

## CHAPTER 35

### Primary Rules

### Chapter Notes

#### **1. Chemical Reaction**

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (1) dissolving in water or other solvents;
- (2) the elimination of solvents including solvent water; or
- (3) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin-conferring.

#### **2. Mixtures and Blends**

[For the purposes of subheading 3502.20 and headings 35.06 and 35.07, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring.]

#### **3. Purification**

Purification is considered to be origin conferring provided that one of the following criteria is satisfied:

- (a) purification of a good resulting in the elimination of 50 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
  - (i) pharmaceutical, medical, cosmetic, veterinary or food grade substances;
  - (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
  - (iii) elements and components for use in micro-electronics;
  - (iv) specialized optical uses;
  - (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst);
  - (vi) carriers used in a separation process; or
  - (vii) nuclear grade uses.

**4. Reduction in particle size**

The deliberate and controlled reduction in particle size of a good, other than by merely crushing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.

**5. Standard Materials**

Standard materials (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer. The production of standard materials is to be considered as origin conferring.

**6. Isomer Separation**

The isolation or separation of isomers from a mixture of isomers is to be considered as origin-conferring.

**7. Non-Origin Conferring Processes**

[For the purposes of Chapters 30-38 the addition, whether or not in combination, of the additives enumerated in HS Chapter Notes 1(f) and 1(g) to Chapter 29 for the purposes indicated therein is not origin conferring.]

**8. Packing for retail sale**

For the purposes of heading 35.06, the change of classification resulting from the mere putting up for retail sale of products of this Chapter is not to be considered origin-conferring.

## CHAPTER 38

### **Primary Rules**

### **Chapter Notes**

#### **1. Chemical Reaction**

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (1) dissolving in water or other solvents;
- (2) the elimination of solvents including solvent water; or
- (3) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin conferring.

#### **2. Mixtures and Blends**

[For the purposes of headings 38.01, 38.04, 38.06, 38.07, 38.08 through 38.15, 38.19 through 38.21, 38.23 and 38.24, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring. ]

#### **3. Purification**

Purification is considered to be origin conferring provided that one of the following criteria is satisfied:

- (a) purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:

  - (vi) carriers used in a separation process; or
  - (vii) nuclear grade uses.

#### **4. Change in particle size**

[For the purposes of headings 38.02, 38.08, 38.09, 38.11, 38.12 and 38.15, the deliberate and controlled modification in particle size of a good, other than by merely crushing [or pressing,] resulting in a good having a defined particle size, defined particle size distribution or defined surface

area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.]

**5. Standard Materials**

Standard materials (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer. The production of standard materials is to be considered as origin conferring.

**6. Packing for retail sale**

For the purposes of headings 38.08 and 38.13, the change of classification resulting from the mere putting up for retail sale of products of this Chapter is to be disregarded for the determination of origin.

**7. Non-Origin Conferring Processes**

[For the purposes of Chapters 30-38 the addition, whether or not in combination, of the additives enumerated in HS Chapter Notes 1(f) and 1(g) to Chapter 29 for the purposes indicated therein is not origin conferring.]

## CHAPTER 39

### **Chapter Notes**

#### **1. Chemical Reaction**

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (1) dissolving in water or other solvents;
- (2) the elimination of solvents including solvent water; or
- (3) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin conferring.

This definition comprises all types of polymerization reactions and chemical modification of polymers, including cross-linking by hardener/cross-linking agents and irradiation.

#### **2. Mixtures and Blends**

- (a) [The deliberate and proportionally controlled mixing or blending including dispersing of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring.]
- (b) [The deliberate and proportionally controlled mixing or blending of polymers, which results in the production of a polymer blend having physical and/or chemical characteristics different from the individual constituents, is considered to be origin conferring. (Headings 39.01-39.15)]

This definition comprises polymer compounding and the use of recycled polymers.

#### **3. Purification**

Purification is considered to be origin conferring provided that one of the following criteria is satisfied:

- (a) purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
  - (i) pharmaceutical, medical, cosmetic, veterinary or food grade substances;
  - (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
  - (iii) elements and components for use in micro-electronics;
  - (iv) specialized optical uses;
  - (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst);
  - (vi) carriers used in a separation process; or
  - (vii) nuclear grade uses.

#### 4. Change in particle size

[The deliberate and controlled modification in particle size of a good including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.]

#### Chapter Residual Rule

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) Goods of headings 39.01 through 39.14 produced by mixing or otherwise combining materials of different origins, originate in the country that produced the polymers that predominate by weight or volume, as appropriate, over those of each other single country.]

### **Primary Rules**

#### **Chapter Notes**

##### **1. Chemical Reaction**

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (a) dissolving in water or other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin conferring.

##### **2. Mixtures and Blends**

[The deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring. ]

### **Primary Rules**

#### **Chapter Notes**

##### **[1. Minor processing operations not affecting origin.**

For the purposes of determining the country of origin for goods falling within Section XI that are not wholly obtained in one country, the following individual processes, considered singly, are minimal operations and shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes; or
- (d) Putting up goods for retail sale or in sets or ensembles.]

[2. The term “complete making-up” means that all the operations following cutting have to be performed. However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings;
- making of button-holes;
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses;
- fitting of trimmings and accessories such as pockets, labels, badges, etc.;
- ironing and other preparations of garments for sale “ready made”.]

