Japan

ex 21.07 - delete import duty 27.5%

Page 14

25.01 - in column "Type of Restriction" delete DL

30.03 - delete item and footnote 6

Sweden

Sweden has made the following additional comments:

The licensing requirement with the exception of products under 17.02 refers only to imports from North, Central and South America.

The licence requirements for all products, with the exception of position 17.02, are of a formal nature involving no quantitative restrictions. It is at present not possible to indicate when the requirements may be abolished.
The licence requirement for certain products under 17.02 results from Sweden’s adherence to the International Sugar Agreement. The requirement refers only to 17.02.706 and ex 709 and only to imports from countries not belonging to the sugar agreement.

The term "variable tax" in the column, Import duty post-Kennedy Round, should be substituted by "import levy".
