1. At its May 1980 meeting the Committee agreed that Parties who used questionnaires in anti-dumping investigations should submit them to the Committee for information (ADP/M/2 paragraph 30).

2. The secretariat has received copies of questionnaires used by Revenue Canada for the information of the Committee. Given the length of the questionnaires they will not be circulated at this time but they are available in English and French for inspection by interested delegations.*

It should be noted that these questionnaires constitute a master model containing all the questions which would be asked. In any particular investigation Revenue Canada draw on these to tailor a questionnaire directly applicable to the nature of the product and the economic and account procedures in the country of export. As a result, the actual questionnaire used in any one investigation may be much simpler than these master questionnaires might suggest.

*Interested delegations are requested to contact Miss S. Aspinall, Office 1063, Tel. Ext. 2153.
