The following notification has been received from the delegation of Canada in response to the questionnaire annexed to document L/5640/Rev.2. The present document replaces the information previously made available in document L/5640/Add.10/Rev.1.
The following notification, describing the present import licensing systems, replaces the previous notification contained in Document* and responds to the questionnaire annexed to document L/5640/Rev. 2.

Commodities subject to quantitative restrictions are primarily related to domestic agricultural programmes; measures taken to safeguard domestic producers against injurious imports pursuant to either GATT Article XIX (e.g. footwear); the Arrangement Regarding International Trade in Textiles (MFA) (e.g. clothing and textiles); or international commitments (e.g. narcotics and endangered species of fauna and flora). In these cases, import permits are required. Other products, although not generally limited as to quantity, are also subject to import control on grounds of public interest, or for surveillance purposes. This is accomplished either through import licensing measures or through certain other formalities at the port of entry.

Import controls are administered by a limited number of government departments. It is not practical, however, to provide a general description of the procedures involved as they vary, in certain particulars, from department to department. Consequently, replies to the questionnaire have been organized according to the different legislative instruments under which import controls are maintained. In the case of the Export and Import Permit Act, general responses, in respect of dairy products; and turkeys, eggs and chickens; and coffee, have been provided for questions 5, 8-10, 12-17 and 19 of the questionnaire. Replies to the remaining questions have been organized by separate product groups owing to differences in the procedures involved. Copies of the applicable Acts and Regulations, including sample forms referred to in the notification, are available in the Secretariat. The notification covers import licensing measures in force as of 31 December, 1986.

I - NARCOTIC CONTROL ACT
FOOD AND DRUGS ACT
NARCOTICS AND DRUGS

OUTLINE OF SYSTEM

1. The importation into Canada of narcotic, controlled and restricted drugs is subject to import licensing to ensure that dealer's procedures are in conformity with Canada's international obligations (Single Convention on Narcotic Drugs 1961 and Convention on Psychotropic Substances 1981), our domestic regulations, that the importation meets Canadian medical requirements and that the drugs remain in the legitimate distribution channels. The importation of these drugs is covered by the Food and Drugs Act and its regulations as well as the Narcotic Control Act and its regulations.

PURPOSE AND COVERAGE OF THE LICENSING

2. The prospective importers of controlled drugs (e.g. amphetamine, mehtamphetamines, barbituric acids), narcotics (e.g. codeine, morphine), and restricted drugs (used only for research, not commercial sale). The application must specify the origin, quantity and type of drug being imported.

Prospective importers of such drugs must be firms domestically licensed to manufacture or distribute specified narcotic, controlled, or restricted drugs.

3. The system applies to all narcotic, controlled and restricted drugs from all countries. Imports of narcotics are made only from countries which are party to the International Narcotic Convention of the United Nations, to which Canada is a signatory.

4. The licensing is intended to ensure that the quantity of drugs imported does not exceed Canadian medical or scientific needs and that Canada is able to comply with its International commitments.

5. The laws governing the importation of these drugs are the Narcotic Control Act (1961) as amended and Parts III (1961) and IV (1968) of the Food and Drugs Act, as amended. Licensing is statutorily required and the narcotic, controlled and restricted drugs are listed in the Schedules to the Acts. Drugs may be added to or deleted from these Schedules by Order-in-Council.
PROCEDURES

6.  (a) Allocations of quotas for narcotics are published by the United Nations and this information is provided to dealers upon request. Any nation exporting these drugs has Canadian quotas provided to it through the United Nations International Narcotic Control Board. Canada does not allocate a specific quantity to any country.

(b) The quotas for narcotics are allocated annually in accordance with the requirements of the United Nations International Narcotic Control Board.

(c) Permits to import narcotic, controlled and restricted drugs are issued to resident licensed dealers only. Should Canada not use the unassigned quota in a calendar year it would when allowed by international agreements be utilized in the following year.

(d) All narcotic quotas are on a calendar year basis and an application may be made at any time during the year.

(e) All the import permits are issued within five working days of receipt of application provided the Canadian quota has not been utilized for the calendar year.

(f) Permits are issued for immediate importation except when a dealer has indicated that he wishes to import in the following calendar year. In this case the permit becomes valid January 1st. All permits are valid for three months from the date of issue with none extending beyond December 31 of the year in which the permit is granted.

(g) All applications to import narcotics are reviewed by the Bureau of Dangerous Drugs, Department of National Health and Welfare, and the import permits are issued by this Bureau on the authority of the Minister of the Department of National Health and Welfare.

(h) Permits are issued to licensed manufacturers and distributors on a first-come-first-served and past performance basis.
(i) Under Canadian law and the International estimate system of the International Narcotics Control Board of the United Nations, the narcotic, controlled and restricted drugs requiring an import permit are also covered by an export permit issued by the narcotics authorities of the exporting country.

(j) Not applicable.

(k) Export permits would only be issued for narcotic, controlled or restricted drugs not approved for sale on the Canadian market after receiving an import permit from the importing country.

7.  
(a) The importer of controlled and restricted drugs possessing a manufacturer's or distributor's licence for that drug is usually issued an import permit within 5 days of receipt of the application. It is effective immediately.

(b) All permits are granted within 5 days if there is a legitimate medical or scientific need and the Canadian quota has not been utilized.

(c) No. All Permits are valid for three months from the date of issue and none extend beyond December 31 of the year in which they were issued.

(d) The Bureau of Dangerous Drugs, Health Protection Branch, Department of National Health and Welfare is the only group which the importer need contact.

8. An application for an import permit can be refused if there is an insufficient quota remaining or if there has been non-compliance with the Acts and Regulations by the importer or if there is reason to suspect that there will be diversion of the drug to an illicit market. Reasons are given for refusing permits.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENCE

9. Permits to import or export narcotic, controlled or restricted drugs are limited to these companies licenced to manufacture or distribute the drug in Canada. A list of such companies is published at least once each year and revisions more frequently.
DOCUMENTATION AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. Applications for permit to import narcotic and controlled drugs.¹

11. Canadian import permits and export permits from the exporting country.

12. No.

13. No.

CONDITIONS OF LICENSING

14. Three months. It may be extended upon application.

15. No.

16. No.

17. (a) No.

(b) No.

OTHER PROCEDURAL REQUIREMENTS

18. No, provided the company is currently licenced to manufacture or distribute such drugs and can provide the security necessary to store the drug.

19. Not applicable.

¹ Sample application forms are available for reference in the Secretariat.
II - EXPLOSIVES ACT

OUTLINE OF SYSTEM

1. The importation of explosives is governed by the Explosives Act and Regulations administered by the Department of Energy, Mines and Resources. The legal definition of explosives includes blasting explosives, detonators, propellants, sporting and industrial cartridges, and all types of fireworks and pyrotechnic devices. Before an explosive may be imported it must be declared an authorized explosive by the Chief Inspector of Explosives appointed under the Explosives Act. The process of authorizing an explosive consists of the manufacturer submitting data on the nature and composition of the explosive and on its packaging and markings. Samples are usually required for laboratory examination. The criteria for authorization are based on the safety characteristics of the explosive substances or articles during handling, storage, transport and use, and to confirm that the classification is in conformity with the recommendations of the Committee of Experts on the Transport of Dangerous Goods as adopted by the Economic and Social Council (ECOSOC) of the United Nations.

PURPOSE AND COVERAGE OF THE LICENSING

2. Once an explosive is authorized any person may import it into Canada provided he has the proper storage facilities for the type and quantity of explosives in question. Two kinds of importation permits are issued, a general permit issued for a specific quantity in one shipment, and an annual permit issued for unlimited shipments during a twelve month period of explosives that constitute only a limited hazard to the general public or that are used in a manufacturing process. In addition, special permits may be issued for small quantities required for purposes of chemical analysis or scientific research.

3. The system applies to explosives from all countries.

4. The system is intended only to ensure that the same degree of safety exists with imported explosives with those of domestic manufacture. There is no intent whatsoever to restrict quantity or value of the explosives imported.
5. The Explosives Act, R.S., c. E-15 amended by 1974-75-76, c. 60 and the Explosives Regulations, C.P.C., C. 599 as amended. The system is a statutory requirement which does not convey any administrative discretion and would require legislative approval to be abolished.

PROCEDURES

6. Not applicable.

7. (a) The import permit is normally issued within twenty-four hours if the explosive has been previously authorized and facilities exist in Canada for the safe and secure storage of the quantity being imported. Permits may be obtained in a shorter time but nevertheless should be on hand when shipment arrives at Customs to prevent dangerous accumulations. Naturally delays will occur if the explosive has not been authorized previously.

   (b) Permits may be granted immediately on request provided all is in order.

   (c) There are no limitations as to the period of the year during which an application for an importation permit may be made.

   (d) The importer need only approach the Explosives Branch of Energy, Mines and Resources. No other administrative organs are involved.

