IMPORT RESTRICTIONS OF JAPAN

Lifting of Import Restrictions

In a communication dated 8 January 1975 the Permanent Delegation of Japan has notified the following to the GATT secretariat.

The quantitative restriction on imports of integrated circuits (with not less than 200 elements in circuits) (BTN 85.21-2) was lifted on 25 December 1974. (The import of integrated circuits with less than 200 elements in circuits has been liberalized since April 1973.)

As a result of the above liberalization measure, the number of the tariff headings subject to residual import restrictions in Japan has been reduced to twenty-nine.
