NOTIFICATION

Addendum

The following communication, dated 2 December 2004, is being circulated at the request of the Delegation of Canada.

Regulations Amending the Food and Drug Regulations (1387 - Cyhalothrin-lambda)

The Pest Management Regulatory Agency (PMRA) of Health Canada has recently approved an application to amend the registration of cyhalothrin-lambda in order to allow its use for the control of onion thrips on leeks. This regulatory amendment will establish a maximum residue limit (MRL) for residues of cyhalothrin-lambda resulting from this use in leeks, in order to permit the sale of food containing these residues.

After the review of all available data, the PMRA has determined that an MRL for cyhalothrin-lambda of 0.15 ppm in leeks would not pose an unacceptable health risk to the public.