8. An application for an explosives importation permit may only be refused for failure to meet safety criteria. Reasons for such refusal would be given to the applicant who would have the right of appeal to the Minister of Energy, Mines and Resources under subsection 17(2) of the Explosives Act.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENSE

9. Any importer who has satisfied the requirements of the Explosives Regulations relative to the storage, transport, sale, purchase and possession of the explosive to be imported may apply for an importation permit.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENSE

10. The Forms of application and permits to import explosives are included in Schedule II Forms 13 to 17 inclusive of the Explosives Regulations.
11. The importers Transmission Schedule (Form 16) is required to be prepared in duplicate by the importer and presented to the customer officer at the point of entry along with the Importation Permit (Form 14 for General), (Form 17 for Annual) for verification and forwarding of one copy of the transmission schedule to the Explosives Branch of Energy, Mines and Resources.

12. The present fee for a twelve month term is $20.00 for a General Importation Permit and $60.00 for an Annual Importation Permit.

Where the period of validity of the Annual Importation is less or more than twelve months, the fee shall be prorated.

The $20.00 fee for General Importation Permits is fixed regardless of the period of validity.

13. Other than the fee, there is no deposit nor advance payment associated with the issuance of an importation permit.

CONDITIONS OF LICENSING

14. General Explosives Importation permits are valid for one importation or a period of not less than nine and not more than 15 months, whichever comes first. Annual explosives importation permits are valid for a period of not less than nine and not more than 15 months....

15. There is no penalty for the non-utilization of an explosives importation permit.

16. Permits are not transferable between importers.

17. There are no conditions attached to the issuance of an explosives importation permit relative to quantitative restrictions.

OTHER PROCEDURAL REQUIREMENTS

18. There is a requirement to have the explosive tested and authorized prior to applying for importation.

19. Not applicable.

1 An Office Consolidation of the Explosives Act and Explosives Regulations with amendments is available for reference in the Secretariat.
III - ATOMIC ENERGY CONTROL ACT

RADIOACTIVE MATERIALS
(Prescribed Substances)

OUTLINE OF SYSTEM

1. The Atomic Energy Control Board has established a strict licensing system for the distribution and use of prescribed substances. Under this system, any person or organization proposing to deal in prescribed substances in Canada, in excess of exempt quantities, must apply to the Board, giving details of the prescribed substance and quantity requested, the proposed use, the facilities and protection equipment available and the experience of the user. When satisfied, the Board issues a license authorizing the applicant to possess and use the prescribed substance subject to any conditions which the Board deems necessary.

In addition to obtaining this authorization to possess and use prescribed substances, any person or organization wishing to import any quantity of a prescribed substance must, pursuant to section 5(1) of the Regulations under the Atomic Energy Control Act, obtain an import licence.

PURPOSES AND COVERAGE OF THE LICENSING

2. Section 5(1) of the Atomic Energy Control Regulations refers to importation into Canada of any prescribed substance. Prescribed substances includes uranium, thorium, plutonium, neptunium deuterium, their respective derivatives and compounds, and radioactive isotopes of all elements and any substances containing such isotopes.

3. This licensing system applies to prescribed substances from all countries.

4. The import licence is intended to ensure that the prescribed substance is destined to a person or organization authorized and equipped to use the prescribed substances safely and to effect government policy regarding such imports.

5. Import licensing is provided for by the Atomic Energy Control Act and regulations made thereunder. Licensing procedures and the products coverage of the licensing requirements are prescribed by regulation. The licensing system cannot be abolished without the approval of the Governor-General in Council.
6. Quantity and value restrictions do not apply to imports of prescribed substances except as may from time to time be determined by Government Policy.

7. (a) (b) The application for a licence to import a quantity of a prescribed substance in excess of an exempt quantity can be approved only if the importer is authorized by the Board to possess the prescribed substance.

An import licence is normally issued within one month of receipt of the application and can be issued in a shorter time if necessary.

(c) No.

(d) The Atomic Energy Control Board is the only body authorized to issue an import licence. Applications are made directly to the Board.

8. The Board may refuse to issue a licence or revoke, suspend, or amend the terms and conditions of, a licence for reasons of health, safety or security. The holder of the affected licence has the right to be heard by the Board.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENCE

9. Yes

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. Application for licence to import uranium, thorium, plutonium other radioactive isotopes and deuterium.

11. Approved import licence or a copy thereof.

12. No.

13. No.

CONDITIONS OF LICENSING

14. The period of validity depends on the nature of the import and is normally 1 or 2 years. The validity of a licence may be extended upon receipt of a written request.

15. No.
16. No.

17. No.

OTHER PROCEDURAL REQUIREMENTS

18. The applicant should ensure that the importer is authorized to possess the subject prescribed substance.

19. Not applicable.

A sample application form is available for reference in the Secretariat.
IV - PLANT QUARANTINE ACT

PLANTS AND PLANT PRODUCTS

Strictly speaking, we do not have an importing licensing system. The permit serves to apprise the importer of any plant health requirements that may apply to commodities that can carry plan pests.

OUTLINE OF SYSTEM

1. A "Permit to Import", outlining the health conditions that must be met before plants, plant parts and plant products may be imported, is a requirement.¹

PURPOSES AND COVERAGE OF LICENSING

2. Under section 4 of the Regulations, pursuant to the Plant Quarantine Act, the prospective importer must apply in writing for a permit for the importation of living plants and plant parts for propagation, root crops, broc- corn, used bag and any other matter or commodity likely to be a pest or to be infested with a pest. The permit is required for each source or exporter for the regulated products.

3. The system applies to plants and plant products from all countries.

4. The permit system is intended to ensure that plant materials imported conform with Canada's phytosanitary import requirements. We tried to replace the permit system with a public information system but this was rejected, after a trial, by the industry as being inadequate.

PROCEDURES

6. a) Material that could not normally enter because of quarantine restrictions may, for research or developmental purposes, be permitted entry under biologically secure conditions and in limited quantities;

¹ The "permit" system in use in Plant Quarantine is not, in reality, so much a restriction but rather, a means of providing the prospective importer with information about the health standards that must be met before his commodity may enter the country.
b) No such thing as quota. Restricted items are permitted entry in the quantities that may safely be held and tested or treated before release.

c) Not applicable.

d) Not applicable.

e) When application is received it takes 2-5 days.

f) Not applicable.

g) Yes, if the single administrative organ is the Permit Office. For example, insects and disease cultures must be directed to the Biological Section of Plant Health Division for assessment. No, the importer does not have to approach more than one administrative organ.

h) Not applicable.

i) Not applicable.

j) Not applicable.

k) No.

7. a) No set deadline. Permit office prefers to have two weeks notice. Yes, in emergency situations a telex will be accepted as an application and the permit will be issued immediately.

b) No. An application must be made in writing and processed through the proper channels.

c) No.

d) Yes.

8. None. Yes, by letter. The importer may appeal to the Minister.
ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENSE

9. Any person or firm may apply for a permit to import.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION FOR A PERMIT TO IMPORT

10. Information required on application:
   - the name and address of the person shipping the pest, plant or other matter and the person to whom it is being shipped;
   - the name or a description of the pest, plant or other matter;
   - the purpose for which the pest, plant or other matter is to be admitted into Canada;
   - the place at which the pest, plant or other matter will enter Canada and its destination within Canada;
   - the means by which the pest, plant or other matter will be transported and the precautions that will be taken to prevent the spreading of any pest while being transported;

11. Documents specified by the permit: e.g., phytosanitary certificate, certificate of inspection, certificate of treatment, certificate of origin, affidavit.

12. No.

13. No.

CONDITIONS OF PERMIT

14. The permit is valid one year from date of issue except for corn or soybean where it may be valid for an unlimited period. The permit may be valid for one or multiple importations. Validity may be extended upon re-application by permit-holder.

15. No.

16. No.
17. Conditions may be stated on permit depending on the nature of the imported goods and/or their origin.

OTHER PROCEDURAL REQUIREMENTS

18. No.

19. Not applicable.
V - ANIMAL DISEASE AND PROTECTION ACT

LIVE ANIMALS, ANIMAL PRODUCTS, BIRDS AND VETERINARY BIOLOGIES

OUTLINE OF SYSTEM

1. For importation from countries other than the U.S.A. a permit is required for all animals (except domesticated dogs and cats), semen, birds, and veterinary biologics. For importation from the U.S.A. a permit is required for the following: Semen, veterinary biologics, psittacine birds, monkeys, turtles, skunks, foxes, ferrets and raccoons.

PURPOSES AND COVERAGE OF LICENSING

2. See Number 1 above.

3. Imports are permitted only from countries which are free of serious animal diseases which may affect the species of animal or bird imported. The movement of most live animals between Canada and the United States is excepted from this requirement because of the relatively disease-free status of the two countries and on the basis of an agreement with respect to certification procedures between the veterinary services of Canada and the U.S.A.

4. The permit system is intended to ensure that all items identified in Number 1 are imported in conformity with Canada's sanitary health regulations.

5. The Animal Disease and Protection Act and Regulations thereunder. Goods, products, animals requiring permit are specified (see #1). There is no authority to waive regulations.

PROCEDURES

6. Recent amendment permits importation of certain food products to a maximum amount for sample purposes only under approved conditions. Dealt with as received.

