Dear Sir,

I wish to refer to document W.13/1 which contains notes on the import restrictions applied by various contracting parties for balance-of-payments reasons. At the meeting on Monday, 20 October, the Chairman of the CONTRACTING PARTIES called attention to the request made in that document that the contracting parties concerned examine the notes relating to their respective countries and notify any modifications or corrections to the secretariat as early as possible.

In many cases the notes are not complete, and supplementary statistical or other information is needed under certain headings. In case a note is found satisfactory and requires no modification, a confirmation to that effect by the delegation concerned will also be necessary.

It would be greatly appreciated if this matter could be given early attention in your delegation. In order that a revised document may be circulated well before the end of the Session, we are anxiously awaiting the necessary material from your delegation.

Yours faithfully,

C. Shih
Chief, Quantitative Restrictions Section
