

Committee on Specific Commitments

COMPILATION OF CONDITIONAL COMMITMENTS IN GATS SCHEDULES

NOTE BY THE SECRETARIAT¹

Revision

This compilation encompasses the conditional commitments in the Schedules of Specific Commitments under the GATS. As indicated previously, for the purpose of this Note, conditional commitments refer to those entries which contain certain conditions attached to the entry into force, implementation, or updating of specific commitments. Most of the conditions are related to a domestic process. In addition, as requested, information related to the implementation of conditional commitments are also included, subject to the availability of information.

This Revision has incorporated the updates (in bold) on the implementation of conditional commitments provided since June 2022 by Mauritius. Members are invited to continue to verify and complement the information related to the implementation of conditional commitments.

As noted previously, this document is to serve transparency purposes only and is without prejudice to the positions of Members and to their rights and obligations under the WTO.

¹ This document has been prepared under the Secretariat's own responsibility and is without prejudice to the positions of Members and to their rights and obligations under the WTO.

Bangladesh GATS/SC/8/Suppl.1	2.C Telecommu- nication Services	Additional Commitments	The creation of regulatory disciplines is under review. If the outcome of this review permits then additional commitments on regulatory disciplines will be attached before 1 January 1998.	Strategic policies for developing a digital Bangladesh and providing affordable telecommunication services led to institutional and regulatory developments involving the creation of the Ministry of Posts, Telecommunications and Information Technology in 2014, and the issuance of directives on services and tariffs. The telecoms sector has emerged as a very competitive mobile telephone market with significant foreign participation. (Para. 23 of WT/TPR/S/385/Rev.1 of 21 May 2019; Para. 68 of WT/TPR/S/270/Rev.1 of 26 November 2012)
Brazil GATS/SC/13/Suppl.3/R ev.1	7.A All insurance and insurance- related services - Work accident insurance 7.B.1) Services provided by financial institutions	Additional Commitments	Brazil will undertake commitments regarding commercial presence in the work accident insurance market within two years after the adoption by the National Congress of legislation regulating such presence. For factoring services, national treatment shall be granted in commercial presence, if these services are defined as financial services in future legislation adopted by the National Congress.	The National Social Security Institute (INSS) is the sole authorized supplier of work accident insurance. The only activity monopolized by law is worker's compensation insurance, which is provided by the INSS, administered by the Government. (Para. 131 of WT/TPR/S/75 of 27 September 2000) No legislation has been adopted by the National Congress of Brazil in relation to work accident insurance services. (Statement by Brazil at the meeting of 29 June 2021. European Union (Cont'd)	7.A Insurance and Insurance-Related Services (second part)	Limitations on market access Mode 2	Slovenia: Reinsurance and retrocession Reinsurance companies in the Republic of Slovenia have priority in the collection of insurance premiums. In case that these companies are not able to equalise all risks, these can be reinsured and retroceded abroad. (None upon the adoption of the new law on Insurance Companies).	Slovenia (Reinsurance and retrocession): There are no limits on foreign participation in the reinsurance sector. There are no restrictions on the establishment of foreign branches. Please refer to Articles 21, 137-139 of Insurance Act (Official Gazette of RS, no. 93/2015); , 9/2019 and 102/2020; Articles 162-175 of Directive 2009/138/EC of 25 November 2009 Solvency II. (Retrieved from the Services Trade Policy Database of I-TIP Services, based on the OECD STRI regulatory database)
		Limitations on market access Mode 3	Reinsurance and retrocession Foreign participation in reinsurance company is limited up to a controlling share of the capital. (None, except for branches, upon the adoption of the new law on Insurance Companies)	According to the Insurance Act and the legislation implementing the EU Directive on Solvency II, there are no longer limits on foreign participation in the reinsurance sector. Nor are there any restrictions on the establishment of foreign branches. (The statement of the European Union at the meeting of 29 June 2021. Para. 1.6 of S/CSC/M/86.)
