Committee on Technical Barriers to Trade

Original: English

NOTIFICATION

The following notification is being circulated in accordance with Article 10.6

1. Notifying Member: <u>EUROPEAN UNION</u> If applicable, name of local government involved (Article 3.2 and 7.2):
2. Agency responsible: European Commission Name and address (including telephone and fax numbers, email and website addresses, if available) of agency or authority designated to handle comments regarding the notification shall be indicated if different from above: European Commission, EU-TBT Enquiry Point, Fax: +(32) 2 299 80 43, E-mail: grow-eu-tbt@ec.europa.eu Website: http://ec.europa.eu/growth/tools-databases/tbt/en/
3. Notified under Article 2.9.2 [X], 2.10.1 [], 5.6.2 [], 5.7.1 [], other:
4. Products covered (HS or CCCN where applicable, otherwise national tariff heading. ICS numbers may be provided in addition, where applicable): Imidacloprid (pesticide active substance)
5. Title, number of pages and language(s) of the notified document: Draft Commission Implementing Regulation amending Implementing Regulation (EU) No 540/2011 as regards the conditions of approval of the active substance imidacloprid (5 pages + Annex 2 pages, in English)
6. Description of content: This draft Commission Implementing Regulation provides that the conditions of approval of the active substance imidacloprid are amended. Existing authorisations for plant protection products containing imidacloprid will be amended or withdrawn from the market. The amendment is based on the evaluation of confirmatory information submitted following the amendment of the conditions of approval of imidacloprid (Regulation (EU) No 485/2013). This decision concerns the placing on the market of this substance and does not affect the Maximum Residue Levels (MRLs) for residues of the concerned pesticide.
7. Objective and rationale, including the nature of urgent problems where applicable: During the evaluation of the confirmatory data on imidacloprid, provided following the amendment of its conditions of approval (Regulation (EU) No 485/2013), high acute risks for bees were identified for most crops from plant protection products containing the active substance imidacloprid. In particular, as regards exposure via dust, high risks were identified for bees for several field uses. For bees foraging in the treated crop a high risk was identified for the use on potatoes and winter cereals. For almost all field uses also a high risk to bees was identified in the succeeding crops. In order to ensure the protection of bees, it is necessary to amend the approval conditions to include a further restriction of use. In particular, the use of imidacloprid should be limited to permanent greenhouses where the crop stays its entire life cycle within the greenhouse and is thus not replanted outside.

	<p>Seeds treated with plant protection products containing imidacloprid may not be placed on the market or used, with the exception of seeds to be used in permanent greenhouses where the crop stays its entire life cycle within the greenhouse and is thus not replanted outside.</p> <p>Existing authorisations will need to be amended or withdrawn; Member States must amend or withdraw existing authorisations for plant protection products containing imidacloprid at the latest by 3 months from the date of entry into force. A period of grace in line with Article 46 of Regulation 1107/2009 is allowed for and shall expire at the latest 6 months from the entry into force.</p>
