# HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM 

Changes in the Harmonized System to be Introduced on 1 January 2007
Correlation tables

The following communication, dated 1 March 2006, was received from the World Customs Organization.

Introduction
This publication contains the tables ${ }^{1}$ correlating the 2002 and 2007 editions of the Harmonized System (HS), as drawn up by the World Customs Organization Secretariat in accordance with instructions received from the Harmonized System Committee.

Though these Correlation Tables were examined by the Harmonized System Committee, they are not to be regarded as constituting classification decisions taken by that Committee; they constitute a guide published by the Secretariat and whose sole purpose is to facilitate implementation of the 2007 version of the Harmonized System. They do not have legal status.

During the discussions within the Review Sub-Committee and the Harmonized System Committee aimed at amending the HS Nomenclature, several differing views emerged concerning the present classification of certain goods, without the Committee ruling officially on their classification. It was agreed that the Tables should be as comprehensive as possible and thus include correlations supported by several Contracting Parties, even if the subheadings mentioned did not reflect the views expressed by the majority within the Committee. The Correlation Tables might be subject to further amendments or changes. The most recent version is reproduced on this Web site (www.wcoomd.org).

Table 1 establishes the correlation between the 2007 version and the 2002 version of the HS. It contains remarks opposite certain correlations briefly specifying the nature of the goods transferred. In many cases, reference has also been made to the amended legal provisions. In addition, where differing views emerged within the Harmonized System Committee concerning the present classification of certain goods, an annotation has been added opposite the subheadings concerned.

The left-hand column of Table 1 refers to the HS 2007 code numbers whose scope has been changed compared with HS 2002, or which have been introduced as new entries. The centre column contains the corresponding HS 2002 code numbers, and may be preceded by "ex". This prefix indicates that the corresponding HS 2007 entry contains only part of the referenced subheading. For example, new subheading 0301.94 contains a part of the HS 2002 code number 0301.99, which is,

[^0]therefore, preceded by "ex". The other part of HS 2002 code number 0301.99 is covered by new subheading 0301.95 or remains in subheading 0301.99.

In some cases, however, the code number has been changed though its content remains the same. For example. subheading 3006.92 (HS 2007) has the same scope as subheading 3006.80 (HS 2002), and subheadings 8487.10 and 8487.90 have the same scope as HS 2002 code numbers 8485.10 and 8485.90 , respectively. The renumbering was necessary because the different structure of the nomenclature of heading 30.06 and the renumbering of heading 84.85 to 84.87 , respectively.

In other cases, the code number has not been changed, although the scope of the subheading did change, in particular when it concerned so called "residual" subheadings. For example, code number 2827.39 has not been changed, despite the fact that the subheading now also covers the contents of HS 2002 subheadings 2827.33, 2827.34 and 2827.36 (which were deleted due to low trade volumes).

Table II establishes the correlation starting from the $\mathbf{2 0 0 2}$ version. It is simply a mechanical transposition of Table I and therefore includes no remarks.

Table II contains the HS 2002 code number references in the left-hand column, with the corresponding HS 2007 entry in the right-hand column. The prefix "ex" is used in the same way as it has been used in Table I, i.e., to indicate that only a part of the subheading concerned is covered by the code number referred to in the left-hand column.

TABLE I - CORRELATING THE 2007 VERSION TO THE 2002 VERSION OF THE HARMONIZED SYSTEM