	7.B Banking and other financial services (excluding insurance) (second part)	Limitations on market access Modes 1&2	Slovenia: - Unbound except accepting credits (borrowing of all types) and accepting guarantees and commitments from foreign credit institutions by domestic legal entities and sole proprietors. (Remark: consumer credits shall be free upon the adoption of the new Foreign Exchange Law). - All above mentioned credit arrangements must be registered with the Bank of Slovenia. (Remark: this provision shall be abolished upon the adoption of the new Law on Banking.)	Slovenia (Banking and other financial services): The Foreign Exchange Law had freed up consumer credits and, according to the Banking Act, credit arrangements no longer needed to be registered with the Bank of Slovenia. Ghana GATS/SC/35/Suppl.1	2.C Telecommu- nication Services (a) Voice telephone services (7521) (g) Private leased circuit service (7522**, 7523**)	Additional Commitments	The duopoly operators are granted exclusivity for a period of five years. At the expiration of this period, the Government will conduct a review of its policy to determine whether to license additional suppliers of such services.	<p>The National Communications Regulations of 2003 constitute the regulatory framework for the telecom sub-sector. The main objectives of the National Telecommunications Policy, published in 2004, were to achieve fully open, private, and competitive markets for all telecom services.</p> <p>Ghana's commitments regarding the telecommunication sector under the GATS were limited by the duopoly arrangements that prevailed at the time. In fact, Ghana's current market access and national treatment conditions are very favourable to foreigners, and most of the companies operating are foreign-owned. Specifically, most of the limitations in its Schedule are no longer in force.</p> <p>(Para. 4.134 and 4.138 of WT/TPR/S/298/Rev.1 of 11 July 2014)</p>
Hong Kong, China GATS/SC/39/Suppl.2	2.C Telecommu- nication Services - Local services (a)-(g); (o)	Limitations on market access Mode 3	Four licences for local fixed network services were issued in 1995. New licences will not be considered before June 1998. Whether more licences will be issued thereafter is subject to review in 1998.	<p>Local fixed telecommunication network services have been fully liberalized since January 2003.</p> <p>(Notification under Article III:3 of the GATS, S/C/N/312, dated 28 January 2005; statement by Hong Kong, China at the CSC meeting of 2 December 2020. India GATS/SC/42/Suppl.3	2.C Telecommu- nication Services (a) Voice telephone service (CPC 7521**) Wire based (i.e. for fixed network of subscribers) (o) Other Cellular mobile telephone services	Limitations on market access Mode 3 Additional Commitments Limitations on market access Mode 3	There will be one operator other than Department of Telecommunications (DOT)/Mahanagar Telephone Nigam Ltd. (MTNL) in each service area for a period of 10 years from the grant of licence after which the position will be reviewed. The subject of opening up of national long-distance service beyond service area to competition will be reviewed in the year 1999. Also, the subject of opening up of international service to competition will be reviewed in the year 2004. There will be two cellular service operators in each service area. The position will be reviewed after 10 years.	Competition was allowed from the private sector in value-added telecommunication services and cellular mobile telephone services (CMTS) in 1992, followed by fixed line local telephone services in 1994. The New Telecommunications Policy, 1999 (NTP 99) sought to address improving efficiency by establishing a more competitive environment for the sector. Under the new policy, fixed-line service providers (FSPs) and cellular mobile service providers (CSMPs) will be granted non-exclusive licences for individual service areas for an initial period of 20 years, extendable by additional ten-year periods. Private-sector participation in domestic long-distance telephony was permitted in August 2000, followed by international long-distance voice telephony on 1 April 2002 (two years ahead of India's commitments in the GATS). As a result of these steps, all telecommunication services are now open to private participation and competition. (Para. 98 of WT/TPR/S/100 of 22 May 2002)
Indonesia GATS/SC/43/Suppl.2	2.C Telecommu- nication Services - Local services - Long distance services - International services	Additional Commitments	The period of exclusivity for local services expires in 2011. The Government will conduct a review of policy with respect to whether to permit additional suppliers of such services upon the expiry of this period. The period of exclusivity for long distance services expires in 2006. The Government will conduct a review of policy with respect to whether to permit additional suppliers of such services upon the expiry of this period. The period of exclusivity for international services expires in 2005. The Government will conduct a review of policy with respect to whether to permit additional suppliers of such services upon the expiry of this period.	In 2002, the Government ended Telkom's exclusive rights to provide fixed- line services in Indonesia. The Government also sold 42% of its shares in Indonesian Satellite (Indosat), Indonesia's second-largest mobile-phone operator, to Temasek Holdings, the state-owned investment arm of the Government of Singapore. Indosat's monopoly on international calls ended in 2003. (Para. 4.73 of WT/TPR/S/278/Rev.1 of 16 July 2013) As at May 2020, there were seven cellular operators and four fixed-line operators in Indonesia. (Paras. 4.221 and 4.222 of WT/TPR/S/401/Rev.1 of 5 February 2021)

