ANNEXE II¹**INTERNATIONAL COOPERATION FACILITATED BY UPOV**

UPOV facilitates cooperation in the examination of plant varieties as follows:

- a. Document C/50/5 "Cooperation in Examination" contains a synopsis of offers for cooperation in examination made by authorities, of cooperation already established between authorities and of any envisaged cooperation. (see http://www.upov.int/meetings/en/details.jsp?meeting_id=40044)
- b. Document TC/52/4 "List of Genera and Species for which Authorities have Practical Experience in the Examination of Distinctness, Uniformity and Stability" provides information on plant genera and species for which authorities have practical experience in the examination of Distinctness, Uniformity and Stability (DUS). (see http://www.upov.int/meetings/en/details.jsp?meeting_id=38785)
- c. UPOV has developed "Guidelines for the Conduct of Tests for Distinctness, Uniformity and Stability," or "Test Guidelines", for many individual species or other variety groupings (see http://www.upov.int/test_guidelines/en/). The purpose of these Test Guidelines is to provide practical guidance for the harmonized examination of DUS and, in particular, to identify appropriate characteristics for the examination of DUS and production of harmonized variety descriptions. In 2015, the adopted Test Guidelines covered 92% of all entries concerning plant variety protection in the PLUTO Plant Variety Database (246,890 of 267,550).
- d. The GENIE database provides a dynamic source of information on the cooperation explained above. (see <http://www.upov.int/genie/en/>)
- e. The PLUTO Plant Variety Database provides information concerning plant breeders' rights. (see <http://www.upov.int/pluto/en/>)
