**NOTIFICATION UNDER ARTICLE 12.1(A) OF THE AGREEMENT
ON SAFEGUARDS ON INITIATION OF AN INVESTIGATION
AND THE REASONS FOR IT**

JORDAN

*(Potato Chips and Potato prepared or preserved otherwise than by vinegar
or acetic acid, not frozen)*

The following communication, dated 3 September 2019, is being circulated at the request of the Delegation of Jordan.

In accordance with Article 12.1(a) of the WTO Agreement on Safeguards, Jordan hereby notifies the Committee on Safeguards that the National Production Protection Directorate (NPPD) in the Ministry of Industry, Trade and Supply has initiated its safeguards investigation as follows:

1. Specify the date when the investigation was initiated

In accordance with Article 12(c) of the "Jordanian Regulation on Safeguard No. (55) of the year 2000", the date of initiation of the safeguards investigation is 1 September 2019.

2. Specify the product subject to investigation

The product subject to investigation is Potato prepared or preserved otherwise than by vinegar or acetic acid ,not frozen, under the tariff heading (20052090) and potato chips, under the tariff heading (210690992) of the Jordanian Harmonised Tariff System according to Jordan Customs Department.

3. Provide the reasons for the initiation of investigation

(i) Was the investigation initiated pursuant to a petition from the domestic industry?

And

(ii) Evidence on the basis of which the investigation was initiated.

The National Production Protection Directorate (NPPD) in the Ministry of Industry, Trade and Supply initiated the investigation based on a petition filed by the domestic industry, in which it alleged that the increase of imports had caused serious injury to the domestic industry producing like and directly competitive products. The application has been examined and it was concluded that there was sufficient evidence on increasing imports of the subject products, sufficient evidence of injury on the industry, and evidence of causality between the increased imports and the injury.

National Production Protection Directorate (NPPD) analysed imports data submitted in the application for the period of investigation from 2015 to 2018.

It has been found that the increase, both in absolute terms and relative to production in imports, was recent, sudden, sharp and significant.

Regarding injury factors, NPPD found that there is a decline in the economic indicators of the domestic industry, in conjunction with the increase in imports.

The Competent Authority (NPPD) is satisfied that the information it has examined discloses a reasonable indication that the subject products are being imported in such increased quantities and under such conditions as to cause injury to domestic producers of like or directly competitive products.
