**NOTA**

1. Los autores reconocen que la utilización de fuentes distintas de estadísticas comerciales arroja resultados ligeramente diferentes de los de las series nacionales y otras series internacionales de estadísticas comerciales. Hemos utilizado FAOSTAT como fuente de los datos por ser la que emplea la Secretaría de la OMC en su documento sobre las exportaciones mundiales de productos básicos (documento G/AG/W/32/Rev.15).

2. En la medida de lo posible, hemos tratado de reproducir exactamente en términos de valor los datos recopilados por la Secretaría en términos de volumen. No obstante, en ocasiones no hemos podido establecer una correspondencia exacta con las categorías utilizadas por la Secretaría. En particular, el presente documento no contiene cuadros para los "cereales secundarios" o las "tortas oleaginosas" y los cuadros sobre la "leche (en polvo)" combinan conjuntos de datos que se presentaban por separado en el documento de la Secretaría. Además, en los casos en los que no estaba claro qué categoría de FAOSTAT había utilizado la Secretaría, hemos intentado de buena fe seleccionar una categoría por aproximación. Excepto en el caso del algodón, el nombre de cada cuadro corresponde al del cuadro de FAOSTAT utilizado para la recopilación de los datos. En el caso del algodón, los resultados que se presentan combinan las tres categorías de FAOSTAT "Algodón, fibra", "Algodón, desechos" y "Algodón, cardado o peinado".

3. A fin de simplificar y al no disponer de datos sobre el comercio exterior de la UE-28, en todos los cuadros hemos utilizado los datos relativos a la UE-27, con exclusión del comercio intra-UE, mientras que en el documento de la Secretaría se utilizan los datos correspondientes a la UE-15, la UE-25, la UE-27 y la UE-28, según los años de que se trate. Es algo que trataremos de rectificar en las revisiones futuras del presente documento.

4. Los autores también colaborarán con la Secretaría para ajustar aún más los datos relativos al valor que figuran en el presente documento con los datos relativos al volumen que se presentan en el documento G/AG/W/32/Rev.15.

5. Otros elementos del presente documento que no aparecen en los cuadros del documento G/AG/W/32/Rev.15 son los siguientes:

- un cuadro sobre el "total de los productos agropecuarios";
- una columna en la que se indican las exportaciones de 2013 expresadas en porcentaje de las exportaciones de 2003 para cada uno de los Miembros, titulada "Variación en 10 años":
  - nota: Cuando no se disponía de datos para 2003 o cuando las exportaciones eran nulas (0), en la columna "Variación en 10 años" se indica "N/D";
  - nota: Como los valores de referencia correspondientes a 2003 eran muy bajos, el crecimiento porcentual registrado por algunos Miembros era de 6 o 7 dígitos en ciertas categorías.