Israel GATS/SC/44/Suppl.1	2.C Telecommu- nication Services	Limitations on market access Mode1 Limitations on market access Mode 2	<p>The existing monopoly's exclusive rights in domestic Telecommunication services and infrastructure mentioned in paragraphs: a(I), a(III), b, c, f, g, will terminate not later than the year 2001. The government will publish the rules and regulatory policy regarding the way of opening the above mentioned to competition in the future.</p> <p>The government issued two licenses to two operators that won a tender issued by the government for the operation of international services in addition to those offered by the present operator (BEZEQ International, which is a fully (100%) subsidiary of BEZEQ - the local PTT). The companies have exclusivity until 1.1.2002 and the government will reexamine its policy regarding further competition in the field of international services towards the year 2001.</p>	<p>Over the years, Israel has pursued progressive liberalization and privatization of its telecoms market. It began in 1994 with the entry of Cellcom to compete with Bezeq (the incumbent) in mobile telephony. As of January 2018, there were six domestic fixed services operators; six mobile network operators (MNOs); three mobile virtual network operators (MVNOs); and eight mobile operators providing international services.</p> <p>In order to promote competition, the Ministry of Communications licensed a third communications infrastructure operator.</p> <p>(Paras. 4.75 and 4.76 of WT/TPR/S/376/Rev.1 of 10 October 2018)</p>
Jamaica GATS/SC/45/Suppl.1	2.C Telecommu- nication Services: - Voice Telephone Services (7521) - Internet and internet access services (75260)	Additional Commitments	<p>The Government is in the process of reviewing this with the exclusive private operator in the context of the draft Telecom Bill and the establishment of the regulatory regime in 1997. If the outcome of this review is favourable, the Government will submit an improved commitment on private voice telephone services.</p> <p>The Government is in the process of reviewing this with the exclusive private operator in the context of the draft Telecom Bill and the establishment of the regulatory regime in 1997. If the outcome of this review is favourable, the Government will submit an improved commitment on voice over Internet.</p>	<p>In 1999, the Government started a process of liberalizing the telecommunications industry, which included a renegotiation of the contract with Cable and Wireless Jamaica Limited (C&WJ), the sole supplier of fixed and mobile telephony, the passing of new legislation and the adoption of a phased approach for its implementation. In September 1999, the Government concluded an agreement with C&WJ, which was granted a 25-year exclusive right to operate basic telephony services in 1988. The new agreement ended the company's status as a monopoly in the provision of basic telecommunications services well before the originally scheduled date of 2013 (renewable to 2038). C&WJ's monopoly rights ended as of 1 March 2003.</p>

