

Fee structure

License fees are established on non-discriminatory basis.

For the consideration by a licensing body of an application for a license the said body collects a fee, the maximum rate of which may not exceed a threefold minimum rate of the remuneration of labour¹ established by the federal law.

A license fee is collected for the issuance of a license. The maximum rate of the license fee must not exceed a tenfold minimum rate of the remuneration of labour established by the federal law.

In the case of the redrawing-up of a document confirming the presence of a license, a fee is collected for the issuance of the said documents and the introduction of changes therein. The rate of the said fee must not exceed one tenth of the minimum rate of the remuneration of labour established by the federal law.

The types of activity which have not been included in the Federal Law № 158-FZ may be subject to licensing if it is stipulated by other federal laws which entered into force before the entry into force of this Federal Law. The particularities of licensing of types of activity requiring licensing according to other federal laws are indicated in the Table 2.

For the purpose of increasing the transparency and efficiency of the existing licensing system the Government of the Russian Federation has elaborated and adopted the Draft of the new Federal Law on Licensing and officially submitted it to the State Duma. According with this Draft Law the List of the types of activity, which are subject to licensing, is significantly shortened (List of Activities Subject to Licensing According to the Draft of the new Federal Law On Licensing)

¹ Minimum rate of the remuneration of labor: from 1 January 2001 – 100 rubles per month.

Table 1

List of activities whose licensing is established by the Federal Law No. 158-FZ On Licensing of certain types of activities

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. Additional documents affirming the conformity of an applicant for a license to the established license requirements and conditions.
1	Television broadcasting; Radio broadcasting	Federal Service of Russia for Telecasting and Radio Broadcasting by agreement with the Ministry of Communications of the Russian Federation	Documents: - the application according to the form established by the Federal Service of Russia for Telecasting and Radio Broadcasting; - information about the basic technical and economic indicators of the means of preparing and forming TV and radio programmes. The application shall be appended with the duly certified copies of the registration certificate as a mass information medium and the editorial charter (the enterprise's charter), and also the document certifying the payment for the issue of a license. In case of the contemplated use of equipment belonging to another person, the right of lease (use) of this equipment shall be confirmed. The confirmation may be presented in the form of a contract or its copy certified in the established order.
2	Broadcasting of additional information	Ministry of Printing, of the Television and Radio Broadcasting and of the Mass Communication Media of Russia	
3	Audit activity Separate licenses shall be issued for the following kinds of audit activities: a) audit of insurance companies and mutual insurance societies (audit of insurers); b) audit of stock exchanges, extra-budgetary funds	Ministry of Finance of the Russian Federation	Documents: a) for an individual businessman, the notarized copy of the auditor qualification certificate to the right to engage in the particular kind of auditing; a standard reference from his place of residence; b) for an auditing organization, bank references or other documents confirming the payment for the auditing organization's authorized capital; information about the auditing organization managers, their deputies and the certified auditors working in the auditing organization (including their family name, given name, middle name and position held), including notarized copies of the auditors' qualification certificates. The following shall be the documents used to confirm the payment for the auditing organization's authorized capital: a copy of the organization's balance sheet bearing a note made by the tax body or a conclusion of another auditing organization or an independent auditor who holds a relevant auditing license.

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. Additional documents affirming the conformity of an applicant for a license to the established license requirements and conditions.
	and investment institutions; c) general audit (audit of other legal entities and individual businessmen). Bank auditing	Bank of Russia	<p><u>Requirements and conditions:</u></p> <ol style="list-style-type: none"> 1) the auditing organization may not have the form of an open joint stock company; 2) the authorized capital (authorized fund) as stated in the foundation documents shall be not less than 100-fold minimal wages established by the federal law (at the application filing date); 3) the share owned by certified auditors and/or licensed auditing organizations shall be not less than 51 per cent of the authorized capital (authorized fund) of the auditing organization; 4) the auditing organization shall have at least two full time auditors holding valid auditor certificates that cover the area of auditing activities stated in the application filed to obtain the license. <p>The license shall be issued to an individual businessman who receives it for the first time, provided he holds a valid auditor certificate that covers the area of auditing activities stated in the application filed to obtain the license.</p> <p><u>For Bank Auditing</u></p> <p><u>Documents:</u></p> <ul style="list-style-type: none"> - information on the head, deputy heads and employees engaged in bank audit (either entered in the list of staff or combining jobs) holding a qualification certificate, including full names and positions, and signed by an official with the seal of the license contender affixed thereto and copies of auditors' qualification certificates whereby they are entitled to engage in bank audits being attached thereto; - information on the founders (stakeholders) of the license contender as including indication of the name of the legal entity, full name of the natural person, his/her main employer, the numbers and dates of issue of an auditor's qualification certificates, audit licenses, if any, the amount of the contribution (stake) made by the stakeholders (founders) in the authorised capital as of the time when the application is being filed; - documents confirming that the license contender has its authorised capital paid (copies of payment instructions or assets acceptance certificates, certificates of the valuation of the said assets in the case of the authorised capital having been paid in noncash form or other documents).
4	Activity in the distribution of encoding facilities	Federal Agency for the Governmental Communication and Information	
5	Activity in the technical servicing of encoding facilities	Federal Agency for the Governmental Communication and Information	

