Corrigendum

Section V (on pages 4-5) of the basic document should be replaced by the following:

V. Commodities or group of commodities affected by the various forms of import restrictions

The economic value of import goods is fixed by the amount of import duty paid plus import surcharge. Non-essential commodities for which import duty are high will be affected while this will not be the case with essential commodities for which import duties are 0 (zero).

Commodities that are banned or protected, according to the Decision of the Minister of Trade dated 17 April 1970, No. 69/Kep/IV/1970, are the following:

(a) textiles with batik-design;
(b) tubes and tyres of the following size: 600-10; 670-15; 650-10; 750-20;
(c) books, magazines and other kind of lectures in the Indonesian language and/or regional language;
(d) built-up commercial cars.

At present, selected goods such as rice, wheat flour, cloves, yarn and raw cotton, fertilizer, insecticides, pesticides, herbicides, fungicides, granulated sugar and automobiles may only be imported by the Government or by importers designated and approved by the Government.

(1) Rice may only be imported by BUL (Badan Urusan Logistik, i.e. the Official Rice Procurement Agency) under PL 480, grants and other aid. Commercial rice imports are only permitted if considered necessary.

(2) Wheat flour may only be imported under PL 480, grants, other aid, or be financed by long-term loans. The Government is the sole importer of wheat flour. The Minister of Trade designates handling agents to be in charge of the domestic distribution.

(3) Cloves may only be imported by members of the Cloves Supply Agency designated by the Minister of Trade in order to secure an adequate supply of cloves for the "kretek" (clove) cigarette industry.
(4) **Yarn** and **raw cotton** imports should be financed under PL 480. Commercial imports in small quantities are permitted.

(5) **Fertilizer** imports should be financed by aid and/or grants and be effected by tender according to a procedure determined by the Minister of Trade. The volume of fertilizer imports will be determined on the basis of estimates of the Department of Agriculture.

(6) **Insecticides, pesticides, herbicides and fungicides** for small-scale and estate agriculture should be imported under grants and/or food aid, or be financed with aid-BE's, and should in principle be effected by tender organized by the Department of Trade. Exceptions are permitted in specific cases.

(7) **Granulated sugar** will be imported only if domestic consumption exceeds domestic production. Sugar imports should be handled by importers designated by the Minister of Trade.

(8) **Commercial cars** may be imported subject to the following conditions: trucks, buses, jeeps and pick-ups destined for Java and Sumatra should be imported in CKD conditions, whereas passenger cars may be imported in built-up condition. Imports should exclusively be handled by sole agents approved by the Minister of Trade and the Minister of Industry.