#### **Chapter Residual Rule**

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) The country of origin of a good of heading 42.02 or 42.03 that was assembled from parts, but was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.]

### Primary Rules

#### Note

#### [Minor processing operations not affecting origin.]

For the purposes of determining the country of origin for goods falling within Section XI that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles. ]

### Primary Rules

#### Note 1: [Minor processing operations not affecting origin.]

1. For the purposes of determining the country of origin for goods falling within Section XI that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles. ]

#### Note 2:

2. For the purposes of heading 58.10 embroidery in strips or in motifs means:

- (a) embroidered fabric not exceeding 30 cm in width (strips);
- (b) embroidery in a motif, whether or not rectangular in shape, which is capable of being enclosed in a square or rectangular frame the area of which is no more than 1 square meter.

[3. Application of the value added rule:

- (a) The term "**x% value added rule**" shall mean manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least x% of the ex-works price of the product. "X" is the percentage indicated for each heading.
- (b) The term "**ex-works price**" shall mean the price to be paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out (this price shall not include internal taxes which are, or may be, repaid when such product is exported);
- (c) The term "**value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture**" shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations;
- (d) The term "**value of non-originating materials**" means the customs value at the time of importation of the non-originating materials used, or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the country of importation.]

## **Chapter Residual Rule**

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) The country of origin of quilted fabrics of heading 58.11 of this Chapter shall be the country in which the exterior textile fabric was formed, or in the case of a good containing textile fabrics of more than one country, the origin of the good is the country in which the exterior textile fabric that predominates by weight was formed. ]

### Primary Rules

#### Note:

#### 1. [Minor processing operations not affecting origin.

For the purposes of determining the country of origin for goods falling within Section XI that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles.]

#### 3. Assembly in a Single Country

- [(a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric, or the knitting or crocheting, to shape of the parts have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
  - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes collars;
  - making button holes, hemming, pressing, stone or acid washing.]

#### 3. [Application of the value added rule

- (a) The term "**x% value added rule**" shall mean manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least x% of the ex-works price of the product. "X" is the percentage indicated for each heading.
- (b) The term "**ex-works price**" shall mean the price to be paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out (this price shall not include internal taxes which are, or may be, repaid when such product is exported);
- (c) The term "**value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture**" shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating

in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations;

- (d) The term "**value of non-originating materials**" means the customs value at the time of importation of the non-originating materials used, or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the country of importation.

#### **[Chapter Residual Rule**

When application of the primary rules of this Chapter (including the product specific rules provided in the matrix) do not result in a determination of a country of origin, the country of origin shall be determined as follows :

- (1) Where the primary rule for a good assembled from parts requires that the good be wholly assembled in a single country, the country of origin of such a good that was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.
- (2) The country of origin of other goods of this Chapter shall be the country where the textile fabric or knit-to-shape components was formed, or in the case of a good containing textile fabrics or knit-to-shape component of more than one country, the origin of the good is the country in which the textile fabric or knit-to-shape component that predominates by weight was formed. ]

### Primary Rules

#### Note

1. **Minor processing operations not affecting origin.**

For the purposes of determining the country of origin for goods falling within Section XI that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles.]

2. **Assembly in a Single Country**

- (a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric, to shape of the parts have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
  - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes, collars;
  - making button holes, hemming, pressing, stone or acid washing ]

3. **[Application of the value added rule**

- (a) The term "**x% value added rule**" shall mean manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least x% of the ex-works price of the product. "X" is the percentage indicated for each heading.
- (b) The term "**ex-works price**" shall mean the price to be paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out (this price shall not include internal taxes which are, or may be, repaid when such product is exported);
- (c) The term "**value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture**" shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating

in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations;

- (d) The term "**value of non-originating materials**" means the customs value at the time of importation of the non-originating materials used, or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the country of importation.

### **Chapter Residual Rule**

When application of the primary rules of this Chapter (including the product specific rules provided in the matrix) do not result in a determination of a country of origin, the country of origin shall be determined as follows :

- (1) Where the primary rule for a good assembled from parts requires that the good be wholly assembled in a single country, the country of origin of such a good that was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.
- (2) The country of origin of other goods of this Chapter shall be the country where the textile fabric or knit-to-shape components was formed, or in the case of a good containing textile fabrics or knit-to-shape component of more than one country, the origin of the good is the country in which the textile fabric or knit-to-shape component that predominates by weight was formed. ### Chapter Residual Rule

When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

[1. For a good of headings 65.01 through 65.05 that was assembled from parts, where the primary rule requires that the good be wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, hanger loops, tighteners, labels, hat bands, ornaments and other minor components.]

## CHAPTER 72

### Primary Rules

### Notes

1. For the purposes of this Chapter, a change of classification resulting only from cutting is not regarded as a substantial transformation.
2. For purposes of this Chapter, the expressions "cold-rolled(cold-reduced)" and "cold-formed" mean cold reduction resulting in changes to the crystalline structure of the workpiece. The expressions do not include very light cold-rolling and cold-forming processes (skin pass or pinch pass) which act only on the surface of the material and do not result in change to its crystalline structure.
