At its meeting on 3-4 March the Group on Anti-Dumping Policies discussed the draft anti-dumping checklist circulated in document TN.64/NTB/W/5. During the discussion this draft was revised by the Group and it was agreed that governments should be invited to make every effort to submit in writing their specific and detailed views on the items on the attached checklist. Some delegations questioned the necessity of including some of the items and it was understood that some governments might not submit views on certain items.

It was agreed that views on items VI, VII and VIII should be in the hands of the secretariat by 15 April 1966 and on the remaining items by 1 June.

It was agreed that the Group should meet early in May to discuss the replies which would be submitted by 15 April, the exact date to be set by the Chairman after consultation with delegations.

It was understood that the checklist and the replies would be distributed to all members of the Sub-Committee on Non-Tariff Barriers and to observers in the Group on Anti-Dumping Policies.

ANTI-DUMPING CHECKLIST

I. Concept of dumping

A. Price discrimination criteria:

Determination of margin of dumping: price comparison taking into account conditions of sale and other factors considered relevant.
