At their 10th meeting this afternoon the Contracting Parties set up a working party to examine the taxes imposed by Brazil on products of foreign origin. The members of the working party are: Brazil, China, Cuba, France, India, United Kingdom and United States.

The Contracting Parties then discussed various arrangements necessary for bringing the results of the Annecy tariff negotiations into line with the 1947 Geneva concessions now incorporated in the GATT, and other problems concerning the initial period of duration of the tariff concessions to be negotiated at Annecy.

In order to allow the tariff negotiations to get under way there will be no meeting of the Contracting Parties until — probably — next week.
