"Mr. LERENA (Argentina) said that Argentina had met with the United States and expressed concern over the maintenance of these restrictions and the associated problem of surpluses. The concern which Argentina had expressed was connected with paragraphs 3, 4, 8, 9 and 15 of the Working Party's report. He insisted on the necessity of the rapid removal of all the existing restrictions and reiterated the concern of Argentina as regards the consequences of disposal operations of agricultural surpluses. He welcomed the recent action by the United States on its cheese quota, but agreed with the representatives of Australia and New Zealand that these restrictions should be removed or at least all exporters of the product concerned should be treated equally."