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. Additional documents affirming the conformity of an applicant for a license to the established license requirements and conditions.
6	Furnishing of services in the field of the encoding of information	Federal Agency for the Governmental Communication and Information	
7	Activity in the manufacture of special protective marks designed for the marking of goods, accompanying commodity documents and the confirmation of the authenticity of documents and securities	State Technical Commission of Russia, Federal Agency for Governmental Communication and Information, Ministry of Finance of Russia	
8	Activity in the distribution of special protective marks designed for the marking of goods, accompanying commodity documents and the confirmation of the authenticity of documents and securities	State Technical Commission of Russia, Federal Agency for Governmental Communication and Information, Ministry of Finance of Russia	
9	Activity in the use of technical facilities designed for the revelation of electronic devices serving for secret obtention of information	Federal Security Service of Russia, Federal Agency for the Governmental Communication and Information, Foreign Intelligence Service of Russia	

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. Additional documents affirming the conformity of an applicant for a license to the established license requirements and conditions.
10	<p>Activity of the centers of obligatory certification; Activity of testing laboratories (expert centers) in the field of obligatory certification Licenses shall be issued for the following works:</p> <ul style="list-style-type: none"> - to the bodies responsible for the certification of products - for the work of certifying within the limits of accreditation, the issue of certificates of compliance and licenses for the application of the mark of compliance; - to the testing laboratories or centres for the testing of products and the issue of test certificates for the purpose of certification within the limits of accreditation; -to the manufacturers (sellers and executors) of products - for the application of the mark of compliance of the certification system with products certified at their request. 	<p>Gosstandart of Russia shall issue licenses to the certification bodies and testing laboratories. Licenses to manufacturers (sellers and executors) shall be issued by the bodies responsible for the certification of products, which have certified the given products, and also by the Gosstandart of Russia, if it certifies products.</p>	

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. Additional documents affirming the conformity of an applicant for a license to the established license requirements and conditions.
11	Manufacture, repair and distribution of armament systems; Manufacture of military equipment; Manufacture of special self-defense facilities; Utilization of systems of armament, military equipment, special self-defense facilities.	Russian aviation and space agency, Russian agency for armament, Russian agency for conventional weapons, Russian agency for control systems and Russian agency for shipbuilding	<p>Requirements and conditions:</p> <ol style="list-style-type: none"> 1. Fulfill the requirements for protection of the state secret information. 2. Fulfill fireproof and explosion safety rules and regulations. <p>Licensing of weapons manufacture (excluding the weapon manufacture by military state organizations), manufacture of weapon system, military equipment, special self-defense facilities is conditioned by the following special licensing requirements:</p> <ol style="list-style-type: none"> 1) admit to work only duly qualified professionals; 2) equip buildings and constructions with fireproof facilities, existence of protected warehouses and storage buildings guaranteeing the safety of expendable materials, components, controlling and testing equipment processing furniture and equipment as well as existence of protected areas for operating with explosive technologies 3) ensure the production process with necessary normative and technical documentation, tools and controlling and testing equipment; 4) ensure working conditions' compliance with the normative requirements; 5) existence in the contracts entered into between a licensee, the head executor of the state defense order, and third parties of the provisions on parties' liability for manufacture and use of product and of the provisions on the conditions of product maintenance (relating to guarantee surveillance, action remedial, transmitting of documentation in case of termination of the licensee's activities). <p>Licensing of repair works with respect to weapon systems is conditioned by additional licensing requirements relating to assurance of compliance with safety requirements in case of operating with radioactive, explosive and flammable products and materials.</p> <p>Licensing of distribution of weapon systems is conditioned by additional licensing requirements relating to assurance of remedies for the intellectual property, derived from elaboration of weapon system components</p> <p>Licensing of utilization works with respect to weapon systems, military equipment, special self-defense facilities is conditioned by the following additional licensing requirements relating to</p> <ul style="list-style-type: none"> - safety guaranteeing with respect to dismantling of weapon systems; - existence of protected technically equipped warehouses and premises.

