1. In the case referred to by Romania, a number of exporters had offered undertakings to the effect that the quantity of their future exports of urea to the community would be limited. After examination to which extent such a solution would eliminate the injury resulting from the dumping which had been practised by these exporters, the Community accepted most of the undertakings offered and consequently terminated the investigation in these cases.

This is in conformity with Article 7 of the GATT Anti-Dumping Code. The Community does not agree with Romania that this article only refers to price undertakings.

2. The measures temporarily taken by France with regard to urea imported from Romania are taken in pursuance of the Protocol for the Accession of Romania to the GATT. These measures, limited to one single member State, do not prevent possible anti-dumping action being taken by the Community.
