1. The Jamaican delegation has suggested that the following additional paragraph appear as the third paragraph of the preamble.

"Having noted also that the Government of Australia, whilst stating that it relies on the tariff as a significant aid for further diversification of its economy, has been according preferential duties for many years to certain developed countries at rates, in several instances, lower than those now proposed for the developing countries; and that this suggests that the Australian economy is already in a position to compete with the developing countries even when the latter have reached a stage of development that enables them to compete in the Australian market with like goods produced in those industrialized countries now receiving preferences."

2. The Swedish delegation has suggested replacing the first two paragraphs on page 2 of document Spec(65)136 by the following:

"Noting that the basic objectives of the General Agreement on Tariffs and Trade include the raising of the standards of living and the progressive development of the economies of all contracting parties and noting that the attainment of these objectives is particularly urgent for less-developed contracting parties,"

"Noting furthermore, that the proposed action is designed by the Government of Australia with a view to facilitating the attainment of these objectives by creating additional trade opportunities for all developing countries with a view to accelerating their economic development, and that this initiative would provide some evidence of the effect of such action in facilitating these objectives."

3. The Swedish delegation has also suggested that the first paragraph on page 3 of document Spec(65)136 be deleted and that the last paragraph on page 2 should read as follows:

"Having considered that in the view of the Government of Australia the proposed action is not intended by the Government of Australia to impede the reduction of tariffs on a most-favoured-nation basis,"
