CHAPTER 38

Chapter Note: Non-Origin Conferring Processes

[For the purposes of Chapters 30-38 the addition, whether or not in combination, of the additives enumerated in HS Chapter Notes 1(f) and 1(g) to Chapter 29 for the purposes indicated therein is not origin conferring.]

Primary Rule 1: Chemical Reaction

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (1) dissolving in water or other solvents;
- (2) the elimination of solvents including solvent water; or
- (3) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin conferring.

Primary Rule 2: Mixtures and Blends

[For the purposes of headings 38.01, 38.04, 38.06, 38.07, 38.08 through 38.15, 38.19 through 38.21, 38.23 and 38.24, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring.]

Primary Rule 3: Purification

Purification is considered to be origin conferring provided that one of the following criteria is satisfied:

- (a) purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (i) pharmaceutical, medical, cosmetic, veterinary or food grade substances;
 - (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (iii) elements and components for use in micro-electronics;
 - (iv) specialized optical uses;
 - (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst);
 - (vi) carriers used in a separation process; or
 - (vii) nuclear grade uses.

Primary Rule 4: Change in particle size

[For the purposes of headings 38.02, 38.08, 38.09, 38.11, 38.12 and 38.15, the deliberate and controlled modification in particle size of a good, other than by merely crushing [or pressing,] resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.]

Primary Rule 5: Standard Materials

Standard materials (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer. The production of standard materials is to be considered as origin conferring.

[Criterion to apply Appendix 2, Rule 1(g)]

The criterion to determine the major portion of the materials as set forth in Appendix 2, Rule 1(g) for this Chapter is weight.

CHAPTER 39

Primary Rule 1: Chemical Reaction

A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (1) dissolving in water or other solvents;
- (2) the elimination of solvents including solvent water; or
- (3) the addition or elimination of water of crystallization

A chemical reaction as defined above is to be considered origin conferring.

This definition comprises all types of polymerization reactions and chemical modification of polymers, including cross-linking by hardener/cross-linking agents and irradiation.

Primary Rule 2: Mixtures and Blends

[The deliberate and proportionally controlled mixing or blending including dispersing of materials other than the addition of diluents only to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is to be considered to be origin conferring.]

Primary Rule 3: Purification

Purification is considered to be origin conferring provided that one of the following criteria is satisfied:

- (a) purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (i) pharmaceutical, medical, cosmetic, veterinary or food grade substances;

 - (iii) elements and components for use in micro-electronics;
 - (iv) specialized optical uses;
 - (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst);
 - (vi) carriers used in a separation process; or
 - (vii) nuclear grade uses.

Primary Rule 4: Change in particle size

[The deliberate and controlled modification in particle size of a good including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which

are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.]

Chapter Residual Rule

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) Goods of headings 39.01 through 39.14 produced by mixing or otherwise combining materials of different origins, originate in the country that produced the polymers that predominate by weight or volume, as appropriate, over those of each other single country.]

CHAPTER 42

Definition 1: Assembly in a single country

- (a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric, or the knitting or crocheting, to shape of the parts have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
 - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes collars;
 - making button holes, hemming, pressing, stone or acid washing.

Definition 2: Complete making-up

The term “complete making-up” means that all the operations following cutting have to be performed. However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings;
- making of button-holes;
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses;
- fitting of trimmings and accessories such as pockets, labels, badges, etc.;
- ironing and other preparations of garments for sale “ready made”.

Chapter Note: Minor processing operations not affecting origin

For the purposes of determining the country of origin for goods in Chapter 42 that are not wholly obtained in one country, the following individual processes, considered singly, are minimal operations and shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes; or
- (d) Putting up goods for retail sale or in sets or ensembles.]

Chapter Residual Rule

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

The country of origin of a good of heading 42.02 or 42.03 that was assembled from parts, but was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.]

[Criterion to apply Appendix 2, Rule 1(g)]

The criterion to determine the major portion of the materials as set forth in Appendix 2, Rule 1(g) for this Chapter is weight.

CHAPTER 43

Definition 1: Assembly in a single country

- (a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric, or the knitting or crocheting, to shape of the parts have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
 - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes collars;
 - making button holes, hemming, pressing, stone or acid washing.

Definition 2: Complete making-up

The term “complete making-up” means that all the operations following cutting have to be performed. However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings;
- making of button-holes;
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses;
- fitting of trimmings and accessories such as pockets, labels, badges, etc.;
- ironing and other preparations of garments for sale “ready made”.

Chapter Note: Minor processing operations not affecting origin.

For the purposes of determining the country of origin for goods falling of headings 43.03 or 43.04 that are not wholly obtained in one country, the following individual processes, considered singly, are minimal operations and shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other materials; or separating goods produced in the finished state by cutting along dividing threads or lines;
- (c) Assembling or joining goods by sewing, or stitching for convenience of shipment or other temporary purposes; or
- (d) Putting up goods for retail sale or in sets or ensembles.]

