GENERAL AGREEMENT ON TARIFFS AND TRADE  
Third Session of the Contracting Parties

COPYRIGHT PUBLISHED TODAY

Copies of "The Attack on Trade Barriers" are available in the press room today. Geneva correspondents filing stories may be assured that there will be no distribution outside Geneva for several days.

The Attack on Trade Barriers is the first full account of the work achieved to date through the operation of the General Agreement. The first four sections of the Report describe the work of the Contracting Parties at their three Sessions, the two sets of tariff negotiations, and the way in which the Agreement has been developed pending the creation of the International Trade Organization.

The final section of the Report deals with future prospects for the Agreement, its potentialities and limitations, and the need for establishing ITO as quickly as possible.

A French edition of The Attack on Trade Barriers will be published in September.
