NOTIFICATION IN PURSUANCE OF PARAGRAPH 3 OF THE
UNDERSTANDING REGARDING NOTIFICATION,
CONSULTATION, DISPUTE SETTLEMENT
AND SURVEILLANCE

Communication from Canada

The following communication, dated 2 October 1986, has been received from the Permanent Mission of Canada.

Following inquiry by the Canadian Import Tribunal (document L/6001 of 4 June 1986 refers), the Government of Canada has introduced an import monitoring system for carbon steel products effective 1 September 1986 pursuant to the recommendations of the Canadian Import Tribunal. Carbon steel has been placed on the import control list pursuant to Section 5(3) of the Export and Import Permits Act in order to facilitate the collection of information with respect to the importation of such goods. Import permits will be issued automatically upon proper application in accordance with the Act and are available through a Canada-wide on line computerized customs broker system. This action does not establish quantitative controls on steel imports.