Jamaica (Cont'd)	- Video transmission services (satellite-based) (75241**)		The Government is in the process of reviewing this with the exclusive private operator in the context of the draft Telecom Bill and the establishment of the regulatory regime in 1997. If the outcome of this review is favourable, the Government will submit an improved commitment on video telephony services.	The passing of the Telecommunications Act (Act No. 1 of 16 February 2000) redefined telecommunications policy in Jamaica and facilitated the gradual opening up of the market to new players. The Act put in place a reform process divided into three phases. Phase I, which started on 1 March 2000, opened the market to competition in wireless cellular services, the provision of customer equipment, and the resale of data, international voice and Internet access. Phase II of the liberalization process started on 1 September 2001 and introduced competition in domestic facilities and services, and allowed subscriber TV providers (STVOs) to become Internet service providers (ISPs). Phase III, which started on 1 March 2003, international voice and data facilities opened up to competition. (Paras. 129 and 130 of WT/TPR/S/139/Rev.1 of 9 March 2005)
Japan GATS/SC/46/Suppl.3	7.B Banking and Other Financial Services (excluding Insurance and Insurance-Related Services)	Additional Commitments	Appropriate authorities permit the Pension Welfare Service Public Corporation to allow investment advisory companies to participate in the management of its fund assets through a variation on the "Shiteitan" framework. At the time of the next comprehensive review of the Japanese pension system in 1999, this scheme would be reviewed.	Law No. 19 in 2000: Pension Welfare Service Public Corporation was disestablished. Government Pension Investment Fund was allowed to manage the pension fund by itself. With respect to the management of the pension fund of Government Pension Investment Fund, no asset allocation regulations were applied to the total assets of Government Pension Investment Fund, and investment advisory companies were allowed to participate in the management of the pension fund of Government Pension Investment Fund. (Notification by Japan of 6 November 2001, S/C/N/179) After the comprehensive review, the Pension Welfare Service Public Corporation was succeeded by the Government Pension Investment Fund which managed pension funds by itself. Also under the reform, the participation in the management of the pension assets by investment advisory companies became no longer limited to through the "Shiteitan" framework. Japan notified this regulatory change in November 2001. Since then, further reform has taken place and the Government Pension Investment Fund has become an independent administrative agency specialized in the management of pension funds. The participation in the management of pension assets by investment advisory companies remains open, and not limited to through "Shiteitan" framework. Mexico GATS/SC/56/Suppl.2	2.C Telecommu- nication Services - Commercial agencies	Limitations on market access Mode 3	The establishment and operation of commercial agencies is invariably subject to the relevant regulations. The Ministry of Communications and Transport (SCT) will not issue permits for the establishment of a commercial agency until the corresponding regulations are issued.	In 2014, the Federal Telecommunications and Broadcasting Law (LFTR) was enacted; this repealed the Federal Telecommunications Law of 1995. The LFTR regulates the use, development and exploitation of the radio-frequency spectrum; the public telecommunications networks; access to the infrastructure; orbital resources and satellite communications; the provision of public telecommunications and broadcasting services of general interest; convergence of services. (Paras. 4.150 and 4.151 of WT/TPR/S/352/Rev.1 of 23 June 2017) Article 170 of the LFTR establishes that the Institute's authorization is required to: I. establish and operate or use telecommunications marketing services without the status of concessionaire. Papua New Guinea GATS/SC/118/ Suppl.1	2.C Telecommu- nication Services (a) – (g) ; (o)	Limitations on market access Mode 3	All Telecommunication Services are subjected to a five year exclusivity (1997-2002) to TELIKOM PNG Ltd. as the monopoly service provider. The issuance of additional operating licenses and their terms and conditions will be considered and announced at least two years prior to the end of the exclusivity period.	Telikom, a subsidiary of KTH, had the monopoly in local, national, and international mobile and fixed-line services until July 2007. Plans to privatize 51% of equity in Telikom to an overseas company were abandoned by the Government in the early 2000s. The National ICT Policy Phase II Reforms Final Report introducing open competition was approved in March 2009. The National Information and Communications Technology Authority (NICTA) grants four types of telecommunications licences, all valid for ten-year periods: General Telecommunications Carrier Licence (GL); Public Mobile Telecommunications Licence (MC); Value-added Services (carrier grade and ISP grade) Licence; and Restricted General Licence/Private Network Licence (RGC). (Paras. 4.99 and 4.101 of WT/TPR/S/387/Rev.1 of 28 June 2019; Para. 90 of WT/TPR/S/239/Rev.1 of 8 February 2011)
Saudi Arabia GATS/SC/141	11.H Services auxiliary to all modes of transport	Additional commitments	The services related to CPC 749 are currently provided by the public sector. As far as market access to services included in CPC 749 become open under the Saudi legislation to private entities, national treatment will be granted.	
Senegal GATS/SC/75/Suppl.1	2.C Telecommu- nication Services (a) – (g); (o)	Limitations on market access, Mode 1 Limitations on market access, Mode 3	Exclusively through the Sonatel network, on which Sonatel has a monopoly in international traffic until 31 December 2003 at the earliest and 31 December 2006 at the latest. After 2003 the authorities will examine the possibility of opening up the sector to other operators. After 2003 the authorities will examine the possibility of opening up the sector to other operators. Sonatel's monopoly also applies to local and long-distance traffic until 31 December 2003 at the earliest and 31 December 2006 at the latest. After 2003 the authorities will examine the possibility of opening up the sector to other operators.	Sudatel obtained a "global" telecommunications licence in September 2007 and has been providing prepaid mobile phone services under the Espresso brand since early 2009. This in principle eliminates the SONATEL monopoly in the fixed-line network, but SONATEL still has a de facto monopoly. Senegal thus considers it has fulfilled its specific commitments under the GATS. (Para. 197 of WT/TPR/S/223/SEN/Rev.1 of 22 December 2009)

