AG-IMS ID 93312: Question by New Zealand - Tariff quota fill

New Zealand has previously queried Canadas quota underfill (reference AG-IMS ID 91017). New Zealand notes that the quotas continue to suffer from significant underfill. Acknowledging Canada is currently undertaking Phase II of its comprehensive review of the allocation and administration of tariff rate quotas for supply-managed projects (refer AG-IMS ID 93046), can Canada please advise how it will enable quotas to be fully utilised going forward?
