UPDATE TO CANADA'S ANALYTICAL TOOL ON DOMESTIC SUPPORT

SUBMISSION BY CANADA

The following submission, dated 22 September 2021, is being circulated at the request of the delegation of Canada.

The attached files consist of an update to Canada's analytical tool on domestic support that was circulated to Members on 7 December 2020:

1. Canada WTO domestic support analytical tool – Nominal.xlsx.
2. Canada WTO domestic support analytical tool – Percentages.xlsx

Canada's analytical tool on domestic support consists of two Excel files which include domestic support data of all 102 Members who have submitted a DS:1 notification for notification years 2001 to 2020, as of 1 September 2021. All data from Members are reported in a common currency (US dollar) and in relative share of the value of agriculture production.

This tool aims to enable Members to undertake their own analysis of the different categories of domestic support across all WTO Members. Canada believes that this analytical tool on domestic support will be a useful tool that can be used by all Members to support additional technical work in the Committee on Agriculture, Special Session and the Working Groups.

Compared to the 7 December 2020 version, this version of the analytical tool on domestic support integrates a total of 72 new DS:1 domestic support notifications and all corrections and revisions notified by Members.

ATTACHMENTS 1 AND 2

Two Excel files* in Attachments 1 and 2 are available in electronic format (Microsoft Excel) from *Documents On-line*:

1. Canada WTO domestic support analytical tool – Nominal.xlsx.
 2. Canada WTO domestic support analytical tool – Percentages.xlsx.
