## REPLIES TO QUESTIONNAIRE ON IMPORT LICENSING PROCEDURES<sup>1</sup>

### NOTIFICATION UNDER ARTICLE 7.3 OF THE AGREEMENT ON IMPORT LICENSING PROCEDURES

#### BURKINA FASO

The following communication, dated 16 July 2014, is being circulated at the request of the delegation of Burkina Faso.

---

Pursuant to Article 7.3 of the Agreement on Import Licensing Procedures and in response to the request from the WTO Central Registry of Notifications, the Government of Burkina Faso hereby informs the Committee on Import Licensing that the import licensing procedures notified in 2012 were not amended in 2013. The replies to the questionnaire on import licensing procedures is attached.

---

<sup>1</sup> See document G/LIC/3, Annex, for questionnaire.

In Burkina Faso, import formalities are limited to the issuance of a prior import declaration (DPI), which is an import document required for all imports of goods of an f.o.b. value of CFAF 500,000 or more.

This DPI is issued immediately and free of charge by the Directorate of the Single Trade and Investment Window Centre (DCGU/CI) of the Ministry of Trade on the basis of a pro forma invoice.

For certain products, a DPI can only be issued against an import licence. Products requiring import licences include refrigerators, air conditioners and other appliances operating on Freon-12, or any other appliances operating on substances subject to the Montreal Protocol, and explosives, arms, ammunition and military articles, sugar and animal products (meat, live animals, eggs, canned goods, etc.).

Licensing procedures are described below for each product:

### **Refrigerators, air conditioners and appliances operating on Freon-12, or any other appliances operating on substances subject to the Montreal Protocol**

Automatic licence issued in the form of a Special Import Authorization (ASI) subject to a technical opinion from the Ozone Office of the Ministry of the Environment and Sustainable Development.

This import licence, which is the subject of Notice to Importers No. 97-005/MCPEA/DGC of 11 May 1997, was introduced pursuant to an international commitment by the Government with regard to the protection of the ozone layer.

Information on eligibility is available from the Ministry of Industry, Trade and Handicrafts and the Ministry of the Environment and Sustainable Development.

Applications containing the technical opinion of the Ozone Office are examined by the Director of the Single Trade and Investment Window Centre of the Ministry of Trade, who issues the licence within a maximum of 24 hours.

This licence is applicable on a permanent basis, in order to protect the ozone layer.

### **Explosives, arms, ammunition and military articles**

Non-automatic licence issued in the form of a Special Import Authorization (ASI) subject to authorization by the Ministry of Security for Arms, Ammunition and Military Articles, and the Ministry of Mining for Explosives.

This licence was introduced to enable the authorities to control imports of civil arms in view of their extreme sensitivity.

The focal points for communication of information on eligibility are the Ministry of Trade, the Ministry of Security and the Ministry of Mining.

Applications containing all of the required authorizations go to the Director of the Single Trade and Investment Window Centre, who issues the licence within a maximum of 24 hours.

The need to control arms imports requires that the application of this procedure should be of unlimited duration.

### **Sugar**

Non-automatic licence issued in the form of an ASI by the Ministry of Trade.

This licence was introduced by an announcement of 31 September 2004 with a view to improving the country's sugar supply.

Any information on eligibility is available from the Ministry of Trade.

Applications accompanied by pro forma invoices are received and processed by the Directorate of the Single Trade and Investment Window Centre on behalf of the Minister, who issues the licence within a maximum of 48 hours.

It is not possible to establish how long this licensing procedure will apply, since it could be maintained as long as the authorities consider the country's supply to be inadequate.

**Animal products (meat, live animals, eggs, canned goods, etc.)**

The importation of any animal product is subject to the requirement that a non-automatic licence be obtained in the form of an ASI issued by the Directorate-General of Veterinary Services (Ministry of Animal Resources).

Applications containing pro forma invoices are submitted to the Directorate-General of Veterinary Services which forwards them to a technical committee for its opinion.

The purpose of this procedure is to control health risks linked to imports of animal products.
