Japanese System of Safeguard Measures Designed to Ensure that Skimmed Milk Powder for Purposes of Animal Feed will not be Diverted to Other Uses

Based on the provisions of Article 13 of the Customs Tariff Law, he who wants to import, with customs duty exempted, skimmed milk powder so as to produce animal feed through mixing the powder concerned with other materials shall take the following steps so that the powder concerned will not be diverted to uses other than animal feed:

1. He shall in advance make an application to the Director of Customs Office so that his factory be authorized to produce mixed feed with the duty-exempted skimmed milk powder.

2. When he (himself or through his agent) imports skimmed milk powder for purposes of animal feed, he shall go through necessary importation formalities and customs officers at a port of entry shall keep a record on the quantity of the skimmed milk powder thus imported.

3. He shall deliver the skimmed milk powder to his factory authorized under paragraph 1 above and mix it with fish meal, chrysalis meal or fish soluble.

4. After producing mixed feed, he shall submit, for inspection by the Customs Office, a report which contains, among others, information on the quantities of the skimmed milk powder used in the production and of other materials mixed therewith. The customs officer shall check how much of the quantity recorded at the time of entry has been used in the production and inspect the product concerned before its delivery from the factory.

In cases where he violates the control measures mentioned above, the authorization under paragraph 1 above shall be cancelled and the exempted customs duty shall be collected according to the provisions of the Customs Tariff Law. In addition to the above, he shall be fined or imprisoned, as the case may be, on the ground of the evasion of customs duty as provided for by the Customs Law.

Approved by the Management Committee and recorded on 14 May 1970
