

Committee on Agriculture**MEMBERS' PARTICIPATION IN THE NORMAL GROWTH OF
WORLD TRADE IN AGRICULTURAL PRODUCTS –
ARTICLE 18.5 OF THE AGREEMENT
ON AGRICULTURE**NOTE BY THE SECRETARIAT¹*Revision*

1.1. Article 18.5 of the Agreement on Agriculture provides that "Members agree to consult annually in the Committee on Agriculture with respect to their participation in the normal growth of world trade in agricultural products within the framework of the commitments on export subsidies under this Agreement." According to the Committee's Working Procedures, these consultations are to be undertaken at the November meetings of the Committee.²

1.2. The present note updates the information contained in the Secretariat note G/AG/W/32/Rev.19 dated 12 November 2020. The attached tables contain, for selected exporters and selected agricultural products/product groups, data on export volumes and values (including international food aid) and shares in world exports. The statistics cover the period 2010 to 2020 and show the world market shares of the leading exporters for the products/product groups concerned. In addition, pie charts show the evolution of the world market shares of the leading exporters for the products/product groups concerned over the covered period.

1.3. The following products/product groups³, as defined in Annex 1 for statistical purposes, are covered by this note:

- Wheat and wheat flour
- Coarse grains
- Rice
- Oilseeds
- Vegetable oils
- Oilcakes
- Sugar
- Butter and butter oil
- Skim milk powder
- Cheese
- Whole milk powder⁴
- Bovine meat
- Pigmeat
- Poultry meat
- Sheepmeat
- Live animals
- Eggs

¹ This document has been prepared under the Secretariat's own responsibility and is without prejudice to the positions of Members or to their rights and obligations under the WTO.

² In view of the 12th Ministerial Conference originally slated for the week of 29 November 2021, the usual November meeting of the Committee did not take place that year and the 2021 annual consultations were agreed to be undertaken at the March 2022 meeting (paragraph 5.29 of G/AG/R/99 refers).

³ Based on the list of products/product groups on page 24 of G/AG/2.

⁴ Whole milk powder is, in terms of world trade, the main product within the product group "other milk products".

- Wine
- Fruits & Vegetables
- Tobacco
- Cotton

1.4. The table below shows the aggregate export values of the product categories listed in paragraph 1.3 above ("selected" agricultural products) during the period 2010 to 2020. In addition, aggregate export values are shown for agricultural products other than the selected products ("other" agricultural products). The basket of "other" agricultural products includes basic agricultural products, such as coffee, cocoa, cut flowers or wool, but also many processed products, such as food preparations or whiskies. These "other" agricultural products account, in average, for about 38% of world exports of agricultural products.

Note:

- World exports are net of intra-EU trade.
- Definition of agricultural products correspond to the product coverage of the Agreement on Agriculture as defined in Annex 1 thereto.

TECHNICAL NOTES

Selected product groups

1.5. Each of the attached tables includes major exporters during the period covered with respect to the selected product/product group concerned. For each product/product group, exporters are ranked in descending order based on their exports in the most recent year for which data are available (i.e. 2020).

1.6. The product definitions of the selected data sources in terms of the Harmonized System classification (HS 2017) are included in Annex 1 to this note. These product definitions do not necessarily match the product definitions used by Members in the Uruguay Round for the purpose of scheduling their export subsidy commitments. This point should be borne in mind, in particular when comparing the statistical data with scheduled commitment levels, subsidized exports or total exports as reported by Members in accordance with the relevant notification requirements (G/AG/2 refers).

Data

1.7. The data provided in this note are sourced from UN Comtrade and Trade Data Monitor (TDM), complemented by Secretariat estimates (mainly based on mirror data) where necessary. Other sources may produce different results in terms of absolute volumes and values as well as year-to-year changes of shares in world export volumes/values. This may be due to a variety of reasons, including differences with respect to product definition, reporting period (e.g. calendar year versus marketing year), conversion factors or the revision of data.

1.8. The trade data of the European Union (EU) as well as the aggregate "world" exports exclude intra-EU trade. The data for the EU refers to the EU28 (2010-2020).⁵ The country-specific and commodity-specific explanatory notes which are contained in the data source are not reproduced in this note.

⁵ The United Kingdom ceased to be a member State of the European Union on 1 February 2020. The United Kingdom has not been listed separately in the various tables; annual export subsidy notifications by the European Union, including those concerning total exports (Table ES:2), include information in respect of the United Kingdom for the years covered in this document.