7. (a) and (b) In the case of live animals or animal semen, an import permit must be issued prior to the importation and the permit describes the conditions of importation as it relates to health certification. On arrival at the port of entry in Canada:
(i) Live animals receive veterinary inspection and the accompanying permit and health certification are inspected to assure that import requirements are met, and,

(ii) In the case of animal semen, the permit and health certification are checked.

In the case of biologics, production protocols for each product must be submitted and approved prior to the issuance of the permit. They are examined and reviewed to assure the product is safe, free from contaminants and that the label meets all requirements.

(c) No.

(d) Food Production and Inspection Branch, Department of Agriculture.

8. We do refuse to issue import permits on some occasions. Examples of these are:

(1) When the disease status of a country does not meet minimum criteria, a permit will be refused.

(2) When a country does not have a satisfactory disease diagnosis capability or disease control organization, a permit may be refused.

(3) Agriculture has agreed to refuse to issue import permits for certain species of animals because of the risk of zoonosis. Examples are primates, turtles, tortoises, foxes, skunks, raccoons and ferrets for purposes other than exhibition in zoos or for research purposes. This agreement is with Health and Welfare since they do not have regulatory authority under their own Act and Regulations.

The reasons for refusal are given to the applicant. There is no formal right of appeal but we are prepared to examine special situations that the importer may present.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENSE

9. Any resident of Canada.
DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENSE

10. Application must be made in writing, and must specify the species, quantities, date of arrival, country or origin and purposes of import.

11. In addition to the Permit to Import Animals and the normal customs invoices, a certificate of health issued by the veterinary services of the country or origin must accompany the shipment.

12. No.

13. No.

CONDITIONS OF LICENSING

14. Usually three months but will often vary depending on the species of animal and the purpose of importation. Yes, upon request by the importer.

15. No.

16. No.

17. See no 6.

OTHER PROCEDURAL REQUIREMENTS

18. No.

19. Not applicable.

\[A sample form of application for permit to import is available for reference in the Secretariat.\]
VI - CANADIAN WHEAT BOARD ACT

GRAINS

OUTLINE OF SYSTEM

1. The importation into Canada of wheat, oats, barley and certain grain products are subject to import control pursuant to Part IV of the Canadian Wheat Board Act and the regulations thereunder depending on the supply situation.

PURPOSE AND COVERAGE OF THE LICENSING

2. The Canadian Wheat Board Act prohibits any person, other than the Board except if permitted under the regulations, from importing into Canada wheat or wheat products owned by a person other than the Board. This provision extends by regulations to include oats and oat products, barley and barley products. Wheat, oat and barley products include screenings and all substances produced by processing and manufacturing wheat, oats and barley that contain more than 25 per cent by weight of those grains (such as wheat starch and gluten, rolled and crushed oats, and crimped barley and barley meal).

3. The system applies to grains coming from all countries.

4. The import control is intended to restrict the quantity imported for orderly marketing and distribution of Canadian grains. No.

5. The Canadian Wheat Board Act and the regulations thereunder. The licensing is statutorily required for wheat and wheat products and is extended by regulations to include oats and barley and their products. Effective January 23, 1986, responsibility for issuing licences for the importation of oats and oat products and barley and barley products has been transferred from the Canadian Wheat Board to the Department of External Affairs.

PROCEDURES

6. (a) (b) (c) (d) Information on import licensing procedures for wheat and wheat products is published in the Canada Gazette. It is also available from collectors of Customs and Excise at Canadian Customs ports or entry
and from the Canadian Wheat Board. The Department of External Affairs has issued notices to importers outlining the import procedures for oats and oat products and barley and barley products.

Canada is a major producer and exporter of wheat, oats and barley and products thereof. However if it appeared that domestic supplies of any of these commodities at market prices were inadequate and applications for import permits had been received, the Wheat Board would assess the supply situation and decide whether a permit should be granted. Alternately, the Board, even in the absence of applications, may decide that imports are necessary and would advise the trade that applications for import permits would be entertained.¹/¹

Information on number of licenses issued and volume of imports is available from the Canadian Wheat Board in the case of wheat and wheat products and from the Department of External Affairs in the case of oats and oat products and barley and barley products.

(c) Permits are issued immediately provided that the application is in order.

(f) Import licences for wheat and wheat products are effective upon issuance. For oats and barley the validity of the licence is 30 days; licences may be requested 30 days prior to the expected date of importation.

(g) Yes, the Canadian Wheat Board for wheat and wheat products. The Department of External Affairs for oats and oat products and barley and barley products.

(h) Quotas are allocated and licences granted on the basis of the market situation in Canada at the time. Licences are normally issued on a first come first served basis. New importers are treated in the same manner as previous importers.

(i) Not applicable.

(j) Not applicable.

(k) No.

7. Not applicable.

8. Not applicable.

¹/¹Copies of import licence and in-transit licence forms for oats, barley and their products are annexed (Annex I).
ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENSE

9. Any Canadian resident, firm or institution.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENSE

10. The prospective importer must specify the value quantity, description and origining of the goods including the port of entry.

11. The import license with the usual Customs invoices.

12. No.

13. No.

CONDITIONS OF LICENSING

14. Licenses are normally valid for thirty days and if extension is required, new licenses are issued.

15. No.

16. No.

17. No.

OTHER PROCEDURAL REQUIREMENTS

18. No.

19. Not applicable.
VII - NATIONAL ENERGY BOARD ACT

SECTION A: NATURAL GAS AND ETHANE

OUTLINE OF SYSTEM

1. The National Energy Board Act and the Part VI Regulations made thereunder control imports of natural gas by pipeline, railway tank cars and tank trucks or tankers. Imports are authorized by both licences and orders. Licences are issued for large volume imports while orders are used in the case of small volume and emergency imports. An application is made to the Board for import authorization and depending on the type of authorization requested (licence or order) the application may or may not be set down for a public hearing. Any licence or order, other than an emergency import order, is not effective until approved by the Governor-in-Council. However, emergency import and certain other short-term orders can be approved by the Board.

PURPOSES AND COVERAGE OF THE LICENSING

2. As stated, the licences are issued for the larger volume imports of natural gas while orders are used in the case of small volume and emergency imports of natural gas (or liquefied natural gas or ethane) for periods up to 24 months.

3. The system described applies to gas originating in and coming from any country. In practice, however, all imports of natural gas have, to date, been from the United States.

4. The licensing of imports is for regulatory and emergency purposes. Since the formation of the National Energy Board in 1959 there has been a surplus of natural gas in the United States and a surplus of natural gas produced in Canada. The purpose of licensing has been to restrict the quantity of imports except in the case of emergency imports.

5. The licensing is maintained under the National Energy Board Act, a statute of the Government of Canada, and the National Energy Board Part VI Regulation. The designation of products, i.e., natural gas, is specifically referred to in the Act and is not subjected to administrative discretion. Legislative action would be required to abolish the system.
PROCEDURES

6. There is no quota system, determination is made on a case-by-case by assessing the impact on Canada of the proposed import, i.e., impact on gas industry, consumer cost etc.

   (e) For processing applications, the minimum length of time is approximately one month, while the maximum length depends on whether a public hearing is required, in which case four months or longer would be approved. Applications for emergency import purposes can be approved immediately.

   (f) In some cases, imports commence immediately upon issuance of a licence, or there may be some interval between licence issuance and the commencement of the import. It depends on what is being applied for.

   (g) The importer has to approach one administrative organ only, the National Energy Board. However, licences for imports of more than 24 months require the approval of the Governor-in-Council before final authorization is granted.

   (h) Applications are examined on receipt, except for special situations arising as a result of emergency conditions. To date there has been no need to allocate import licences.

   (i) There are no applicable bilateral arrangements.

   (j) The granting of import licences would be conditional on an export licence being granted by the appropriate foreign government agency.

   (k) Not applicable.

7. (a) Application for a licence should be made in advance of importation by a reasonable length of time, depending on the scope of the importation.

   (b) An order can be granted immediately by the Board in an emergency situation.

   (c) There are no limitations as to the period of the year during which application for licence and/or importation may be made.
(d) See response to 6(g) above.

8. An application for a licence may be refused for failure to meet ordinary criteria, failure to consider alternative domestic supplies, etc. An applicant, in the event of refusal to issue a licence, may resubmit his application with appropriate amendments to the same Board or may request a review. Appeal can be made to the Federal Court of Appeal on a question of law or jurisdiction, on leave being obtained from the Court.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENCES

9. All National Energy Board persons and institutions, within the meaning of the Act, are eligible to apply for licences.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. The Board may have regard to the following information in the application: the availability of gas; the existence of markets, natural or potential; the economic feasibility; the financial responsibility; and the public interest. The Governor-in-Council may make regulations respecting the information to be furnished by applicants for licences and the procedure to be followed in applying for licences as constituted in the National Energy Board Act under the Regulations made pursuant to Part VI of that Act, and specifically Section 5 entitled "Information to be Furnished by Applicant for Licence to Import Gas".

