## NOTIFICATION

### *Addendum*

The following communication, received on 11 February 2020, is being circulated at the request of the Delegation of Canada.

---

#### Established Maximum Residue Limit: Malathion

The proposed maximum residue limit (PMRL) document for malathion notified in G/SPS/N/CAN/1278 (dated 4 October 2019) was adopted 6 February 2020. The proposed MRLs were established via entry into the Maximum Residue Limits Database and are provided directly below:

<u>MRL (ppm)<sup>1</sup></u>	<u>Raw Agricultural Commodity (RAC) and/or Processed Commodity</u>
8.0	Bushberries (crop subgroup 13-07B, except currants and gooseberries) <sup>2</sup> ; small fruits vine climbing, except fuzzy kiwifruit (crop subgroup 13-07F, except gooseberries and grapes) <sup>3</sup> ; low growing berries (crop subgroup 13-07G, except lowbush blueberries and strawberries) <sup>4</sup> ; wild raspberries
6.0	Cherries (crop subgroup 12-09A) <sup>5</sup>

<sup>1</sup> ppm = parts per million

<sup>2</sup> The established MRL of 8.0 ppm for blueberries was revised to "highbush blueberries" and "lowbush blueberries" to reflect current terminology. Currants and gooseberries are excluded from this MRL action as an 8.0 ppm MRL is already established for these commodities.

<sup>3</sup> Gooseberries and grapes are excluded from this MRL action as an 8.0 ppm MRL is already established for these commodities.

<sup>4</sup> Lowbush blueberries are included under Bushberries (crop subgroup 13-07B) in this MRL action and strawberries are excluded from this MRL action as an 8.0 ppm MRL is already established for this commodity.

<sup>5</sup> The established MRL 6.0 ppm for cherries was revised to "sweet cherries" and "tart cherries" to reflect current terminology.

MRLs are established for each commodity included in the listed crop groupings in accordance with the *Residue Chemistry Crop Groups* webpage (<https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/residue-chemistry-crop-groups.html>) in the Pesticides and Pest Management section of the Canada.ca website.

MRLs established in Canada may be found using Health Canada's *Maximum Residue Limit Database* (<http://pr-rp.hc-sc.gc.ca/mrl-irm/index-eng.php>) on the *Maximum Residue Limits for Pesticides* webpage (<https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/maximum-residue-limits-pesticides.html>). The database allows users to search for pesticides or for food commodities.

**This addendum concerns a:**

- Modification of final date for comments
- Notification of adoption, publication or entry into force of regulation
- Modification of content and/or scope of previously notified draft regulation
- Withdrawal of proposed regulation
- Change in proposed date of adoption, publication or date of entry into force
- Other:

**Comment period: (If the addendum extends the scope of the previously notified measure in terms of products and/or potentially affected Members, a new deadline for receipt of comments should be provided, normally of at least 60 calendar days. Under other circumstances, such as extension of originally announced final date for comments, the comment period provided in the addendum may vary.)**

- Sixty days from the date of circulation of the addendum to the notification and/or (dd/mm/yy): Not applicable.

**Agency or authority designated to handle comments:**  National Notification Authority,  National Enquiry Point. **Address, fax number and e-mail address (if available) of other body:**

**Text(s) available from:**  National Notification Authority,  National Enquiry Point. **Address, fax number and e-mail address (if available) of other body:**

The specified MRLs have been provided above and are also accessible from the MRL webpage as indicated below:
