1. The report of the Textiles Surveillance Body to the Textiles Committee covered the period from the inception of the Arrangement to 30 September 1976. Since that time the TSB has held three further meetings, at which a number of measures notified by participating countries have been reviewed and some new notifications received. In addition the TSB has been informed of certain agreements concluded, but not yet formally notified. The purpose of the present addendum is to supplement the report with this additional information.

Article 2

2. The TSB reviewed the remaining phase-out programmes notified by the EEC, which apply to Brazil, Colombia, Korea, Macao, Malaysia, Mexico, Singapore and Thailand, and found them, in all essential respects, similar to the programmes notified by the EEC with reference to India and Hong Kong and previously reviewed by the TSB. Accordingly the TSB was of the view that the findings and recommendations applicable to the India and Hong Kong programmes (see paragraphs 11, 12 and 13 of COM.TEX/SB/188) would also apply to the eight programmes listed above.

Article 3

3. Sweden has notified two bilateral agreements under Article 3. The first, with Hong Kong, covers sixteen product categories and the second, with Pakistan, three product categories. These agreements are under review by the TSB. A unilateral action under Article 3:5 taken by Sweden with respect to certain imports from India has not yet been considered by the TSB. This brings the number of Article 3 actions notified by all participating countries up to thirty-seven.
4. The TSB has reviewed an agreement between the United States and Haiti which amends their existing bilateral agreement under Article 4 of the MFA. An Article 4 agreement between Canada and Japan, providing for export restraint on three items and for the termination of previously existing restrictions on all other products, has been reviewed by the TSB. The TSB also reviewed an agreement under Article 4 between Norway and Malaysia covering exports of woven shirts. This brings the number of Article 4 actions notified up to sixty-five.

5. A recently initialled agreement under Article 4 between the EEC and Romania has not yet been formally notified to the TSB.