11. Documents required upon actual importation are as stated in the licence or order authorizing the import. Full details of documentation requirements are set out in the National Energy Board Part VI Regulations.

12. There is no licensing fee or administrative charge in respect of an application.

13. There is no deposit or advance payment requirement associated with the issue of licences.

CONDITIONS OF LICENSING

14. No import licence shall be issued for any period in excess of twenty-five years from a date to be fixed in
the licence. The validity of a licence cannot be extended beyond this period without an amendment to the Act, by Parliament.

15. There is no penalty for the non-utilization of a licence or a portion of a licence. Licences are permissive only.

16. Licences are not transferable between importers without authorization of the Board.

17. Conditions attached to the issue of a licence would normally include installation of metering, inspection and reporting, subject to requirements defined by the Board.

OTHER PROCEDURAL REQUIREMENTS

18. Apart from procedures defined in the Regulations made pursuant to the act, no additional administrative procedures are required.

19. Not applicable.
VIII - EXPORT AND IMPORT PERMITS ACT

GENERAL RESPONSES (APPLICABLE TO DAIRY PRODUCTS; TURKEY, EGGS AND CHICKEN; AND COFFEE)

NOTE: On January 1, 1979 a computerized import permit issuing system was introduced and is now fully operational for all products, except endangered species of wild fauna and flora. This system, based upon the concept of single shipment permits, is effected through the use of computer terminals located in all major centres across Canada.

5. Licensing is effected by regulations under the Export and Import Permits Act.

- Individual products are not designated in the Act.

- An Import Control List has been established by the Governor in Council which includes any article, the import of which he deems it necessary to control for any of the following purposes, namely:

1) - to ensure, in accordance with the needs of Canada, the best possible supply and distribution of an article that is scarce in world markets or is subject to government controls in the countries of origin or to allocation by inter-governmental arrangement;

- to restrict, for the purposes of supporting any action taken under the Farm Products Marketing Agencies Act, the importation in any form of a like article to one produced or marketed in Canada the quantities of which are fixed or determined under the Act;

- to restrict, for the purpose of supporting any action under the Meat Import Act, the importation of products to which the act applies;
- to implement any action taken under the Agricultural Stabilization Act, the Fisheries Prices Support Act, the Agricultural Products Co-operative Marketing Act, the Agricultural Products Board Act or the Canadian Dairy Commission Act, to support the price of the article or that has the effect of supporting the price of the article;

- to implement an intergovernmental arrangement or commitment;

2) where at any time it appears to the satisfaction of the Governor in Council on a report of the Minister made pursuant to:

(a) an inquiry made by the Textile and Clothing Board with respect to the importation of any textile and clothing goods within the meaning of the Textile and Clothing Board Act, or

(b) an inquiry made under section 48 of the Special Import Measures Act by the Canadian Import Tribunal in respect of any goods, that goods of any kind are being imported or are likely to be imported into Canada at such prices, in such quantities and under such conditions as to cause or threaten serious injury to the production in Canada of like or directly competitive goods, any goods of the same kind may, by order of the Governor in Council, be included on the Import Control List in order to limit the importation of such goods to the extent and for the period that, in the opinion of the Governor in Council, is necessary to prevent or remedy the injury.

- Once an item has been placed on the Import Control List, a permit either individual or general, is required by the Act to import such goods into Canada.

- Specific products can be made subject to either individual licensing or open general licensing by the Secretary of State for External Affairs.
This licensing system may be abolished by the Governor in Council by removing the items from the Import Control List. Only Parliament can alter or amend the Export and Import Permits Act.

Applications which meet the general requirements will not be refused. If criteria have not been met (e.g. no valid export licence, no quota entitlement) the applicant will be informed; in such event the applicant may request reconsideration by the Secretary of State for External Affairs.

ELIGIBILITY OF IMPORTERS TO APPLY FOR PERMIT

9. Any resident of Canada may apply for a permit. Citizenship is not a criterion.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. The applicant is required to provide the information requested on the application for import permit form. For certain products, additional information and/or documentation may be required, as indicated in the specific product group responses.

12. Any applicant may apply for a permit in Ottawa, for which there is no charge, but for permits issued at other computer terminals there is a $5.00 or more fee to cover costs of additional service. There is no advance payment associated with the issue of permits.

CONDITIONS OF LICENSING

13. Import permits have a validity of 30 days which may be extended, provided the request for extension is made prior to the original expiry date, by a simple amendment to the permit. Otherwise if the permit has not been used the importer may apply for its cancellation and the issue of a new permit upon presentation of unused permit.

14. There is no penalty for non-utilization of an import permit.

15. Permits are not transferable between importers.

---

1/ Copy attached (Annex II)
16. Under very particular circumstances, special conditions may be attached from time to time (e.g. see responses to 6(k)).

17. Not applicable.

OTHER PROCEDURAL REQUIREMENTS

19. Not applicable.
OTHER RESPONSES - BY PRODUCTS GROUPS

(1) CLOTHING & HANDBAGS

OUTLINE OF SYSTEM

1. Specified clothing products are included on the Import Control List established under the Export and Import Permits Act pursuant to negotiated bilateral export restraint arrangements, and are subject to either individual import licensing or general licensing.

PURPOSES AND COVERAGE OF LICENSING

2. Clothing products on the Import Control List and subject to individual import permits are: work gloves; outerwear garments; hosiery; pants; blouses and ladies' shirts; pyjamas and sleepwear; raincoats; sportswear; foundation garments; swimwear; underwear; topcoats and overcoats; men's and boy's structured suits and jackets; leather coats; men's and boy's shirts; and sweaters. All clothing products, with the exception of work gloves, and hosiery, are allowed entry into Canada under open general permits if a) the value for duty, as determined under the Customs Act, of each importation of the goods is not more than $500; or b) where the importation of the goods has a value for duty, as determined under the Customs Act, of more than $500, the number of units of the goods to be imported does not exceed twelve. Imports of hosiery are allowed entry into Canada under open general permit where they are imported for personal use of the importer, as gifts, or a bona fide commercial samples and where their value does not exceed $500.00. Imports of work gloves are allowed entry into Canada under open general permit where they are imported for the personal use of the importer or as gifts and the importation does not exceed 12 pairs or where they are bona fide commercial samples and the importation does not exceed 144 pairs.

3. See table on licensing requirements on page 36.

4. The licensing system is being used to implement restraint arrangements negotiated under the MFA,* and for surveillance purposes in order to fulfill Canada's obligations under the MFA and its bilateral obligations to those trading partners with whom restrains have been negotiated. General Canadian custom clearance is not yet

*Arrangement Regarding International Trade in Textiles (Multi-Fibre Arrangement)
fully computerized and in view of the significant number of ports of entry, the surveillance required could not be achieved without the licensing system.

5. Export and Import Permits Act provides for the establishment of an Import Control list to implement an intergovernmental arrangement. Import permits may be issued to import goods including clothing items, on the Import Control List.

PROCEDURES

6. NOTE: Quantitative restrictions on clothing products and handbags are established in accordance with bilateral export restraint arrangements negotiated under the International Arrangement Regarding Trade in Textiles. The administration of all such arrangements is maintained in the exporting source. The Canadian import licensing system is therefore a back-to-back licensing system with that of the exporting sources. Canadian import permits are issued on a single shipment basis to the holders of valid export licences from the exporting authorities. As a result of the above, parts (b), (c), (f) and (h) in question 6 are not applicable to the Canadian system.

(a) Information on restraints and formalities is published in the Canada Gazette, in press releases and in notices to importers distributed to associations and traders, and, upon request, from the Department of External Affairs.

- When the authorities in the exporting source are responsible for administration of the restraint, information is available from the appropriate body in that source.

- In addition to the above overall amounts and the amount allocated to goods from each country are also available from the Department of External Affairs.

(b) See NOTE above.

(c) See NOTE above.

(d) Within 30 days prior to arrival or any time after arrival of goods.
(e) Import permits are available immediately at numerous computer terminals across Canada provided that proper documentation from the exporting source is presented.

(f) See response to 6 (d).

(g) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) See NOTE above.

(i) Yes. Import licences are issued back-to-back with the export permit.

(j) Not applicable.

(k) There are provisions of this type in the bilateral arrangements in order that such transshipments are not counted against the negotiated restraint levels.

7. (a) Import permits for goods subject to surveillance only can be applied for 30 days prior to the expected date of arrival or at any time after arrival.

(b) A permit is normally granted immediately upon request.

(c) See response to 7(a).

(d) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

8. Import permits are not normally refused if the criteria relating to issuance is met. If a permit is refused, for example, because of incomplete information on the application, the applicant is advised and given the opportunity to correct the anomaly.

9. Import permits may be issued only to Canadian residents, whether persons, firms or institutions. Importers eligible to receive import permits are registered with the Special Trade Relations Bureau without charge. This registration is for administrative purposes only related to the use of a computerized permit delivery system. The names of registered importers is made available on request.
DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. See NOTE on question (6) for additional information required to that prescribed in the application for import permit form.

11. Import permits and normal customs entry forms are required.

12. There is no fee for import permits issued by the Special Trade Relations Bureau. Importers, however, may apply for permits through the offices of commercial customs brokers who may charge a fee for their services.

13. No.

14. Each permit is valid for approximately 30 days, and may be extended for a further 30 days if the request for extension is submitted prior to expiry.

15. No.

16. Licences are not transferable.

17. (a) No
    (b) No.

OTHER PROCEDURAL REQUIREMENTS

18. See NOTE in question (6).

19. Import permits are not a condition of foreign exchange transactions pursuant to the Export and Import Permits Act.

R = Restraint; CL = Consultation Level; EA = Export Authorization
* All items not under restraint are under surveillance

No silk categories included,
(1) Jackets only
(2) Suits and co-ordinates only
(3) Blouses and shirts, WCI only
(2) TEXTILES

OUTLINE OF SYSTEM

1. Specified textile products are included in the Import Control List established under the Export and Import Permits Act pursuant to negotiated bilateral export restraint arrangements, and are subject to either individual import licensing or open general licensing.

PURPOSES AND COVERAGE OF LICENSING

2. See table on licensing requirements on page 41

All textile products are allowed entry into Canada under open general permits where they are imported for personal use of the importer or as gifts or as a bona fide commercial sample and where their value does not exceed in most cases $500.00.

3. See table on licensing requirement on page 41

4. Individual import licensing for textile products is being used to implement bilaterally negotiated restraint arrangements under the MFA. In addition, it is used for import surveillance in order to fulfill Canada's obligations under the MFA and its bilateral obligations to those trading partners with whom restraints have been negotiated. General Canadian custom clearance is not yet fully computerized and in view of the significant number of ports of entry, the surveillance required could not be achieved without the licensing system.

5. See 5.p. 33

PROCEDURES

6. **NOTE** The administration of all bilateral arrangements is maintained in the exporting source. The Canadian import licensing system is therefore a back-to-back licensing system with that of the exporting sources. Canadian import permits are issued on a single shipment basis to the holders of valid export licences from the export authorities.

(As a result of the above, parts (b), (c), (f) and (h) in question 6 are not applicable to the Canadian system).
(a) Information on restraints and formalities is published in the Canada Gazette, in press releases and in notices to importers distributed to associations and traders, and upon request, from the Department of External Affairs.

When the authorities in the exporting source are responsible for administration of the restraint, information is available from the appropriate body in that source.

In addition to the above, overall amounts, and the amount allocated to goods from each country are also available from the department of External Affairs.

(b) See NOTE above.

(c) See NOTE above. Bilateral arrangements provide for swing, borrow-forward and carry-over.

(d) Within 30 days of arrival or any time after arrival of goods.

(e) Import permits are available immediately at numerous computer terminals across Canada provided that proper documentation from the exporting sources is presented.

(f) See NOTE above.

(g) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) See NOTE above.

(i) Yes

- Yes

(j) Not applicable.

(k) There are provisions of this type in the bilateral arrangements in order that such transhipments would not be counted against the negotiated restraint levels.

7. (a) Import permits for goods subject to surveillance only can be applied for 30 days prior to the expected date of arrival or at any time after arrival.
(b) A permit is normally granted immediately upon request.

(c) See response to 7 (a).

(d) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

8. Import permits are not normally refused if the criteria relating to issuance is met. If a permit is refused, for example, because of incomplete information on the application, the applicant is advised and given the opportunity to correct the anomaly.

9. Import permits may be issued only to Canadian residents, whether persons, firms or institutions. Importers eligible to receive import permits are registered with the Special Trade Relations Bureau without charge. This registration is for administrative purposes only related to the use of a computerized permit delivery system. The names of registered importers is made available on request.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. See note on question (6) for additional information required to that prescribed in the application for import permit form.

11. Import permits and normal customs entry forms are required.

12. There is no fee for import permits issued by the Special Trade Relations Bureau. Importers, however, may apply for permits through the offices of commercial customs brokers who may charge a fee for their services.

13. No.

14. Each permit is valid for approximately 30 days, and may be extended for a further 30 days if the request for extension is submitted prior to expiry.

15. No.

16. Licences are not transferable.
17. (a) No
   (b) No.

OTHER PROCEDURAL REQUIREMENTS

18. See NOTE in question (6).

19. Import permits are not a condition of foreign exchange transactions pursuant to the Export and Import Permits Act.

Note: X means special export licence or document required.  
R = Restraint; EA = Export Authorization; CL = Consultation Level; CL = Group Limit

(1) Denim & Corduroy only
(3) FOOTWEAR

OUTLINE OF SYSTEM

1. Specified footwear products as described in paragraph 2 are on the Import Control List established under the Export and Import Permits Act. As such these products are subject to either: (a) individual import licensing, or (b) general import licensing.

PURPOSES AND COVERAGE OF THE LICENSING

2. The individual and general licensing systems apply to most women's and girls' leather and non-leather footwear except rubber footwear, slippers, athletic/utility footwear, winter boots and injection plastic moulded footwear. Men's and Boys' and children's and infants' leather and non-leather footwear have not been subject to import restraints since December 1, 1985.

   (a) Individual import permits are required for all shipments of the women's and girls' footwear products unless specifically exempt.

   (b) The following exceptions are allowed entry into Canada under open general licensing: personal effects and gifts totalling not more than six pairs; commercial samples not exceeding 100 pairs; footwear acquired by means of medical prescription; sisal footwear; disposable paper slippers; and footwear imported by and for performing arts organizations.

3. The systems apply to goods originating in and coming from all countries.

4. (a) Individual import licensing for footwear products is intended to restrict the quantity of imports in accordance with Canadian action under G.A.T.T. Article XIX, as a temporary measure to allow the Canadian footwear industry to improve its competitive ability and better meet international competition.

   However, import permits are granted freely on request for the following women's and girls' products which are under surveillance:

   Cowboy Boots - whose value for duty exceeds $50.00 (Cdn.)/pair;
   Orthopaedic Footwear (to be sold under medical prescription);
Highland Dancing Pumps and Jig Shoes;
Beach-type Sandals;
Womens' Footwear of size 10 1/2 (metric size 43) and over;
Footwear with steel toe caps;
Leather Shoes and Sandals with value for duty of at least $28.00 (Cdn)/pair;
Leather Boots with value for duty of at least $55 (Cdn)/pair

General Canadian Customs clearance is not yet fully computerized and, in view of the significant number of ports of entry, the surveillance required could not be achieved without the licensing system.

(b) Bilateral arrangements had been considered following the Canadian Import Tribunal conclusion of its inquiry in 1985, which established that imports of certain women's and girls' footwear into Canada were at such prices, in such quantities, and under such conditions as to cause or threaten serious injury to Canadian production of like or competitive goods. However, foreign government observations about such agreements made this alternative unrealizable, forcing Canada to impose global import constraints.

5. The action of placing footwear on the Import Control List is taken under the authority of paragraph 5(2)(b) of the Export and Import Permits Act.

PROCEDURES

NOTE:

6. For footwear products subject to quantitative restrictions under G.A.T.T. Article XIX, overall quantitative limits for the period December 1, 1986 to November 30, 1987 for all sources (with no individual country sub-limits) are established. Individual importers are informed of their entitlements which are based on activities and historical performance in the footwear market. Applications for single shipment permits are made against these entitlements. New importers submit requests for entitlements in order to be able to obtain the necessary import permits at the appropriate times.

7. (a) Information on quotas and formalities is published in the Canada Gazette, in press releases, and in Notices to Importers distributed to associations and
traders, and customs brokers and is also available from the Department of External Affairs. There are no allocations specific to any country. The overall quota amount is made public annually. However the amount allocated to each importer is treated as confidential information.

(b) Allocations to individual importers are made once a year for use at any time in the quota year (December 1 to November 30).

(c) Applications for quota entitlements are considered on an individual basis. The Special Trade Relations Bureau has records of the allocations by importer and of permits approved, but there is no means of ensuring that the import permits are actually utilized. Unused quotas are not added to quotas for a succeeding period. There is provision for extension of unused permits on a case-by-case basis at the end of a quota year when shipments may have been delayed. The names of licensed importers are made known to any party, upon request.

(d) Importers can apply for permits during all quota periods provided they still have unused allocations.

(e) Individual import permits are available at computer terminals across Canada. Processing time from application to permit print out can be as short as one minute or less and only rarely would require up to 25-30 minutes.

(f) Allocations against which permits are drawn are valid for a one-year period.

(g) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) Quota allocations per importer are attributed on their past performances in recent periods plus a percentage increase. In the women's and girls' sectors, a phase-out of controls is currently underway over a three-year period through increases in quota levels, of six, eight and ten percent.

(i) Not applicable.

(j) Not applicable.
(k) Permits could be issued on condition that goods should be exported and not sold in the domestic market.

8. (a) Import permits for goods subject to surveillance only can be applied for 30 days prior to the expected date of arrival or at any time after arrival.

(b) a permit is normally granted immediately upon request.

(c) None.

(d) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

9. All applications are judged against published criteria and are generally advised why their application was refused. In the event of refusal, no legislative right of appeal exists.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENSE

10. Canadian residents, firms and institutions are eligible to apply for licenses.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATIONS FOR LICENSE

11. A sample application form is attached. Since criteria may vary from year-to-year, information requirements differ. No supporting documents are required at the time of application.

12. Import permits and normal customs entry forms are required.

13. There are no licensing fees/administrative charges.

14. No deposits or advance payments are required.

CONDITIONS OF LICENSING

15. A license is valid from 5 days prior to the expected date of entry up to 24 days after that date. Licenses may be extended upon request to the Special Trade Relations Bureau.
16. No penalties exist.

17. Licenses are not transferable.

18. In the case of high-priced women's and girls' leather, the importer must demonstrate, by submitting Customs entry form B3 along with a permit, that declared value for duty was in excess of the minimum value.

OTHER PROCEDURAL REQUIREMENTS

19. Not applicable.
(4) DAIRY PRODUCTS

OUTLINE OF SYSTEM

1. Dairy products as listed in paragraph 2 are on the Import Control List established under the Export and Import Permits Act and subject to individual import licensing.

PURPOSE AND COVERAGE OF LICENSING

2. Dairy products on the Import Control List and subject to individual import licensing are: butter, butterfat in any form except any combination unsuitable as a butterfat ingredient; dry buttermilk, dry casein or caseinates; dry skimmed milk, animal feed containing more than 50 per cent of non-fat milk solids; dry whole milk dry whey, evaporated and condensed milk; cheese of all types and dry dairy blends. With the exception of dry casein which is subject to global surveillance, all the aforementioned products are subject to quantitative restrictions - namely a global quota on cheese, quotas allocated to traditional supplying countries on dry buttermilk and sweet condensed milk, and discretionary licensing which varies with domestic supply availability for all remaining products. Where imported for the personal use of the importer and his household and where the value of each importation does not exceed $20.00, all products are allowed entry into Canada under open general licensing.

3. The system applies to goods originating and coming from all countries.

4. Except for dry casein, the licensing is intended to restrict the quantity of imports in support of the domestic price stabilization programme to which milk is subject. For dry casein, the licensing is for surveillance purpose in order to provide information on the levels of imports from all sources. General Canadian customs clearance is not yet fully computerized and, in view of the significant number of ports of entry, the surveillance required could not be achieved without the licensing system.

PRODUCTS SUBJECT TO GLOBAL QUOTAS (APPLICABLE TO IMPORTS OF CHEESE, DRY BUTTERMILK AND SWEET CONDENSED MILK)

6.1 NOTE: The basic procedure is that a quantitative limit is established for a one year period. At the beginning of a quota year, individual importers are informed of their allocation (which is based upon import
performance in recent periods). Applications for single shipments are made against these allocations at any time during the 30 days preceding the expected date of arrival of the shipment or at any time after the arrival. In the case of cheese, unused share is set aside for new importers who submit requests for allocation in order to be able to obtain the necessary import permits at the appropriate time.

(a) Information on quotas and formalities is published in the Canada Gazette, in press releases and in importers notifications distributed to associations and traders and, in addition, available upon request from the Department of External Affairs.

- Not applicable.
- Through publication in the Canada Gazette and distribution of importers notices.
- The levels of the annual quotas are published.
- The amount allocated to each importer is treated as confidential information.

(b) See NOTE above.

(c) See NOTE above. Applications for allocation are considered on an individual basis without reference to whether or not the applicant is a producer of the like product.

- Permit utilization requires the return of a copy of the permit for monitoring purposes. Unused allocations are generally made available for redistribution in the subsequent year to new applicants or to importers requesting increases in their allocations.
- Unused allocations may not be carried over to succeeding quota years.
- List of traditional cheese importers is available upon request.

(d) See NOTE above.

(e) Import permits are available at numerous computer terminals across Canada with a turn-round time measured in seconds.
(f) See NOTE above.

(g) Permit applications are considered by one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) See NOTE above.

(i) Not applicable.

(j) Not applicable.

(k) Not applicable.

6.2 PRODUCTS SUBJECT TO DISCRETIONARY LICENSING
(Applicable to imports on butter, butterfat in any form except any combination unsuitable as a butterfat ingredient, caseinates, dry skimmed milk, animal feed containing more than 50 per cent of non-fat milk solids, dry whole milk, dry whey and evaporated and condensed milk other than sweet condensed milk, and dry dairy blends).

NOTE: Under the discretionary licensing that applies to the forementioned products, import authorization is granted if and when shortages are identified in the domestic market. Accordingly, there are no fixed quantitiative limits as to the import volumes and values allowed into the country. At any given time, importers apply for single shipment import permits. These permits have a validity period of 30 days.

(a) Information pertaining to the formalities of filing applications is published in importers notifications.

- Not applicable.

- Through distribution of importers notifications.

- Not applicable.

- Not applicable.

- The amount allocated to each importer is treated as confidential information.

(b) See NOTE above.
(c) See NOTE above. Applications for allocations are considered on an individual basis without reference to whether or not the applicant is a producer of the like product.

- Not applicable.
- Not applicable.
- Names of importers to whom permits have been given are made known to governments and export promotion bodies of exporting countries upon request.
- Information on individual importers allocations is deemed under the Export and Import Permits Act to be confidential and can be revealed only to those legally entitled thereto under the Act.

(d) Not applicable.

(e) Import permits are available immediately at numerous computer terminals across Canada for all permits issued automatically. However, for products subject to discretionary licensing, each application is authorized individually usually with a turn-round time of one or two days.

(f) Not applicable.

(g) Under discretionary licensing, permit applications are considered by the issuing organization, the Special Trade Relations Bureau, in consultation with the Canadian Dairy Commission and the Agriculture, Fisheries and Food Products Branch of the Department of Regional and Industrial Expansion (D.R.I.E.).

- The importer must approach only one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) See NOTE above.

(i) Not applicable.

(j) Not applicable.

(k) Not applicable.
PRODUCT SUBJECT TO GLOBAL IMPORT SURVEILLANCE (CASEIN)

7. (a) An application may be made at any time during the 30 days preceding the arrival of a shipment in Canada or at any time after the arrival.

(b) A permit is normally granted immediately upon request.

(c) Not applicable.

(d) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

11. Import permits and customs entry forms are required as well as food certificates as required under the Canadian Dairy Products Act and Regulations.

OTHER PROCEDURAL REQUIREMENTS

18. Importation is subject to health/food inspection and normal requirements of Customs regulations.
(5) TURKEY, EGGS AND CHICKEN

OUTLINE OF SYSTEM

1. Turkey, eggs and egg products and chicken are on the Import Control List established under the Export and Import Permits Act. As such, these products are subject to either individual import licensing or open general licensing.

PURPOSE AND COVERAGE OR LICENSING

2. Imports of "chicken and chicken capons, live or eviscerated, chicken parts, whether breaded or battered, and chicken products manufactured wholly thereof, whether breaded or battered", "turkeys, turkey parts and products manufactured wholly thereof" and "eggs and egg products" are subject to global import quotas. For all three products, individual import permits are required for each shipment covered by the aforementioned descriptions. Exceptions are however provided for (a) chicken not exceeding in net weight per non-commercial importation, or for baby chickens or chicken contained in a jar or can, (b) turkeys not exceeding one or turkey parts not exceeding 10 kg for each non-commercial importation, turkey poults and turkey contained in jars or cans and (c) non-commercial importation of eggs where the amount does not exceed 2 dozen eggs per importation, hatching eggs for direct use by registered hatching operations and eggs encased in mud or other material which preserves their quality for speciality food. These exceptions are under open general licensing.

3. The system applies to goods originating in and coming from all countries.

4. The licensing is being used to implement the import quotas on chicken, turkey and eggs in support of the supply management programmes to which these products are subject.

PROCEDURES

6. NOTE: The basic procedure that applies to imports of chicken, turkeys, shell eggs and egg products is that a quantitative limit for all sources is established yearly. Individual quota holders are informed of their allocations which are based upon import performance in recent periods. New importers may submit requests for allocations with a view to obtaining import permits at a later date. In the case of turkeys,
individual allocations may be utilized at any time during the quota year. However for chicken and egg products individual allocations are distributed on a quarterly basis while shell eggs are distributed on a monthly basis at a volume ratio in keeping with traditional demand. Applications for single shipment permits are made against these allocations at any time during the 30 days preceding the expected date of arrival of the shipment. Depending upon domestic supply availability, import permits may also be obtained to supplement the basic quota.

(a) Information on quotas and formalities is published in the Canada Gazette, in press releases and in importers notifications distributed to custom brokers, associations and traders; and, in addition, available upon request from the Department of External Affairs.

- Not applicable.

- Through publication in the Canada Gazette and distribution of importers notices.

  - Overall amounts are published.

  - The amount allocated to each importer is treated as confidential information.

(b) See NOTE above.

(c) See NOTE above. Applications for allocation are considered on an individual basis without reference to whether or not the applicant is a producer of the like product.

- Not applicable.

- Allocations may not be carried over from one quota year to the next. However in the case of chicken, quarterly allocations may be carried over to the succeeding quarters. For egg products, unused individual quarterly allocations become available to all importers on a first come first served basis in the following quarter, of each year. For shell eggs unused individual monthly allocations may not be carried over to succeeding periods.

  - Names of importers to whom allocations and permits have been given are made known to any party, upon request.

(d) See NOTE above.
(e) Import permits are available immediately at numerous computer terminals across Canada, provided that the applicant has unused allocation.

(f) See NOTE above.

(g) Permit applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

(h) See NOTE above.

(i) Not applicable.

(j) Not applicable.

(k) In certain cases permits may be issued to allow applicants to bid competitively on export contracts.

7. Not applicable.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATIONS OR LICENCE

11. Import permits and normal customs entry forms are required in addition to health certificates as required under the Canada Agriculture Products Standards Act.

OTHER PROCEDURAL REQUIREMENTS

18. Importation is subject to health/food inspection and normal requirements of Customs regulations and the Department of Agriculture and may be subject to the Consumer Packaging and Labeling Act.
(6) COFFEE

OUTLINE OF SYSTEM

1. Coffee is on the Import Control List, established under the Export and Import Permits Act and is subject to individual open general licensing in paragraph 2 below.

PURPOSES AND COVERAGE OF LICENSING

2. Pursuant to Canada's undertakings under the International Coffee Organization, the following products are subject to individual import licensing:

"Coffee, in any form including parchment, green, roasted, ground, decaffeinated, liquid and soluble."

The following exceptions for each product may however be imported under open general licensing:

- coffee: samples and parcels up to a limit per importation of (a) 60 kilograms net of green coffee; or (b) 50 kilograms net of roasted coffee; or (c) 23 kilograms net of soluble or liquid coffee.

3. The system applies to coffee originating in and imported from all countries.

4. Pursuant to Canada's undertakings under the International Coffee Organization, the licensing is not intended to restrict the quantity of value of imports, it is intended to monitor the volume and the origin of coffee imports.

PROCEDURES

5. Not applicable.

6. Individual import licences are required for each shipment of coffee entering Canada. Applications for licences may be made at any time during the 30 days preceding the date of arrival of a shipment or at any time after the arrival. Under the current ICA rules in effect, the ICO certificate, if it accompanies the shipment, must be forwarded to the Special Trade Relations Bureau, Department of External Affairs, within 10 days following customs clearance of the shipment.
(a) See above.

(b) A licence is normally granted immediately upon proper application in accordance with the Act.

(c) See above.

(d) Licence applications are considered by only one organization, the Special Trade Relations Bureau, Department of External Affairs.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATIONS OF LICENCE

7. The import licence as well as the valid ICO certificate Form 0, are the only documents required under the present rules outlined in the ICA that cover suspension of quota. The Form 0 is only required if importers are importing coffee directly from a coffee producing member of the ICO.

OTHER PROCEDURAL REQUIREMENTS

8. Importation is subject to the requirements of the Food and Drugs Act as well as normal Customs regulations.
(7) ENDANGERED SPECIES

OUTLINE OF SYSTEM

1. By virtue of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, of which Canada is a member, specimens of such species and their by-products are listed on the Import Control List established under the Export and Import Permit Act and subject to licensing.

PURPOSES AND COVERAGE OF LICENSING

2. The purpose of this coverage is:

(a) to place a particularly strict limitation on trade in specimens and by-products of species considered as endangered;

(b) to establish a system of monitoring on specimens and by-products susceptible to becoming endangered through the mechanism of back-to-back licensing;

(c) to allow individual countries to exercise surveillance on importation in other countries specimens and by-products of species which are considered endangered by the exporting country only.

3. The system applies to endangered species originating in and coming from all countries.

4. The purpose of the licensing system is to allow importation in endangered species and their by-products in internationally agreed circumstances.

- Licensing is effected by regulations under the Export and Import Permits Act.

- Individual products are not designated in the Act.

- Endangered species were placed on the Import Control List, established by the Governor in Council to implement an intergovernmental arrangement or commitment.

- See General Responses.

- Endangered species are subject to open general licensing by the Secretary of State for External Affairs.

- See General Responses.
PROCEDURES

6. (a) Information as to the formalities for complying with the requirements of this control is published in the Canada Gazette, in press releases and in importers notifications distributed to associations and traders and, in addition, available upon request from the Department of External Affairs.

   - Not applicable.
   - Not applicable.
   - Not applicable.

   Parts (b), (d), (e), (f), (g), (h), (i), (j), and (k) are not applicable.

7. (a) Individual import permits can be applied for 30 days prior to the expected date of arrival or at any time after arrival.

   (b) An individual import permit is normally granted immediately upon request, provided the criteria for issuing a permit are met.

   (c) Not applicable.

   - Not applicable.

   (d) Permit applications are processed by three administrative organizations.

8. If criteria have not been met applicant will be informed, in such event applicant may request reconsideration by the Secretary of State for External Affairs.

9. Any resident of Canada may apply for a permit. Citizenship is not a criterion.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. The importer is required to provide all the information requested by regulations depending on the type of species he intends to import (e.g. an export permit, a re-export permit or certificate issued by the exporting state, and an import permit issued by the Canadian Wildlife Service of the Department of the Environment).
11. Documents as in 10 and the customs entry forms are required.
   - There is no permit fee.
   - Not applicable.

13. There is no advance payment associated with the issue of permits.
   - Not applicable.

CONDITIONS OF LICENSING

Questions 14-17 are not applicable.

OTHER PROCEDURAL REQUIREMENTS

18. Importation is subject to requirements of customs regulations.

19. Not applicable.
(8) CARBON STEEL

OUTLINE OF SYSTEM

1. Carbon steel is on the Import Control List (ICL) established under the Export and Import Permits Act (EIPA) and is subject to individual and open general licensing.

PURPOSES AND COVERAGE OF LICENCING

2. Carbon steel products were placed on the ICL under the authority of subsection 5(3) of the EIPA with effect September 1, 1986, for the purpose of monitoring their entry into Canada. This action was taken as a result of a reference to the Canadian Import Tribunal (CIT) pursuant to section 48 of the Special Import Measures Act. In their report to the Minister for International Trade, the Tribunal concluded that carbon steel products are being and are likely to be imported into Canada at such prices, in such quantities and under such conditions as to make it advisable to collect information with respect to the importation of such goods. Carbon steel products are defined as semi-finished steel (ingots, blooms, billets, slabs and sheet bars), plate, sheet and strip, wire rods, wire and wire products, railway-type products, bars structural shapes and units and pipe and tube.

3. The monitoring system applies to carbon steel imports from all countries.

4. The licencing is not intended to restrict the quantity or value of imports, it is intended to monitor the volume and the origin of carbon steel products.

5. The action of placing carbon steel on the ICL is under the authority of section 5(3) of the EIPA. Amendments to the ICL may be made by Order in Council in accordance with the Act.

PROCEDURES

6. Not applicable.

7. Individual import licences are required for each shipment of carbon steel as described in paragraph (2) above. Applications for licences may be made up to 30 days in advance of the expected date of arrival of the shipment in Canada, or at any time after its arrival. Licences will be granted immediately upon proper application in accordance with the Act. There are no
limitations as to the period of the year during which applications for licences and/or importation may be made. Licence applications are considered by only one organization, the Special Trade Relations Bureau (STRB), Department of External Affairs.

The following exceptions for any carbon steel product may be imported under general licencing:

(i) where the total value for duty of the goods, as determined under the Customs Act, is not more than $5,000;

(ii) where those goods are imported by the nine major automotive companies under the 1965 Canada/U.S. Automotive Products Trade Agreement (The Auto Pact). These companies are required to report their imports of carbon steel products monthly.

8. See section 7.

ELIGIBILITY OF IMPORTERS TO APPLY FOR LICENCES

9. All persons, firms and institutions are eligible to apply for licences.

DOCUMENTATIONAL AND OTHER REQUIREMENTS FOR APPLICATION OF LICENCE

10. Nil

11. Documents required upon actual importation:
   i) import licence
   ii) documents in accordance with the Customs Act.

12. Licences are available from STRB free of charge. Customs brokers may charge a fee for their services.

13. Nil

CONDITIONS OF LICENCING

14. Licences are issued with a maximum validity of 30 days, i.e. 5 days prior to anticipated arrival date specified by importers and 25 days thereafter.

15. In cases where a shipment has been cancelled and the import licence unused, importers are required to promptly return all copies of the licence to STRB for cancellation.
16. Licences are not transferable between importers.
17. Nil
18. Nil
19. Not applicable.

ANNEX I

Copies of application forms for import and in-transit licences for oats, barley and their products are attached.

For import licences, four examples must be filed:

- Copy No. 1 (Departmental Copy)
- Copy No. 2 (Licence Holder's File Copy)
- Copy No. 3 (for importer's use, to be presented to customs at port of validation)
- Copy No. 4 (for Canada Customs use).

An additional copy for the Canadian Wheat Board must be filed in the case of in-transit licence applications.
APPLICATION FOR IMPORT LICENCE, OATS AND/OR BARLEY AND THEIR PRODUCTS — Pursuant to the Canadian Wheat Board Act and Regulations.