South Africa GATS/SC/78/Suppl.2	2.C Telecommu- nication Services - Facilities based and public switched telecommu- nication services	Additional Commitments	Authorities to consider by 31/12/2003 the feasibility of suppliers additional to the duopoly. Liberalization of resale services to take place between 2000 and 2003 with authorities to define terms and conditions as well as the maximum limit for foreign investment.	Competition in the fixed line segment was introduced in 2006 when Neotel was licensed to compete against Telkom (which used to have monopoly power in the sector). Neotel was licensed as South Africa's first alternative infrastructure-based telecom provider, able to deliver wireline and wireless data telecoms services at national and international levels. (Para. 4.110 of WT/TPR/S/324/Rev.1 of 05 February 2016; Para. 269 of WT/TPR/S/222/ZAF/Rev.1 of 14 December 2009)
Sri Lanka GATS/SC/79/Suppl.1	2.C Telecommu- nication Services - International basic voice telecommu- nication services - Domestic local and long- distance basic telephone services: Mobile cellular services - Satellite-based services GMPCS services supplied through own gateways	Limitations on market access Modes 1&3 Limitations on market access Mode 3 Limitations on market access Mode 3	Monopoly guaranteed for Sri Lanka Telecom Ltd (SLT) until 31 December 1999. Government of Sri Lanka (GOSL) proposes thereafter to issue an additional licence, depending mainly on satisfactory progress having been made with respect to tariff rebalancing. Four operators' licences. This number will be reviewed by the GOSL in the year 2000. Issuing of licences is under consideration.	The Commission permitted use of Global Mobile Personal Communications Services (GMPCS) in Sri Lanka with effect from 9 April 1999, subject to the issuance of a licence under Section 22 of Sri Lanka Telecommunications Act No. 25 of 1991 as amended. (Notification pursuant to Article III:3 of the GATS, S/C/N/167 of 27 August 2001) The monopoly of Sri Lanka Telecom (SLT) over international and voice telecommunication services ended in 2002. The telecommunications sector has opened up to several providers in most subsectors, including in fixed-access telephone services, cellular mobile phones and satellite services. The market comprises five mobile services providers and three fixed-line operators. Sri Lanka has proceeded with liberalizing many of its telecom subsectors, thus the applied regime is more liberal than its GATS commitments. (Paras. 4.149 and 4.150 of WT/TPR/S/347/Rev.1 of 1 March 2017)
Suriname GATS/SC/80/Suppl.1	2.C Telecommu- nication Services For public use -Fixed network infrastructure -Local, domestic, long distance and international - Mobile services (terrestrial and satellite based)	Limitations on market access Mode 3 Limitations on market access Mode 3	The duopoly operators are granted exclusivity for a period of five years ending on 1 January 2003. Before the expiration of this period, the Government will determine the circumstances under which additional operators can be licensed. Licenses are granted for a period of five years ending on 1 January 2003. Before the expiration of this period, the Government will determine the circumstances under which additional operators can be licensed	Both five-year restrictions ended in 2003 but the possibility of extending the number and/or duration of licenses after that is still at the discretion of the Government. Licensed operators also have the exclusive right to provide long-distance and international services over fixed and mobile networks, and cannot be bypassed. Many regulatory aspects were detailed in a series of state decrees, issued in 2007, that cover issues including licensing. (Paras. 4.96 and 4.98 of WT/TPR/S/391/Rev.1 of 27 November 2019)

