NOTIFICATION

Corrigendum

The following communication, received on 18 February 2016, is being circulated at the request of the Delegation of the United States of America.

TITLE: Energy Conservation Program: Energy Conservation Standards for Standby Mode and Off Mode for Microwave Ovens; Correction

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy

ACTION: Final rule; correction

SUMMARY: On 18 January 2013, the U.S. Department of Energy (DOE) published a final rule amending the test procedures for microwave ovens to include provisions for measuring standby mode and off mode power. On 17 June 2013, DOE published a final rule adopting energy conservation standards for microwave oven standby mode. This document addresses a drafting error in the June 2013 standards final rule, which referenced the incorrect provision for determining standby power for microwave ovens. Neither the error nor the correction in this document affect the substance of both the test procedure and energy conservation standards rulemakings or any of the conclusions reached in support of those final rules.

DATES: This correction is effective on 17 February 2016.