Chapter Residual Rule

[When application of the primary rules of this chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) The country of origin of goods of heading 43.03 that was assembled from parts, but was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.]

Primary Rule: Minor processing operations not affecting origin.

For the purposes of determining the country of origin for goods falling within Chapter 50 that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;

Primary Rule 1: Minor processing operations not affecting origin.

For the purposes of determining the country of origin for goods falling within Chapter 55 that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles.]

Primary Rule: Minor processing operations not affecting origin

For the purposes of determining the country of origin for goods falling within Chapter 60 that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles.

CHAPTER 61

Definition: Assembly in a Single Country

- [(a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric to parts, or the knitting or crocheting to shape of the parts, have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
 - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes collars;
 - making button holes, hemming, pressing, stone or acid washing.]

Chapter Note: Application of the value added rule

- (a) The term "**50% value added rule**" shall mean manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least 50% of the ex-works price of the product.
- (b) The term "**ex-works price**" shall mean the price to be paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out (this price shall not include internal taxes which are, or may be, repaid when such product is exported);
- (c) The term "**value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture**" shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations;

Primary Rule: Minor processing operations not affecting origin

For the purposes of determining the country of origin for goods falling within Chapter 61 that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;
- (d) Putting up goods for retail sale or in sets or ensembles.

[Chapter Residual Rule]

When application of the primary rules of this Chapter (including the product specific rules provided in the matrix) do not result in a determination of a country of origin, the country of origin shall be determined as follows:

- (1) Where the primary rule for a good assembled from parts requires that the good be wholly assembled in a single country, the country of origin of such a good that was not wholly assembled in a single country, is the country in which the most significant assembly operations were performed in the making-up of the good, without regard to the addition of buttons and other fasteners, belt and hanger loops, belts, patch pockets, labels, foot straps, epaulettes, ornaments and other minor components.
- (2) The country of origin of other goods of this Chapter shall be the country where the textile fabric or knit-to-shape components was formed, or in the case of a good containing textile fabrics or knit-to-shape component of more than one country, the origin of the good is the country in which the textile fabric or knit-to-shape component that predominates by weight was formed.]

[Criterion to apply Appendix 2, Rule 1(g)]

The criterion to determine the major portion of the materials as set forth in Appendix 2, Rule 1(g) for this Chapter is weight.

[Criterion to apply Appendix 2, Rule 2(f)]

The criteria to apply the *de minimis* provision as set forth in Appendix 2, Rule 2(f) for this Chapter is weight.

Definition: Assembly in a Single Country

- (a) For the purposes of this chapter, and subject to paragraph (b), the term “assembled in a single country” means that all of the assembly operations following the cutting of the fabric to parts have been performed in that country.
- (b) For the purposes of paragraph (a) performing or not performing operations such as the following shall not affect the determination of whether the good has been assembled in a single country:
 - attaching to garments or accessories items such as accessories, buttons and other fasteners, pockets, trimmings, cuffs, plackets, labels, foot straps, ornaments, belt loops, epaulettes, collars;
 - making button holes, hemming, pressing, stone or acid washing.]

Chapter Note: Application of the value added rule

- (a) The term **"50% value added rule"** shall mean manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least 50% of the ex-works price of the product.
- (b) The term **"ex-works price"** shall mean the price to be paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out (this price shall not include internal taxes which are, or may be, repaid when such product is exported);
- (c) The term **"value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture"** shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations;

Primary Rule 1: Minor processing operations not affecting origin

For the purposes of determining the country of origin for goods falling within Chapter 62 that are not wholly obtained in one country, the following individual processes, considered singly, shall not affect the origin of the goods concerned, whether or not such processes result in changes of classification:

- (a) Working or finishing one or more edges by hemming, rolling, whipping or similar means or by knotting fringe;
- (b) Cutting fabrics, yarns or other textile materials; or separating goods produced in the finished state by cutting along dividing threads;
- (c) Assembling or joining goods by sewing or stitching for convenience of shipment or other temporary purposes;

- (d) Putting up goods for retail sale or in sets or ensembles.

CHAPTER 72

Definition

For the purposes of this Chapter, the expressions "cold-rolled(cold-reduced)" and "cold-formed" mean cold reduction resulting in changes to the crystalline structure of the workpiece. The expressions do not include very light cold-rolling and cold-forming processes (skin pass or pinch pass) which act only on the surface of the material and do not result in change to its crystalline structure.

Chapter Note

For the purposes of this Chapter, a change of classification resulting only from cutting is not regarded as origin-conferring.

[Criterion to apply Appendix 2, Rule 1(g)]

The criterion to determine the major portion of the materials as set forth in Appendix 2, Rule 1(g) for this Chapter is weight.
