PROBLEMS OF INTERNATIONAL TRADE IN FORESTRY PRODUCTS

Background Note Submitted by Canada

Corrigendum

By letter dated 9 October, the delegation of Canada notified, with a request for a correction to be circulated, that - in the light of comments made by the delegate of Finland at the meeting of the Working Party on 16 September¹ - the Canadian authorities had reviewed the data on State aid to trades and industries referred to in paragraph 36 of document MDF/W/49. This review did, in fact, show that there existed a misprint, namely showing such aid to have amounted in 1984 to US$ 9 billion, instead of FIM 9 billion ("or approximately USA$ 2 billion").
