CONSULTATION UNDER ARTICLE XVIII:12(b) WITH GREECE

Basic Document for the Consultation

1. Legal and administrative basis of the restrictions

The regulations governing imports into Greece are mainly based on Law No. 5426 of 1932 and Legislative Decree No. 480 of 1947 as amended. Law No. 5426 stipulates that the importation of certain machinery and spare parts is subject to the issuance of import licences.

Legislative Decree No. 480 is more general in scope, its purpose being to co-ordinate the efforts of the Government, quasi-government agencies and private companies in the sector of foreign trade, and to institute import and export controls so as to ensure the import of the necessary supplies to meet the requirements of the country's national economy, to promote exports and to utilize national resources in the most effective way.

With a few exceptions, imports into Greece are not subject to quantitative or foreign exchange restrictions. However, each transaction is subject to administrative procedures of registration, and to control regulations designed to furnish data on receipts and expenditures of foreign exchange and on external financial commitments. Imports are limited to a level compatible to some extent with the country's external resources by means of monetary policy, credit policy and in particular, by regulations governing methods of payment for imports.

Import control policy was drawn up by the Foreign Trade Board established by Legislative Decree No. 480 of 1947. This policy is now exercised by the Minister of Co-ordination and Planning pursuant to the Legislative Decree 175 of 1973. The control measures are implemented by the Bank of Greece and authorized commercial banks.

2. Methods used in restricting imports

Imports can be divided into four categories:
- products which can be imported freely;

1Material supplied by the Government of Greece
- products specified in List "A", attached to the Decision No. 80800 of 1970 of the former Foreign Trade Board, for which an import licence is required;

- certain machinery and spare parts specified in List "B", attached to the Decision No. 70853 of 1971 of the former Ministry of National Economy, for which an import licence is also required;

- products imported under the State-trading régime. This category is referred to in the Section 5 of this document.

According to the procedures in force all imports are generally permitted under Procedure "E" and Procedure "D". Import permits are granted upon presentation of a certified pro-forma invoice. The importer must obtain the import permit before the goods are shipped. Any importer who fails to observe this provision is liable to a fine equal to the 10 per cent of the amount of the cash margin which the importer has to deposit in obtaining the import approval of the commodity in question. The said fine is imposed on prior shipments for commodities which are listed under such Lists requiring a prior deposit (Lists F50-1, F50-2, F50-3, F100-1, F100-2, F100-3).

Such obligation for importers as above, i.e. shipment without the prior issuance of an import permit, exists even for shipments of commodities listed under Lists P, P12 and F, for which no prior deposit is required, given that a possible shipment without the prior issuance of an import permit is effected on importer's own responsibility (Decision No. 90500/6.12.72 Chapter A, paragraph II of the former Ministry of National Economy).

Procedure "E"

In this case import permits are issued by the authorized commercial banks, in their own responsibility. This procedure is applied to imports:

(1) from countries participating in the European Monetary Agreement (EMA), the United States and their dependent territories, as well as from Canada, the settlement of their value being effected against State foreign exchange;

(2) from countries not participating in the EMA, but with which bilateral agreements are in force, the settlement is effected exclusively only through clearing arrangements. Any payment of the value of goods in free currency from these countries can be effected by approval of the Minister of Commerce authorized by the Currency Committee.
Procedure "D"

In the case of Procedure "D" import permits are issued by the Bank of Greece. This procedure relates to imports of products from countries other than those covered by Procedure "E". It is also applicable where the method of payment is not that one as provided for under Procedure "E". Procedure "D" is also applied to certain imports effected for the account of the State, either by public services, or by the Agricultural Bank of Greece. The settlement of the value of these imports is effected through State foreign exchange. This procedure is also applied to imports from countries covered by the above paragraph (2) (Procedure "E") but with payment other than mentioned in the same paragraph.

List "A"

List "A" which is applicable to the above procedures ("E" and "D") consists of certain luxury products (reptile skins, furs and fur goods, precious stones, gilt or silvered knives, spoons and forks, gold or silver discs, silver and silver articles, gold and gold articles, platinum and platinum articles and jewellery, gold or silver pocket-watches and wrist-watches, perfumes and perfumery products) and some other products such as fish, fresh, chilled, frozen, smoked or in brine, eggs, fresh and dried vegetables, fresh and dried fruit, Brazil nuts, coarse grains (barley, oats, maize), wheat flour, rice, canary and sesame seed, acorn, incense, sugar, tomato pulp, extracted olive kernels, tanning extracts, fabrics and articles of cotton, wool, silk or man-made fibres, natural sponges, ceramic ware, arms, books, booklets etc. printed in Greek and all advertising material, refrigerator cabinets (without refrigeration unit), television receiving sets, motor vehicles, Malta stones, chicks, turkeys and guinea fowls, potato-starch, soup and broth cubes, cream for preparation of ice-cream and pastries, benzoyl peroxide, prepared dressings based on amylaceous substances, ball-point pens, television antennas and cables for descending current, etc.

