee Structure**

License fees are established on non-discriminatory basis.

For the consideration by a licensing body of an application for a license the said body collects a fee, the maximum rate of which may not exceed a threefold minimum rate of the remuneration of labour<sup>3</sup> established by the federal law.

A licence fee is collected for the issuance of a license. The maximum rate of the license fee must not exceed a tenfold minimum rate of the remuneration of labor established by the federal law.

In the case of the redrawing-up of a document confirming the presence of a license, a fee is collected for the issuance of the said documents and the introduction of changes therein. The rate of the said fee must not exceed one tenth of the minimum rate of the remuneration of labor established by the federal law.

The types of activity which have not been included in the Federal Law № 158-FZ may be subject to licensing if it is stipulated by other federal laws which entered into force before the entry into force of this Federal Law. The particularities of licensing of types of activity requiring licensing according to other federal laws are indicated in the Table 2.

For the purpose of increasing the transparency and efficiency of the existing licensing system the new Federal Law "On Licensing of Certain Types of Activities" № 128-FZ of 8 August 2001 was adopted. This Law will come into force in 6 months from the day of its official publication (on 10 February 2002). According with this Federal Law the List of the types of activity, which are subject to licensing, is significantly shortened – from 216 to 120 types of activities. (List of Activities Subject to Licensing according to the new Federal Law On Licensing of certain Types of Activities is enclosed).
