ARRANGEMENT REGARDING INTERNATIONAL TRADE IN TEXTILES

Notification under Articles 8:3

Bilateral agreement between Canada and South Africa

Note by the Chairman

Attached is a notification received from Canada of a bilateral agreement concluded with the South Africa for the period 1 January 1989 to 31 December 1991. This agreement replaces unilateral restraints which were imposed effective 1 January 1988.¹

¹The communication on the unilateral measures is contained in COM.TEX/SB/1368.

*English only/Anglais seulement/Inglés solamente
Dear Ambassador Raffaelli:

Pursuant to Article 8:3 of the Arrangement Regarding International Trade in Textiles (hereinafter referred to as the MFA) done at Geneva on December 20, 1973, and to the Protocol extending the MFA done at Geneva on July 31, 1986, I have the honour to notify you of a restraint arrangement embodied in an exchange of letters between the Government of Canada and the Government of the Republic of South Africa, regarding certain textiles and textile products for import into Canada (see attached). This bilateral textile arrangement becomes effective January 1, 1989 and is in effect until December 31, 1991. This replaces a unilateral restraint which was imposed effective January 1, 1988, and communicated to you in our notification dated December 30, 1987.

The arrangement covers textiles and clothing products which fall within the scope of the MFA and takes into account Canada’s equity commitments under the MFA and under several bilateral arrangements pursuant to the MFA, as well as the position of the Republic of South Africa as an established supplier to that market.
The bilateral restraint arrangement covers the categories included in the previous unilateral action, i.e. trousers, blouses, tailored-collared shirts, other apparel, and worsted fabric. Under the unilateral restraint, primary consideration was given to restraint levels already in place for textile suppliers to the Canadian market. Under the current bilateral arrangement, the restraint levels have been modified to also take into account the average level of South African exports to Canada during the three years prior to the imposition of the unilateral restraint.

The arrangement provides for annual growth of six percent for apparel categories and three percent for worsted fabric. The arrangement also provides for flexibility in that any under-utilization of the sub-limits in the categories for trousers, blouses, and tailored-collared shirts may be transferred to the category for other apparel (i.e. category d).

The Government of Canada believes this agreement conforms with the provisions of the MFA and its Protocol of Extension and, as such, is in keeping with the gradual liberalization of the Canadian import program on clothing and textiles.

Yours sincerely,

John Gero
Counsellor