Import licences are issued by a special committee.

For most of the products in List "A" import licences are issued automatically and without restriction.

List "B"

List "B" is also applicable to both procedures ("E" and "D") and comprises certain machinery and spare parts. For those items an import licence issued by the Ministry of Industry is necessary.
Barter transactions or private compensations are authorized with certain countries (East Germany, USSR, Romania, Bulgaria and Czechoslovakia) when such arrangements facilitate the export of specific products.

Such transactions must be approved by the Bank of Greece.

**Import procedures and methods of payment**

Imported goods can be paid for in cash either through the opening of documentary credit or against shipping documents, and for certain products by acceptance of time drafts.

For about 50 per cent of products, however, importers who adopt payment in cash, it is required to deposit with their bank a certain percentage of the c.i.f. value invoice (7-140 per cent according to the list in which the imported good is included) once they have obtained the import permit. In accordance with the Association Agreement between Greece and the European Economic Community (EEC), these percentages have been reduced by 20 to 90 per cent according to the product concerned. It should be noted that the above-mentioned reduction is an obligation only vis-à-vis EEC member countries; Greece has, however, extended this reduction spontaneously towards all GATT member countries. This is a measure of economic significance placed mainly within the framework of the anti-inflationary policy.

The above prior deposits are not refunded before the end of the time-limit of their retention (of two months or of four months), even if the final settlement of the value of the commodity is effected within that time-limit.

No prior deposit is required for imports of the remaining 50 per cent of products (particular foodstuffs and raw materials).

Recently pursuant to the Decision No. 1192 of 1973 of the Minister of Co-ordination and Planning the prior deposit system required for some foodstuffs is abolished for the purpose of stabilizing the cost of living index.

On the other hand, in one case of 400 products approximately, which are included in Lists P and PL2 (with terms either of unlimited time or of twelve months period respectively), such commodities shall be paid for against time settlement payment by accepting relevant drafts. Payment of drafts must be within the terms specified. The authorities may grant exceptions from these rules (settlement after a longer period, or deferred payment for articles not included in Lists P and PL2).

No prior deposit is required for products in Lists P, PL2 and F.
3. Treatment of imports from different sources

Imports may be classified in one of the following categories according to their source:

(1) Member countries of the European Monetary Agreement, their overseas territories and currency areas associated with them, Canada, the United States and dependent territories, and countries with which bilateral payments agreements are in force (East Germany, Bulgaria, Egypt, Hungary, Poland, Romania, Czechoslovakia, USSR, People's Republic of China and Yugoslavia) enjoy the liberal import régime which covers the major part of total imports by Greece.

(2) Imports of products from most other countries receive the same treatment in practice, under Procedure "D" mentioned above.

The same procedure is applicable to imports from countries with whom Greece is maintaining bilateral agreements, when the method of payment is different from that one of clearing arrangement.

(3) The regulations concerning imports of products on List "A" and imports of machinery and spare parts (List "B") also apply to all these countries.

4. Commodities or groups of commodities affected by the various forms of restrictions

For the products covered by the various systems of restrictions, see section 2 above.
Breakdown of Imports in 1972 According to the Import Regime Applied

A. Private trade

1. Private imports other than those coming under 2 and 3  
   Value in US$'000  
   1,962,806

2. Imports of goods included in List "A"  
   271,573

3. Imports of machines under special licensing system  
   57,620

B. State imports  
   Value in US$'000  
   53,786

Total  
   2,345,785

---

1/ Of which the amount of US$200.1 million represents the value of imported shipping.

2/ Of this figure, only the amount of US$44.5 million represents the value of articles subject to import limitations; the rest relates to products for which any licensing application is granted.

3/ Figure determined on the basis of import licences issued and not imports actually carried out. Because of the lack of concordance between the statistical headings and the headings relating to machinery as shown in the special list, it is difficult to distinguish data relating to actual imports in the official statistics.

4/ Including US$50.4 million of petroleum products.

