Modification of Concession on Item No. 763 - Alsike Clover Seed -
under the Provisions of Article XIX

Contracting parties were informed (GATT/AIR/47 (SECRET) of 1 June 1954) of the possibility that, pursuant to recommendations of the Tariff Commission, the President of the United States might decide to modify the concession in Schedule XX - Part I, item 763 - Alsike Clover Seed. In view of that possibility, the United States Government offered to consult any interested contracting party.

On 30 June 1954 the President issued a proclamation giving partial effect to such recommendations. The Proclamation makes the following modifications in the concession:

1. the existing rate of duty of 2¢ per lb. will continue to apply to any quantity of imports up to 1,500,000 lbs. during the twelve-month period beginning 1 July 1954;

2. a new rate of 6 cents per lb. will apply to any quantity in excess of that amount entered during such period.
