

TECHNICAL ASSISTANCE AND COOPERATION  
LIST OF EXPERTS IN RISK ANALYSIS

Submission by the European Community at the meeting of 12-13 March 1998

1. Article 9 of the SPS Agreement sets out that Members should facilitate the provision of technical assistance to other Members, especially developing country Members, in order to allow such countries to adjust to, and comply with, SPS measures necessary to achieve the appropriate level of sanitary and phytosanitary protection in their exporting markets.
2. Risk analysis and the concepts pertaining to it (such as risk assessment and risk management) are seen as complicated, especially by developing country Members, and apparently there is insufficient practical knowledge in this area. As a consequence, a number of developing country Members have requested assistance to the SPS Committee in strengthening technical expertise in specific areas of risk analysis.
3. The European Community has compiled a list of experts in the field of risk analysis who could assist the SPS Secretariat to run seminars to provide technical assistance to Members in meeting their obligations and accruing the benefits of the SPS Agreement.
