1 OZONE DEPLETING SUBSTANCES

Outline of Systems

1. Kyrgyz Republic manages its obligations for ozone depleting substances controlled by the Montreal Protocol on Substances that Deplete the Ozone Layer. The import, export and manufacture of the ozone depleting substances is prohibited under the Montreal Protocol, except where an essential or critical use exemption has been granted by the Parties to the Montreal Protocol. Kyrgyz Republic's Montreal Protocol obligations are implemented through a system of licensing. Imports of ODSs and/or products containing ODSs are forbidden for personal use.

Purpose and Coverage of Licensing

2. The requirements of the licensing systems are:

- import or export of ozone depleting substances;
- pre-charged equipment containing ozone-depleting substances.

Strict conditions and reporting requirements apply in relation to all licences issued.

3. The system applies to goods from all countries-parties to the Montreal Protocol.

4. The non-automatic import licensing system implements Kyrgyz Republic's legal obligations under the Montreal Protocol. As well as limits on production and consumption of ozone depleting substances leading to eventual phase-out, the Protocol requires the establishment of a licensing system.

5. The legislation under which licences are maintained includes:

- Treaty on the Eurasian Economic Union (EAEU) of 29 May 2014;
- Annex No. 7 "Protocol on Non-Tariff Measures Concerning Third Countries" to the Treaty on the EAEU;
- Agreement on Movement of Ozone-depleting Substances and Products Containing Them and Accounting for Ozone-depleting Substances in Mutual Trade of the Member States of the Eurasian Economic Union of 29 May 2015;
- Annex No. 2 to Decision No. 30 of the Board of the Eurasian Economic Commission of 21 April 2015;
- Regulation on the importation/exportation of ozone-depleting substances and products containing ozone-depleting substances into/from the customs territory of the Eurasian Economic Union (Annex No. 20 to Decision No. 30 of the Board of the Eurasian Economic Commission of 21 April 2015);
- Resolution of the Kyrgyz Republic on the approval of the Regulation on state regulation of the import and export of ozone-depleting substances and products containing them dated 19 September 2009 No. 594;
- Law of the Kyrgyz Republic on the licensing system in the Kyrgyz Republic of 19 October 2013 No. 195.

Licensing is a legislative requirement. It is an offence to import, export or manufacture the mentioned substance without a licence. It is not possible to abolish this system without legislative approval. The legislation does not leave designation of products to administrative discretion. All substances that require licences are specified in a schedule to the legislation. No other substances require licensing under this legislation.
