NOTIFICATIONS OF IMPORT RESTRICTIONS OF NEWLY-INDEPENDENT COUNTRIES

Addendum

CHAD

The Government of Chad has submitted information supplementing and bringing up to date the full notification concerning its import restrictions which was issued last year in L/2577/Add.2.

As there explained, imports from the French Franc Area are free, whilst imports from all other countries are subject to licensing in accordance with an annual import programme. Separate global quotas are established for imports from European Economic Community countries other than France (referred to below as "Common Market") and for imports from other countries ("Global Quotas").

As shown in the information below, it appears that there are ceilings, within overall quotas, for certain textile products and also for certain other goods when produced by low-wage countries.
