1949 Tariff Negotiations

Note to Delegations regarding Italian Statistical Data

With regard to the request by the Tariff Negotiation Committee that the Italian Delegation send statistical data regarding the imports of Italy in the year 1934 to all members of the committee, the Italian Delegation has informed the Executive-Secretary that it has at present only one copy of the volume of "Italian Foreign Trade in 1934" and that this is out of print in Rome. Consequently, it will not be possible to forward this volume to Delegations in sufficient time.

The Italian Delegation will, however, keep the above mentioned volume at the disposal of Delegations for consultation and it will start collecting the statistical data together with the rates of duty in force in 1934 for the products already indicated in the lists of request received from each country. The Italian Delegation has also stated that for certain countries no lists of requests have been received.
