INVENTORY OF NON-TARIFF BARRIERS

Restraints on Imports and Exports by the Price Mechanism

Corrigendum

The following additions should be made on the pages indicated to take account of notifications by Uruguay. In this connexion the representative of Uruguay has drawn attention to Uruguay's continuing interest in removal of non-tariff barriers to trade in all of the export products considered earlier by the Panel of Experts in connexion with Uruguay's complaints under Article XXIII (L/1662/Rev.1). Some of the products there considered are not included in this notification in view of the fact that they may be regarded as agricultural rather than industrial products.
