*** Injury price level considered

*The symbol '19' should be used if an investigation is opened in the context of a review of an existing anti-dumping measure or after an allegation of a breach of an undertaking.
**Trade volume based on statistical data for the latest available calendar year prior to initiation.

*Symbol '19' should be used if:
- Dumped imports as % of domestic consumption
- Price undertakings

Notes:
- List in annex '1' all definitive duties and price undertakings in force on 30 June or 31 December as appropriate, and in annex '2' revocations of anti-dumping measures.
INITIATION OF AN ANTIDUMPING PROCEDURE

The Finnish producer of ski boots has made an application in February 1987 to initiate an anti-dumping investigation concerning ski boots of the type "Nordic norm 75 mm" with uppers of leather or with imitation leather or textile material imported from Czechoslovakia.

The Ministry of Finance has established that the number of domestic producers has decreased from four to one. In 1986-87 the turnover of the latter has diminished to one third of its level in 1983-84 and production volume has diminished by approximately 70 per cent. Investments had decreased to one tenth of their average level in 1983-85. The import price of Czechoslovakian ski boots has been lower than the raw material and wage costs of the domestic producer. Imports have increased by 110 per cent in 1984-85 and the sales of the domestic producer have decreased by 45 per cent. His market share has diminished to 20 per cent from the 50 per cent in 1983-84.

Imports of ski boots have also increased from Italy during the period 1985-86. The domestic producer has not considered these imports to be injurious because the ski boots imported from Italy are of another type than those made in Finland.

Although the demand for ski boots made in Finland is likely to decrease in the long term, the domestic producer has presented sufficient evidence that his short term problems are due to low price imports of ski boots from Czechoslovakia.

On the basis of these factors the Ministry of Finance has initiated on 7th May 1987 an anti-dumping investigation
concerning "Nordic norm 75 mm" ski boots imported from Czechoslovakia.

Because Czechoslovakia is a country described in notes and supplementary provisions to the General Agreement, the reference country method referred to in Article 15 of the Code on Subsidies and Countervailing Duties should be used in the investigation. The applicant has suggested that Norway, which has a representative manufacture of similar ski boots, be used as reference country.
INITIATION OF AN ANTI-DUMPING INVESTIGATION CONCERNING ELECTRICITY METERS FROM AUSTRIA

The domestic producer of electricity meters has lodged a complaint with the Ministry of Finance concerning dumping of three phase and three phase, double rate electricity meters imported from Austria.

Preliminary evidence indicates that the export price of these meters undercuts their sales price in Austria by 45-54 per cent concerning three phase meters and by 46-53 per cent concerning double rate meters. That evidence also indicates that the import price of the meters undercuts the sales prices of the domestic producer by 43-45 per cent.

During the time the price competition has prevailed the sales volume of domestic meters has decreased by 17 per cent. Domestic production is unprofitable and the staff of the branch has been reduced by 13 per cent. Almost 40 per cent of the staff employed has made four day working weeks for some time in 1986.

Because sufficient evidence of dumping and of material injury to the domestic producer has been presented the Ministry of Finance has decided, on 12th June 1987, to initiate an anti-dumping procedure concerning the electricity meters.
TERMINATION OF AN ANTI-DUMPING INVESTIGATION

On 9th January and on 24th March 1987 the Ministry of Finance initiated anti-dumping investigations concerning fibreboards (insulation board and hardboard) imported from Poland. The exporter was Paged Foreign Trade Enterprise.

On 30th March and 6th April 1987 provisional measures were applied in the form of a bank guarantee for the payment of possible anti-dumping duties.

In the investigation it appeared that the cif-import prices undercut the normal value, which was calculated according to the reference country principle in Article 15 of the Code on Subsidies and Countervailing Duties, by 42-51 per cent.

Imports of the investigated fibreboards has increased considerably in 1985 and 1986. Poland is the most important exporting country. Import competition has caused the domestic producer a reduction of turnover and the necessity to reduce staff by around 25 per cent and temporarily to lay off approximately 50 per cent of the staff. The price level in Finland has been reduced by import competition and the domestic producer has encountered problems in selling his production.

On 26th June 1987 Paged Foreign Trade Enterprise has given the Ministry of Finance a price undertaking which the Ministry has estimated to be sufficient to eliminate material injury to the domestic producer and to create sound price competition on the Finnish market. The undertaking prices are not higher than the normal value of the respective qualities of fibreboards.
The Ministry of Finance has terminated the anti-dumping investigation without imposing an anti-dumping duty on the fibreboards imported from Poland.
