As will be recalled, the Working Party on Border Tax Adjustments decided that a consolidated document on border tax adjustment practices, based on Spec(69)49 and the additional information and corrections received from member countries, should be prepared by the secretariat. Enclosed, herewith, you will find the sections of this revised edition concerning your country or organization. The secretariat would be grateful if you could check these sections for their accuracy and, if necessary, bring them up to date. It would be appreciated if your observations could be received before the meeting of the Working Party in March.

In view of the considerable interest this information has for the general public, the secretariat proposes that the derestriction of the consolidated document be discussed at the next meeting of the Working Party.
