- P - Publication date
C - Date of commencement of duty collection
DIPDC - Dumped imports as % of domestic consumption
CV - Constructed Value
EPTC - Export price to a third country
FA - Facts available
HMP - Home market price
NA - Not applicable

Provisional Measures (Column 4): Provisional measures apply from the date of a preliminary determination of dumping to the date on which the Canadian International Trade Tribunal makes its finding regarding injury caused to the Canadian industry (maximum 120 days from the notice of the preliminary determination).

Definitive Duties (Column 5): Either the day after the date of a positive injury finding, in the case of an investigation or the date of the conclusion of a review of injury; or the date of the conclusion of a review of normal values and export prices in cases where there is an existing Canadian International Trade Tribunal finding of injury. The percentage represents the weighted average margin of dumping, as a percentage of export price, for the final determination of dumping in the original investigation.

²⁶ Appeals filed: 18.11.2020 (Algoma Tubes Inc., Prudential Steel ULC, Teneris Global et al v. HMTQ. Federal Court of Appeal file no. T-1398-20); 09.10.2020 (Algoma Tubes Inc. et al v. HLD Clark Steel Pipe Co. Inc. et al. Federal Court of Appeal file no. A-248-20); 18.08.2020 (Algoma Steel Inc. v. Attorney General of Canada and Hyundai Steel Company. Federal Court of Appeal file no. A-200-20); 14.08.2020 (Algoma Tubes Inc. et al v. Hyundai Steel Company et al. Federal Court of Appeal file no. A-197-20); 13.08.2020 (Evrans Inc. NA Canada et al. v. Hyundai Steel Company et al. Federal Court of Appeals file no. A-196-20).

No injury (Column 7, original investigations): The Canadian International Trade Tribunal makes its finding regarding injury caused to the Canadian industry after the President of the Canada Border Services Agency renders his final determination of dumping (maximum 120 days from the notice of the preliminary determination). If the Canadian International Trade Tribunal finds that the dumped goods did not cause injury and did not threaten to cause injury, definitive duties are not imposed and provisional duties are refunded.

Rescinded (Column 7, reviews/other proceedings): The Canadian International Trade Tribunal generally conducts the expiry review (sunset review) before the expiry of the finding or order imposing duties. If the Tribunal finds that the injury caused by the dumping of the goods is not likely to resume or continue, they will rescind the original finding or order, usually on the date of that the order or finding would have expired.

Interim Review (INR): An interim review is a review that is initiated where there is a reasonable indication that sufficient new facts have arisen or that there has been a sufficient change in the circumstances that led to the measure, or where there are sufficient facts that, although in existence, were not put into evidence during the previous review or investigation and were not discoverable by the exercise of reasonable diligence at that time.

Sunset Review (SNR) A review of an existing anti-dumping measure to determine whether the measure should be continued.

Administrative Review (ADR): A review of the normal values and export prices of an existing anti-dumping measure. These proceedings are not reviews of whether to extend or rescind measures in force; they are used to update normal values and export prices to reflect market conditions. The completion date of the review is shown in column 5. If this column is empty, the ADR has not been completed during the reporting period. Generally, it is not possible to state the range of individual dumping margins, as these are not calculated in an ADR. Furthermore, individual normal values and export prices are not provided for reasons of confidentiality.

Normal Value Review (NVR): A review of the normal values and export prices of an existing anti-dumping measure. These proceedings are not reviews of whether to extend or rescind measures in force; they are used to update normal values and export prices to reflect market conditions. Procedures followed during a normal value review are similar to those of an administrative review with the exception that each NVR is conducted with respect to a single exporter only. As with ADRs, the completion date of the review is shown in column 5. If this column is empty, the NVR has not been completed during the reporting period. Generally, it is not possible to state the range of individual dumping margins, as these are not calculated in an NVR. Furthermore, individual normal values and export prices are not provided for reasons of confidentiality.

Anti-circumvention investigation: (ACI): An investigation to determine whether circumvention of an existing anti-dumping measure is occurring. These investigations determine whether an existing measure in force will be extended to the goods. Individual normal values and export prices are not calculated and therefore, it is not possible to state the range of individual dumping margins. The completion date of the ACI is shown in column 5. If this column is empty, the ACI has not been completed during the reporting period.

NOTES

Note 1 Unless otherwise indicated, the volume of imports reported in column 9 is for the period of investigation for the dumping investigation.

Note 2 Unless otherwise indicated, the import volume in column 10 is reported as the percentage ratio of dumped imports to total imports.

Note 3 Under Canadian legislation, questions of law can be referred to the Federal Court and the Federal Court of Appeal for domestic judicial review.

Note 4 Applications regarding questions of law can be made to the Supreme Court of Canada although the Supreme Court of Canada must grant leave in order for the case to be heard. This is the final court of appeal.

⁷ This case was originally two separate dumping investigations concerning whole potatoes: one with respect to non-size A russets potatoes from the state of Washington (date of original imposition: 04.06.1984) and another with regard to whole potatoes from the United States, excluding those potatoes covered by the previous finding (date of original imposition: 18.04.1986 – Publication reference C.Gaz.1986.I.120.17). Those two investigations merged before the first expiry review in 1990.

Note 6 In Canada, domestic legislation allows importers to request refunds of anti-dumping and countervailing duties through a process called re-determinations. Requests for re-determinations of anti-dumping duties can be made on three grounds:

- Normal value of the imported goods;
- Export price of the imported goods;
- Whether the imported goods are goods of the same description as goods to which the order or finding applies (note: when an order or finding imposes both anti-dumping and countervailing duties, a refund request made on this ground will appear on both reports).

In Canada, requests for re-determinations follow a two-level appeal system under which the re-determination at the first level can further be appealed at the second level.

Consequently, the table records the number of requests made under both levels of re-determination, for any of the three grounds listed previously with respect to imported goods subject to anti-dumping measures.

Note that in the context of the Canadian system for processing refund requests, the following descriptions apply for the table headings:

- "Number of refund requests received": the number of requests received during the period covered by the report.
- "Number of refund reviews commenced": includes the number of requests received during the period covered by the report and the number of requests received in a preceding period that were not completed within the period covered by the report. Under the

Canadian system once a request is received, a decision under both levels of appeal must be rendered within one year.

- "Number of refund reviews completed": the number of requests that were completed during the period covered by the report.

Further, under the Canadian duty refund system, a request can cover multiple entries. It may thus be possible for one request to represent a series of entries rather than an individual entry.

APPEALS ON REFUND REQUESTS UNDER ARTICLE 9.3 DURING THE PERIOD 1 JULY THROUGH 31 DECEMBER 2021 (NOTE 7)

| Country or customs territory | Product, investigation ID number | Date of filing of appeal | Date of appeal decision |
|------------------------------|----------------------------------|--------------------------|-------------------------|
| NIL | | | |

Note 7 In Canada, decisions taken by the investigating authority pursuant to refund requests (as reported in the table titled "Refund Requests under Paragraph 9.3") may be further appealed by the importer to an independent administrative tribunal on questions of fact and law. The appeals that were decided upon during the period covered by the report are identified above.

TERMINATION OF MEASURES DURING THE PERIOD 1 JULY THROUGH 31 DECEMBER 2021

| Country/Customs Territory | Product, investigation ID number | Date of termination | Reason for termination |
|---------------------------|----------------------------------|---------------------|------------------------|
| NIL | | | |