Thailand GATS/SC/85/Suppl.2	2.C Telecommu- nication Services	Headnote	Conditional upon passage and coming into force of all necessary new communication acts, commencing from the year of 2006, commitments on public telecommunication services will be introduced, and carried out in accordance with the implementing regulations to be issued by virtue of those acts.	Thailand has issued the Telecommunication Business Act which has introduced the increasing of foreign equity participation, and other new laws and regulations related to the Reference Paper. Thailand is currently in a public hearing stage, and the results of public hearings will be presented to the cabinet and parliament for their approval. After that, Thailand will proceed with WTO procedures for the certification of improvements to schedules of specific commitments. (Statement by Thailand at the Trade Policy Review meeting on 24 and 26 November 2020. Paras. 5.8-5.9 of WT/TPR/M/400).
		Limitations on market access Mode 3	Conditional upon passage and coming into force of all necessary new communication acts, commencing from the year of 2006, Thailand will introduce the market access elements as contained in those acts into the relevant parts of its Schedule of Specific Commitments relating to the supply of public telecommunication services.	With the approval of the Cabinet and Parliament, Thailand is ready to improve its Schedule in accordance with the Telecommunication Business Act 2006 and other relevant laws and regulations as specified in its Uruguay Round Schedule. The improvements include: the foreign equity participation being increased from 20 to 49% for WTO Members to provide telecommunication services in the Thai market; the conditions no longer in force being removed from the Schedule; and the obligations contained in the Reference Paper on Telecommunication Services being introduced as additional commitments. Thailand initiated the process to certify the proposed improvements to its Schedule of Specific Commitments pursuant to the procedures under S/L/84.
		Limitations on national treatment Mode 3	Conditional upon passage and coming into force of all necessary new communication acts, commencing from the year of 2006, Thailand will introduce the national treatment elements as contained in those acts into the relevant parts of its Schedule of Specific Commitments relating to the supply of public telecommunication services	(Statement by Thailand at the CSC meeting on 18 October 2021, para. 2.4 of S/CSC/M/87; Thailand's request for certification contained in S/C/W/386.)
		Additional commitments	Conditional upon passage and coming into force of all necessary new communication acts, commencing from the year of 2006, Thailand will introduce into its Schedule of Specific Commitments on public telecommunication services its treatment on the subjects relating to competitive safeguards, interconnection, universal service, public availability of licensing criteria, separation of regulatory and operational functions, and the allocation and use of scarce resources.	The certification procedure initiated in document S/C/W/386 was concluded and the modifications attached to document S/C/W/386 are hereby deemed to constitute an integral part of Thailand's Schedule of specific commitments under the GATS as of 9 March 2022. A certified true copy of the above-mentioned modifications was circulated to each Member of the World Trade Organization in document WT/Let/1566. For ease of reference, these modifications have also been issued in document GATS/SC/85/Suppl.2/Rev.1 which replaces GATS/SC/Suppl.2.
