WORKING PARTY 2 ON ARTICLE XVIII

Paragraph proposed by Mr. Evans for inclusion in the Report on Ceylon Application

It was further decided, in agreement with the representative of Ceylon, that the recommendation regarding releases on individual products should be subject to the following conditions:

1. Regulations on imports would be limited to products comparable in type and quality to the domestic product being protected.

2. The maximum quantity of domestic availability that would be used in the calculation of a standard ratio should in each case be stated as a condition of the release.

3. The release would apply only to restrictions on imports based on the application of such standard ratio in accordance with the provisions of the Industrial Products Act.