5. Imports under State-trading conditions

Certain products are under State-trading terms for reasons of public health and for the protection of the consumer, motives of public interest or fiscal considerations. In principle, State trading is not intended to restrict imports or to protect domestic industry or agriculture.
The products affected may be divided into four categories:

(1) Commodities under monopoly, imported under control of the Ministry of Finance: matches, kerosene, rice-paper for cigarettes when imported by tobacco producers (but not when imported by cigarette manufacturers), playing-cards, saccharin, narcotics and sea salt.

(2) Wheat is imported by the State (Ministry of Commerce) for its own account.

(3) Since the petroleum refinery in Greece was brought into operation at the end of 1958, all local requirements of petroleum products must be met from the refinery's output.

Inasmuch as the refinery output does not suffice to cover all domestic requirements, imports are effected by the Government to satisfy the above requirements.

Petroleum products other than those produced by the refinery can be imported freely under import licence.

As regards crude oil imported for processing at the refineries, this product is imported by the refineries or by the State. Since 1968 the State reserves the right of importing 900,000 tons from countries with which we maintain bilateral agreements.

In 1972 out of 6,995,803 tons of crude oil imported into Greece, only 642,338 tons were imported from the bilateral agreements countries.

(4) Sulphur, copper sulphates and fertilizers are imported by the Agricultural Bank of Greece under Government permit. The essential objective of this Bank is to maintain prices at a minimum level through bulk imports and to achieve uniform prices for these products throughout the country so as to ensure that the mountain areas farthest away from the ports of entry are not penalized to the advantage of other more accessible parts of the country.
6. Measures adopted since the last consultations

(a) Since 1970 (year of the last consultations with Greece) prior deposits for commodities of the twelve years tariff disarmament (Lists F50-3 and F100-3) have been reduced three times by 10 per cent each, while since the date that the Association Agreement between Greece and EEC was put into effect (November 1962) the above prior deposits have been reduced nine times by 10 per cent each.

It should be noted that for the full disarmament there remains one only reduction (November 1974) of 10 per cent.

As regards the prior deposits, for commodities of the twenty-two years tariff disarmament (Lists F50-2 and F100-2), they have been reduced since the year 1970 (year of last consultations with Greece), one time by 8 per cent, while since the date that the Association Agreement between Greece and EEC was put into effect (November 1962) the above prior deposits have been reduced five times, i.e. four times by 5 per cent and one by 8 per cent.

It should be noted that for the full disarmament there remains seven further reductions which shall take place in a period of eighteen months each and expire on 1 November 1984.

These reductions are required only in respect of the EEC countries, but nevertheless Greece has extended them towards all GATT member countries despite the fact that the gap between exports and imports is still wide, so that in 1972 the trade deficit amounted to $1,274.3 million, according to official Greek statistics.

(b) Changes or amendments made to the various lists as they are presently in force are attached (see Lists "A" and "B" in Annex).

(c) Lists P3 and P6, as applied up to 1968, were renamed to Lists P6 and P12 correspondingly. In 1970 the same lists were abolished and two new lists were established under the name P and P12.
In recent years the trends in the trade balance have been as follows:

<table>

7. Effects of trade restrictions

The Greek Government applies these restrictive measures in a liberal manner and refrains from introducing new restrictions, although the latter would be justified by the trade balance situation.

The following table shows the evolution of the balance of payments in 1969, 1970, 1971, 1972 and 1973 (January-August). Payments and receipts are expressed in terms of million dollars (figures provided by the Bank of Greece):

<table>

<td>-865.3</td>
</tr>
</tbody>
</table>
As indicated from the above listed figures, the value of imports is substantially rising annually. Greece is, therefore, obliged to make recourse to the invisible earnings in order to cover its trade deficit. However, these earnings are unsuitable and sensitive elements and do not reflect a firm and permanent source of export earnings.

The said structure of Greece's balance of payments and the problems arising thereof, makes it necessary for the Greek authorities to give close attention to developments, particularly as regards exports which are likely to rise, and to the replacement of a large number of imports by domestic products in order to protect domestic production. Therefore, in order to equilibrate the above-mentioned adverse evolution of the balance of payments, it is necessary to maintain the said slight restrictions so far applied upon the Greek imports but continuously reduced, in our efforts to achieve the objectives established by the adopted measures.
**ANNEX**

Commodities Subject to Various Tariff Classifications

- Alcohol-making machinery in general
- Cast steel accessories, processed or otherwise, all types (crushing machinery jaws, pulleys, tractor metal belts, rolling sheaves, press cylinders etc.)
- Pressing machines all types and for all uses except presses used in the plastics industry, printing presses
- Condensers (vacuum) autoclave, all types
- Canned food processing and tin can-making machinery in general

The listing tariff classifications is intended to clarify the said commodities and to give the most accurate and clear specification.
