PRESENTATION OF GATT AUDIO-VISUAL MATERIAL

In the past few months the Secretariat has completed the development of a film and a colour-slide/overhead-projection presentation on the GATT and the Uruguay Round. The objective has been to produce material for public education purposes, for presentations to the business sector and for technical cooperation activity. Both products have been prepared in English, French and Spanish versions. The film is of TV broadcast quality but will also be available on VHS format to PAL, SECAM and NTSC standards.

These items will be marketed alongside traditional GATT publications. They will also be available to delegations, at reduced prices. In order that delegates can familiarize themselves with the material, a presentation, lasting about one hour, will be made in Room D at 15.00 on Monday 10 May. You are cordially invited to attend.

For further information, please contact David Woods (739 5015) or Liliane Rastello (739 5186) in the Information and Media Relations Division.

You are kindly requested to inform the Information and Media Relations Division (739 5007) if you are able to attend the presentation.