No.	Types of Activity	Licensing Bodies	Additional license requirements and conditions stipulated by the special Regulations for licensing of certain types of activities. List of Activities Subject to Licensing stipulated in the
Draft of the new Federal Law on Licensing

(approved by the Government and passed to the Duma in April 2001)

1. Works and services in space industry;
2. Development, manufacture, repair and testing of aircraft, including double purpose aircraft;
3. Distribution of encoding (cryptographic) facilities;
4. Maintenance of encoding (cryptographic) facilities;
5. Information encoding services;
6. Development, manufacture of encoding facilities, information systems, telecommunication systems and complexes protected by encoding (cryptographic) devices;
7. Issuance of certificates of electronic digital signature keys, registration of owners of electronic digital signature keys, provision of services incidental in manufacture of electronic digital signature keys, authentication of electronic digital signature;
8. Detection of electronic devices used for secret collection of information from tapping and bugging devices planted in buildings and equipment;
9. Design and (or) manufacture of confidential information protection devices;
10. Technical protection of confidential information;
11. Manufacture, repair of measurement devices;
12. Development, production, sale and acquisition for the purposes of sale of special equipment for secret collection of information by individuals and legal entities unauthorized to carry out investigative activity;
13. Manufacture and numbering of forgery-proof printed matter, including security forms;
14. Development of armament and military equipment;
15. Manufacture of armament and military equipment;
16. Repair of armament and military equipment;
17. Disposal of armament, military equipment;
18. Trade in armament and military equipment;
19. Manufacture of weapons;
20. Trade in weapons;
21. Manufacture and development of ammunition and parts thereof;
22. Disposal of ammunition and parts thereof;
23. Storage, transportation and destruction of chemical weapons;
24. Maintenance of explosive, spontaneously igniting, and chemically hazardous production facilities;
25. Maintenance of main pipe-line transportation;
26. Manufacture of industrial explosives;
27. Use of industrial explosives;
28. Distribution of industrial explosives;
29. Manufacture of pyrotechnic articles;
30. Distribution of pyrotechnic articles;
31. Works and services in nuclear power use;
32. Use of radioactive materials;
33. Maintenance of electric power and thermal energy grids (except utilities) in an operational state;
34. Maintenance of gas stations;
35. Design of buildings and structures of 1 and 2 responsibility level, and land and town planning;
36. Construction of buildings and structures of 1 and 2 responsibility level;
37. Engineering research for the purposes of construction of buildings and structures of 1 and 2 responsibility levels;
38. Conduct of mine surveying works;
39. Restoration of objects of cultural heritage (monuments of history and culture);

40. Geodesic and cartographic activity;
41. Conduct of works involving interference with hydrometeorological and geophysical processes and phenomena;
42. Medical activity;
43. Pharmaceutical activity;
44. Manufacture of medicines;
45. Manufacture of medical equipment;
46. Maintenance of medical equipment;
47. Distribution of medicines and medicinal articles;
48. Rendering of prosthetic-orthopedic aid;
49. Cultivation of plants used in the manufacture of narcotic drugs and psychotropic substances;
50. Activity associated with circulation of narcotic drugs and psychotropic substances (development, manufacture, production, processing, storage, shipment, release, sale, distribution, acquisition, destruction of narcotic drugs and psychotropic substances included in Lists II and III pursuant to the Federal Law on "Narcotic Drugs and Psychotropic Substances";
51. Activity associated with the use of agents of infectious diseases;
52. Veterinary activity;
53. Manufacture of disinfectants, insecticides and deratization agents;
54. Performance of disinfection, insecticide and deratization works;
55. Carriage of passengers and goods by sea transport;
56. Carriage of passengers and goods by inland water transport;
57. Carriage of passengers and goods by automobile transport;
58. Carriage of passengers, goods and mail by air transport (domestic and international);
59. Towage by sea transport;
60. Loading-unloading works at seaports;
61. Loading-unloading activity on inland water transport;
62. Technical servicing of air navigation, and maintenance and repair of aircraft;
63. Technical servicing, repair and modernisation of rolling-stock and other machinery used on railway transport;
64. Loading-unloading activity on railway transport;
65. Disposal of waste products and litter;
66. Handling of dangerous waste products;
67. Activity of pawn-houses;
68. Organization and maintenance of totalizators and gambling establishments;
69. Valuation activity;
70. Audit activity;
71. Activity of investment companies (funds);
72. Management of investment funds and mutual funds;
73. Activity of commercial organizations as financial agents under financial agreements secured by assignment of payment claims;
74. Broker activity in securities and other financial instruments;
75. Management of securities;
76. Depository activity;
77. Keeping of registers of shareholders;
78. Detective (investigative) activity;
79. Security services;
80. Procurement, processing and sale of scrap of non-ferrous metals;
81. Procurement, processing and sale of scrap of ferrous metals;
82. Activity of preschool institutions;
83. Primary and secondary education;
84. Notary activity;
85. Publishing activity;
86. Printing activity;

87. Provision of pension welfare;
88. Activity associated with employment of Russian citizens outside of the Russian Federation.