DEMANDE DE LICENCE D'IMPORTATION D'AVOINE, D'ORGE ET LEURS PRODUITS — Conformément à la loi sur la Commission canadienne du Blé et aux règlements qui s'y rapportent.

IMPORTANT NOTE: PLEASE READ CAREFULLY THE TERMS & CONDITIONS ON THE REVERSE BEFORE COMPLETING THIS APPLICATION.

NOTE IMPORTANTE: VEUILLEZ LIRE ATTENTIVEMENT LES CONDITIONS IMPRIMÉES AU VERSO AVANT DE REMPLIR LA PRÉSENTE DEMANDE.

State the specific purpose for which the goods are required and any efforts made in securing domestic sources of supply.

Spécifier la raison précise pour laquelle ces denrées sont requises et quels efforts ont été faits pour trouver des produits canadiens.

The undersigned hereby certifies that all information given in this application is true and correct.

Le soussigné certifie par les présentes que tous les renseignements donnés dans cette demande sont sincères et véritables.

WARNING: This licence in no way relieves the holder from responsibility for complying with the requirements of any other act or regulations respecting the importation of the commodities referred to herein.

ATTENTION: La présente licence ne dégage en aucune façon le titulaire de l'obligation de se soumettre aux prescriptions de toute autre loi ou réglement concernant l'importation des denrées faisant l'objet de la présente demande.

FOR EXTERNAL AFFAIRS USE ONLY / RÉSERVE À L'USAGE DES AFFAIRES EXTÉRIEURES

for the Secretary of State for External Affairs / pour le secrétaire d'État aux Affaires extérieures
NOTE: It is an offence to import Oats, Barley or their products without an import licence

Terms and Conditions for Import Licence Application:

1. Import licences are granted only to applicants/importers who are permanent residents or citizens of Canada.

2. S 14(2)
The Secretary of State for External Affairs may grant licences for the import into Canada of oats, oat products, barley or barley products when alternative supplies sufficient to meet the needs of users are not generally available and upon condition that the applicant pays to the Receiver General for Canada a sum of money that, in the opinion of the Board represents the pecuniary benefit accruing to the applicant pursuant to the granting of the licence arising solely by reason of the prohibition of imports of those grain and grain products without a licence and existing differences between prices of the grain and grain products inside and outside Canada.

3. For the importation of unlicenced spring varieties of barley, permission must first be obtained from the Plant Products Division of Agriculture Canada, Ottawa, before an import licence will be issued by External Affairs. All seed imports are subject to the seed meeting requirements of the Seeds Act.

4. When applying for an Import Licence, the reason for importing the grain or its product must be given. The applicant should furnish any information which would be useful in deciding whether or not the licence should be issued. This information would include where you have tried to obtain a similar product in Canada and the specifications required for the product.

5. Unsigned applications or applications which omit essential information will be returned for signature and/or completion.

6. A separate application must be submitted for each port of entry.

7. Please note that each shipment requires a separate import licence.

NOTE: Toute importation d'avoine, d'orge ou de produits à base de ces céréales sans licence d'importation est contraire à la loi.

Demande de licence d'importation — Conditions générales:

1. Seuls les ressortissants ou les citoyens du Canada se verront accorder une licence d'importation à titre de demandeurs/importateurs.

2. L'article 14(2)
Le secrétaire d'État aux Affaires extérieures peut octroyer des licences pour l'importation au Canada d'avoine, de produits de l'avoine, d'orge ou de produits de l'orge quand il n'existe pas, de façon générale, suffisamment de stocks de remplacement pour satisfaire les besoins des utilisateurs à condition que le requérant verse au receveur général du Canada une somme qui, de l'avis de la Commission, représente l'avantage pécuniaire acquis au requérant par suite de l'octroi de la licence, résultant uniquement de l'interdiction d'importer ce grain ou ces produits de grain sans licence et des différences alors existantes entre les prix du grain et des produits du grain à l'intérieur et à l'extérieur du Canada.

3. Lorsque la demande d'importation porte sur des variétés de printemps d'orge qui ne sont pas homologuées au Canada, il faut obtenir au préalable la permission de la division des produits végétaux d'Agriculture Canada à Ottawa, avant que les Affaires extérieures n'accorde la dite licence d'importation. Dans le cas des importations de semence, les graines importées doivent correspondre aux définitions, données par la loi sur les semences.

4. La raison de l'importation du grain ou des produits à base dudit grain doit être précisée dans la demande. Le demandeur se doit de fournir tout renseignement qui se révélerait utile quant à la décision d'accorder ou de refuser la licence; par exemple, si le demandeur a essayé d'obtenir un produit semblable au Canada et les spécifications du produit.

5. Toute demande incomplète, ou non signée, sera renvoyée au demandeur pour supplément d'information ou signature.

6. Lorsque l'importation se fait par plusieurs ports d'entrée, le demandeur doit remplir une demande par port.

7. S.V.P. Veuillez noter que chaque importation demande une licence individuelle.
APPLICATION FOR IN-TRANSIT LICENCE FOR OATS AND/OR BARLEY AND THEIR PRODUCTS ENTERING CANADA

Pursuant to the Canadian Wheat Board Act and Regulations

IMPORTANT NOTE: PLEASE READ CAREFULLY THE TERMS & CONDITIONS ON THE REVERSE BEFORE COMPLETING THIS APPLICATION

I, the applicant, hereby apply for an in-transit licence

Name, Address, Tel. No. / Nom, adresse et numéro de tél.

Date of Application / Date de la demande

Owner of product(s) / Propriétaire des marchandises

Foreign port of loading / Port d'embarquement à l'étranger

Name of vessel entering Canada / Nom du navire entrant au Canada

Name of elevator where in-transit product to be stored / Nom du silo d'entreposage au Canada

Date in-transit product expected to enter Canada / Date approximative d'arrivée au Canada

Approximate duration of storage in Canada / Durée approximative de l'entreposage au Canada

Name of ocean vessel and estimated time of arrival for loading the in-transit goods in Canada for export / Nom et date approximative d'arrivée du bateau devant enlever les marchandises

Date when in-transit goods are to be exported from Canada / Date approximative de sortie des marchandises du Canada

Date the specific purpose for which the goods are required - not to be entered into Canadian market - for storage and re-export only / Précisez le but auquel sont destinées les marchandises - non écoulables sur le marché canadien - à des fins d'entreposage et de réexportation uniquement

The undersigned hereby certifies that all information given in this application is true and correct / Le soussigné certifie que ces renseignements sont exacts

Signature

WARNING: This licence in no way relieves the holder from responsibility for complying with the requirements of any other act or regulations respecting the importation of the commodities referred to herein, except to allow entry into Canada for storage and re-export as above stated / AVIS : Cette licence ne dégage en aucune façon de l'obligation de se soumettre aux prescriptions de toute autre loi ou règlement canadien concernant l'importation des marchandises faisant l'objet de la présente sauf pour en permettre l'entrée au Canada à des fins d'entreposage et de réexportation tel qu'indiqué ci-dessus.

FOR EXTERNAL AFFAIRS USE ONLY / RÉSERVÉ À L'USAGE DES AFFAIRES EXTERIEURES

LICENCE

1) The import of the designated product described above is permitted for storage and re-export only, subject to all the terms and conditions described herein and in accordance with The Canadian Wheat Board Act & Regulations & Board Orders made thereunder.

2) This licence is valid only for the use of the applicant.

For the Secretary of State for External Affairs / pour le secrétaire d'État aux Affaires étrangères
NOTE: It is an offence to transport through Canada Oats, Barley or their products without a Special Trade Relations Bureau in-transit licence.

Terms and Conditions for In-Transit Licence Application:
1. In-transit licences are granted only to applicants/importers who are permanent residents or citizens of Canada.

2. Unsigned applications or applications which omit essential information will be returned for signature and/or completion.

3. A separate application must be submitted for each port of entry.

4. It is the responsibility of the applicant to comply with any other laws of Canada for such imports.

5. Please note that in-transit shipment under this licence must not be considered to represent an export from Canada as defined under Part 1 of the Export & Import Permits Act regulations respecting transhipment.

NOTE : Tout transport d’avoine, d’orge ou de produits à base de ces céréales au Canada sans permis de transit de la Direction générale des relations commerciales spéciales est contraire à la loi.

Demande de permis de transit – Conditions générales :
1. Seuls les ressortissants ou les citoyens du Canada se verront accorder un permis de transit à titre de demandeurs/importateurs.

2. Toute demande non signée ou omettant des renseignements importants sera retournée au demandeur pour signature ou complément d’information.

3. Chaque port d’entrée fera l’objet d’une demande particulière.

4. Le demandeur a la responsabilité de voir à ce que sa demande soit bien conforme aux autres lois canadiennes agissant les denrées importées.

5. Veuillez noter que les denrées en transit en vertu du présent permis ne doivent en aucun cas être prises en considération au titre des exportations canadiennes telles que définies à l’article 1 des règlements de la loi sur les permis d’importation et d’exportation quant au transbordement.
