Subject to proposals of specific texts to be submitted later depending on the development of work in the Community and the Textiles Committee at Geneva, the Delegation of the Community submits the following proposed texts:
PROPOSAL OF THE COMMUNITY CONCERNING THE ECONOMIC AND SOCIAL DEVELOPMENT OF THE DEVELOPING COUNTRIES

The participating countries agree that the implementation of the Arrangement should, inter alia, not only facilitate the economic expansion of the developing countries but also promote the social development and benefit the populations of those countries.
PROPOSAL OF THE COMMITTEE CONCERNING
THE PERIOD OF VALIDITY OF THE ARRANGEMENT

The participating countries agree that a new Arrangement shall be valid for five years.
The participating countries reaffirm that fraudulent practices, and in particular those referred to in Article 8, paragraph 1 of the Arrangement, are liable to threaten seriously the smooth functioning of the Arrangement.

They reiterate the special need for mutual co-operation in this field. In this connexion, they have now considered that the participating countries concerned will take due account of the principle that all quantities of imported products whose fraudulent origin is established are to be deducted in their entirety from the limitations applicable to the true country of origin.

For the application of this principle, the participating countries agree as follows:

The consultations to be held under Article 8, paragraph 2 should produce a mutually satisfactory solution within a period of three months from the date of notification by the importing participating country.

At the expiry of that period, the importing participating country may take any action to ensure that the quantities concerned are counted against the limitations applicable to the country of origin.
PROPOSAL OF THE COMMUNITY CONCERNING APPLICATION OF THE ARRANGEMENT TO CERTAIN PARTICIPATING COUNTRIES

The participating countries note that, in view of the stagnation in the consumption of textile and clothing products in certain importing countries, the risk of market disruption is higher than in the past. They also note that, as regards the contribution to such disruption by various exporting countries, there are important differences between suppliers that are both more competitive and more developed and those that are less, for whom more favourable treatment should be envisaged. They note that consideration of such differences for the implementation of the Arrangement, particularly as regards the application of Annex B, is consistent with the objectives and other provisions of the Arrangement.
PROPOSAL OF THE COMMUNITY CONCERNING MARKET ACCESS

The Committee notes that Article 1:2 of the Arrangement provides for the expansion of trade among all participating countries. It notes that that objective relates to both importing and exporting countries and considers it necessary for newly industrialized countries and State-trading countries to improve the conditions of access to their own markets.
