The following communication, dated 27 November 1984, has been received from the Permanent Mission of Canada and should be added to the annex to document DPC/P/30.

Further to the decision of the Committee of the Protocol Regarding Certain Milk Powders (DPC/P/30) of 25 September 1984, I would be grateful if you could inform the participants to the Protocol Committee of the following:

Canada maintains its status as an observer to the International Dairy Council and its Protocol Committees and, as such, has neither rights nor obligations under the International Dairy Arrangement and its Protocols. In order to assist the Council and its Protocol Committees to review the international situation, Canada undertakes to inform the Committee of the Protocol Regarding Certain Milk Powders of any changes in Canadian processes and control methods, and the modalities of their application, for the denaturing of milk powders sold for export. This undertaking does not alter in any way Canada's status vis-à-vis the Arrangement and its Protocols.
